A list of the expected graduates for the Fall 2020-2021 semester was circulated via email before the meeting. Acting Dean Bou Jaoude recommended awarding degrees to the indicated students in the Faculty of Arts and Sciences (FAS). **A motion was made to award degrees to the candidates in FAS. Vote 2020-28. The motion was approved unanimously.** Interim Dean G. Zaatari recommended awarding degrees to the indicated students in the Faculty of Medicine (FM). **A motion was made to award degrees to the candidates in FM. Vote 2020-29. The motion was approved unanimously.** Interim Dean Farhoud recommended awarding degrees to the indicated students in the Rafic Hariri School of Nursing. **A motion was made to award degrees to the candidates in** Rafic Hariri School of Nursing**. Vote 2020-29. The motion was approved unanimously.** Dean Shihadeh recommended awarding degrees to the indicated students in the Maroun Semaan Faculty of Engineering and Architecture (MSFEA). **A motion was made to award degrees to the candidates in MSFEA. Vote 2020-30. The motion was approved unanimously.** Dean Mohtar, recommended awarding degrees to the indicated students in the Faculty of Agricultural and Food Sciences (FAFS). **A motion was made to award degrees to the candidates in FAFS. Vote 2020-31. The motion was approved unanimously.** Interim Dean Sibai recommended awarding degrees to the indicated students in the Faculty of Health Sciences (FHS). **A motion was made to award degrees to the candidates in FHS. Vote 2020-32. The motion was approved unanimously.** Interim Dean Sidani recommended awarding degrees to the indicated students in the Olayan School of Business (OSB). **A motion was made to award degrees to the candidates in OSB. Vote 2020-33. The motion was approved unanimously.**

3) Approval of amendments to the USFC bylaws
Dean Nezameddin presented the proposed amendments to the USFC bylaws. The changes pertain to article 3 of the USFC bylaws pertaining to the composition. The amendments are made to recognize the HSON as an independent school. **A motion was made to approve the proposed amendments to the USFC bylaws. Vote 2020-34. The motion was approved unanimously.**

4) Discussion of the "Report of the UCSA Committee on Academic Integrity and Cheating at AUB
Prof. Knio presented the findings of the UCSA committee on Academic Integrity and Cheating at AUB. Knio started by stating the mandate of the committee. She then discussed the problems associated with contract cheating and plagiarism. Current accountability measures were highlighted, and the

Consequences of cheating and other forms of academic integrity following the Student Code of Conduct were summarized.
Knio then presented a six-step plan of action and suggestions to prevent cheating, contract cheating and plagiarism at AUB. The steps are:

1) Educate AUB students by making them aware of their rights and responsibilities and increasing the visibility of student resources on the AUB website and other media platforms.
2) Involve students by having regular discussions with student representatives and societies through general assemblies about ethics and the impact of cheating on the reputation of the student body and the credibility of their diploma if academic integrity is jeopardized.
3) Involve Faculty and encourage them to:
    a. Include separate sections in the course syllabi, in which they clearly state their expectations, class regulations, and academic integrity requirements
    b. Make students sign an honor pledge before their projects/assignments/exams
    c. Build trust and good communications with students, in addition to showing some flexibility
4) Develop a required zero credit plagiarism seminar to educate students
5) A separate and clear section on contract cheating was added to the Student Code of Conduct; in addition, the whole section on Academic Misconduct was revised.
6) Launch campaigns across campus promoting and educating students about academic integrity and AUB values at the beginning of every semester or academic year

One senator commended the efforts of the UCSA but highlighted that there is a need to follow up on all the ongoing contract cheating instances, identify the responsible entities, and punish them to deter other students from cheating in the future. The senator added that the commercialization of the contract cheating process will harm the AUB reputation.
Another senator commented that the recommended flexibility on behalf of the faculty might lead to students taking advantage of the situation and abusing the system.
Other Senators stated that as indicated in the outcome of a small survey prepared by UCSA, many students are aware of the harms of cheating and give clear reasons for their actions. The solution should therefore attempt to treat the root cause of the cheating rather than increase awareness.
A senator recommended that students caught for cheating should not be allowed to fill the ICE at the end of the semester. They might intentionally give the faculty member who caught them cheating low scores.

5) Update on the post tenure review policy and procedure

Associate Provost, Dawy, presented the post tenure review policy and procedure. He emphasized that the purpose of the presentation is to update the Senate on the status of the policy and solicit feedback only. There will be no voting on the policy at this stage. Dawy stated that the post tenure review policy is one of the required tenure related policies as per the 2017 TDC report.
The policy states that the Post Tenure Review (PTR) is conducted every five years for the purpose of continued professional development of tenured faculty members and to ensure that faculty members are meeting their responsibilities to the university. The review will form a basis for merit raises, honors, resource allocation, teaching and service loads.
The procedure for the post tenure review is as follows:

1. Tenured faculty member submits CV and personal statements on research, teaching and service (after five years – evaluation takes place during sixth year post tenure)
2. Post Tenure Review Committee: The dean, in consultation with the department chair, should appoint a Post Tenure Review Committee (PTRC) consisting of at least three (3) tenured faculty members of equal or higher rank than that of the faculty member subject to review. In their report, the PTRC shall assess the faculty member's research, teaching and service. The review process should take into consideration transitions in the faculty member's

workload responsibilities over career stages. The PTRC report should conclude with one of the following recommended outcomes: demonstrates a sustained trajectory or does not demonstrate sustained trajectory:

3. Department Chair: If the department chair is tenured with equal or higher rank than that of the faculty member, then she/he should write a letter consisting of a candid review of the faculty member's trajectory including research or creative work in the arts and contributions to teaching and service in the department. In the letter, the chair should either endorse the PTRC's conclusion or provide additional evidence/justification if recommending a different conclusion. The chair then adds the letter to the faculty member's dossier and submits the full dossier to the dean.

   If the department chair is non-tenured or of lower rank than that of the faculty member, she/he should write a letter on contributions to research, teaching and service in the department, without making any concluding recommendation on the outcome of the review and without having access to the PTRC report.

   A senator commented that this would create a two class system – tenured versus non tenured faculty members. The senator suggested that the professorial rank and years in rank of the chairperson should be considered in lieu of his/her tenure status.
4. Faculty Advisory Committee (FAC): The dean should subsequently convene the FAC to vote on the PTR conclusion ("Demonstrates a sustained trajectory" or "Does not demonstrate a sustained trajectory"). Senators commented that the FAC should not consist of tenured professors only to avoid creating a two tier faculty system.
5. Dean: The dean reviews the dossier including the PTRC report, the department chair's letter, and the minutes of the FAC meeting, and writes a summary letter on the PTR with any additional evidence/justification. The dean's letter should conclude with a recommendation statement whether the outcome is "Demonstrates a sustained trajectory" or "Does not demonstrate a sustained trajectory".
6. Provost: The provost should review the dossier of the faculty member and make a final decision on the outcome of the review, and inform the president and the dean. For cases where the recommendation/voting on the outcome is not consistent across the different levels, the provost may seek formal documented advice from external experts. If the provost's decision is not consistent with the dean's recommendation, then the provost should provide written justification. Senators commented that seeking external expert's opinion might be too late at this stage of the evaluation process.

If the final evaluation outcome is that the candidate "Does not demonstrate a sustained trajectory", the faculty member should develop a Development Action Plan (DAP) in consultation with the dean. A negative outcome will trigger a post tenure review during the third year post the original review. The triggered review will have one of two outcomes: meets or does not meet expectations. If the outcome of the triggered review process is "does not meet expectations", then appropriate measures will be taken. Possible measures may include: Reassignment of workload duties; participation in mandated professional development programs; set up of a second triggered review process; reallocation of resources including activities such as research funding, sabbatical leaves, external consulting, etc. In the event where a faculty member fails to adequately address the major concerns on performance based on the DAP, a process for termination may be initiated with proceedings following the Policy and Procedures for the Termination of a Tenure Appointment.

SCFA chairperson, H. Darwish, stated that SCFA reviewed the policy, solicited feedback from faculty members and presented their comments in a meeting with the Provost. Most of the concerns raised by SCFA were incorporated in the version of the Policy presented to the Senate.

A senator suggested that the PTR policy will subject tenured faculty members to shorter review periods than non-tenured full professors whose contract are renewed every 7 years. Associate

Provost, Dawy, stated that the files of both tenured faculty members and non-tenured professors will be subject to a full review during the 6th year after tenure appointment or contract renewal respectively. Another senator commented that the PTR involves more review layers than those required for an associate professor or full professor applying to tenure only. Dawy explained that while the tenure only applications apply for the transitional stage only, the PTR is continuing process that should involve as many constituents as possible for normalizing the evaluation process.
A senator questioned the necessity of the PTR in the absence of an approved tenure appointment letter. Another senator questioned the need for annual reviews for tenured faculty members. Dawy explained that the tenure appointment letter is a mere contractual issue that does not define tenure, and that annual reviews are important as they are often used to trigger merit salary increases.

6) Update on Spring 2021 enrollment

Vice Provost and Registrar, B. Tucker, presented the student enrollment numbers for the Spring 2020-21 semester. The number of students this semester remained almost the same as the Fall 2020-21 semester. While the total number of students at AUB was 9,019 in the Spring 2019-20 semester, the current number of students is 8,285. To date, around 87% of the students paid their tuition fees for this semester as compared to 90% (during the same time frame) for the Spring 2019-20 semester. The cutoff date for payment of fees is March 3, 2021. Tucker concluded that the numbers for the Spring semester are somewhat encouraging and indicate that the enrollment figures were not significantly affected by the change in the USD exchange rate.
A senator brought up the issue of the students who paid their tuition fees at the 1500LBP/$ exchange rate at the Notary public and the law cases raised by the students in the Lebanese courts. Provost Choueiri stated that no formal ruling in the cases has been reached, AUB is following up on the situation and will wait for the official decisions to act on them.

7) Salaries of full time professorial rank faculty members for academic year 2021-2022

President Khuri gave an update on the salaries for academic year 2021-2022. The President stated that the administration is working on a multi-year plan for financial support packages that will include both faculty and staff members of AUB. There is no one size fits all solution, but AUB is planning for a broad support package; the details of which are not ironed out yet. The final budget for the upcoming year will be approved by the BOT in the June 2021 meeting. BOT discussions on salary increases/ support packages will probably commence in the March 2021 meeting. The input of SCFA, faculty representatives, and various University constituents will be solicited in April 2021.
A senator asked whether the AUB administration wants to take a look at the Faculty United proposal for support packages. President Khuri said that this is a faculty affair, and SCFA is the right channel if Faculty United wants to share their proposal.

8) Other business

FM senator Ali Abu-Alfa read a statement about the COVID-19 vaccination campaign at AUBMC (see appendix). **A motion was made to adopt the statement as a Senate statement and include in the records.**
Some senators claimed the no motions can be made under other business as this constitutes a violation to Robert's Rule. Others argued that since the Senate is not voting on policy changes, this does not constitute a violation of the rules. Moreover, there is precedent to such occurrence in past Senate meetings.
A substitute motion was made to delay action on this vote until the next Senate meeting to give the Senators time to review the statement and provide comments. The motion did not pass. Vote 2020-35 (4-26-0).
The original motion was voted on. The motion passed. Vote 2020-36 (28-0-2).
Interim FM Dean, Zaatari, thanked the Senate for supporting AUBMC in its vaccination campaign, and he said that AUBMC is working on a plan to vaccinate all AUB citizens.

President Khuri added that to-date less than 700,000 people registered to take the vaccine in Lebanon. This is a relatively small number. He urges senators to not play anything but a positive role in this uphill battle for the country. AUB citizens should support AUBMC's efforts in vaccinating as many people as possible.

A senator inquired whether AUB is considering getting vaccines for its faculty and staff members. President Khuri stated that no major pharmaceutical company is allowing vaccine sales for individual entities. However, there is a possibility for Universities to buy vaccines in bulk as long as they do not charge people for vaccination. AUB is waiting on this until the vaccination process run by MoPH is smoothly functioning not to undermine the MoPH efforts at this stage. Moreover, there is a legal aspect to this, as AUB will have to assume liability if they purchase the vaccines directly from source without coordinating with the MoPH.

The meeting was adjourned at 4:50 pm.

(Minutes recorded by G. Saad, Secretary of the Senate)

Appendix

Statement about COVID-19 vaccination campaign at AUBMC

The AUB senate recognizes the now one-year-old formidable, responsible, progressive, and increasingly complex response of AUB and AUBMC to the COVID-19 pandemic, culminating most recently with the vaccination campaign.

This response needed leadership, tremendous efforts, high level coordination and above all much sacrifice by all the healthcare team members and especially frontline staff at AUBMC. They have been providing first-rate, up-to-date medical care to COVID-19 patients, while continuing usual day-to-day activities tending to all patients.

The high death rate among patients and happening mostly in imposed physical isolation, has devastated families loosing loved ones, and caused much stress and anguish among the healthcare providers witnessing the brutality of COVID-19 while having to deal with their own risks, fears, and concerns. This is all happening amidst other major crisis around us but nothing has deterred AUBMC and its people from stepping up to the call and duty. For that, the AUB Senate salute them and AUBMC.

Vaccination is undoubtedly changing the course of pandemic but is also opening a discourse on prioritization and safety. The public has been generally wary of vaccination, with positions mostly fueled by unfounded claims, rumors and unscientific statements by scientists and non-scientists alike. AUB and AUBMC stand as beacons of knowledge and have a moral obligation to provide the latest accurate information to its community and people of Lebanon. AUBMC has fully engaged in the nascent national vaccination campaign, executing to the best of its ability given the imperfections in the Ministry of Public Health vaccination platform, and doing so transparently, efficiently, and safely while complying with national and international guidelines. Any act or word that results in the spread of unsubstantiated facts will only fuel the negative perceptions and detract from trust in AUB/AUBMC as institution at a time such trust is critical for literally surviving this pandemic on all fronts. The University senate pleads for a high level of responsibility from each member of the AUB faculty and community to highlight AUB and AUBMC efforts, to acknowledge the sacrifices and devotions and to only share validated information. AUBMC remains committed to implement needed actions whenever deemed necessary to continue providing and improving services. It needs all of AUB to succeed in its mission serving all.

February 26th, 2021

Exhibit I.16: HSON recruitment material

Rafic Hariri School of Nursing
at AUB offers a

Blended Master's Program in Nursing Administration and Management

The courses include in-class and online sessions

Regular classes at beginning and end of semesters (**5 days** for part-timers, **10 days** for full-timers, intensive format); online sessions in between.

37 credits can be completed in **4 semesters** (full time) or **6 semesters** (part time)

ENTRY QUALIFICATIONS

1. Meeting all the university admission requirements for graduate studies.
2. Having a BSN degree or its equivalent from an accredited/ recognized institution.
3. Having a GPA of at least 2.7, with an undergraduate GPA of at least 3.2 in nursing major courses.
4. Satisfactory scores on the English Entrance Exam (EEE) or Test of English as a Foreign Language (TOEFL), as per AUB requirements for graduate studies.
5. License to practice nursing from country of residence.
6. Two years of work experience in nursing

Are you a nurse ready to **advance** your career?

Are you looking for a flexible, **blended** (partly online), **CCNE-accredited program** to prepare you for **leadership and management** positions in nursing?

American University of Beirut

Rafic Hariri School of Nursing

Pioneering Achievements and Global Vision

The baccalaureate and master's programs at the American University of Beirut – Rafic Hariri School of Nursing are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington DC 20036, (202)887-6791.

The school is also a full member of the American Association of Colleges of Nursing.

American University of Beirut

Hariri School of Nursing

Founded in 1905 as the first nursing school in the Middle East, the Rafic Hariri School of Nursing at the American University of Beirut is redefining nursing education and practice in the region. The school has strong undergraduate and graduate academic programs and a brand new facility equipped with advanced technology that enables students to participate in real-life clinical interactions. There is also a strong commitment to nursing research and continuing education. The Hariri School of Nursing is internationally recognized for excellence in education, research, and service. The school is committed to developing leaders in nursing with the skills and knowledge they need to respond to the priorities of the region in a wide range of health care settings.

Our Mission

Our mission is to promote and maintain the highest educational standards of excellence, integrity, and professionalism in nursing following the American model of nursing education and practice. The Hariri School of Nursing provides learning opportunities that enable students to become qualified nurses who meet the highest ethical standards, respect cultural diversity, and deliver compassionate nursing care. We promote an interactive learning environment in which students are encouraged and supported to take responsibility for their education.

The School's Bachelor of Science in Nursing (BSN) and Master of Science in Nursing (MSN) programs were granted unconditional accreditation in 2007 and re-accreditation in 2012 by the Commission on Collegiate Nursing Education (CCNE) in the United States.

The school is also a full member of the American Association of Colleges of Nursing, ranking among the top nursing schools in the United States.

Established in 1905

Our Academic Programs

Accredited by CCNE in 2007

Undergraduate Programs

Our BSN program combines an undergraduate liberal arts education with professional nursing training in both academic and clinical settings. The undergraduate program focuses on theory and research as the basis for practice to prepare nurses to become generalists who are able to provide humanistic care to a culturally diverse clientele in various health care settings. Our students are able to take elective courses at other AUB faculties and gain clinical experience in hospitals and community agencies.

Current Undergraduate Programs:

- **Bachelor of Science in Nursing (BSN)**
- **Registered Nurse-Bachelor of Science in Nursing (RN-BSN)**
- **Bachelor of Arts/Bachelor of Science-Bachelor of Science in Nursing (BA/BS-BSN, Second degree, accelerated program)**

Graduate Programs

The MSN program prepares nurses for advanced nursing practice roles and uses research-based knowledge to guide practice. In addition to training advanced practice nurses for clinical, management, and administration positions, the graduate program also offers students the opportunity to work with faculty on research projects on a wide range of topics.

MSN students can specialize in one of four areas:

- **Adult Gerontology Clinical Nurse Specialist**
- **Psychiatric Mental Health Clinical Nurse Specialist**
- **Nursing Administration and Management**
- **Community and Public Health Nursing**

Scholarships and financial aid
are available

Our Students

We are very proud of the students that we attract to our programs. They come from many different backgrounds and – especially in recent years – in increasing numbers and from many countries. It is one of our highest priorities to enhance the diversity of our student body and to build our financial aid program. Therefore, we can offer an increasing number of young men and women the opportunity to train for careers in nursing at AUB. Many nursing students at AUB receive financial assistance.

Our students are heavily recruited when they graduate and live and work in Lebanon, the Gulf, the United States, Canada, Australia, Europe, and Latin America. They work in hospitals and ministries of health; in schools and universities; at insurance and pharmaceutical companies and in NGOs and community-based organizations. The School of Nursing is particularly proud of its extraordinary graduates who have excelled in practice, teaching, and research for more than 100 years to date.

Our graduates are highly desired and
heavily recruited

Partnerships with US universities

Our Faculty

We have recruited a number of academicians in recent years who have enriched our faculty and broadened our expertise. These men and women joined a diverse and well-rounded faculty of professionals who have extensive nursing experience and active research agendas. Most faculty members hold PhD degrees, others are enrolled in PhD programs in the United States and Europe.

Our Research Programs

We believe that our students enjoy a richer educational experience when they are taught by faculty who are involved in research. This involvement increases the knowledge base of nursing and informs practice in nursing and health care. We are committed to providing our faculty – and our students – with the facilities and research support they require being productive and contributing academics.

The Hariri School of Nursing plans to create a Center for Nursing Research that will oversee faculty and student research and establish partnerships at AUB, in the region, and internationally.

Rafic Hariri School of Nursing

American University of Beirut

Rafic Hariri School of Nursing

Adult-Gerontology Clinical Nurse Specialist

The Adult-Gerontology Clinical Nurse Specialist Track is designed to meet the health challenges of the 21st century in Lebanon and the region. It provides students with a thorough understanding of the theoretical basis of advanced clinical practice and incorporates role development managerial and educational skills.

The graduate is expected to be an expert clinician, an informed educator, and a knowledgeable researcher.

Pioneering Achievements and Global Vision

Objectives

The program provides learning opportunities to enable students to become skilled clinical nurse specialists who can provide advanced high quality nursing care in acute and chronic adult care specialty areas. Our advanced practice nurses are ready to promote the profession of nursing through leadership, mentorship, collaborations, and research-based practice.

Structure

Both full-time and part-time students are eligible for this 39-credit program that can be completed in two years if pursued full-time. All students must complete the program requirements within 4 years. Students can choose to do a minor in nursing education; they can also choose to do either a final-year project or a thesis.

Curriculum

Students are required to complete the following Core Courses:

- Nursing Theory
- Advanced Nursing Research
- Foundations of Advanced Nursing Practice
- health service development and evaluation

Specialty-Specific Courses

- Advanced Health Assessment
- Advanced Pathophysiology
- Advanced Pharmacology
- Advanced Practice in Adult-Gerontology I
- Advanced Practice in Adult-Gerontology II
- Advanced Practice in Adult-Gerontology III
- The residency is advanced practice in adult gerontology III

Electives
Project or Thesis

Career Opportunities

The graduate is qualified to work as a clinical nurse specialist in acute and long term care settings, an educator in academic institutions or health care organizations, or a case manager responsible for developing, implementing and monitoring clinical protocols in various health care settings.

Nursing Administration and Management Track

The Nursing Administration and Management Program focuses on the unique issues relevant to nursing administration and management of health care settings. Emphasis is placed on organizational theory, health management and policy, leadership, financial management, performance improvement, and management of human resources.

Pioneering Achievements and Global Vision

Objectives

The program prepares nurses to assume leadership positions in health care. It is designed to enable students to develop their leadership and management skills and to use relevant theory and current approaches to improve the efficiency and effectiveness of health and social care provision.

Structure

Both full-time and part-time students are eligible for this 37-credit program that can be completed in two years if pursued full-time. All students must complete the program requirements within 4 years. Students can choose to do either a final-year project or a thesis.

Curriculum

Students are required to complete the following Core Courses:

- Nursing Theory
- Advanced Nursing Research
- Foundations of Advanced Nursing Practice

Specialty-Specific Courses

- Essentials of Nursing Administration and Management
- Practical Applications of Budgeting in Nursing
- Leadership Theories and Application for Nurse Managers
- Managing Quality with Teams
- Digital tools for Connected Health
- Human Capital Management
- Residency, Advanced Practice in Nursing Administration

Electives
Project or Thesis

Career Opportunities

Graduates will be qualified to assume positions as nurse managers of hospitals and ambulatory care centers and leadership positions in governmental and non-governmental organizations.

1866 AUB American University of Beirut الجامعة الأميركية في بيروت

Rafic Hariri School of Nursing

American University of Beirut

Rafic Hariri School of Nursing

Psychiatric Mental Health Clinical Nurse Specialist Track

The Psychiatric Mental Health Clinical Nurse Specialist track is designed to train expert clinicians for positions in the rapidly changing field of psychiatric and mental health nursing and to fill teaching and clinical positions in health care in Lebanon and the region. The scarcity of resources in this field intensifies the need for nurses who can provide comprehensive patient-centered mental health care to individuals, groups, and families.

Pioneering Achievements and Global Vision

Objectives

The program prepares advanced practice nurses to be mental health care providers for individuals and families in a variety of settings. In addition to the study and application of theories of practice, the program focuses on the promotion and maintenance of health and on the prevention, detection, and treatment of acute and chronic mental illnesses to help patients achieve the highest possible level of well-being.

Structure

Both full-time and part-time students are eligible for this 40-credit program that can be completed in two years if pursued full-time. All students must complete the program requirements within 4 years. Students can choose to do a minor in nursing education; they can also choose to do either a final-year project or a thesis.

Curriculum

Students are required to complete the following courses:

- Nursing Theory
- Advanced Nursing Research
- Foundations of Advanced Nursing Practice

Specialty-Specific Courses

- Advanced Psychiatric and Mental Health Assessment
- Advanced Pharmacology and Therapeutics
- Advanced Pathophysiology
- Advanced Health Assessment for Mental Health Professionals
- Psychopathology and Human Behavior
- Models of Treatment - Psychotherapy (Bio-behavioral Nursing Interventions)
- Group and Family Psychotherapy
- Clinical Residency in Acute Psychiatric Care

Electives
Project or Thesis

Career Opportunities

Registered nurses will be prepared to provide psychiatric and mental health services to individuals and families in different settings; inpatient psychiatry, emergency psychiatry, outpatient mental health services, and psychiatric consult-liaison services.

Rafic Hariri School of Nursing

American University of Beirut

Rafic Hariri School of Nursing

Community and Public Health Nursing Track

The Community and Public Health Nursing Program is designed to meet the primary health care challenges of the 21st century in Lebanon and the region. It prepares nurses to assume leadership positions in community health and equips them with the advanced knowledge and skills they need to provide care to individuals and communities. It incorporates elements of health education, program development, research, administration, and public policy.

Pioneering Achievements and Global Vision

Objectives

The program prepares advanced practice nurses as primary health care providers for individuals and families in a variety of settings. It includes the study and application of theories and the development of practices focusing on the promotion and maintenance of health and on the detection and treatment of acute and chronic illness. The goal is to help individuals and communities to achieve the highest possible level of well-being.

Structure

Both full-time and part-time students are eligible for this 40-credit program that can be completed in two years if pursued full-time. All students must complete the program requirements within 4 years. Students can choose to do a minor in nursing education; they can also choose to do either a final-year project or a thesis.

Curriculum

Students are required to complete the following courses:

- Nursing Theory
- Advanced Nursing Research
- Foundations of Advanced Nursing Practice

Specialty-Specific Courses

- Advanced Health Assessment
- Advanced Pathophysiology
- Advanced Pharmacology
- Principles and Practice of Community Health Nursing
- Advanced Community Assessment
- Residency, Community Health Care
- Principles of Epidemiology for Health Professionals
- Principles and Practice of Community Health Nursing

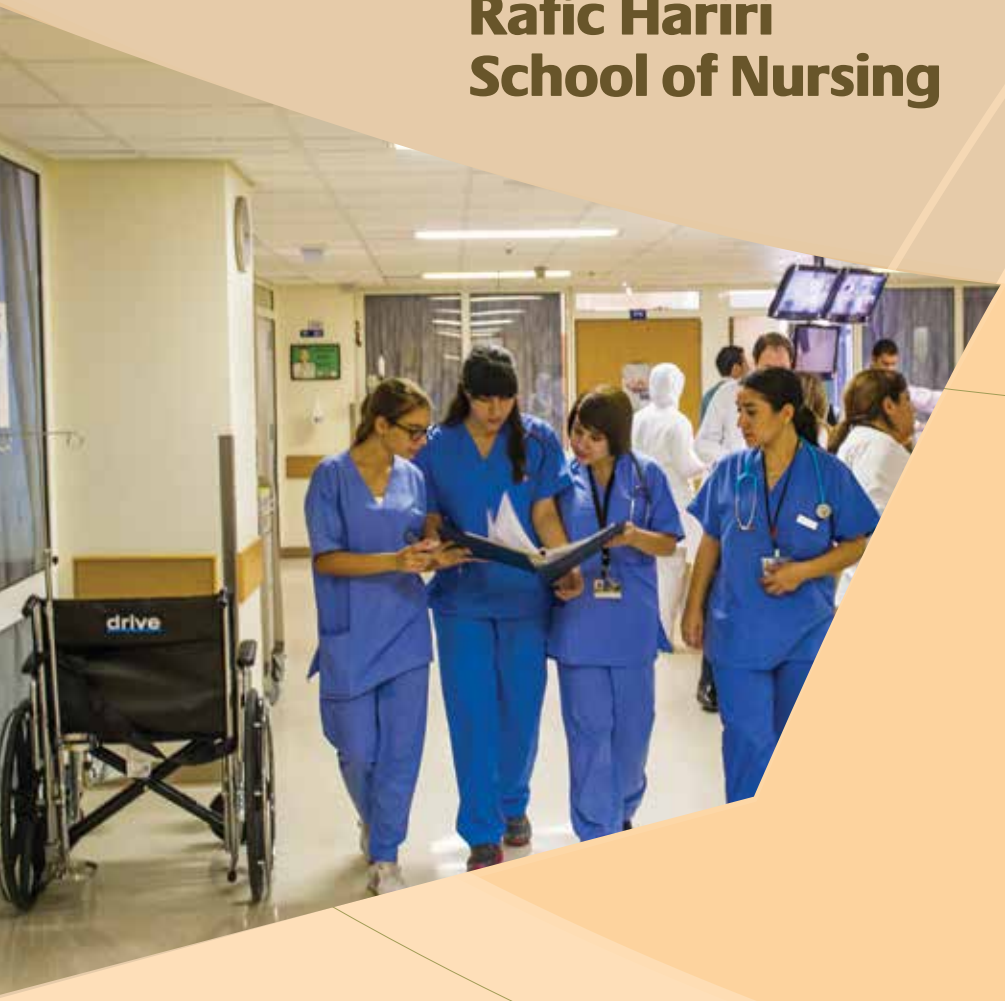
Electives
Project or Thesis

Career Opportunities

Graduates will be qualified to work in community health care settings, schools, public health departments, and a variety of for-profit and not-for-profit public and private agencies at the local, national, and international levels.

American University of Beirut

Rafic Hariri School of Nursing



Bachelor of Science in Nursing (BSN)

The BSN program is registered by the Department of Education of New York State and accredited by the Commission on Collegiate Nursing Education in the United States. Applicants with a recognized secondary school diploma are eligible for this program that focuses on theory and research as the basis for practice.

Pioneering Achievements and Global Vision

Objectives

The program prepares generalists to provide high quality humanistic care to a multicultural clientele in various health care settings.

Admission Requirements

- Students admitted with the Lebanese Baccalaureate or equivalent who enter as sophomores are required to complete 103 credit hours over a period of three academic years and two summer sessions.
- Students admitted with other secondary school certificates who enter as freshman are required to complete 133 credit hours over a period of four academic years and two summer sessions.

Curriculum

The program combines a liberal arts education with professional nursing education in both academic and clinical settings. Students take courses at the Hariri School of Nursing and other AUB faculties. Clinical experience is provided in hospitals and community settings in cooperation with various health care agencies.

Students take courses in English and Arabic, the humanities, economics and social sciences, basic medical sciences, and nursing. Nursing courses include classroom teaching and clinical training in health-care settings. Students are required to take four electives and can choose from a wide selection of courses in humanities such as ethics, poetry, philosophy, politics etc.

American University of Beirut

Rafic Hariri School of Nursing

Registered Nurse–Bachelor of Science in Nursing (RN-BSN)

The RN-BSN bridging program is registered by the Department of Education of New York State and accredited by the Commission on Collegiate Nursing Education (CCNE) in the United States. It provides graduates of technical programs in nursing with the opportunity to earn a Bachelor of Science in Nursing degree. The program focuses on theory and research as the basis for practice.

Pioneering Achievements and Global Vision

Objectives

The program prepares generalists to provide high quality humanistic care to a multicultural clientele in various health care settings.

Admission Requirements

- Three years of work experience preferred
- English Entrance Exam
- Candidate may be asked to interview with the school director and/or program coordinator

Curriculum

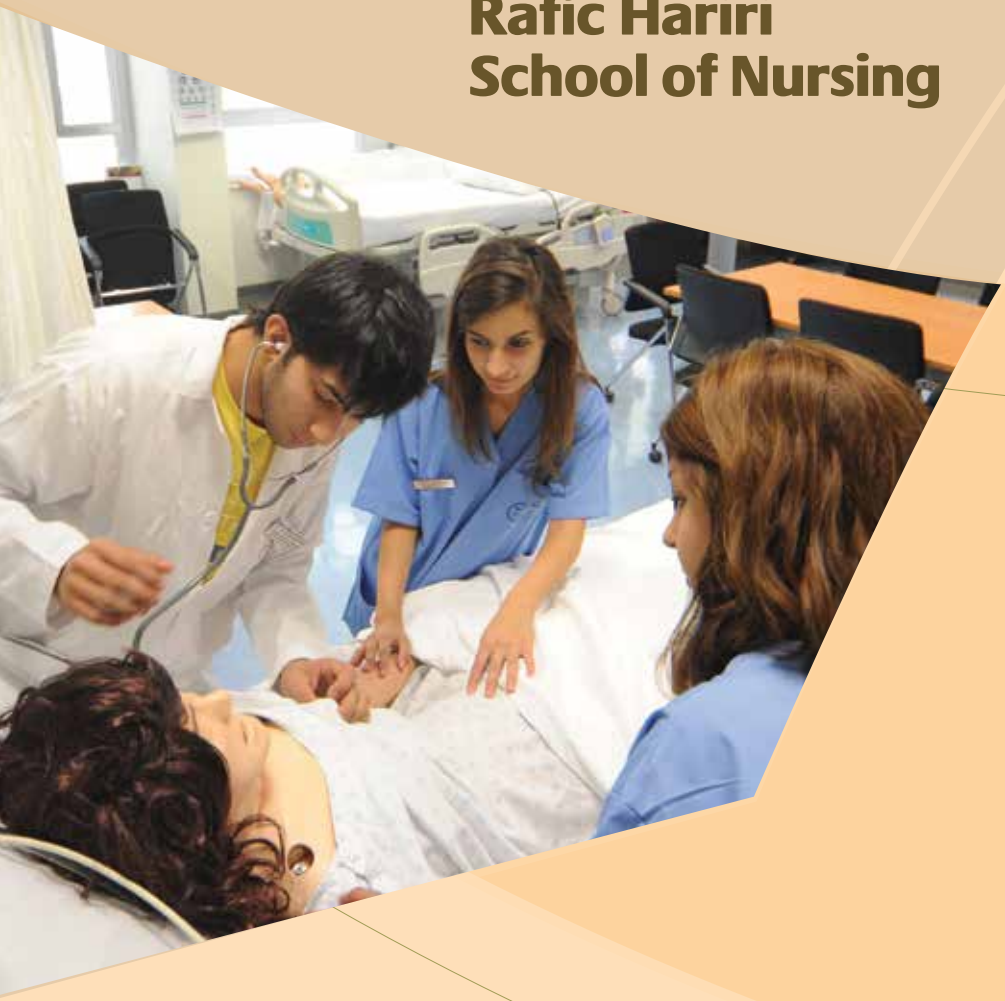
The 90-credit curriculum can be completed in two and a half years on a full-time basis. All students are expected to complete the program within six years. A selected number of nursing courses may be validated if applicable.

The program combines a liberal arts education with professional nursing education in both academic and clinical settings. Students take courses at the Hariri School of Nursing and other AUB faculties. Clinical experience is provided in hospitals and community settings and is usually tailored according to the student's background.

Students take courses in English and Arabic, the humanities, economics and social sciences, basic medical sciences, and nursing. Nursing courses include classroom teaching and clinical training in health-care settings. Students are required to take four electives and can choose from a wide selection of courses such as education, nutrition, psychology, languages, ethics, etc.

American University of Beirut

Rafic Hariri School of Nursing



Bachelor of Arts/Bachelor of Science-Bachelor of Science in Nursing (BA/BS-BSN)

The BA/BS-BSN program is registered by the Department of Education of New York State and accredited by the Commission on Collegiate Nursing Education (CCNE) in the United States. This program is open for students who have a BS or BA degree and are interested in earning a second undergraduate degree in nursing.

Pioneering Achievements and Global Vision

Objectives

The program prepares generalists to provide humanistic care to a multicultural clientele in various health care settings.

Structure

- Students must take prerequisites and all nursing courses to satisfy the requirements of the BSN degree.
- Students must be resident at AUB for a minimum of four semesters.
- Students are evaluated individually and their curriculum planned accordingly.

Curriculum

This accelerated program is designed for individuals who have a BS or BA in a field other than nursing. The streamlined curriculum permits students to earn a BSN in 24 months. Students who graduate from this program are eligible to sit for the Lebanese National Colloquium Exam to qualify to become registered nurses.

Why Study Nursing at AUB?

- The baccalaureate and master's programs at the American University of Beirut – Rafic Hariri School of Nursing are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington DC 20036, (202)887-6791.
- Benchmarked against leading MSN programs in the United States
- Cutting-edge curriculum
- Highly credentialed PhD-prepared faculty
- Rich and varied programs
- Strong international links to leading US and European universities
- Partnerships with Johns Hopkins University, University of Maryland, University of Technology of Sydney and University of Michigan Schools of Nursing.

Career Opportunities

The Rafic Hariri School of Nursing has graduated thousands of men and women who currently occupy leadership positions in nursing in Lebanon, the region, and internationally. AUB graduates are heavily recruited as Managers in hospitals, Directors of nursing, health care organizations, insurance companies, pharmaceutical companies, and non-governmental organizations (World Health Organization, UN agencies, etc.); as clinicians in specialized hospital units; and as educators in schools of nursing. AUB is proud of its graduates who have excelled in practice, teaching, and research.

American University of Beirut

Rafic Hariri School of Nursing

Founded in 1905 as the first nursing school in the Middle East, the Rafic Hariri School of Nursing at the American University of Beirut is redefining nursing education and practice in the region. The Hariri School of Nursing is internationally recognized for excellence in education, research, and service. The school is committed to developing leaders in nursing with the skills and knowledge they need to respond to the priorities of the region in a wide range of health care settings.

CCNE ACCREDITED

Graduate Program

Pioneering Achievements and Global Vision

American University of Beirut

Graduate Program

Master of Science in Nursing (MSN)

The MSN program prepares nurses for advanced nursing practice roles and uses research-based knowledge to guide practice. In addition to training advanced practice nurses for clinical, management, and administration positions, the graduate program also offers students the opportunity to work with faculty on research projects on a wide range of topics.

MSN students can specialize in one of four areas:

» Adult-Gerontology Clinical Nurse Specialist,
with an optional minor in Nursing Education.
» Nursing Administration and Management.
» Psychiatric Mental Health Clinical Nurse Specialist,
with an optional minor in Nursing Education.
» Community and Public Health Nursing,
with an optional minor in Nursing Education

MSN Curriculum (A minimum of 37 credits)

» Core courses (Nursing Theory, Nursing Research, Foundations of Advanced Nursing Practice)
» Specialty-Specific courses
» Electives.
» Residency
» Project or Thesis
Total of minimum of 37 credits to graduate

Length of Program

» Full time: two years
» Part-time: Maximum of four years

Admission Requirements

» AUB admission requirements for graduate studies
» Bachelor of Science in Nursing (BSN)
» Cumulative undergraduate average of at least 80, 3.0, or B in the major field of study (nursing) and a a cumulative undergraduate average of at least 75.
» Evidence of knowledge and competence in physical assessment skills
» AUB's English Entrance Exam (EEE) or Test of English as a foreign Language (TOEFL)
» License to practice nursing from country of residence
» At least one year of work experience in Nursing

Admission Requirements

AUB admission requirements for undergraduate studies.

For the BSN program:

- High School degree or equivalent
- SAT I
- EEE or TOEFL or SAT I (writing)

For the RN-BSN program:

- Nursing diploma (BT, other)
- EEE or TOEFL

Graduation Requirements

- Students admitted with the Lebanese Baccalaureate or equivalent, entering as sophomores, are required to complete 103 credit hours over a period of three academic years and two summer sessions.
- Students admitted with other secondary school certificates, entering as freshmen, are required to complete 133 credit hours over a period of four academic years and two summer sessions.

Financial Aid and Scholarships

- AUB offers financial aid to qualified students on the basis of need and academic excellence.
- Scholarships are available and might cover up to 100% of the tuition fees.
- For more information, contact the Student Services Office at the Hariri School of Nursing at schnsg@aub.edu.lb or by Tel:01-350000- Ext: 5952, or the Office of Financial Aid

Undergraduate Program

American University of Beirut

Undergraduate Program

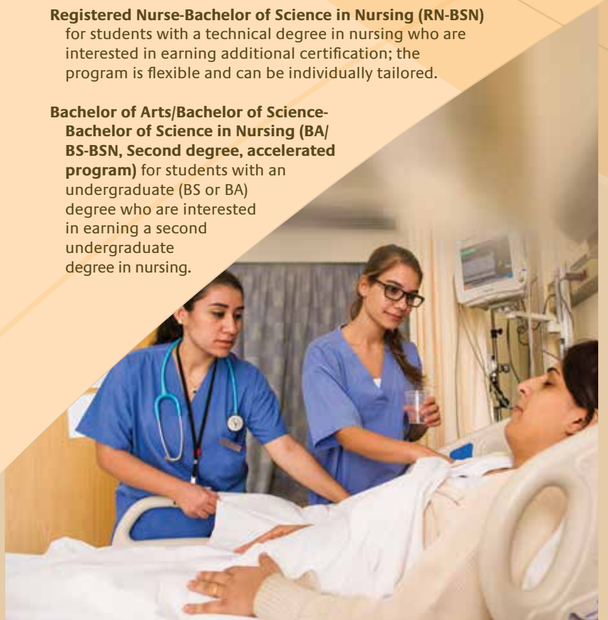
The undergraduate program focuses on theory and research as the basis for practice. It prepares skilled generalists who are able to provide high-quality, compassionate care to a multicultural clientele in various health care settings. The emphasis in the undergraduate programs is on nurturing personal attributes among students such as responsibility, maturity, cooperation, self reliance, and leadership skills.

You can choose from among three undergraduate programs depending on your interests, career goals, and previous nursing experience. All undergraduate programs are registered by the Department of Education of New York State and accredited by the Commission on Collegiate Nursing Education (CCNE) in the United States.

Bachelor of Science in Nursing (BSN) for students with a recognized secondary school diploma (high school, BacI, BacII) interested in doing an undergraduate degree in nursing; the program can be completed in three years if pursued full-time.

Registered Nurse-Bachelor of Science in Nursing (RN-BSN) for students with a technical degree in nursing who are interested in earning additional certification; the program is flexible and can be individually tailored.

Bachelor of Arts/Bachelor of Science-Bachelor of Science in Nursing (BA/BS-BSN, Second degree, accelerated program) for students with an undergraduate (BS or BA) degree who are interested in earning a second undergraduate degree in nursing.



AMERICAN UNIVERSITY OF BEIRUT
RAFIC HARIRI SCHOOL OF NURSING

will be launching

A PhD PROGRAM IN NURSING SCIENCE

Academic year 2018–19

Aim

To prepare students for careers in academic research, teaching, and healthcare administration.

Areas of Focus

1) Physical and mental health, especially among the chronically ill and aging populations
2) Health care delivery and system-level analysis

Collaboration

The PhD program will be in collaboration with Johns Hopkins University, the University of Michigan–and with the Faculty of Medicine and Faculty of Health Sciences at AUB.

Curriculum

- Minimum of 48 credits beyond the master's degree:
  - » 20 credits core courses
  - » 6 credits electives
  - » 22 credits dissertation work

Admission Requirements

1) Master's degree in Nursing Science
2) GRE
3) TOEFL or EEE
4) Three letters of recommendation
5) Statement of purpose (~500 words) specifying area of research interest
6) Interview by PhD program faculty

Policy on the Development and Revision of Bylaws, Policies, Procedures, and Manuals

[Policy Statement](#)
[Purpose](#)
[Scope](#)
[Who Should Read this Policy](#)
[Responsibilities](#)
[Procedures](#)
[Definitions](#)
[Forms/Tools](#)
[Related Policy Documents](#)
[Other Information](#)
[Policy History and Review](#)
[Appendix I: AUB Policy Approval Hierarchy](#)
[Appendix I. a. Additional Policies for Senate Recommendation](#)
[Appendix II: Policy and Procedures Review Committee Charge](#)

Policy Statement

The American University of Beirut ("University") shall conduct university affairs through policies consistent with applicable laws, its Principles of Ethical Conduct, and accepted best practices. The process of policy management and development must meet university standards for legal compliance, consistency among policies, and accessibility to the university community.

"Each faculty, within policies established by the Board of Trustees, the president of the University, and the Senate, shall be the academic legislative body of its respective school or group of schools," (Corporate Bylaws, Article X, Section 1). "The Board of Deans shall constitute the academic executive body of the University and shall exercise responsibility for implementing the policies developed by the senate, the various faculties, or other sources affecting the operation of the faculties." (Corporate Bylaws, Article IX, Section 2).

The president is ultimately responsible for university policies.

University-wide policies will be:

- Developed through inclusive review by key stakeholders.
- Formally approved as specified in the AUB Policy Approval Hierarchy (Appendix I).
- Presented in a standardized format.
- Systematically communicated, published, and archived.
- Monitored for implementation and compliance.
- Comprehensively reviewed at least every 3 years to determine whether the policy objectives are being achieved.

Executive Sponsors and Policy Owners are responsible for achieving compliance with the above for policy documents within their jurisdiction. Policy Owners are responsible for oversight of policy implementation for policy documents within their jurisdiction, including:

- Specifying the unit/office(s) responsible for implementation.
- Ensuring that tools (forms, etc.) are developed to support policy implementation and facilitate compliance as applicable.
- Ensuring that an appropriate communications strategy and training plan (if needed) are undertaken.

- Establishing reporting requirements and periodic monitoring of policy implementation for compliance as applicable.

If a policy document only affects a specific entity (AUBMC, Faculty/School, administrative unit, department, etc.), it is considered a non-university-wide policy. Non-university-wide policies:

- Must be consistent with university-wide policies. University-wide policy will supersede in case of conflict with a non-university-wide policy.
- Must be approved according to the relevant approval hierarchy (as defined by the unit/division/entity), including approval by the appropriate Executive Sponsor.
- Must be accessible to relevant members of the university community (utilization of the policy management software system is optional).

Purpose

The purpose of this policy is to 1) ensure that the AUB community has access to well-developed and understandable university policies that support the university's mission, and 2) define the policy development and management processes.

Scope

University-Wide

Who Should Read this Policy

The university community, in particular:

- Members of the Policies and Procedures Review Committee (PPRC).
- The president, provost, AVP for Administration & Chief of Staff, vice presidents (VPs), deans, directors and department heads, and anyone tasked with participating in the policy development process as an owner, approver, reviewer, or writer.

Responsibilities

Position/Office	Responsibilities
Policies and Procedures Review Committee (PPRC)	PPRC is an advisory committee appointed by the president and comprised of representatives from the major administrative and academic units as well as from AUBMC to support the university mission in policy management and development. (Appendix II: Charge of the Policy and Procedures Review Committee)
Systems and Procedures Analyst (or other as designated by president)	▪ Maintaining the university's online version of policies, procedures, bylaws, manuals, and other policy documents ▪ Ensuring accessibility of policy documents to staff as appropriate ▪ Assisting in the coordination between Policy Owners and the Policies and Procedures Review Committee ▪ Tracking the automatic notification of Policy Owners regarding upcoming policy reviews and response by Policy Owners ▪ Facilitating use of the policy management software system

Procedures

All procedures outlined in this section apply only to university-wide policy documents (with the exception of bylaws; specific processes for amendment are outlined in each bylaws document).

- New Policies and Policy Revisions
  - Initiating the Process
  - Drafting the New/Revised Policy
  - Review
  - Approval
- Minor Amendments and Policy Reclassification
- Policy Revocation
- Policy Publication, Communication, and Archiving
  - Policy Publication
  - Policy Communication
  - Policy Archiving
- Comprehensive Policy Review

New Policies and Policy Revisions

Initiating the Policy Process

1. The need to revise an existing policy or develop a new policy is identified. This is typically done by the relevant Policy Owner. Any member of the university community wishing to propose a new or revised policy should communicate such a request to the appropriate Policy Owner. Advice from PPRC can also be sought. In case of disagreement between members of the university community and the Policy Owner regarding the need for a new or revised policy, the PPRC may play a mediating role and advise the president as necessary.

2. The Policy Owner may identify a Policy Champion for drafting or revising a policy. Otherwise, the Policy Owner shall be the Policy Champion.

3. Policy Owner/Champion submits "Request for New or Revised Policy" to the PPRC (via aubpolicies@aub.edu.lb). It is recommended that this form be submitted and discussed in the PPRC for feedback prior to developing/drafting the proposed new/revised policy. *Note: For simple policy revisions, the Request Form and the draft revised policy may be submitted to the PPRC at the same time.*

4. PPRC reviews the form and provides feedback to the Policy Owner/Champion to ensure consistency with university-wide policies, and to encourage best practices in the policy development/revision process such as benchmarking, inclusive review by key stakeholders, and formal approval as specified in the AUB Policy Approval Hierarchy (Appendix I). The Policy Owner/Champion is typically invited to the PPRC meeting at which the Request Form is discussed.

5. Policy Owner/Champion revises (as needed) and resubmits the Request Form to aubpolicies@aub.edu.lb.

6. The Document Control Administrator (DCA) initiates the policy management software process for the new/revised policy based on the Request Form.

Drafting the New/Revised Policy

7. Policy Owner/Champion will oversee the drafting of the proposed new or revised policy. Policy Owner/Champion will:

    a) Utilize the appropriate template (links to templates provided under "Forms/Tools" in this policy and on the AUB Policies and Procedures Website).

    b) Optionally designate writers and/or editors (could be a committee or working group as appropriate) to assist them in the process.

    c) Conduct preliminary consultations with key policy stakeholders and/or subject-matter experts/specialists as needed.

    d) Undertake benchmarking with international peer universities, and refer to guidance from accrediting bodies or relevant professional associations, etc.

Review

8. Policy Owner/Champion submits draft new/revised policy with the updated "Request for New or Revised Policy" to the PPRC (via aubpolicies@aub.edu.lb) for their review and feedback (refer to Checklist for PPRC Discussion/Review in the request form). The Policy Owner/Champion is typically invited to the PPRC meeting during which the draft new/revised policy is discussed.

9. Policy Owner/Champion will act on PPRC feedback and edit the draft new/revised policy as needed.

10. Policy Owner/Champion then submits the draft new/revised policy for review by all relevant stakeholders and subject-matter experts/specialists as needed. Policy Owners may utilize the AUB policy management software system to facilitate the review process.

    Note:

    - Policies that affect faculty, students, and or the research/education/student services functions of the University, even if the policy is not categorized as academics/research or student life, require consultation with appropriate faculty and/or student representative bodies.

    - For policies that require University Senate recommendation, a comment period of two weeks will be provided during which all faculty members can view a proposed new/revised policy online, and share feedback with their elected Senators' prior to the Senate meeting at which a vote will be taken for the Senate's recommendation on the policy.

    - If a policy may have financial implications, consultation with the Office of Financial Planning is required.

11. Policy Owner/Champion will edit the draft new/revised policy as needed. Policy Owner/Champion shall inform the PPRC and/or stakeholders, and solicit further feedback, as the Policy Owner deems appropriate when integrating feedback and editing the draft new/revised policy.

Approval

12. Policy Owner will submit the final draft new/revised policy for approvals according to the AUB Policy Approval Hierarchy (See Appendix I) utilizing the AUB policy management software system. If edits are required during the approval process, the Policy Owner/Champion shall inform the PPRC and/or stakeholders, and solicit further feedback, as the Policy Owner deems appropriate.

13. Legal review must be coordinated directly with the Office of the President or Office of the Provost. If legal counsel recommends changes to the draft new/revised policy, it will be returned with comments to the Policy Owner/Champion. AUB Legal Matters Policy (May 15, 2012) specifies that legal assistance should be obtained for policy review (Section 3.2.e).

14. The president may approve the proposed policy and forward the policy to the Board of Trustees for approval, when applicable, or ask for substantial revisions of the proposed policy:

    a) If the president asks for substantial changes to the draft new/revised policy, it will be returned with comments to the Policy Owner/Champion.

    b) If the policy is approved by the president and the Board of Trustees (as applicable), the permanent policy link will be published on the University Policies and Procedures webpage and appropriate communication to the university community shall be undertaken (see section "Policy Publication, Communication, and Archiving" below).

Minor Amendments and Policy Reclassification

1. It is the responsibility of Policy Owners to propose minor amendments or the reclassification of a policy document as a non-university-wide policy as needed (See Definitions). No approval is required beyond the Policy Owner for minor amendments or reclassification. The PPRC chairs must validate that the proposed change is a minor amendment or reclassification consistent with the definitions in this policy.

2. The Policy Owner will submit the "Minor Amendment or Reclassification Notification" form to aubpolicies@aub.edu.lb with a cc to the Executive Sponsor of the Policy.

3. The form will then be forwarded to the PPRC chairs for validation, to the full PPRC for information purposes, and to a DCA (Document Control Administrator). Upon validation by the PPRC chairs, the DCA will implement the requested minor amendment(s) in AUB's policy management software system and the updated policy will be published on AUB's Policies and Procedures Website.

Policy Revocation

1. Policy Owner submits "Request for New or Revised Policy" to the PPRC (via aubpolicies@aub.edu.lb) indicating the need to revoke the policy.

2. PPRC reviews the form and provides feedback to the Policy Owner/Champion.

3. Policy Owner/Champion edits the Request Form as needed and resubmits it to aubpolicies@aub.edu.lb. The Document Control Administrator will initiate the policy management software process for the policy revocation based on the Form.

4. Policy Owner/Champion requests approval of the policy revocation according to the AUB Policy Approval Hierarchy (See Appendix I) utilizing the AUB policy management software system.

5. If the policy revocation is approved by the president and the Board of Trustees (as applicable), the policy will be removed from the AUB Policies and Procedures webpage and appropriate communication to the university community shall be undertaken (see section below on "Policy Publication, Communication, and Archiving").

Policy Publication, Communication, and Archiving

Policy Publication

1. The Systems and Procedures Analyst (or other as designated by president) will ensure that links to all university-wide policy documents are published on the AUB Policy and Procedures webpage (http://www.aub.edu.lb/pnp/Pages/index.aspx). The permanent links are provided by the policy management software system.

2. All links to university-wide policies on any other university webpages must utilize the permanent link from the AUB Policies and Procedures Webpage.

3. There are two access-levels for policies and procedures published online:

   Public Access: *Available to the general public.*

   Restricted Access: *Accessed only by designated users with an AUB User ID and Password.*

   The Policy Owner may recommend the appropriate access level to be confirmed as part of the new/revised policy approval process.

Policy Communication

1. The Policy Owner is responsible for ensuring that information regarding new and significantly amended policies is communicated to policy stakeholders according to a communication plan that must be submitted with the draft new/revised policy documents during the review and approval process.

2. Managers are responsible for ensuring that employees who do not have ready access to the on-line policy documents are either provided with printed copies, or are otherwise fully informed, of all university policies that may apply to them.

Policy Archiving

1. Previous versions of university-wide policy documents will be archived electronically through the AUB policy management software system.

2. The Systems and Procedures Analyst (or other as designated by president) will provide hard copies of original policies and subsequent approved versions to be maintained in the University Archives.

Comprehensive Policy Review

1. Policy Owners are responsible for ensuring comprehensive review of university-wide policy documents, at least every three years, to determine whether the policy objectives are being achieved. The next comprehensive review must proceed regardless of policy revisions or minor amendments not resulting from a comprehensive policy review process. A review may be conducted at any time prior to the scheduled review date. The PPRC may direct Policy Owners to undertake such a review.

   Comprehensive policy review outcomes will include one or more of the following:

   - No amendment
   - Minor amendment
   - Policy revision
   - Reclassification of policy as non-university-wide
   - Policy revocation

2. The Systems and Procedures Analyst (or other as designated by president) will monitor the automatic periodic notification of Policy Owners regarding upcoming policy reviews before the review due date.

3. Policy Owners will submit the "Comprehensive Policy Review Outcome Notification" to the PPRC (via aubpolicies@aub.edu.lb) and to the Policy Executive Sponsor by the due date of the Comprehensive Policy Review.

4. If the outcome of the review is a minor amendment, reclassification, policy revision, or policy revocation the relevant procedures and approval authority must be followed as outlined in this policy.

Definitions

Policy Categories

Academics and Research [ACR]: Academic policies address the academic functions of the university, including the interrelation of the various faculties, as well as research policies related to faculty, staff, and student research, its funding and commercialization. Note: Curricular Policies (for example admission or graduation requirements) are governed by the Bylaws of the Faculties and the Senate Bylaws, and not this policy.

Business and Finance [BSF]: Policies guiding the financial aspects of budgeting, procurement, use, disposal, and accounting for the University's income, expenses, assets, funds, and other related financial matters.

External Relations and Fundraising [ERF]: Policies related to managing relationships with groups, organizations, and other entities external to AUB, including alumni relations.

Facilities, Environmental Health and Safety [FEH]: Policies related to facilities, campus access, and environmental risk.

Governance and Administration [GAD]: Policies related to governance, ethics, institutional integrity, standards of conduct, communications, risk and liability management, values, and principles.

Human Resources [HUR]: Policies pertaining to the employer/employee relationship, employee behavior, and other personnel issues.

Information Technology [ITC]: Broad range of policies related to users, information, and related technologies.

Student Life [STL]: Policies related to all non-academic facets of student life from admission through graduation.

Other Terms

Approver: University official with approval authority for designated university-wide policies and procedures based on organizational responsibilities and AUB governance documents.

Bylaws: Bylaws provide a framework for the overall governance of the various university bodies. Bylaws govern the organization and operation of the Board of Trustees, its officers, and committees; establish and define the principal institutions and administrative officers of the university and their roles and responsibilities; and provide a general framework for the organization, administration, and operation of the University. Approval processes for the amendment of the bylaws is outlined in each bylaws document. Most bylaws are subject to adoption by the Board of Trustees. AUB has the following bylaws: Corporate; Faculties; Outlook; Senate; Student Representative Committee (SRC); and University Student Faculty Committee (USFC).

Document Control Administrator (DCA): Policy management software system administrator responsible for: 1) managing user information, categories, roles and permissions, 2) monitoring workflow, and 3) providing user support.

Executive Sponsor: The president, provost, executive vice president, vice president, or AVP for Administration and Chief of Staff with approval authority for policy documents.

Implementation office: Unit designated by the Policy Owner to implement the policy.

Manual: A collection of policies and procedures that apply to a particular AUB community group.

Minor Amendment: A modification that does not otherwise affect document content, such as a change to a title, name, contact information, location, format, order of information, hyperlink, or form associated with the policy document.

Non-University-Wide Policy: A policy that is limited in its scope and application and does not have broad impact on the university community (for example, policies specific to units, faculties/schools, departments, or the medical center).

Policy: A high-level overall plan outlining the general goals and acceptable procedures of an administrative/academic or any general university-wide operation with intentions to influence and determine decisions, actions, and other matters. Policies are stated in broad terms. Policies aim to promote consistency, operational efficiency, enhancement of the university's mission and/or mitigate significant institutional risk. The term "policy" (when used generally) refers to policies, procedures, bylaws, manuals, handbooks, guidelines, etc.

Policy Document: Policy document is a generic term that refers to policies, procedures, bylaws, manuals, handbooks, guidelines, etc. that mandates requirements, actions, constraints, and/or provisions for members of the AUB community.

Policy Owner: The appropriate university officer responsible for the development, monitoring for compliance, and review of policy documents within their jurisdiction.

Policy Revision: Changes to a policy document that affect the content and do not qualify as a minor amendment.

Policy Management Software System: Automated policy management software system utilized by AUB for policy development, revision, management, archiving, and reporting.

Procedure: A step-by-step sequence of activities or course of action (with definite start and end points) that must be followed in the same order to correctly perform a task or to implement established policies.

Policy Champion: Individual designated (optionally) by the Policy Owner to develop, review, and edit the policy document. The Policy Champion is referred to as the "Proxy Author" in AUB's policy management software system.

Reviewer: Individual (or group) designated to formally review and suggest edits to the policy document.

Stakeholders: All individuals or groups having direct interest in and/or are affected by the policy and procedure.

Subject-Matter Experts and/or Specialists: Faculty/staff subject-matter experts, legal counsel (U.S. and Lebanese), Office of Financial Planning, Internal Audit, or others as needed.

Writer/Editor: The Policy Owner may designate an editor(s) and/or writer(s) to assist in the development or revision of a policy document.

The above definitions are applicable within the policy development context as described herein.

Appendix II Policy & Procedures Review Committee Charge

Charge of the Policy and Procedures Review Committee

The Policies and Procedures Review Committee (PPRC) is comprised of representatives from the major administrative and academic units as well as from AUBMC to serve as an advisory group and support the University mission by promoting best practices in university policy governance across AUB and particularly among policy owners. (When used generally, the word "policy" refers to policies, bylaws, procedures, manuals and other policy documents.)

PPRC Specific Responsibilities

a) Facilitate consistency in university policy development.
b) Monitor and suggest improvements to the policy management process through which new and revised policies are formulated, vetted, approved, communicated, monitored for compliance, reviewed, and retired as applicable.
c) Support policy development and revisions in line with the University's governance documents and the Policy on the Development and Revision of Bylaws, Policies, Procedures, and Manuals to facilitate:
    i. Utilization of a standardized format
    ii. Consistency among established policies
    iii. Inclusive review by key stakeholders
    iv. Adherence to the AUB Policy Approval Hierarchy
    v. Implementation
    vi. Regular comprehensive policy reviews
d) Advise on strategies to ensure that information regarding new, revised, and/or revoked policies is communicated to the appropriate AUB constituencies through AUB's website and other mechanisms.

The Committee reports to the President and maintains minutes of meetings. The Committee will meet as needed to address matters on its agenda, but not less than four times per year. The Committee may invite other members of the AUB community to attend as necessary.

PPRC Membership

Appointed by the President:
Chair (Academic Administrator)
Co-Chair (Administrator)
AVP for Administration & Chief of Staff or designee
AUBMC designee
Two faculty members appointed by the president
Director of Procurement and Contracts Administration (or designee)
Director of Human Resources (or designee)
Chief Information Officer (or designee)
Director of Institutional Consulting, Regional External Programs
Elected
Two faculty members elected by the Senate from the faculty at large
Ex-Officio
Associate Provost (if not Chair)
Systems and Procedures Analyst
University Auditor (Non-voting)

By invitation:
Lebanese Legal Advisor (Non-voting)
U.S. Legal Advisor (Non-voting)

The term for serving on this committee is recommended for two years (renewable) on a rotating basis for continuity.

Version Number:	1
Policy Owner:	Dean of Student Affairs
Implementation Office(s):	Student Affairs

Preamble

The American University of Beirut expects that all faculty, staff, and students embrace and exemplify the values of AUB, as defined in the Principles of Ethical Conduct and other university policies regarding ethical standards of behavior.

AUB has a long and distinguished tradition of seeking to instill in students high academic and ethical principles. The University expects students to adhere to norms of academic integrity that accord with those of accepted international scholarly practice and professional ethics. Students should speak and act with due regard to the rights, dignity, and freedom of others, whether within the academic context of the classroom and laboratory, or within the context of co-curricular life and social and recreational events. AUB encourages the free exchange of ideas and opinions, but it does not tolerate any form of discrimination or harassment, breach of academic integrity, or infringement of ethical standards of conduct. These principles and values are expressed in AUB's mission statement.

By applying for and accepting admission at AUB, students accept its regulations and acknowledge the right of the University to take disciplinary action for conduct judged to be in violation of the applicable university rules and regulations, and in particular of the Student Code of Conduct.

The Student Code of Conduct shall be applied on campus and at AREC, the AUB medical center, and all university-authorized events such as galas, sporting events, graduation parties, etc.

Back to Top

Jurisdiction

The purpose of this code is to provide students with a clear statement of the standards of behavior expected in an educational environment, so that they make responsible choices regarding their participation in the academic community and understand the consequences of their infringement of these standards. Violations may be of an academic or non-academic nature.

Jurisdiction of academic violations lies initially under the authority of the instructor of the course in which the violation occurred. If necessary, the case will subsequently be reviewed by the Student Affairs committee of the Faculty or School in which the violation occurred. The Dean of Faculty or School in which the student is enrolled, is responsible for implementing the sanctions recommended by the Student Affairs committee.

Misconduct that is clearly non-academic falls under the jurisdiction of the dean of student affairs who will take the necessary action in consultation with the dean(s) of the faculty or school to which the student belongs. AUB holds all students responsible for actions occurring on campus and at AREC, the AUB medical center, and university-authorized events.

Students attending an off-campus function as representatives of the University (such as, but not limited to, students serving on academic or athletic teams or engaging in club activities) are subject to disciplinary sanctions for violations of this code.

Students Code of Conduct

The following are examples of actions deemed in violation of the Student Code of Conduct; they are not intended to define misconduct in exhaustive or exclusive terms. Any student who violates the principles described in the preamble to this document shall be subject to disciplinary action in accordance with the Student Code of Conduct.

Back to Top

Section 1 - Definitions of Misconduct

1. Academic Misconduct
2. Non-Academic Misconduct

---

1. Academic Misconduct

Offences involving academic misconduct include, but are not limited to, the following:

a. Cheating[1]

While taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work.

Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

Recommended range of actions: [3-5].

b. Plagiarism[2]

Whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Recommended range of actions: [3-5].

c. In-Class Disruption

Students in class are expected to behave appropriately, and shall not disrupt classes or exams by extraneous conversation and/or misbehaving.

Recommended range of actions: [1-3].

d. Dishonesty[3]

Students are expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

   Recommended range of actions: [1-3].

b. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

   Recommended range of actions: [3-5].

c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

   Recommended range of actions: [1-3].

d. Unlawfully copying computer software.

   Recommended range of actions: [2-4].

e. Engaging in bribery of any kind.

   Recommended range of actions: [3-5].

Back to Top

2. Non-Academic Misconduct

a. Disruption/Obstruction

Students have the right to express their opinions on matters of concern to the University in an organized manner and in a public space, excluding residences on campus, but they must notify and consult with the dean of student affairs before doing so. The nature of the event and any publicity accompanying it must be reviewed by the dean to assure that neither Lebanese law, nor university policies and norms are being violated.

In cases where student-sponsored events, including protests, sit-ins, and demonstrations are, after such consultation, not approved by the dean of student affairs, or, if needed by the Board of Deans or the president, it may become necessary for the dean of student affairs to undertake disciplinary measures and even to instruct campus protection to bring the public gathering to an end.

Disrupting or obstructing the normal educational process or any university function or activity by student demonstrations, sit-ins, or 'strikes' is strictly prohibited. This includes, but is not limited to: disrupting classes, library operations, seminars, exhibitions, meetings, ceremonial events, or examinations; impeding or preventing others from attending such events; falsely activating a disaster alarm; or making a threat.

Under no circumstances are any members of the university family to be intimidated or threatened in the execution of their normal duties and responsibilities. That means that students and faculty who wish to hold or attend classes or to go to their offices or places of study shall not be prevented from doing so; non-academic staff and administrators shall not be impeded from going to their places of work.

b. Distribution of Unauthorized Published Material

The public distribution and posting of published materials such as fliers, leaflets, posters, audiovisuals, etc., must be approved and stamped by the dean of student affairs. The campus protection office will remove from display any such unauthorized material.

c. Theft

Stealing on campus or at a university-authorized event off campus, including unauthorized use of university equipment or services (e.g., telephones, photocopiers, or computer facilities), or possession of stolen property, is prohibited.

d. Destruction of Property/Endangering Public Safety

Students are expected to protect university property and to respect the safety of others. Acts contrary to these principles, which include, but are not restricted to, the following, are subject to disciplinary procedure:

i. Engaging in vandalism or other intentional damage (such as spray painting or graffiti) to property on campus or at university-authorized events off campus.

ii. Littering, such as disposing of waste (empty bottles, cigarette butts, food containers, etc.) in other than designated places on campus.

iii. Unjustified discharge, damaging, or tampering with any fire extinguisher, fire alarm, or other safety devices.

iv. Taking, or attempting to take, action that damages or could damage private property, without the consent of the owner or person legally responsible.

v. Appropriating, or attempting to appropriate or possess, private property, without the consent of the owner or person legally responsible.

vi. Unauthorized entry, unapproved duplication of keys or use of such, or unauthorized use of campus facilities.

e. Mental or Physical Harm

Acts that inflict mental or physical harm are prohibited, including the following:

i. Engaging in physical aggression including, but not limited to, assault.

ii. Engaging, or attempting to engage, in intimidation, coercion, extortion, blackmail, or bribery; bullying; threatening violence, injury, or harm to others on campus or at university-authorized events off campus; endangering or tending to endanger the safety, health, or life of any person.

iii. Engaging in behavior that creates a substantial risk of, or results in, injury to others, such as committing arson or causing a riot.

iv. Using force, inciting violence, inflicting or attempting to inflict injury to others on campus or at a university-authorized event off campus.

v. Engaging in any activity that endangers the health and safety of an individual or demeans an individual in conduct of an unbecoming or humiliating nature, or in any way that detracts from an individual's academic pursuits.

Many of these acts may be interpreted as harassment. Cases of discriminatory harassment are addressed through AUB's Procedures to Address Formal Allegations of Sexual and other Discriminatory Harassment . Cases of non-discriminatory harassment, which do not invoke one of the protected characteristics (race, color, religion, etc.) under the University's Non-Discrimination Policy , are addressed through the Grievance Policy and Procedures .

f. Possession of Dangerous Weapons or Materials

Students must not distribute, possess, store, or use, on campus or at a university-authorized event off campus, any kind of weapon, device, explosive, dangerous chemicals, hazardous materials, or any other instrument designed to do bodily harm or to threaten bodily harm. Instruments used to simulate such weapons, which endanger or tend to endanger any person, shall be considered weapons.
Students are also prohibited from distributing, possessing, storing, transferring, selling or attempting to sell, delivering, using or attempting to use, any illegal drugs, narcotic or hallucinogenic, on campus or at any university-authorized event off campus.

g. Discrimination and Harassment

AUB prohibits Non-Discrimination Policy on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. Intimidating, insulting, or threatening others, whether verbally, in writing, or through electronic means, is harassment and may be discriminatory or non-discriminatory in nature. Discriminatory harassment is fully described in Policies Concerning Sexual and Other Discriminatory Harassment ; and procedures to address it are in Procedures to

Address Formal Allegations of Sexual and other Discriminatory Harassment . Non-discriminatory harassment may be addressed through the University's Grievance Policy and Procedures .

Engaging in sexual harassment, e.g., requests for sexual favors, unwelcome sexual advances, unwelcome physical contact of a sexual nature, spoken comments or abuse (including email) of a sexual nature, and the public display of sexually suggestive objects or pictures is prohibited (refer to the University's Non-Discrimination Policy).

h. Smoking and Alcohol

The consumption of alcohol, on campus, by students is not permitted. Smoking is not permitted in university buildings other than private residences and those areas within the student dormitories, as may be designated from time to time by the dean of student affairs (refer to the University's Non-Smoking Policy).

i. Inappropriate Sexual Behavior

Publicly engaging in sexual behavior is prohibited as deemed by Lebanese law.

j. Use of Computers

Accessing protected computer accounts or other computer functions, knowingly transmitting computer viruses, and unethical use of AUB access is prohibited (refer to the Information and Computer Resources Use).

K. Inappropriate Conduct in the AUB Libraries

Any action that impedes the safe and effective use by all patrons of the AUB Libraries for the purpose of study, research, reading, and other intellectual pursuits, is prohibited (refer to the University Policy on Appropriate Conduct in Libraries).

Back to Top

Section 2 - Disciplinary Actions

1. Academic Misconduct
2. Non-Academic Misconduct
3. List of Primary Disciplinary Actions
4. Required Withdrawal from Campus
5. Secondary Disciplinary Actions

Disciplinary action will be imposed according to the nature (academic or non-academic) and severity level of the violation.

1. Academic Misconduct

In principle, enforcement of disciplinary actions for academic violations is carried out by those immediately responsible.

It is the responsibility of the faculty to uphold university policies. Thus, the immediate responsibility for dealing with instances of cheating, plagiarism, and other academic violations rests with the faculty member. If a faculty member has good reason to believe that a student has violated academic standards, it is his or her responsibility to discipline the student expeditiously. A faculty member who has good reason to believe that a student has violated academic standards must give a grade of zero on the exam or assignment where the violation occurred.

When the instructor has taken the initial disciplinary action, he or she should send a letter (see Appendix I) to the office of the Dean of the Faculty or School, in which the incident occurred, informing him/her of the incident and the initial action he/she has taken. A copy of the letter will be placed in the student's file, and another copy forwarded to the student's advisor for follow-up. See detailed flow in Appendix II.

2. Non-Academic Misconduct

a. General

Violations of a non-academic nature are the responsibility of the dean of student affairs, in consultation with the dean of the faculty or school in which the student is enrolled and, as necessary, the chief of campus protection. Students should know that the laws of the Republic of Lebanon apply on campus, and those who violate these laws may be subject to criminal prosecution. See detailed flow in Appendix II.

b. Library-Related

As detailed in the "University Policy on Appropriate Conduct in Libraries", the immediate responsibility for dealing with violations of library rules rests with the librarian or library staff in charge of a department, section, or room of the Library where a violation occurs. Violations that are not dealt with internally by the librarian will follow the flow in Appendix II.

3. List of Primary Disciplinary Actions

All disciplinary actions listed below will be recorded in the student's permanent record at the registrar's office. Only suspension and expulsion, will become part of the student's official transcript or record. Records of the University Disciplinary Committee decisions, including charges and sanctions, will be maintained as part of the confidential records in the office of the respective dean, for a period of up to four years after the student graduates or ceases to be a student.

Range of Actions
Warning This may be oral or written. It is a statement that the student has inadvertently violated a university regulation. The warning will be documented and recorded. Examples: Littering and smoking in prohibited areas.
Reprimand This will be in writing. It is a statement that the student has violated a university regulation. It is intended to communicate most strongly, both the disapproval and the reprimand of the university community. Examples: Inadvertent plagiarism - failure to cite sources appropriately, and inappropriate physical contact.
Dean's Warning This will be in writing. Only two Dean's Warnings are allowed in a student's academic career at AUB. It is recommended that any violation of university regulations after the second Dean's Warning results in consideration of suspension. Dean's warnings are normally accompanied by secondary disciplinary actions (see section 5 below).

Examples: Plagiarism, academic dishonesty, disruption-obstruction, In-class disruption, mental or physical harm, discrimination and harassment.

Suspension*

This will be in writing and will form part of the student's permanent record (and will appear on the student's transcript). A student will be suspended for a fixed period of time during which the student may not participate in any academic or other activities at the University. At the end of the suspension period, the student may be readmitted to the University, only upon the recommendation of the University Disciplinary Committee.

Examples: Cheating, theft, and destruction of property.

Expulsion*

This will be in writing and will form part of the student's permanent record (and will appear on the student's transcript). Expulsion denies the student the right to participate in any academic or other activities of the University for an indefinite time. Only under the most unusual circumstances, and upon the recommendation of the University Disciplinary Committee, will an expelled student be readmitted to the University.

Examples: Academic dishonesty, possession of dangerous weapons or materials, and endangering public safety.

***Cases whereby the student affairs committee recommends suspension or expulsion should be referred to the University Disciplinary Committee.**

N.B: Any person who maliciously lies to cover up an act sanctioned by the code of conduct will be considered to be an accessory after the fact and may be subject to disciplinary action.

4. Required Withdrawal from Campus Pending Hearing

In extraordinary circumstances, when the student's continued presence is deemed a danger to the university community, the student will be required to withdraw from the campus, pending a meeting of the University Disciplinary Committee. This action shall normally require the approval of the president of the University.

5. Secondary Disciplinary Actions

In addition to the disciplinary actions listed above, the following secondary disciplinary actions may be imposed upon those who violate the Student Code of Conduct. Secondary disciplinary actions may be of an academic or non-academic nature.

a. Secondary Disciplinary Actions - Academic

i. The student may be prohibited from participating in the work study program.

ii. The student may be prohibited from receiving any form of financial aid, scholarship, or monetary award.

iii. The student may be prohibited from receiving any form of honor, merit award, or other academic recognition award.

iv. The student may be prohibited from holding a graduate assistantship.

v. The student may be given a failing grade in a course or a test or any other form of academic assessment.

b. Secondary Disciplinary Actions - Non-Academic

i. The student may be prohibited from representing AUB in any official role, activity, or event.

ii. The student may be prohibited from serving as an officer of any AUB organization including club, team, or society.

iii. The student may be prohibited from living in any AUB hall of residence or similar facility.

iv. The student may be strongly advised to attend treatment or counseling as determined by the director of the counseling center, in consultation with the dean of student affairs.

v. The student may be required to make financial restitution.

vi. The student's case may be referred to an external agency for further action (this could include the filing of criminal charges).

Section 3 - Complaint Procedure

Any person subject to, or who witnesses, a violation of the Student Code of Conduct should forward a written complaint to a faculty member, a chairperson, or any university official. Academic violations shall be forwarded to the dean of the faculty in which the violation occurred. Non-academic violations shall be referred to the dean of student affairs. Violations that may require suspension or expulsion will be referred by the concerned dean to the University Disciplinary Committee.

Section 4 - Formal Hearing by University Disciplinary Committee

The University Disciplinary Committee will deal with alleged violations in a manner that ensures that those charged with a violation understand the charge and the evidence against them and are afforded a reasonable right of rebuttal.

The University Disciplinary Committee shall inform the student of the charge in writing. Evidence shall be presented in the presence of the student who shall have a reasonable right of rebuttal including the right to cross-examine witnesses. In determining penalties, the committee may take into consideration the student's cumulative discipline record The University Disciplinary Committee's decision shall be final.

Section 5 - Appeal Procedure

Any student who is charged with a disciplinary offense has the right to a full and fair hearing for any disciplinary charges brought against him or her under university regulations.

If any of the following apply, a student may appeal to the dean of the faculty or school regarding faculty or departmental decisions, or to the University Disciplinary Committee against disciplinary action taken by the dean of student affairs or the dean of the faculty or school to which the student belongs:

1. Procedural error.
2. New evidence.
3. Unsupported conclusion.
4. Disproportionate sanctions.

The outcome of this appeal may result in higher, lower, identical, or no sanctions at all being imposed. The University Disciplinary Committee's decision shall be final.

Section 6 – Grievance Policy and Procedures

Student Grievance Policy

Undergraduate or graduate students may consider informal or formal procedures to seek redress for what they believe to be unfair, improper, or discriminatory decisions, actions, or treatment contravening the established policies and procedures of the University. These grievance procedures neither supersede, nor take precedence over established university procedures or due process for any and all matters related to academic misconduct, disciplinary appeals, grade appeals, financial aid, or other well-defined areas of faculty or staff responsibility. Moreover, grievances should not be confused with petitions related to academic issues, including deviation from academic requirements or policies.

For more information, please refer to Sections 1-3 and 6 of AUB's Grievance Policy and Procedures .

APPENDIX I
VIOLATION OF THE STUDENT CODE OF CONDUCT

(To download this form in Word format, click here)

To: Office of the Dean of _____

Subject: Violation of the Student Code of Conduct

Date: _____

The following details pertain to a violation of the student code of conduct and for which an initial disciplinary action was/wasn't taken:

- Date of incident : _____
- Course (Department & Number): _____
- Nature of offense: _____
- Student(s) involved:

	ID:	Name:	Faculty/Major:
•	_____	_____	_____
•	_____	_____	_____
•	_____	_____	_____
•	_____	_____	_____
•	_____	_____	_____

- Initial disciplinary action taken by instructor (if any):

_____
_____
_____

Submitted by: _____ Signature: _____

- To be completed by faculty members for reporting a violation of the student code of conduct
- To be submitted within 15 academic days from the date of occurrence of the violation to the Student Records Officer in the Dean's Office
- A description of the violation, related evidences and documents to be attached to this form
- One copy to be placed in the student's file (at the Faculty/School where he/she is enrolled)
- One copy to be given to the student's advisor for follow-up

APPENDIX II
BREACH OF THE STUDENT CODE OF CONDUCT PROCESS FLOW

(To download this appendix in Word format, click here)

1. Academic Misconduct

a. The immediate responsibility for dealing with instances of cheating, plagiarism, and other academic violations rests with the faculty member. If a faculty member has good reason to believe that a student has violated academic standards, it is his or her responsibility to discipline the student expeditiously. A faculty member who has good reason to believe that a student has violated academic standards must give a zero on the exam or assignment where the violation occurred, and to report the incident as per paragraph 3 below. Disciplinary actions of a more severe nature are recommended by the Faculty Student Affairs Committee to the Dean who in turn may refer the case to the University Disciplinary Committee which is authorized to impose either suspension or expulsion from the University.

b. The immediate responsibility for dealing with in-class disruption or dishonesty rests with the faculty member. It is his or her responsibility to ask the student to leave the classroom and to report the incident as per paragraph 3 below.

c. The faculty member will report the incident to the office of the Dean of the Faculty or School, in which the incident occurred, informing him/her of the incident and the initial action already taken by the faculty member (see section 1 above). The letter will be forwarded to that Faculty's Student Affairs Committee for review and further action as necessary. Two copies of the letter will be sent to the Faculty where the student is enrolled. One will be kept in the student's file and the other sent to the student's advisor for follow-up.

d. The Student Records Officer at the Faculty where the incident occurred retrieves pertinent information about the student(s) involved in the incident, and adds this information to the incident's file prior to handing it to the Chair of the Student Affairs Committee of that same Faculty. This information will be retrieved from the records of the Faculty in which the student is enrolled and/or from University records.

e. The Student Affairs Committee of the Faculty where the incident occurred reviews the case and either endorses the faculty member's action as is, or

recommends additional disciplinary actions. Its recommendations and justifications are minuted and forwarded to the Dean of that same Faculty for approval and implementation.

f. The Dean of the Faculty where the incident occurred will approve and implement the Faculty's Students Affairs Committee's recommendations for those students that are enrolled in that Faculty. He/she will communicate the action recommended by that committee to the dean/director of the school in which the student is enrolled for his/her approval and implementation.

g. Recommendations for disciplinary actions up to and including the "2nd Dean's Warning" may be approved and implemented by the Dean of the Faculty in which the student is enrolled. Serious cases which in the opinion of the Student Affairs Committee may require suspension or expulsion will be referred by that Dean to the University Disciplinary Committee (UDC) for further review and recommendation.

2. Non- Academic Misconduct

1. Misconduct that is clearly non-academic falls under the jurisdiction of the Dean of Student Affairs who will take the necessary action in consultation with the Dean(s) of the faculty or school to which the student(s) belongs.

2. The Dean of Student Affairs may decide and implement disciplinary actions up to and including the "2nd Dean's Warning". Violations that may require suspension and or expulsion are referred by the Dean of Student Affairs to the University Disciplinary Committee (UDC) for further review and recommendation.

Appendix III – Procedures for Faculty Grievances

Back to Top

Section 1 - University Grievance Policy

In order to ensure the integrity of its operations and the appropriate application of its policies and procedures, the University maintains appropriate means ("Grievance Procedures") by which members of the AUB community who believe themselves to be aggrieved may obtain consideration and, where warranted, redress of their grievances.

Back to Top

Section 2 - Applicability of Grievance Procedures

The Grievance Procedures set forth below are applicable to AUB faculty, non-syndicate staff, and members of the student body, who may file grievances on issues related to the following matters:

1. Academic freedom;
2. Academic integrity;
3. Work conditions;
4. Discrimination;
5. Non-discriminatory harassment;
6. Professional misconduct; and
7. Stipulations in the grievant's employment contract.

AUB staff who are syndicate members are required to file grievances in accordance with the provisions of their collective bargaining agreement.

Aspiring members of the AUB community, non-student participants in university programs or activities, and recipients of health care services provided on university property also have recourse to these Grievance Procedures to pursue allegations of discrimination which violate the University's Non-Discrimination Policy .

Recognizing the sensitive nature of allegations of discriminatory harassment, including sexual harassment, the University maintains a special grievance procedure for their pursuit. In such cases, complainants may file a formal Notice of Discriminatory Harassment Form in accordance with AUB's Procedures to Address Formal Allegations of Sexual and other Discriminatory Harassment .

Similarly, the Grievance Procedures set forth below do not apply in cases in which AUB has established other policies and procedures to address concerns and appeals related to certain types of academic activity, **unless** the complainant is alleging discrimination (as defined in the University's Procedures to Address Formal Allegations of Sexual and other Discriminatory Harassment). Some examples of such policies and procedures include:

a. Human Research Protection Plan Policies and Procedures.
b. Animal Care and Use Program.
c. Research Integrity Policy and Procedures to Address Allegations of Research Misconduct.
d. Intellectual Property Policy .
e. Student Code of Conduct (including policies and procedures related to academic and non-academic misconduct and appeals).
f. Student Grade Appeals.
g. Student Financial Aid Awards.
h. Etc.

Guidance on identifying the appropriate policy and procedure to address a concern may be sought from personnel in the Ombuds Office, the Department of Human Resources (campus or medical center), or the relevant dean's office, as well as from the Title IX coordinator in the Provost's Office.

Back to Top

Section 3 - General Provisions

A formal grievance must be filed within 30 calendar days of the date when the problem or dispute first arose. The grievant must be personally affected by the action or decision underlying the grievance and may not file on behalf of another individual or a group of people. Dissatisfaction with a generally applicable university policy on the grounds that it is unfair or inadvisable is not grounds for a grievance. Neither is discourteous or disrespectful behavior on the part of a colleague or superior, unless it reflects a serious and aggravated lack of civility or is part of a pattern of activity that may indicate abuse of authority.

In negotiating grievances, the parties involved should remember that the purpose of a grievance policy and procedure is to resolve differences, where possible, on a basis mutually acceptable to all parties.

Grievants are normally expected to represent themselves during any proceedings. However, they do have the option of choosing another member of the university community to accompany and speak for them so long as a) their representative is not a member of their immediate family or the legal profession; b) the person that they select is acceptable to the University; and c) exercising this option involves no delay to the proceedings.

The use of the university grievance procedure will not, in any way, reflect unfavorably upon the character, reputation, or employment status of any grievant. AUB prohibits retaliation or the threat of retaliation against any individual who files a grievance, assists someone in filing a grievance, or participates in the investigation or resolution of a grievance.

Failing to participate and/or cooperate in a grievance investigation or providing false information may be grounds for discipline.

Back to Top

Section 4 - Procedure for Staff Filing Grievances

Non-Syndicate staff members who believe that they have a valid grievance should consider discussing the matter informally with the head of their department or asking the department head or the ombuds to mediate a satisfactory solution. The latter approach may be helpful if the problem is with a supervisor or someone working at another department at AUB. These steps are not required, however, and the employee may immediately choose to file a formal grievance.

There are three stages in the staff grievance procedure:

Stage One: The staff member begins the process by completing and signing a Notice of Faculty or Staff Grievance and submitting it, along with any corroborative material, to the head of his or her department. The form and documentation may be submitted to the next level of authority (see below, Stage Two) if the department head is the subject of the grievance. The ombuds can help with the completion of the form as necessary. The person submitting the form should retain copies of it and any other submitted materials.

The department head has 15 calendar days to write to the grievant to acknowledge receipt of the form and materials and to send copies of the form and materials to the appropriate human resources director (campus or AUBMC) and the dean or VP responsible for the department.

The applicable HR director monitors the grievance process, offers advice and assistance when needed, and keeps a record of the grievance process, findings, and decisions. If the HR director determines that sex discrimination may be a factor in the grievance, the director also forwards the form and materials to the Title IX coordinator and consults with the coordinator as necessary. At this point in time, the dean or VP takes no action.

At the discretion of the dean/VP/chief responsible for the faculty/unit or the president, the allegation of sex or gender-based discrimination may be fully referred to the Title IX Coordinator for investigation and preparation of a report to be shared with university official(s) addressing the grievance, and with the provost or the provost's designee.

It is otherwise the responsibility of the department head to conduct an investigation into the situation and circumstances, which might include interviewing the grievant and any other party to the grievance if necessary, and to produce a brief, written report with a clear recommendation. Should this entire process take more than 45 calendar days, the grievant may contact the appropriate dean or VP to expedite the timeliness of the investigation.

Copies of the final recommendation are sent to the grievant, the applicable HR director, and the dean or VP responsible for the department. In cases in which a respondent is named, copies are also sent to the respondent and the respondent's dean or VP (if different from that of the grievant). In cases in which sex discrimination is allegedly a factor, the Title IX coordinator additionally receives a copy of the recommendation.

Should the grievant (and/or respondent) not agree with the recommendation contained in the report, they have the right to have the outcome reviewed at the next level of authority (Stage Two).

Stage Two: Grievants and/or respondents dissatisfied with the recommendation of the head of a department have 14 calendar days to request its review by the appropriate dean or VP. If the administrative unit of the grievant or respondent falls under the Office of the President or Provost, the grievant or respondent may request a review by the president or provost as appropriate.

In most cases, the dean or VP already possesses a copy of the file to date, so the request takes the form of a letter explaining the reasons for disagreeing with the department head's report. The dean or VP reviews the documentation, consults with the parties, if necessary, and issues a written response within 45 calendar days. If the grievance has not been reviewed at a lower level of authority, the dean or VP takes the steps

detailed above (see Stage One) in the specified time frames. Copies of the response are sent to the grievant; the respondent (if applicable); the department head(s); and the applicable HR director. If alleged sex discrimination is a factor in the grievance, the HR director continues to keep the Title IX coordinator informed of the case's progress, which includes sending a copy of the response of the dean or VP to the coordinator.

Stage Three: If the grievant and/or respondent believes that the matter has not been satisfactorily resolved, an appeal may be filed with the president of the University. Prior to rendering a decision on any appeal, the president has the discretion to refer the case to a staff grievance panel (as described below).

The president may designate the provost to fulfill the functions of the president set forth in these Procedures. However, all final decisions concerning action to be taken, including disciplinary measures, must be approved by the president.

Composition of the Staff Grievance Panel

The Staff Grievance Panel is made up of three members, including:

1. The applicable director of human resources (campus or AUBMC) or the director's designee, who normally serves as chair;

2. Two members chosen by the president of the University:

    a. An academic dean or appropriate designee from a faculty uninvolved in the dispute (if the staff member works in a faculty/school) **or** a VP or senior manager from an administrative unit uninvolved in the dispute (if the staff member works in a non-academic unit);

    b. The director of an administrative unit uninvolved in the dispute.

An additional member representing the Syndicate may be added to the panel if a member of the Syndicate is involved.

For grievances in which sex discrimination is alleged to be a factor, the president appoints the Title IX coordinator to serve as the non-voting chair of the panel.

Other than the applicable HR director and possibly the Title IX coordinator, who have followed the case from the start, panelists must disqualify themselves if they discover that they have prior knowledge of the grievance or its circumstances, or if there is a real or perceived conflict of interest. Under such circumstances, the president of the University selects a substitute.

What Happens Next?

The task of the panel is to consider the case thoroughly and to report back to the president. The panel has the right to request information and documents that it deems relevant and to interview the grievant and any other member of the AUB community who may shed light on the matter. The proceedings will remain as confidential as possible consistent with the need for reasonable investigation.

In most cases, the chair submits the panel's findings and recommendation in writing to the president no more than 30 calendar days after the panel's first meeting. If the panel needs more time to conclude its work, the chair must provide the president with a progress letter and rationale for the extension. The numerical results of any votes held during the deliberations must appear in the report. If the panel was chaired by the non-voting Title IX coordinator, the coordinator may provide a separate recommendation in a letter submitted to the president alongside the report.

Should the president subsequently choose not to follow the panel's recommendation, the president should inform the panel of the decision.

Unless it is impractical due to travel or other factors, the president normally advises the panel, the grievant, and the respondent in writing of the decision, which is final and binding, within 15 calendar days. Copies of the panel's recommendation and the president's decision will be kept by the relevant director of human resources (campus or AUBMC).

Back to Top

Section 5 - Procedure for Faculty Filing Grievances

Faculty members who believe that they have a valid grievance should consider discussing the matter informally with the chair/convener/director of their department/track/program (hereafter "chair" and "department"), or asking the chair or the ombuds to mediate a satisfactory solution. The latter approach may be helpful if the problem is with an individual of higher rank or someone working at another department at AUB. These steps are not required, however, and the faculty member may immediately choose to file a formal grievance.

There are three stages in the faculty grievance procedure.

Stage One: The faculty member begins the process by completing and signing a Notice of Faculty or Staff Grievance and submitting it, along with any corroborative material, to the chair of his or her department. The form and documentation may be submitted to the next level of authority (see below, Stage Two) if the chair is the subject of the grievance. The ombuds can help with the completion of the form as necessary. The person submitting the form should retain copies of it and any other submitted materials.

The chair has 15 calendar days to write to the grievant to acknowledge receipt of the form and materials and to send copies of the form and materials to the dean responsible for the department and the provost.

The provost or his/her designee monitors the grievance process, offers advice and assistance when needed, and keeps a record of the grievance process, findings, and decisions. If the provost determines that sex discrimination may be a factor in the grievance, he or she also forwards the form and materials to the Title IX coordinator and consults with the coordinator as necessary. At this point in time, the dean takes no action.

At the discretion of the provost or the president, the allegation of sex or gender-based discrimination may be fully referred to the Title IX Coordinator for investigation and preparation of a report to be shared with university official(s) addressing the grievance, and with the provost or the provost's designee.

It is otherwise the responsibility of the chair to conduct an investigation into the situation and circumstances, which might include interviewing the grievant and any other party to the grievance if necessary, and to produce a brief, written report with a clear recommendation. Should this entire process take more than 45 calendar days, the grievant may contact the appropriate dean to expedite the timeliness of the investigation.

Copies of the final recommendation are sent to the grievant, the applicable dean, and the provost. In cases in which a respondent is named, copies are also sent to the respondent and respondent's dean or VP (if different from that of the grievant). In cases in which sex discrimination is allegedly a factor, the Title IX coordinator additionally receives a copy of the recommendation.

Should the grievant (and/or respondent) not agree with the recommendation contained in the report, they have the right to have the outcome reviewed at the next level of authority (Stage Two).

Stage Two: Grievants and/or respondents dissatisfied with the recommendation of the department chair have 14 calendar days to request its review by the appropriate

dean. If the administrative unit of the respondent falls under the Office of the President or Provost, he or she may request a review by the president or provost as appropriate.

In most cases, the dean already possesses a copy of the file to date, so the request takes the form of a letter explaining the reasons for disagreeing with the chair's report. The dean reviews the documentation, consults with the parties, if necessary, and issues a written response within 45 calendar days. If the grievance has not been reviewed at a lower level of authority, the dean takes the steps detailed above (see Stage One) in the specified time frames. Copies of the response are sent to the grievant; the respondent (if applicable); the department head(s); and the provost. If alleged sex discrimination is a factor in the grievance, the provost continues to keep the Title IX coordinator informed of the case's progress, which includes sending a copy of the response of the dean or VP to the coordinator.

Stage Three: If the grievant and/or respondent believes that the matter has not been satisfactorily resolved, an appeal may be filed with the president of the University. Prior to rendering a decision on any appeal, the president has the discretion to refer the case to a faculty grievance panel (as described below).

The president may designate the provost to fulfill the functions of the president set forth in these Procedures. However, all final decisions concerning action to be taken, including disciplinary measures, must be approved by the president.

Composition of the Faculty Grievance Panel

The Faculty Grievance Panel is made up of five members, including:

1. The provost or the provost's designee, who normally serves as chair;

2. An academic dean from a faculty uninvolved in the dispute and chosen by the president;

3. A member of the University Senate chosen by the president from a pool designated by the Senate at the start of the year;

4. Two members of the faculty chosen by the president and ranking equal to or higher than the grievant. These panelists are chosen from two separate faculties – one involved in the dispute and one uninvolved.

For grievances in which sex discrimination is alleged to be a factor, the president appoints the Title IX coordinator to serve as the non-voting chair of the panel.

Other than the provost and possibly the Title IX coordinator, who have followed the case from the start, panelists must disqualify themselves if they discover that they have prior knowledge of the grievance or its circumstances or if there is a real or perceived conflict of interest. Under such circumstances, the president of the University selects a substitute as appropriate.

What Happens Next?

The task of the panel is to consider the case thoroughly and to report back to the president. The panel has the right to request information and documents that it deems relevant and to interview the grievant and any other member of the AUB community who may shed light on the matter. The proceedings shall remain as confidential as possible consistent with the need for reasonable investigation.

In most cases, the chair submits the panel's findings and recommendation in writing to the president no more than 30 calendar days after the panel's first meeting. If the panel needs more time to conclude its work, the chair must provide the president with a progress letter and rationale for the extension. The numerical results of any votes held during the deliberations must appear in the report. If the panel was chaired by the non-voting Title IX coordinator, the coordinator may provide a separate recommendation in a letter submitted to the president alongside the report.

Should the president subsequently choose not to follow the panel's recommendation, she/he should inform the panel of her/his decision.

Unless it is impractical due to travel or other factors, the president normally advises the panel, the grievant, and the respondent in writing of the decision, which is final and binding, within 15 calendar days. Copies of the panel's recommendation and the president's decision will be kept by the provost.

Back to Top

Section 6 - Procedure for Students Filing Grievances

Undergraduate or graduate students may consider informal procedures to seek redress for what they believe to be unfair, improper, or discriminatory decisions, actions, or treatment contravening the established policies and procedures of the University. Informal procedures may include the participation of the ombuds who can provide information on the rights of students and who possesses the necessary skills for effective mediation. Such steps are not required, however, and the student may immediately choose to file a formal grievance.

As noted above in Applicability of Grievance Procedures, these grievance procedures neither supersede, nor take precedence over established university procedures or due process for any and all matters related to academic misconduct, disciplinary appeals, grade appeals, financial aid, or other well-defined areas of faculty or staff responsibility. Moreover, grievances should not be confused with petitions related to academic issues, including deviation from academic requirements or policies (for more information on petitions, students and advisors should refer to the University Catalogue, the Student Handbook , and the Student Code of Conduct).

Reviewing and Resolving Student Grievances

Filing a formal grievance requires the student to complete and sign a Notice of Student Grievance and to submit it, as well as any corroborative materials, to the dean/director of the relevant faculty/school (hereafter "dean" and "faculty"). The ombuds can assist with the completion of the form as necessary. The student should retain copies of the form and any other submitted materials.

In most cases, the dean will a) attempt to resolve the grievance informally; b) forward it to a lower administrative level for corrective action; or c) direct it to an appropriate faculty-level committee with student representation, such as the Student Affairs Committee, for investigation and recommendation. The committee chair may interview or request information bearing on the grievance from any member of the faculty, staff, or student body before reporting the committee's findings and recommendations back to the dean. The dean of the faculty decides the matter and communicates the decision to the grievant in writing. Normally, no more than 45 calendar days should elapse between the filing of the grievance and the dean's decision.

In cases in which the grievance is non-academic in nature, and involves a unit of the Office of Student Affairs (OSA), the faculty dean refers the matter to the dean of students for resolution. The dean or the dean's designee a) attempts to resolve the grievance informally; or b) convenes and chairs a student grievance panel (as defined

below), which may request information bearing on the grievance from any member of the faculty, staff, or student body.

If in the judgment of either the faculty dean or the dean of students, sex discrimination is deemed to be a factor in the case, copies of the submitted form and materials are forwarded to the Title IX coordinator as soon as they are received. The dean will ask the Title IX coordinator for advice and assistance in addressing the grievance and, should it go to a committee or panel, to play a role in the proceedings. For the faculty dean, this means that the Title IX coordinator will be invited to join the faculty-level committee as a non-voting resource person during the investigation and deliberations. For the dean of students, it means that the Title IX coordinator will be invited to serve as the non-voting chair of the Student Grievance Panel.

At the discretion of the faculty dean, the dean of students, or the provost, the allegation of sex or gender-based discrimination may be fully referred to the Title IX Coordinator for investigation and preparation of a report to be shared with the university official(s) addressing the grievance, and with the provost or the provost's designee.

Composition of the Student Grievance Panel

The Student Grievance Panel is made up of five members, including:

1. The dean of student affairs or his/her designee, who normally serves as chair;
2. One administrator chosen by the dean of student affairs;
3. One member of the University Senate chosen by the Senate Student Affairs Committee;
4. One member of the faculty chosen by the provost;
5. One student member chosen by the dean of student affairs from the USFC.

The dean of student affairs or the dean's designee writes the grievant, the faculty dean, and the head of the OSA unit involved to inform them of the panel's findings and recommendations and to initiate any corrective action that may be required. Normally, no more than 45 calendar days should elapse between the first meeting of the Student Grievance Panel and the dean of student affairs' final disposition.

A student may appeal a dean's decision concerning a grievance to the provost. To file an appeal, the student should submit a copy of the original Notice of Student Grievance , the dean's decision, and a letter explaining the substantive or procedural grounds for the appeal. General dissatisfaction with the decision is not grounds for appeal. The appeal must be filed no more than 10 calendar days after the receipt of the decision. The provost may or may not decide to consider the appeal. The provost's decision is final.

Section 7 - Procedure for Others Filing Complaints Alleging Discrimination

As noted above in the Applicability of Grievance Procedures, aspiring members of the AUB community, non-student participants in university programs or activities, and recipients of health care services provided on university property may pursue allegations of discrimination in violation of the University's Non-Discrimination Policy .

Individuals falling into these categories who believe that they have a valid discrimination complaint should consider discussing the matter informally with the head of the applicable university unit or the ombuds to mediate a satisfactory solution. These steps are not required, however, and the individual may immediately choose to file a formal complaint.

Formal complaints involving alleged discrimination may be conveyed by email, by post, or by hand to a designated receiving officer in the Office of the President, which is located on the 5th Floor of College Hall. Formal complaints of alleged sex discrimination may also be sent directly to the Title IX Coordinator in the Office of the Provost located on the 5th Floor of College Hall (integrityofficer@aub.edu.lb), who will log the complaint and submit it to the president for consideration. The grievance should take the form of a letter describing the facts surrounding the situation, as well as the discriminatory characteristic allegedly invoked, and should include any corroborative material(s). The person submitting the grievance should retain copies of it and any other submitted materials.

The president or the president's designee will have full discretion in determining the next steps in investigating and resolving the grievance. The president may appoint an individual from the administration, such as the provost and/or the Title IX coordinator, to investigate the matter and report back on the facts or may decide to appoint a formal investigative panel for this purpose. The president's decision regarding any complaint pursued hereunder shall be final.

APPENDIX I
NOTICE OF FACULTY OR STAFF GRIEVANCE

AMERICAN UNIVERSITY OF BEIRUT
OFFICE OF THE PRESIDENT

(When completed and signed, the form should be submitted to the head of your department)

This form guides the grievant in providing information that will be needed to resolve the grievance. Please provide all names, dates, and facts pertinent to the complaint and attach additional pages to the form as needed. Grievances must be filed within 30 calendar days from the date when the problem or dispute first arose. Please retain a copy of the form and supporting documentation as submitted. For more details, please check AUB's Grievance Policy and Procedures.

Contact Information

Grievant's name: _____

E-mail address: _____

Telephone number: _____
(Please provide your home number or AUB extension or mobile number)

University status: ( ) Faculty ( ) Staff ( ) Other _____

Faculty and/or department: _____

Head of department's name: _____

1. Please describe, as fully as possible, what occurred, when it occurred, and the names of individuals present or involved when it occurred. If your grievance concerns something that did not occur, please describe the omission, the relevant time period, and the names of the individual(s) involved.

APPENDIX III

Procedures for Faculty Grievances*

A faculty member shall have the right to appeal to the president of the university at any time that the faculty member believes the treatment accorded to the member has been in violation of the provisions of the member's letter of appointment or of university regulations. The president, after considering the matter, may appoint an ad hoc committee to investigate the matter and submit its recommendations to the president. Grievance procedures shall be limited to the investigation of allegations of procedural irregularities and infringement of academic freedom.

In any situation in which the president deems it appropriate to appoint an ad hoc committee to review a matter pursuant to an appeal to the president concerning a grievance, the following shall govern the appointment and procedures of the ad hoc committee.

The ad hoc committee shall be composed of:

1. One voting member of the Faculty or division concerned, of rank equal to or higher than that of the appellant, to be named by the senate steering committee.

2. One voting member of rank equal to or higher than that of the appellant, to be named by the board of deans.

3. One senate member from a Faculty or division other than that of the appellant to be named by the president and who shall serve as chair of the ad hoc committee.

The president shall furnish the ad hoc committee, upon its request, with relevant documents and information about the case. The ad hoc committee shall make every attempt to interview the faculty member and academic administrator(s) concerned.

The ad hoc committee shall submit its recommendations to the president normally within one month from the date of its appointment. The recommendations should give the numerical results of votes taken by the ad hoc committee.

* The text in this appendix is taken verbatim from the Faculty Manual (version 1), Chapter 2, Section 5 (published in February 2016).

In any event, the decision of the president shall be final and binding and shall be transmitted to the appellant and to the ad hoc committee, normally within a period of two weeks following receipt of the recommendations of the ad hoc committee.

The ad hoc committee's findings, recommendations, and any documents or information made available to it shall be subject to the strictest confidentiality.

Exhibit I.20: HSON Annual Reports

AMERICAN UNIVERSITY OF BEIRUT

Annual Report
2019-2020

1866
AUB
American University of Beirut
الجامعة الأميركية في بيروت

Rafic Hariri
School of Nursing

CCNE
ACCREDITED

The baccalaureate and master's programs at the American University of Beirut – Rafic Hariri School of Nursing are accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791

The school is also a full member of the American Association of Colleges of Nursing.

PREFACE

The year 2019-20 marked several major changes and unique challenges at the Hariri School of Nursing (HSON). HSON Faculty and staff honored Dr. Huda Abu-Saad Huijer, HSON former founding Dean, at the graduation gala dinner, in May 2019. On September 1, 2019, Dr. Laila Farhood was appointed as HSON Interim Dean, one month before the October 2019 uprising/revolution. AUB and HSON in particular faced several challenges due to the difficult economic and political situation in the country. End of October 2019, roads were blocked due to a nationwide uprising; however, HSON faculty continued their commitment to teach theory and clinical courses. On the other hand, nursing students volunteered their time at AUBMC, caring for patients in order to fill the shortage of nurse's gap who could not come to work.

As for AUB and HSON governance, I/Dean Farhood appointed Dr. Samar Noureddine as Associate Dean and Convener of the Graduate Division and Dr. Nuhad Dumit as Convener of the Undergraduate Division. In addition, Faculty members from the Undergraduate (UG) and Graduate Divisions were appointed to represent HSON on several AUB committees.

In Fall 2019, although the number of newly enrolled students at the UG level was relatively high compared to previous years (78 in Fall 2019 compared to 60 in Fall 2018), many students even with the 60% (Financial Aid and HSON scholarship) left the program, because they could not afford to pay their tuition fees in the absence of bank loans. They were drastically affected by the deteriorating economic situation in the country. Sixteen new students were enrolled in the MSN program compared to 17 in Fall 2018 and in September 2019, three additional students joined the PhD program that was launched in Fall 2018.

Spring 2020, we celebrated the international year of the Nurse. Then Covid-19 impacting the world thus shaping the experiences of our faculty and students. We have lived through this traumatic experience which was beyond imagination. Faculty and students brought ahead new teaching strategies thus rethinking our life as a school and community. We have brought ahead new ways of teaching and learning and were supported by AUB president Khuri and higher administration, an experience we should not forget. These are important times that shaped our lives with a different sense of meaning and setting strategies reshaping nursing education based on research and addressing future societal challenges. It's worth noting that our school (HSON) was the first among AUB faculties to observe in- person graduation to our students, a time of relief and getting ready to begin their nursing careers and step into their new and challenging roles.

All of the above could not be accomplished without our stellar faculty and staff. We are proud that we have the largest number of faculty with PhD degrees in Lebanon. HSON also has the highest number of funded research projects and the highest publication rate in Lebanon. HSON faculty have published in top-tier refereed journals and are among the most productive and impactful nurse researchers in the Arab world. A number of HSON faculty have either a joint clinical appointments or clinical associate positions with the Faculty of Medicine/AUB Medical Center. They have excelled clinically by establishing collaborative clinics in their specialty areas, thus setting the stage for many more of such future collaborations.

Despite the challenges, we are still planning to launch many hybrid programs at the graduate level in 2020, such as the Blended Master in Nursing Administration and Management, and to pioneer new modalities in program development.

Despite the economic crisis, HSON continues to place emphasis on research and scholarly productivity, teaching excellence, develop new strategies for student recruitment and find additional funds for student scholarships thus expanding the existing HSON academic programs based on new and innovative strategic initiatives. We continue to be proud of our achievements, which are detailed in this annual report.

Laila Farhood, PhD, CNS
I/Dean and Professor
Rafic Hariri School of Nursing

I. THE HARIRI SCHOOL OF NURSING

A. FACULTY

FOUNDING DEAN OF THE HARIRI SCHOOL OF NURSING (Till End of August 2019)
Abu-Saad Huijer Huda, RN, PhD, FEANS, FAAN, Professor

INTERIM DEAN OF THE HARIRI SCHOOL OF NURSING (September 2019)
Farhood Laila, PhD, CNS, Professor

FACULTY MEMBERS

Abi Fakhr Kantar Lina, RN, EdD, Clinical Associate Professor, CE/Offshore Program Coordinator
Abu-Saad Huijer Huda RN, PhD, FEANS, FAAN, Founding Dean (end of August 2019), and Professor
Adra Marina, RN, MS Physiology, PhD, Clinical Associate Professor
Alayan Nour, RN, MSN, PhD, Assistant Professor
Arevian Mary, RN, MPH, Clinical Associate Professor till end of September 2020
Avedissian Tamar, RN, MSN, Clinical Instructor
Clinton Michael, RN (CARNA), RGN RPN (AHPRA), PhD, MSc, BA (Hons.), Professor, joint appointment with FM Institutional Review Board (IRB) as Vice-Chair of the Social and Behavioral Sciences Institutional Review Board
Dakessian Sailian Silva, RN, MPH, Clinical Instructor
Damianos Danielle, RN, MSN, Clinical Instructor
Dhaini Suzanne, RN, Master in Child Studies, PhD, Assistant Professor till end of December 2020
Darwish Hala, RN, PhD, Associate Professor, joint appointment with FM/AUBMC as Managing Director, Abu-Haidar Neuroscience Institute
Dumit Nuhad, RN, MA, PhD, Associate Professor; Undergraduate Division Convener
Fares Souha, PhD, Assistant Professor
Farhood Laila, RN, PhD, CS, Interim Dean since September 2019, Professor, and Clinical Associate, Psychiatry Department, FM
Gulgulian Talin, RN, MSN, Clinical Instructor
Honein Gladys, RN, PhD, Assistant Professor
Khoury May, RN, BSN, MSN, Clinical Assistant Professor
Madi Dina, RN, TD, MA Education, PhD, Clinical Assistant Professor; BA/BS-BSN Coordinator
Massouh Angela, PhD, MSN, CNS; Assistant Professor, joint appointment with AUBMC as Cardiology Clinical Nurse Specialist
Najjar Assaf Ghada, RN, PhD, Clinical Assistant Professor
Noureddine Samar, RN, PhD, FAHA, FAAN, Professor; Graduate Division Convener; Associate Dean for Academic Affairs since September 2019
Tashjian Hera, RN, MSN, Clinical Instructor
Younan Lina, RN, MSN, DNP, Clinical Associate Professor
Puzanian Houry, PhD, FAHA, Assistant Professor

PART-TIME

Masalkhi Hanadi, RN, MSN, Clinical Instructor
Saadeh Myrna, BS, MSN, Clinical Instructor till mid of May 2019
Sabbagh Rachelle, BS, MSN, Clinical Instructor

ACADEMIC ASSOCIATES

Bou Akl Imad, MD, Associate professor, Critical Care and Pulmonary Medicine, Faculty of Medicine, AUBMC, Lebanon
El-Asmar Rebecca, RN, MSN, AOCNS, Clinical Nurse Specialist, AUBMC, Lebanon
El Jamous Sabath, RN, MSN, Critical Care Clinical Nurse Specialist, AUBMC, Lebanon
Hanna Janane, RN, MSN, AOCNS, Clinical Nurse Specialist, AUBMC, Lebanon
Maalouf Wafa, MS, Nursing Director, St. George Hospital, Lebanon
Nasrallah Mona, MD, Associate Professor of Clinical Specialty, AUBMC, Lebanon
Snow Kaiser Karen, PhD, RN, Clinical Practice Coordinator, University of Maryland Medical Center, USA
Zein El-Dine Salah, MD, Associate Professor of Clinical Medicine, AUBMC, Lebanon

B. STAFF

Abdallah Mira, BS, Administrative & Student Services Assistant
Assaf Chedid Patricia, BA, MBA, Executive Officer/Financial Officer till December 2020
Berbary Najem Lynn, BBA, MBA, Student Services and Recruitment Officer
Daher Rabih, Junior Clerk
Farha Randa, BSN, MSN, MPH, Simulation and Clinical Competency Center Coordinator
Ghalayini Nisrine, BA, Graduate Division Administrative Assistant
Itani Maher, MEN, CCE, IT Manager
Karout Tofic, BEN, Senior IT Field Support Engineer
Zeinati Jeanette, Secretary

C. CCNE ACCREDITATION

- The BSN and MSN programs continue to be accredited by the Commission on Collegiate Nursing Education (CCNE) (http://www.aacn.nche.edu/ccne-accreditation) in the USA.
- HSON is due for reaccreditation in 2022 and the site visit is scheduled for March 7 to 9, 2022
- HSON continues to be a regular member of the American Association of Colleges of Nursing.

D. HONORS, AWARDS, AND RECOGNITIONS

Laila Farhood

- World Psychiatric Association (WPA), elected as a board member for the International Association for Women's Mental Health regional section, Berlin, Germany, December 2017 till present

Lina Kantar

- Recognition as a reviewer in the Journal of the Nurse Education Today (May, 2019).

Dina Madi

- Received a Trophy from the Director of the HSON in recognition of more than 25 years of Service at AUB.

Angala Massouh

- Recipient of the 2019 Best moderated Poster Award at the EuroHeart Care Conference by the Association of Cardiovascular Nursing and Allied Professions, Milan.

Lina Younan

- Certificate from ICN: Global Nursing Leadership Institute (GNLI) Facilitator

E. INTERNATIONAL PARTNERSHIPS

HSON continues to have Memoranda of Understanding (MOUs) to enhance research collaboration and student and faculty exchange with the following institutions:

- Johns Hopkins University School of Nursing
- University of Michigan School of Nursing
- University of Maryland School of Nursing

F. SIGMA THETA TAU INTERNATIONAL (STTI) HONOR SOCIETY

The board of the Chi Iota Chapter is as follows:

- President: Dr. Angela Massouh
- Immediate Past President: Dr. Dina Madi
- President-elect: Mrs. Hera Tashjian 2019, Mrs. Silva Dakessian 2020-21
- Vice President: Dr. Lina Kantar
- Treasurer: Mrs. Rebecca El Asmar 2019, Mrs. Nada Nassar 2020-21
- Secretary: Mrs. Janane Hanna 2019, Mrs. Rachel Bejjani 2020-21
- Counselor: Dr. Ghada Assaf
- Founding President: Dr. Huda Abu-Saad Huijer

Chi Iota Committees

Governance Committee

- Mrs. Ursula Rizk; Chair
- Mrs. Danielle Damianos; Member 2019
- Ms. Rola Awwad; Member 2019
- Dr. Nuhad Dumit, Member 2020-21
- Ms. Mireille Chehade 2020-21

Leadership and Succession Committee

- Mrs. Helen Nuwayhid, Chair 2019
- Dr. Nour Alayan, Member 2019
- Mrs. Tamar Avedissian, Member 2019
- Dr. Nour Alayan, Chair 2020-21
- Mrs. Danielle Damianos, Member 2020-21
- Mrs. Tamar Avedissian, Member 2020-21

G. HSON NEWSLETTER

HSON Newsletter number 8 was circulated in April 2019. The newsletter included:

- A message from the Dean, Dr. Huda Huijer
- Hariri School of Nursing independent status
- PhD program: testimonials from PhD students
- Publications and research
- Incoming faculty
- Students corner: undergraduate and graduate
- Faculty awards and activities
- Student activities
- Events
- In memoriam of Dr. Salwa Makarem

II. FACULTY ACTIVITIES

A. EDUCATIONAL PROGRAMS

BSN:

A total of 197 and 196 undergraduate students were enrolled in 2019 in 2020, respectively. Course descriptions, credit hours, and learning objectives did not change this year as student evaluations were positive. We were, however, required to provide two sections of junior-year courses because of the large class size in 2019. Classes were carried online in 2020 due to COVID 19 lockdowns; however, practicum was carried in the clinical areas. In spring 2020, the practicum of three courses [community health, mental health, and leadership and management in nursing] were integrated to ensure students complete requirements despite the limited clinical sites. For example students in community health selected their in-patients' families in the leadership course to do telehealth awareness about COVID-19 to meet the community clinical requirements. The same for the mental health course, patients were selected during the leadership rotation to do Interpersonal Relation assignment for the mental health course. It is worth mentioning that the clinical hours required for each course was met.

Simulation activities were included in most clinical nursing courses, including practice through skill training and scenarios. The Objective Structured Clinical Examination (OSCE) was used in all clinical nursing courses.

MSN:
A total of 56 students enrolled in the MSN program in October 2019 and 49 in October 2020
Four tracks continue to be offered: Adult Gerontology Clinical Nurse Specialist, Nursing Administration and Management, Psychiatry and Mental Health Clinical Nurse Specialist, and Community and Public Health Nursing. Information on the specific tracks is detailed below:

Adult Gerontology Clinical Nurse Specialist track:

- Two students graduated in 2019 and one in 2020
- A total of 17 students were enrolled in October 2019 and 25 in October 2020
- Students in the Adult Gerontology Clinical Nurse Specialist track completed residencies at AUBMC, Johns Hopkins University and the University of Maryland.

Nursing Administration and Management track:

- Two students graduated in 2019 and three in 2020
- A total of 17 students were enrolled in October 2019 and 12 in October 2020
- Students in the Nursing Administration and Management track completed residencies at the Evidence Based Health Management Unit (EHMU), AUBMC, University of Maryland and the Ministry of Public Health.

Psychiatry and Mental Health Clinical Nurse Specialist track:

- Four students graduated in 2019 and one in 2020
- Ten students were enrolled in October 2019 and four in October 2020
- Students in the Psychiatry and Mental Health Clinical Nurse Specialist track completed residencies at AUBMC.

Community and Public Health Nursing track:

- Four students graduated in 2019 and one in 2020.
- A total of 14 students were enrolled in October 2019 and 15 in October 2020.
- One student completed the residency at the University of Colorado Hospital- Anschutz Medical Campus, Outpatient Pavilion-Health Nexus.

PhD Program:

- Six students were enrolled in October 2019 and nine students in 2020
- Nine new applications were received in the Fall of 2019, six were accepted and three were newly enrolled in the Fall of 2020.

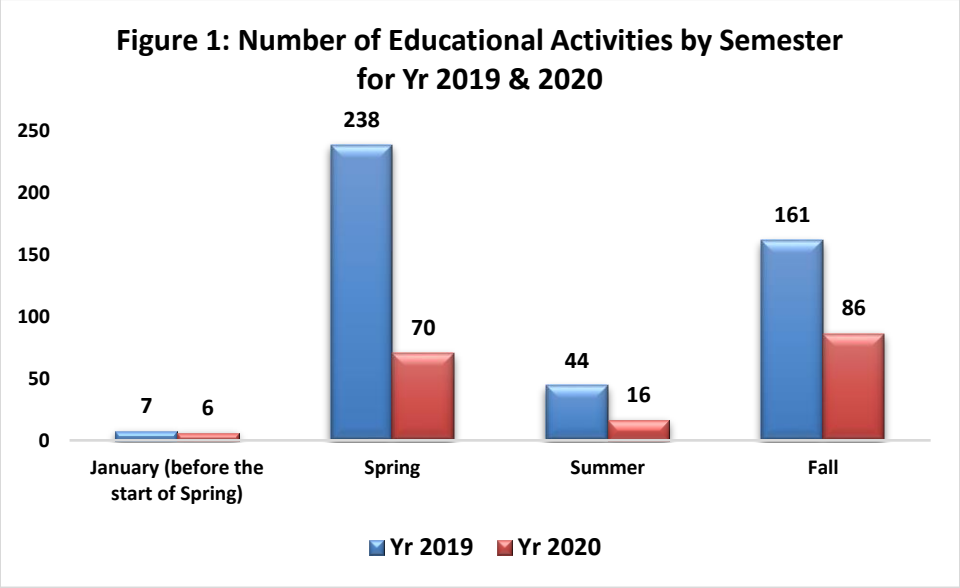
B. SIMULATION TECHNOLOGY at HSON

Academic Year 2019-2020

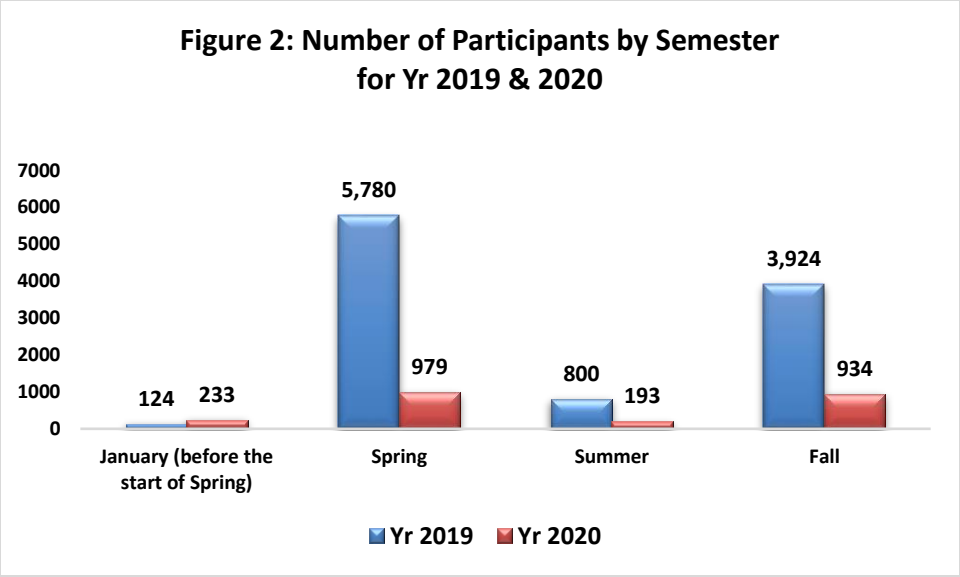
During 2019-2020, the Simulation and Clinical Competency Center (SCCC) provided activities/services – for both AUB and non-AUB users - in line with its mission statement. Users included HSON students enrolled in undergraduate and graduate programs (HSON users), nutrition and dietetics students, medical students, residents, faculty members and nurses from AUB and elsewhere (non-HSON users).

The figures below summarize activities done at the SCCC by semester

In 2020, SCCC supported 178 simulation training activities/ experiences that involved 2339 participants, including HSON and Non-HSON users. When comparing 2020 statistics with that for year 2019, we notice a 60% decrease in activities and 80% decrease in the number of participants. This is expected due to lock down because of COVID 19. For both years, the spring semester had the highest number of activities (53%) and the around the same number of users (Figure 1 & Figure 2 respectively).

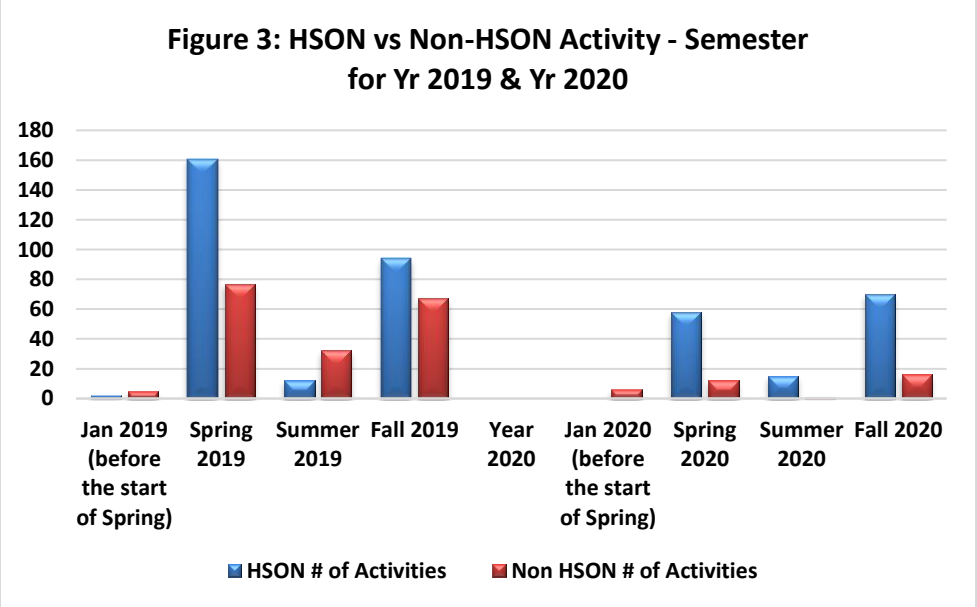


Legend: Educational Activity: each time the lab is utilized regardless of the objectives or content of the learning/teaching that is occurring.

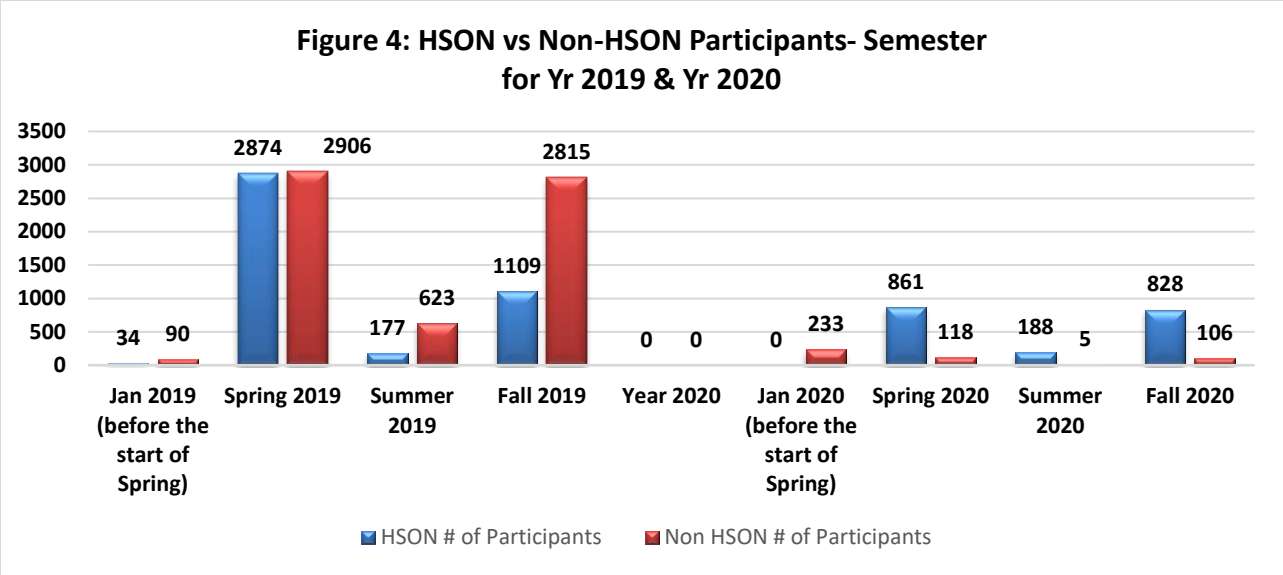


Legend: Participant: a person using the lab whether student, resident, nurse, or employee from AUB/AUBMC community or outside.

During the spring and fall semesters for both years (2020 & 2019), HSON activities outnumbered Non-HSON activities. Only during the summer of 2019 the Lab had more Non-HSON activities- medicine finish their spring semester much later than nursing (see figure 3).



In 2019 and through all semesters, non-HSON users outnumbered HSON users (medicine classes come in big numbers). The exception is year 2020, where we had more HSON users again because of COVID 19 - we restricted access to lab for non-nursing (See figure 4).



C. STUDENT PROJECTS, THESES, RESIDENCIES

MSN STUDENT PROJECTS AND THESES

Name	Track	Defense Date	Project/ Thesis	Project/Thesis Title	Project/Thesis Committee
Melissa Makhoul	Adult Gerontology CNS	February 27, 2019	Thesis	Pain Catastrophizing And Its Relationship With Pain-related Outcomes In Patients With Rheumatoid Arthritis.	Drs. Huda Huijer (Committee Chair), Imad Uthman and Souha Fares
Nadia Omeish	Nursing Administration And Management	April 1, 2019	Project	Marketing Plan for the PhD Program in Nursing Science Introduced At The Hariri School of Nursing	Adviser: Dr. Michael Clinton . Reader: Lina Younan
Lubna Rajab	Psychiatric Mental Health CNS	April 11, 2019	Project	Suicide Loss Survivors: A Toolkit For Mental Health Professionals	Advisor: Dr. Laila Farhood. Reader: Dr. Joseph El Khoury
Reem Salem	Adult Gerontology CNS	April 16, 2019	Project	The Assessment And Management Of Dementia Challenging Behavior In The Emergency Department. A	Reader: Dr. Hala Darwish. Reader: Dre. Eveline Hitti

				Proposed Evidence-Based Algorithm For Emergency Nurses.	
Cynthia Rizkallah	Community and Public Health Nursing	April 23, 2019	Thesis	Exploring the Determinants of Prenatal Education's Utilization among Expectant Women in Lebanon: A qualitative study.	Dr. Gladys Honein (Committee Chair), Labib Ghulmiyyah, Mona Nabulsi and Michael Clinton
Nay Ezzeddine	Community and Public Health Nursing	April 25, 2019	Thesis	Validation of the Heart Failure Index 9-Item European Heart Failure Scale Arabic Version (EHFScB Scale) Based on a Quantitative Survey Study	Drs. Gladys Honein (Committee Chair), Samar Noureddine, Angela Massouh and Monique Chaaya
Zepur Aharonian	Nursing Administration	May 2, 2019	Thesis	Exploring Chronic Fatigue Among Nurses Working In Pediatric Units In Lebanon.	Drs. Lina Younan, Michael Clinton (Committee Chair), Souha Fares and Mona Nabulsi
Sarah Abou Rihan	Psychiatric Mental Health CNS	May 3, 2019	Project	Anxiety And Depression In High Schools' Students in South Lebanon	Advisor: Dr. Laila Farhood. Reader: Dr. Fadi Maalouf
Elsa Jarawan	Psychiatric Mental Health CNS	May 3, 2019	Project	Designing An Educational Program To Promote Mental Health And Reduce Depression Among Older Adults	Advisor: Dr. Laila Farhood. Reader: Dr. Marina Adra
Linda Fakhreddine	Psychiatric Mental Health CNS	September 6,2019	Project	Street Children In Lebanon: The Case of Syrian Refugees A Community Mental Health Guideline Program Development	Advisor: Dr. Laila Farhood. Reader: Dr. Rima Habib

Yara Hazouri	Nursing Administration	September 6, 2019	Thesis	Quality Of Nursing Work Life Among Lebanese Nurses	Dr. Nuhad Dumit (Committee Chair); Drs. Suzanne Dhaini and Monique Chaaya
Rasha Itani	Nursing Administration and Management	January 8, 2020	Project	Low Back Pain Among Medical Surgical Nurses In Lebanon	Advisor: Dr. Lina Younan. Reader: Dr. Michael Clinton
Nada Issa	Community and Public Health Nursing	January 17, 2020	Project	Identifying Additional Measures For The Psychosocial Aspect Of Fatigue In Multiple Sclerosis	Adviser: Dr. Gladys Honein. Reader: Dr. Hala Darwish
Yvonne Jleilaty	Adult Care Nursing	January 27, 2020	Thesis	Knowledge And Self-Management of Patients With Chronic Kidney Disease	Drs. Samar Noureddine (Committee Chair); Drs. Souha Fares and Ali Abu Alfa.
Mohammad Taha	Adult Gerontology Clinical Nurse Specialist	January 28, 2020	Thesis	Symptom Clusters Severity And Effects On Quality of Life Of Hospitalized Oncology Older Adults In Lebanon	Dr. Huda Huijer (Committee Chair); Drs. Souha Fares and Arafat Tfayli
Roula Shehadeh	Nursing Administration	February 17, 2020	Project	Exploring Brownout In A Sample Of Lebanese Nurses	Advisor: Dr. Michael Clinton Reader: Dr. Souha Fares
Hanadi Saad	Community and Public Health Nursing	Friday 25 January 2019	Project	Exploring Health Literacy In Patients With Non-Communicable Disease In South Lebanon	Advisor: Mrs. Mary Arevian. Reader: Dr. Samar Noureddine
Shadi Al Halabi	Nursing Administration	June 19, 2020	Project	Lebanese Nurse Managers' Selections of CNE offerings: Relevance to their Roles and Responsibilities	Adviser: Dr. Nuhad Dumit- Reader: Dr. Souha Fares

Malek AL Makkouk	Nursing Administration and Management	June 19, 2020	Project	A Continuing Professional Development Program for Nurse Managers	Advisor: Dr. Nuhad Dumit Reader: Dr. Lina Younan
Ammar Zahreddine	Dual degree of Master of Science: Psychiatric Mental Health Clinical Nurse Specialist Track and Community and Public Health Track	June 22, 2020	Thesis	Health Related Quality of Life in Adult Patients Following Hematopoietic Stem Cell Transplant	Dr. Laila Farhood (Committee Chair); Drs. Samar Noureddine & Ali Bazerbachi.
Joelle Massouh	Adult Gerontology Clinical Nurse Specialist	June 22, 2020	Thesis	Social Support with Resilience as Moderated by Depression, Anxiety, and Personality Type in Multiple Sclerosis Patients	Dr. Hala Darwish (Committee Chair); Drs. Souha Fares, Pia Zeinoun, & Samia Khoury
Christine Helou	Nursing Administration and Management	June 8, 2020	Project	Charging Medical Supplies: The Best Practice	Advisor: Dr. Lina Younan. Reader: Dr. Nuhad Dumit
Ahmad Termos	Adult Gerontology Clinical Nurse Specialist	June 17, 2020	Project	Treatment Delays for Patients with Acute Ischemic Strokes	Adviser: Dr. Samar Noureddine Reader: Dr. Mazen Al Sayed
Dounia Iskandarani	Adult Gerontology Clinical Nurse Specialist	Friday 22 January 2021	Thesis	Comparing Patient Outcomes of Transcatheter Aortic Valve Implantation versus Surgical Aortic Valve Replacement	Dr. Samar Noureddine (Committee Chair); Drs. Angela Massouh & Fadi Sawaya
Mireille Harakeh	Community and Public Heath	Monday 18 January 2021	Project	Factors Influencing Implementation Of The Accreditation Process In Primary	Adviser: Dr. Gladys Honein Reader: Dr. Lina Younan

				Healthcare Centers In Lebanon.	

III. STUDENT- RELATED ACTIVITIES

STUDENT- RELATED ACTIVITIES

A. STUDENT ENROLLMENT/SCHOLARSHIPS

The table below shows the student enrollment in October 2020 for the Year 2019-20 and October 2021 for the Year 2020-21.

Student Enrollment	BSN		MSN		PHD	
	2019-20	2020-21	2019-20	2020-21	2019-20	2020-21
Total Applied	610	420	32	37	9	11
Acceptance	255	230	26	23	3	6
New Enrolled	**84**	**80**	**16**	**5**	**3**	**3**
Yield	33%	35%	62%	22%	55%	50%
Committed	78	72	16	5	3	3
Total Enrollment	**197**	**196**	**56**	**49**	**6**	**9**
Female %	69%	72%	82%	80%	83%	89%
Male %	32%	28%	18%	20%	17%	11%
Lebanese %	89%	90%	89%	90%	100%	100%
International %	12%	10%	11%	10%	0%	0%
BSN Graduates	40	52	7	10		

- A total of **80** interviews were conducted in May and June 2019 with new and currently registered BSN students for HSON Scholarships. **Forty one** were recommended, and **33** were awarded the scholarship and enrolled. The 60% (Financial Aid and HSON scholarship) is still attracting students who select a nursing major as their 3rd, 4th, or 5th choice when they apply to AUB.

- In 2020, due to the limited scholarship funds available, HSON relied mainly on the Hariri Endowed Fund. In the Fall 2020-21, HSON has coordinated with the Office of Financial Aid to offer additional financial support to new students. As a result, all new students received additional Financial Aid up to 60% in total. Twenty one students received additional financial support (19 new and 2 continuing).

B. STUDENT RECRUITMENT AND MARKETING

Student recruitment and marketing of the BSN and MSN programs remain a priority at HSON. The marketing strategy for student recruitment in 2019 and 2020 included various activities:

- **Graduate Open House:** HSON participated in the Graduate Open House on February 20, 2019 organized by the Graduate Council. The event was very successful; 132 candidates expressed

their interest in the MSN programs and 36 were interested in the PhD in nursing science. A list of potential applicants is documented for recruitment and follow up on admission applications.

- **School visits:** Due to the October 17 national uprising/revolution and road blocks, schools were not flexible in providing a one-hour for student orientation about HSON as they were closed several days due to the situation. As an alternative, the power point presentation has been sent to some student counselors to disseminate to their student body.

- **AUBMC Open House:** On April 23, 2019, HSON participated in the AUBMC Open House to recruit nurses from all over Lebanon. The SSO had a booth to promote the MSN and PhD programs.

- **Marketing and promotion of HSON academic** programs is also done through:
  - Social media: In addition to Facebook, LinkedIn and YouTube, a twitter account has been created for HSON.
  - Nursing Centralized Application System (CAS) portal: to recruit students from North America for the MSN program and for the BA/BS-BSN second degree accelerated program.

- In 2020, recruitment efforts were affected by October 17 revolution and COVID-19 pandemic. HSON has not done any school visit in year 2020. However, HSON organized in January and February 2020 a recruitment program with different scout groups in Lebanon where they attended informational sessions about nursing, first aid sessions, scenarios at the simulation lab and relevant games. In addition, HSON participated in weekly virtual orientation sessions, in coordination with the Office of Admissions to promote the UG program.
- At the graduate level, HSON participated in the Graduate Open House that was organized in February 19, 2020 to promote the MSN and the PhD program.

- An Undergraduate Virtual Open House in April 2020 replaced the AUB school fair and due to COVID-19 pandemic, the orientation was online and attracted more than 400 participants. HSON Dean, faculty, staff and students participated in the open house. A follow up was done with interested applicants a week later, where they were given the opportunity to attend online classes and shadow our nursing students during their clinical practice. Interested applicants provided positive feedback on the orientation experience and ended up by applying and enrolling in the BSN program.

C. STUDENT ACTIVITIES

Nursing students were involved in various community projects and activities in their Community Course and in events organized by the Nursing Students Society (NSS) in 2019:

- **New Student Orientation:** During the orientation of newly-enrolled students, some undergraduate and graduate students provided testimonials and success stories about the nursing profession.
- **AUB Mentorship in Nursing:** The AUB Mentors in Nursing (AMIN) program continues to provide a lot of support to new students, by guiding them into the registration process, informing them about the student life, etc.

- **School Fair:** BSN and MSN students participated in the AUB School Fair that was held on Campus, from April 1- April 17, 2019. On April 21, 2020, students presented their testimonials in the Virtual Open House that replaced the school fair. The school fair and the virtual Open House was organized by the office of admissions and was open to students from different high schools.

- **The AACN Graduate Nursing Student Academy (GNSA):** Ninar Skheita was selected to be the new GNSA liaison for HSON graduate students for the AY-2019-20. She informs graduate students about upcoming events, news, conferences, career fairs, etc.

- **University Research Volunteer Program (URVP)**: Occasionally, undergraduate nursing students volunteer to participate in the University Research Volunteer Program (URVP) organized by AUB.

- **AUB Outdoors:** Nursing students participated in the AUB Outdoors activities in May 2019.

- **NSS elections:** Elections for the Nursing Student Society were held in May 2019 and a cabinet was formed.

- **SRC and USFC elections:** Elections for the SRC and USFC were cancelled in 2019 due to the national uprising/revolution and were conducted online in 2020; it is worth mentioning that it was the first nursing students had seats in the USFC as an independent school.

- **AMIN coffee hour: In the fall 2019-20,** AMIN mentors organized a coffee hour for new and returning students so new students can learn from senior students about the program, activities, etc.

- **Trivia Night:** On March 6, 2019, the first Trivia Night was held by the Nursing Students Society (NSS). Students tested their general knowledge and fun spirits and got competitive. In the end, the winning three teams got valuable prizes from sponsors: Latte Art, Spiced and Sliced, The Conut, Roadster Dinner, and Crepaway!

- **LGBT Health Workshop:** On March 17, 2019, the NSS and LEBMASH held the LGBT Health Student Workshop. This workshop provided students with basic knowledge about sexual health, health concerns, and disparities of lesbian, gay, bisexual, and transgender communities. The workshop used active learning strategies to provide students with opportunities to practice affirming and inclusive health regardless of sexual orientation or gender identity.

- **Other activities:**
  - In 2020, the Nursing Student Society conducted Christmas Cookies event-fundraising, Toys and books drive drop off, and Psychiatric awareness campaign on mental health.
  - Following the August 4, 2020 blast, nursing students were involved in several community projects in Beirut, Karantina for screening, blood/sugar tests, promoting COVID-19 precaution

measures and assessing health care needs. These activities were featured in the international AACN newsletter.

D. OTHER STUDENT SERVICES AND RESOURCES

- **Credentialing Requests of Nursing Graduates**

At the request of the Student Services Office, a new online credentialing request has been developed by the IT Department that enables nursing alumni to request and pay for their credentials online. The service went live in early 2019.
With the great demand for certification in different areas of nursing, the number of requests for credentials has increased from 20 in 2019 to 28 in 2020. The majority of requests were submitted to the Commission on Graduates of Foreign Nursing Schools (CGFNS) in the USA.

- **Electronic Archiving System**

HSON is trying to implement an electronic archiving system for student files in coordination with the IT team and other departments at AUB. HSON attended several training sessions on LaserFiche archiving system, awaiting the final approval to get the License.

- **Online Student Orientation and Advising**

The New student Orientation and group advising were held online in the Fall 2020-21. The orientation is now created as a course on Moodle with different live sessions, videos, visuals and other instructions to guide the new students. In addition, the AMIN mentors played a major role to help the students to have a smooth integration in the program. To minimize the registration problems and answer all new student inquiries, the Student Services Officer held several live sessions to address all student registration issues, minimize the registration problems and answer all new students inquiries.

IV. RESEARCH AND SCHOLARLY ACTIVITIES

A. CURRENT HSON FACULTY RESEARCH

Principal Investigator: Lina Abi Fakhr Kantar
Preceptors' Perspectives on their Teaching Practice: Implications for Academia and Service
Aim: To assess the needs of clinical instructors and preceptors for preparation to their role
Co-investigator: Danielle Damianos
Funding: Center for Teaching and Learning – AUB
Status: Data Collection

Principal Investigator: Huda Abu-Saad Huijer
Palliative Care in Older Adults in Lebanon
The purpose of this study is to evaluate the quality of palliative care (PC), the quality of life (QoL), symptom management, and functional ability among hospitalized older adults in need of palliative care in Lebanon.

Co-investigators: Marina Adra, Suzan Dhaini, Souha Fares, Hussam Ghusn, Ramzi Hajjar, George Karam, **Samar Noureddine**
Funding: CNRS
Status: Data collection completed. Articles in progress.
Secondary Data Analysis: Thesis completed by Mohamad Taha 'Symptom Clusters Severity and Effects on Quality of Life of Hospitalized Oncology Older Adults in Lebanon'

Principle Investigator: Huda Abu-Saad Huijer
Chronic Pain: The Development and Psychometric Validation of an Arabic-Language Version of the Pain Catastrophizing Scale (PCS-A)
Chronic pain is believed to be a disease on its own and has been increasing in prevalence. The 13-item Pain Catastrophizing Scale (PCS) is the most widely used measure of pain-specific catastrophizing and assesses three dimensions: rumination, magnification, and helplessness. The purpose of the project is to develop and psychometrically evaluate PCS in Arabic among a sample of 150 adult chronic pain patients in Lebanon.
Co-investigators: Souha Fares, Douglas French
Funding: Pfizer
Status: Completed. One article published and others in preparation.
Secondary Data Analysis: Thesis completed by Melissa Makhoul 'The relationship between pain catastrophizing and pain-related outcomes in patients with Rheumatoid Arthritis: A secondary analysis of research data'.

Primary investigator: Marina Adra
Impact of person-centered care on dementia-related aggressive behaviors and quality of life on people with dementia living in nursing homes in Lebanon: a feasibility study.
The study aims at evaluating the impact of person-centered care (PCC) on aggressive symptoms of dementia and quality of life of older residents living with dementia**.**
Co-investigator: Hala Darwish
Funding: URB
Status: Ongoing

Principal investigator: Marina Adra
Promoting a Culture of Community in Nursing Homes in Lebanon through Forging Partnerships
The aim of this study is to contribute to the understanding of how the formation of significant relationships in care homes in Lebanon may support the development of a culture of community.
Co-investigators: Zepur Aharonian, Abla Sibai
Funding: URB
Status: Data collection completed. The PI is in the process of writing the manuscript.

Principal Investigator: Farah Ahmad
Perceptions of Complementary and Alternative Medicine (CAM) among users, providers and health care workers in Lebanon
Recently, there has been a renaissance of interest in Complementary and Alternative Medicine (CAM) therapies. By exploring the perceptions of CAM users/non-users, providers and health care workers,

this study aims to examine the knowledge, attitudes, and practices of CAM use, as well as the related barriers and enablers.
Co-investigators: Gladys Honein
Funding: None
Status: Data analysis in progress

Principal Investigator: Elie Akl
Kickbacks between physicians and healthcare facilities
The objective of this study is to explore the interactions between physicians and laboratory and radiological diagnostic centers in Lebanon.
Co-investigators: Gladys Honein, Alaa Ousta, Rola Cheiato, Maya Diab, Michael Bejjani, Mohammad Chahrour
Funding: None
Status: Data analysis in progress, manuscript writing

Principal Investigator: Nour Alayan
Using simulation-based experiential learning to integrate Screening, Brief Intervention, and Referral to Treatment (SBIRT) in the nursing curriculum.
It aims at examining the effect of the simulated Screening, Brief intervention, and Referral to Treatment (SBITR) teaching on nursing students' attitude, knowledge skills and performance of SBIRT techniques in addressing substance use in pregnant women and adolescents.
Co-investigators: Tamar Avedissian, Dina Madi, Ghada Najjar Assaf.
Funding: Center of Teaching and Learning (CTL)
Status: Ongoing

Principal Investigator: Nour Alayan
Nurses' and Pediatricians' Attitudes, Perceptions, and Practices of Screening, Brief Intervention, and Referral to Treatment (SBIRT) for Adolescent Substance Use: A Multisite Cross-Study in Primary Care and School Settings
This study aims to explore nurses' and pediatricians' attitudes, perceptions, and practices regarding adolescent substance use screening and interventions.
Co-investigators: Tamar Avedissian, Ghada Assaf, Farid Talih
Funding: URB
Status: Ongoing

Principal Investigator: Ghada Assaf
Psychological well-being in overweight and obese adolescents in Lebanese schools: A cross-sectional study
This study aims to investigate whether overweight and obesity are risk factors for psychological wellbeing among adolescents.
Co-investigators: Gladys Honien, Dr. Fadi Maalouf, Dr. Lamis Jomaa
Funding: University Research Board
Status: Data collection in progress

Principal Investigator: Tamar Avedissian

The influence of overprotective parenting on growth and development of children with congenital heart disease

The aim of this systematic review is to explore the influence of overprotective parenting on growth and development of toddlers and preschoolers with Congenital Heart Disease.

Co-investigator: Samar Noureddine, Layal Hneiny, Sally Atwi

Funding: None

Status: Full text-screening

Principal Investigator: Dr. Marlene Chakhtoura

Mediterranean, Low Carbohydrate and Control diet in Obese Patients on Liraglutide: a Randomized Controlled Trial (primary outcome: Arterial Stiffness).

Specific Aims:

1. We will assess the effect of various dietary interventions on cfPWV (primary outcome) in obese patients starting on Liraglutide, at 6 months after randomization.
2. To assess the effects of various dietary interventions on visceral adipose tissue (VAT) and other parameters of body composition (lean mass, total fat mass, and subcutaneous fat mass) in obese patients starting on Liraglutide, at 6 months after randomization.

Co-PI: Dr. Lara Nasreddine

Co-I: Dr. Houry Puzantian (Overseeing Primary Outcome: Cardiovascular profile/Arterial stiffness)

Funding: Farouk Jabre Interfaculty Award, AUB

Status: Ongoing

Principal Investigator: Hala Darwish

Interacting with Nature Using Virtual Reality: A Pilot Intervention to Restore Cognitive Fatigue in Patients with Multiple Sclerosis (MS)

Examine the effect of 12 weeks interactive virtual reality (using low cost improved mobile VR headsets), nature compared to urban environment, on cognitive fatigue in MS patients.

Co-investigator: Mariette Awad

Funding: Collaborative Research Stimulus (CRS) 2 years and National MS society

Status: IRB review

Principal Investigator: Hala Darwish

Longitudinal Effect of Vitamin D3 Replacement on Cognitive Performance and MRI Markers in Multiple Sclerosis Patients: A Single-Blind Randomized Clinical Trial

This is a longitudinal single-blind randomized trial to test the effects of high compared to low dose Vitamin D3 supplementation on cognitive performance at 6 and 12 months, and MRI measures of 12 months duration.

Co-investigators: Samia Khoury, Nabil El Ayoubi, Salem Hannoun

Funding: MPP

Principal Investigator: Suzanne R. Dhaini
Implicit Rationing of Nursing Care among Lebanese Patients (Rational) - A Longitudinal Study on the Variations, Trends, Predictors, and Outcomes of Rationed Nursing Care
The purpose of this study is to investigate the variations and trends of rationing of nursing care on a shift-level basis over time on medical, surgical, and pediatric units in a Lebanese university affiliated hospital and its association with work environment factors, as well as nurse and patient outcomes.
Co-investigators: Michael Simon, Dietmar Ausserhofer, **Nuhad Dumit, Huda Abu-Saad Huijer**
Funding: MPP
Status: Dissemination. Four papers published. Last paper work in progress.

Principal Investigator: Dr. Yanis Ben Amor, University of Columbia
Lead Investigator in Lebanon: Nuhad Dumit
REfugees Act and Communicate for Health (REACH): Using Technology to Increase Health Literacy and Health Care Access for Refugees in Turkey and Lebanon
This project aims to use a mixed methods research approach to explore and promote use of digital technologies among young refugees to improve their access to health information and services in Turkey and Lebanon.
Co-investigators: Dr. Ozge Karadag Caman, Dr. Selma Karabey
Funding: Center for Sustainable Development, Earth Institute, Columbia University
Status: Under IRB revision

Principal Investigator: Nuhad Dumit
Perspectives of Registered Nurses on Refugee Healthcare in Lebanon and Jordan: A Multi-site Cross-sectional Study (PROFILE)
The overall aim of this research project is to explore the perspectives of Lebanese and Jordanian nurses on the effect of the influx in healthcare demands due to the protracted Syrian refugee crisis on the health of nurses working in hospitals and primary healthcare centers in Lebanon and Jordan and to examine how this crisis is impacting the quality of their services.
Co-investigators: Gladys Honein, Ibtissam Al Zaru, Muntaha Gharaibeh, Nancy R. Reynolds, Patricia M. Davidson, **Suzanne R. Dhaini**
Funding: Global Health Institute
Status: Qualitative data collection completed; manuscript in press to the *Journal of Nursing Scholarship*; quantitative data collection commenced in March 2019. Quantitative data collection in process.

Principal Investigator: Nuhad Dumit
Exploring Continuing Education Learning Needs of Nurse Managers in Lebanon
The overall aim is to assess the continuing education needs of nurse managers in Lebanon
Co-investigator: Souha Fares
Funding: URB
Status: Manuscripts in preparation.

Principal Investigator: Souha Fares

Abnormal Blood Pressure Complexity and Fluctuation: An Indicator of Vascular Disease Independent of Blood Pressure

The research proposal is focused on the use of non-conventional blood pressure variability (BPV) metrics (complexity measures and detrended fluctuation analysis exponents) to examine the potential role of this novel cardiovascular risk factor in the adult Lebanese population. Our primary objective is to determine the effect of weight loss through bariatric surgery on blood pressure dynamics in obese and morbidly obese normotensives (No-HTN), pre-hypertensive (pre-HTN), and hypertensive patients (HTN). We also aim to **s**how that beat-to-beat BP complexity and fluctuation metrics will provide superior discrimination between No-HTN, pre-HTN, and HTN subjects, and will differ for demographic sub-cohorts. Another objective is to quantify the impact of BPV on the normal and shear stresses at the walls of the blood vessels.

Co-investigators: Kamal Badr, Bassem Safadi, Issam Lakkis

Funding: MPP

Status: Data collection in progress.

Principal Investigator: Laila Farhood

Promoting psychosocial and mental health care through community-based educational workshops for teachers and parents: A follow-up to mental health assessment in civilians exposed to traumatic war events in South of Lebanon

This study aimed to address the needs of children affected by wars in South Lebanon. It consisted of two phases whereby in the first phase focus groups with teachers and parents were conducted to identify their mental health needs. The second phase employed a quantitative, quasiexperimental pre-post design in which school-based educational programs were administered to the same sample. The Strengths and Difficulties Questionnaire (SDQ), General Health Questionnaire (GHQ-28) and Attitudes towards Mental Illness Questionnaires (ATMIQ) were administered before and after the intervention, and at 1.5 years follow-up.

Co-investigators: Dr. Fadi Maalouf

Funding: MPP/URB

Status: Two papers were published so far and additional ones coming soon

Principal Investigator: Laila Farhood

Empowering Families cope with adversity: Improving family resilience and individual wellbeing

The aim of this research is to develop and evaluate the impact of a family-based MHPSS intervention to determine its acceptability, feasibility, and initial impact on improving family cohesion and reducing distress.

Sub-objective 1: Adapt an existing evidence-based multi-family MHPSS programme to meet the cultural and contextual needs

Sub-objective 2: Conduct a pilot trial to assess impact on family cohesion and individual distress and investigate acceptability and feasibility related to the implementation and uptake

Co-investigators: International Medical Corps UK (lead applicant/partner), American University of Beirut (sub-partner), Johns Hopkins University School of Public Health (sub-partner)

(Primary) Claire Whitney, MIA, LICSW Senior Global Mental Health and Psychosocial Support Advisor International Medical Corps UK

Funding: European R2HC funding
Status: Was shortlisted and got soft money for 1st phase however it was not funded due to AUB overhead.

Principle Investigator: Dr. Ghada El-Hajj Fuleihan
Expanding Capacity Building in Non-Communicable Diseases: The Scholars in Health Research Program (SHARP) at the American University in Beirut
Specific Aims:
1. Redesign and deliver the Summer Certificate into a Blended format to enhance flexibility
2. Develop and deliver new advanced quantitative methods modules to expand its core curriculum
3. Launch a mentorship and Career Advancement Network Program (SHARP CAN)
4. Launch the Scholars Research Fellowship Grant Program, to provide SHARP trainees with stipend support, to complete an NCD project.
Co-PI: **Huda Abu-Saad Huijer**
Mentor: Samar Noureddine
Co-Mentor and Instructor: **Dr Houry Puzantian**
Funding: NIH D43 Fogarty International Research Training Award (NCD-LIFESPAN)
Status: Ongoing

Principal Investigator: Gladys Honein
Towards an Organized Colorectal Cancer Screening Program: An Action-oriented Research
This project is considered a pilot study to be used as a tool to guide decision-makers adopt evidence-based approaches at a national level
Co-investigators: Tamar Kabakian, Marco Badrus, Hana Nimer, Caren Daou, Nathalie Awada, Layla Al Hajj, Rasha Ghassani, Malak Tabaja
Funding: Global Compact Network Lebanon
Status: Data collection completed; data analysis in progress.

Principal Investigator: Gladys Honein
Community Health Assessment of Needs and Continuous Empowerment (CHANCE) - An experience-based co-design approach
To assess the learning needs of community-based nurses and to develop an intervention training program to address the top priority learning need.
Co-investigators: Nuhad Dumit, Nathalie Richa, **Mary Arevian, Tamar Avedissian**, Bahia Abdallah
Funding: URB
Status: Manuscript writing

Principal Investigator: Gladys Honein
Patients' Perceptions of Nurses and Physicians' Listening Behaviors, Education, and Empathy
The purpose of this study is to understand the ways in which medical/ surgical patients during their hospital stay at AUBMC recognize, identify, and understand the ways in which bedside nurses' and physicians' behavior conveyed aspects of communication (listening versus the absence of listening, empathy projected, interpersonal skills, and education provided by nurses and physicians). The

objective is to assess patients' perception regarding communication by the physician and nurse and how this affects patient experience and satisfaction.

SEEK Trial: The effect of increased Self- Efficacy and Knowledge (using an innovative psychosocial SRH package) on sexual and reproductive health service use among young refugee women and adolescents
We aim to develop and adapt a low intensity multi-component psychosocial intervention, infused with sexual and reproductive health (SRH) knowledge and focused on empowering self-efficacy around SRH

use, particularly pertaining to the use of selected SRH services. The package is being proposed to empower goal setting, communication skills, problem management, stress management, as well as self-efficacy on use of SRH services. Ultimately, the improved use of SRH services could translate to improved SRH outcomes among refugee populations, such as averting unplanned pregnancies, reducing complications of abortion, and sexually transmitted infections among the refugee population.
Co-investigators: Dr. Fouad Fouad, Dr. Antoine Abu Musa, Dr. Tima Al Jamil, Dr. Myrna Doumit**, Dr. Gladys Honein**

Acceptability of Mobile Health Intervention for Supportive Pain Management for Adolescents with Cancer
This study aims to assess the acceptability of a mobile health application (app) for supportive pain management in adolescents with cancer.
Co-investigator: Dr. Myrna A.A. Doumit
Funding: University Research Board (URB).
Status: data collection in progress

Principal Investigator: Angela Massouh
Dyad Engagement in Heart Failure Self-Care
The primary aim of this study is to identify patient and dyadic determinants of self-care in heart failure care dyads while controlling for dyadic interdependence. Secondary aims of this study are: (1) to typify distinct patterns of heart failure patient-caregiver dyads engagement in self-care and link these patterns to heart failure disease outcomes and (2) to establish a neurocognitive profile of the heart failure patient and determine whether an association exists between the severity of heart failure and cognitive abilities as well as cognitive abilities and self-care.
Co-investigator: Drs. Hala Darwish, Souha Fares, and Huda Huijer
Funding: University Research Board at the American University of Beirut
Status: Data Collection

Principal Investigator: Angela Massouh

Appraisal, Burnout, and Coping in Dyads Living with Chronic Illness: The ABCs of Informal Caregiving

The primary aim of this study is to explore quality of life, family relationships, and health outcomes of dyads living with chronic illnesses.

Co-investigator: Drs. Nour Alayan [HSON] and Samar Noureddine [HSON]

Funding: Doha International Family Institute at Qatar Foundation

Status: Starting

Principal Investigator: Angela Massouh

REflective Simulation-Based e-Training on Motivational Interviewing for Interprofessional Teams [RESeT-MI].

Objectives of this study are to: [1] develop a simulation-based reflective e-training module [RESeT-MI] on Motivational Interviewing [MI] for interprofessional [IP] health students; [2] assess the impact of RESeT-MI on knowledge, attitudes, and confidence; [3] objectively measure MI fidelity using a simulated patient interview; and [4] explore whether self-reflection can promote reflective learning.

Co-investigator: Dr. Nour Alayan

Resuscitation in the Intensive Care Unit: A Survey of Physicians in Lebanon

The aim of this study is to explore the practices, attitudes, and challenges experienced by intensive care physicians related to in-hospital resuscitation. Lime Survey methodology was used and the final sample included 30 members of the Lebanese Society of Critical Care Medicine and 57 members of the Lebanese Society of Cardiology.

Co-investigators: Ahmad Husari, Mira Obeid, Hussain Isma'eel

Funding: In-kind support by the Vascular Medicine Program, AUBMC

Status: Manuscript under review by PLOSOne.

Principal Investigator: Samar Noureddine

Survey of the Knowledge, Attitude, and Practices Related to Out of Hospital Resuscitation Among Nurses in Lebanon

The aims of this study are to: 1) examine the knowledge, attitudes, and practice of nurses in Lebanon related to out of hospital cardiopulmonary resuscitation, and 2) identify factors associated with the willingness of nurses to attempt resuscitation outside the hospital setting. The study uses a descriptive quantitative design. A total of 692 were recruited from 30 hospitals randomly selected from the 5 governorates, and 162 nurses working in primary health care centers. The self-administered questionnaire developed for this study asked about the training received by nurses in resuscitation and their related knowledge, experience, and attitudes regarding out of hospital cardiac arrest resuscitation, and the perceived importance of factors that may influence the nurse's decision to attempt resuscitation outside the hospital setting, in addition to demographic questions.

Co-investigators: Tamar Avedissian, Nina Khatib, Joanna Irani

Funding: In kind support by the Order of Nurses in Lebanon

Status: Manuscript submitted to Journal of Community Health.

Principal Investigator: Saif Al Quaisi

Title: The Effects of Concurrent Physical and Psychosocial Demands on Muscle Tension, Perceived Workload, and Performance

The goal of this research is to explore the impact of two psychosocial factors on the risk of developing an MSD, which included time pressure and workplace distractions. The specific objectives of this research were to examine the concurrent effects of physical factors and psychosocial factors on muscle activation, mental performance, and the perceived workload level.

Research/Continuing Education Seminars

The HSON Research Committee (RC) organized a series of research seminars. Below is a list of seminars.

- ✓ Dr. Marco Bardus, February 20, 2019. Title: Self-directed Mobile Intervention to Promote Weight Control Among Employees of a Lebanese University (WaznApp)
- ✓ Dr. Carmen Loiselle, May 21, 2019. Title: Optimizing Patients' Experience in Oncology: Needs, Preferences, Access and Satisfaction with Cancer Care
- ✓ Dr. Mahmoud Nadar, September 30, 2019. Title: Telehealth Application in Clinical Nursing Practice: How Can It Be Used?
- ✓ Dr. Souha Ballout, December 11, 2019. Title: Disparities Research: From ideas to a research program.
- ✓ Dr. Faysal El Kak, February 17, 2020: Integrating Sexual Health in Clinical Care: Why and How?
- ✓ Dr. Samia Khoury, February 21, 2020: Mentorship in Research

- ✓ Dr. Sabina De Geest, Tuesday April 14, 2020. Title: Implementation Science: Making Research Findings more Powerful for Use in Clinical Practice

C. EDITORIAL POSITIONS

Huda Abu-Saad Huijer

1994 Ongoing	Associate editor and later member of Editorial Board, International Journal of Nursing Studies
1999 Ongoing	Editorial Board, Journal of Transcultural Nursing
2005 Ongoing	Editorial Board, Journal of Nursing Scholarship
2005 Ongoing	Reviewer, European Journal of Pain
2006 Ongoing	Editorial Board, Japanese Journal of Nursing Science
2008 Ongoing	Reviewer, Lebanese Medical Journal
2009 Ongoing	Reviewer, Pediatric Pain Newsletter, IASP
2011 Ongoing	Reviewer, Journal of Palliative Medicine
2011 Ongoing	Editorial Board, IASP Insight Newsletter
2011 Ongoing	Editorial Board, Nursing Children and Young People
2012 Ongoing	Reviewer, Health Promotion International
2012 Ongoing	Reviewer, Europe's Journal of Psychology
2012 Ongoing	Reviewer, Journal of Pain and Symptom Management
2013 Ongoing	Editorial Board, Annals of Palliative Medicine
2014 Ongoing	Editorial Board, Alexandria Scientific Nursing Journal (ASNJ)
2019	Reviewer, the Lebanese Science Journal

Nour Alayan

2020 Ongoing	Reviewer, Drug and Alcohol Dependence
2015 Ongoing	Reviewer, Journal of Addictions Nursing
2015 Ongoing	Reviewer, Japan Journal of Nursing Science

Mary Arevian

2006 Ongoing	Reviewer, Journal of Interprofessional Care
2006 Ongoing	Reviewer, Journal of Transcultural Nursing
2008 Ongoing	Reviewer, Journal of Women's Health
2012 Ongoing	Reviewer, The Japanese Journal of Nursing Sciences
2012 Ongoing	Reviewer, Journal of Health Promotion International

Hala Darwish

2011 Ongoing	Editor, The AUBMC Abu Haidar Neuroscience Institute Newsletter
2012 Ongoing	Reviewer, Electrophoresis (Peer Reviewed Journal)
2012 Ongoing	Reviewer, Journal of Neurotrauma
2012 Ongoing	Reviewer, Journal of Clinical Immunology
2013 Ongoing	Editorial Board, Frontiers of Neurotrauma
2015 Ongoing	Reviewer Plos One
2017 Ongoing	Journal of Nursing Scholarship

2019-Ongoing Journal of the American Medical Association

Nuhad Dumit

2008 Ongoing Reviewer, Journal of Nursing Management
2009 Ongoing Reviewer, Journal of Interprofessional Care
2013 Ongoing Reviewer, BMC Nursing Journal by BioMed Central
2014 Ongoing Reviewer, Journal of Clinical Nursing Research
2014 Ongoing Editorial Board, Nursing Management, Royal College of Nursing
2018 Ongoing Reviewer, European Journal of Cardiovascular Nursing
2020 Ongoing Reviewer for the Journal of Nursing Scholarship
2019 Ongoing Reviewer for the Nurse Education Today journal

Laila Farhood

2006 Ongoing Editorial Board and Reviewer, Journal of Transcultural Nursing
2006 Ongoing Member of Editorial Board and Reviewer, Journal of Transcultural Nursing
2007 Ongoing Reviewer, Journal of Social Science and Medicine
2009 Ongoing Reviewer, Journal of Affective Disorders
2010 Ongoing Reviewer, Journal of Traumatic Stress
2010 Ongoing Reviewer, Journal of Social Psychiatry and Psychiatric Epidemiology
2012 Ongoing Reviewer, International Journal of Mental Health Nursing
2013 Ongoing Reviewer, Journal of Clinical Practice and Epidemiology in Mental Health
Reviewer, Journal of Inter-professional Care
Reviewer, Journal of Global Health online

Souha Fares

2019 Ongoing Editorial Board Member: The Journal of Cardiovascular Pharmacology

Gladys Honein

2014 Ongoing Reviewer, British Medical Journal open access
2015 Ongoing Reviewer, International Journal of Health Policy and Management
2015 Ongoing Reviewer, Women's Health Issues
2015 Ongoing Reviewer, PLOS One
2015 Ongoing Reviewer, European Journal of Cancer Care
2015 Ongoing Reviewer, Clinico-Economics and Outcomes Research
2017 Ongoing Reviewer, Cancer Causes & Control
2018 Ongoing Reviewer, Journal of Nursing Scholarship
2019 Ongoing Reviewer, Health Research Policy and Systems

Lina Kantar

2013 - Ongoing Center for Teaching and Learning (CTL), AUB
2014 - Ongoing Nurse Education Today, Elsevier
2014 - Ongoing Nurse Education in Practice, Elsevier

Samar Noureddine

2019 Ongoing Reviewer, PLOS One

2016 Ongoing Reviewer, BMC Health Services Research
2015 Ongoing Reviewer, Lebanese Nursing Journal
2014 Ongoing Reviewer, Sultan Qaboos University Medical Journal
2013 Ongoing Editorial Board, European Journal of Cardiovascular Nursing
2012 Ongoing Reviewer, Heart & Lung: The Journal of Acute and Critical Care
2011 Ongoing Reviewer, Journal of Cardiovascular Nursing
2011 Ongoing Reviewer, Journal of Clinical Nursing
2011 Ongoing Reviewer, Pan African Medical Journal
2009 Ongoing Reviewer, International Journal of Nursing Studies
2009 Ongoing Reviewer, Journal of Nursing Scholarship
2009 Ongoing Reviewer, European Journal of Cardiovascular Nursing
2009 Ongoing International Editorial Board, Metas de Enfermiera' Nursing Journal
2008 Ongoing Reviewer, American Journal of Critical Care
2008 Ongoing Editorial Board, Journal of Transcultural Nursing

Lina Younan

2019 Reviewer, Journal of Nursing Management

D. SCIENTIFIC CONTRIBUTIONS AND RESEARCH GRANT REVIEWS

Huda Abu-Saad Huijer

2016 Ongoing Faculty mentoring of Dr. Rihab Nasr, Department of Anatomy, Cell Biology and Physiological Sciences, Faculty of Medicine, AUB
2018 Ongoing Faculty mentoring of Dr. Wassim Abi-Kheir, Department of Anatomy, Cell Biology and Physiological Sciences, Faculty of Medicine, AUB
2018 Ongoing PhD supervision; Rima Saad, Primary Caregivers' Knowledge, Attitudes and Beliefs toward Palliative Care for Children with Cancer in Lebanon
2019 Ongoing PhD Supervision; Melissa Makhoul, 'Pain resilience and pain catastrophizing among patients with chronic non-malignant arthritis pain'.

Marina Adra

2014 Ongoing Reviewer, Dementia; the international journal of social research and practice
2015 Ongoing Reviewer, International journal of older people nursing
2016 Ongoing Reviewer, Eastern Mediterranean journal
2019 Ongoing Reviewer, International Journal for qualitative Studies

Hala Darwish

2011 Ongoing Reviewer of Medical Practice Plan, Faculty of Medicine Research Committee, AUB and University Research Board, AUB

Nuhad Dumit

2009 Ongoing Reviewer, Western Institute of Nursing conference Abstracts
2011 Ongoing Reviewer, "Effective Teaching and Learning in Higher Education," organized by the Center for Teaching and Learning (CTL) and IT Academic Core Processes and Systems (IT ACPS), AUB

2012 Ongoing	Reviewer, ICN Congress/conference Abstracts
2016 Ongoing	Appraiser, McMaster Online Rating of Evidence (MORE), McMaster University

Laila Farhood

2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, AUB (upon request)
2013-14	Ongoing MPP/URB funding for the Intervention study "Promoting psychosocial and mental healthcare through community-based educational workshops for teachers and parents: A follow-up to mental health assessment in civilians exposed to traumatic war events in the South of Lebanon."

Lina Kantar

2013 - Ongoing	Center for Teaching and Learning (CTL) grant reviews, AUB

Angala Massouh

2017 - Ongoing	International Journal of Behavioral Medicine
2017 - Ongoing	Journal of Transcultural Nursing
2017 - Ongoing	European Journal of Cardiovascular Nursing
2017 - Ongoing	Journal of Cardiovascular Nursing
2017 - Ongoing	Nutrition and Food Science
2017 - Ongoing	Clinical Nursing Research

Samar Noureddine

2019 Ongoing	Abstract Reviewer, ICN conference
2018 ongoing	PhD supervision; Amani Bayrakdar, "Emerging Adulthood in Individuals with Type 1 Diabetes in Lebanon: A Mixed Method Study"
2017 ongoing	Abstract reviewer, EuroHeart Care conference
2012 Ongoing	Abstract reviewer, Annual Spring Meeting of the Cardiovascular Council of Nurses and Allied Professionals
2011 Ongoing	Reviewer for Sultan Qaboos University, Research and Innovations Department
2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, AUB

Houry Puzanian

Peer reviewer as of 2020, International Journal of Older People Nursing
Abstract Reviewer, Scientific Sessions, American Heart Association (AHA), Council on Cardiovascular and Stroke Nursing (CVSN); Category: Prevention, Education, and Disease Management).
Reviewer/Evaluator, AHA CVSN Fellowship (FAHA) applications

E. SCHOLARLY LECTURES

Huda Abu-Saad Huijer

- Community Engagement and Experiential Learning. Workshop on Transforming Higher Education. EARTH University, February 4-6, Costa Rica (Invited). February, 2019.
- Expanding the role of nurses to provide patient-centered care. Regional Policy dialogue; the State of the World's Nursing Report and the State of the World's Midwifery 2020 Reports. The Power of Data in Evidence Based Decisions and Policy. Ministry of Health, UAE. May 1-2, 2019, Dubai (Keynote Speaker). April 2019.
- Nursing developments transforming health care. International Scientific Conference; Research and Education in Nursing. University of Maribor, Slovenia. June 13-15. (Keynote Speaker). June 2019.
- Transforming health care in Syria through advanced nursing education. Syrian American Medical Society (SAMS) International Conference. Forced Migration and Health Care in a Protracted Crisis. June 27-29, Berlin, Germany. (Invited Speaker). June 2019.
- Pain Management and Palliative Care: A Program of Research. University of Miami, School of Nursing and Health Studies, Oct 13-23. (Invited). October 2019.
- Pain Management and Palliative Care: A Program of Research. Koc University, School of Nursing, Istanbul, Turkey. Nov 11-5. (Invited). November 2019.
- Successful Publishing Strategies. Koc University, School of Nursing, Istanbul, Turkey. Nov 11-15. (Invited). November 2019.
- Scholarship in Nursing and Grant Writing. Koc University School of Nursing, Istanbul, Turkey. (Invited). Nov. 11-15. 2019.
- Building an International Collaborative Program of Research. Koc University, School of Nursing, Istanbul, Turkey. Nov 11-15. (Invited). November 2019.
- Transforming Healthcare through Advanced Nursing Education. International Nursing Symposium. King Saoud University Medical City, Riyadh, KSA. Dec 7-8. (Keynote Speaker). December 2019.

Nour Alayan

- Alayan, N. Motivational Interviewing for Medical Students (Monthly), Family Medicine Rotation, AUB.

Silva Dakessian

- Poster presentation in European Association of Palliative Care , Berlin, May 2019 titled : Palliative Care Assessment Tools for Older Adults: A Review by Silva Dakessian Sailian, Huda Abu Saad Huijer, Suzanne Dhaine, Marina Gharibian Adra
- Poster presentation in 45th Biennial Convention by Sigma Theta Tau International in Washington DC, USA, November 2019

Hala Darwish

- Darwish, H. Cognitive Rehabilitation in Multiple Sclerosis- Invited and Chair of the symposium on Cognition in MS at the MENACTRIMS 5th Annual Pre-Congress activity Dubai. December 5th, 2019 (Chair of session and presenter)

- Darwish, H. Traumatic Brain Injury Patient Characteristics and Outcomes in Lebanon: A Multicenter Retrospective Cohort Study. IBRO MENA/AUB conference (October, 2019) on Trauma, Stress and Neurodegeneration Molecular, Cellular & Behavioral Perspectives. Organizer of the conference, Co- Chair and Co-Organizer of event, Chair of session, and presenter.
  Darwish, H. Protecting Cognitive Function in Multiple Sclerosis: The role of vitamin D. 14-16 March, 2019-Invited. Abu-Dhabi Annual International Conference on Vitamin D Deficiency and Human Health- UAE
- Darwish, H., Zeinoun,P., Farran,N., Ghusn, H., Yamout, B., Khoury, SJ (2019). The First Arabic Brief International Cognitive Assessment for Multiple Sclerosis (BICAMS) ECTRIMS conference. 11-13 September (2019), Stockholm-Sweden
- Darwish, H., Zeinoun,P., Farran,N., Ghusn, H., Yamout, B., Khoury, SJ (2019). The First Arabic Brief International Cognitive Assessment for Multiple Sclerosis (BICAMS) IMSCOG conference. 06-07 June, (2019), Amsterdam, Netherlands.

Nuhad Dumit

- Fares, S., **Dumit, N.Y.,** & Richa, N. (2019). Continuing Nursing Education of Registered Nurses and Nurse Managers: Perceptions, Priorities and Barriers, presented at the ICN 2019 congress in Singapore, June 30, 2019.
- **Dumit, N.Y.,** Daouk-Oyry, L., & Bou Ali, L. (2019). Nurses' Absenteeism and Job Demands, Job Attitudes, and Personal Characteristics, presented at the ICN 2019 congress in Singapore, June 28, 2019.
- Invited as a speaker at a symposium titled "**Nursing Profession and the UN Global compacts for Migration and on Refugees**". The symposium was organized by International Centre on Nurse Migration, CGFNS International that took place at the ICN 2019 congress in Singapore June 29, 2019.
- Invited to an "Invitational, multi-stakeholder, international colloquium" titled, "NURSING. POWER. ADVOCACY. Helping Nurses Deliver: Conversations on nurses, nursing and power" co-hosted by the International Council of Nurses (ICN) and the Canadian Nurses Association (CNA) in Vancouver, Canada, June 1-2, 2019.
- Invited to the 'First Saudi Forum: Eitizaz' [Pride] to speak on "My Journey as a Nurse Leader" among 5 regional leaders in nursing and honored by the KSA minister of health, Riyadh, KSA March 17, 2019.

Gladys Honein

- **Noureddine, S. (presenter**), Avedissian, T., Irani, J., Khatib, N. Nurses and Cardiopulmonary Resuscitation in the Community. Poster presentation at the ICN Congress 2019, Singapore; 29 June, 2019

Lina Younan

- Lina Younan**,** Guest speaker on "Ethical Decision Making in the Emergency Department" at the 2nd Conference of Emergency Medicine of ND Maritime Hospital. April 2019

V. PROFESSIONAL PRACTICE/SERVICE

A. PROFESSIONAL PRACTICE

Huda Abu-Saad Huijer

- Member, Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP). Ongoing.
- Founding President, Chi Iota Chapter, Sigma Theta Tau International Honor Society in Nursing in Lebanon.
- Consultant, WHO EMRO on the Future of Nursing and Midwifery in the Eastern Mediterranean Region.
- Vice-President, National Committee on Pain Relief and Palliative Care (Appointed by Minister of Health); Chair, Research Committee.
- Past president, Lebanese Society for the Study of Pain.
- Member, UC Davis, Advancing Pain Relief Education: Anchoring Pain Competencies around the World
- Member, Advisory Board of the Order of Nurses in Lebanon.
- Member, Association of Deans and Directors of Schools of Nursing in Lebanon.
- Invited to attend the expert regional meeting organized by WHO EMRO to develop a regional roadmap for palliative care in the Eastern Mediterranean region. The meeting took place at AUB September 26-27, 2019. A number of working groups were formed. I was invited to chair the work group on human resources, which included participants from Lebanon, Morocco, Pakistan, Kuwait, Sudan, and KSA.

Marina Adra

- Initiated training sessions on Person Centered Care for nurses taking care of older residents living with dementia at Dar al Ajazah Al Islamiyyah Hospital.

Nour Alayan

- Behavioral health support, Provider of hypnotherapy (smoking cessation and other behaviors), Health and Wellness Center, Family Medicine Department, AUB.
- Bi-weekly Stress Management Program for Nursing Students, HSON, AUB.

Tamar Avedissian

- Guideline development: Identifying and managing anaphylaxis by school and day care nurses in Lebanon. In collaboration with the Order of Nurses, Order of Physicians, Lebanese Pediatric Society, Lebanese Society of Allergy & Immunology, Lebanese Society of Family Medicine and the Lebanese society of Emergency Medicine and Droguerie De L'union
- Volunteered with Quick Aid in providing wound care services for victims from the Beirut Blast

Hala Darwish

- Workshop for UAE Nurses: Ministry of Health, Training, and Development Center Sharjah (Training with the AUB (HSON and Regional Educational Program).
- Advanced Health Assessment- Spring 2018-2019 March 2019

Nuhad Yazbik Dumit

- Co-director of the Continuing Medical Education Office, FM, AUB
- Member of the International Council of Nurses (ICN) Scientific Steering Committee for the ICN Code of Ethics

Laila Farhood

- Psych Mental Health track coordinator.
- Clinical Associate, Department of Psychiatry, Faculty of Medicine. Clinical activities include psychiatric assessment and psychotherapy (individual, couple, and family therapy) in in-patient and out-patient settings.

Gladys Honein

- Session Chair, Patient education workshop, Regional Educational Program- Dubai. March 2019
- Session Chair, Introduction to qualitative research, Clinical Research Institute. American University of Beirut. January 2019

Lina Kantar

- Coordinator, CNE and Offshore Projects /REP
- Chair, Academic and Curriculum Committee/HSON
- Member of the HSON Admission Committee
- Sigma Theta Tau International, Chi Iota Chapter, AUB, vice president
- Chair of the taskforce on developing an Online Graduate Diploma in Nursing Education at the HSON, AUB

Dina Madi

- Coordinated a Training program for school nurses in Lebanon: Health Assessment of Children & Adolescents at the AUB-HSON simulation lab. in collaboration with the Order of Nurses in Lebanon. September 2019
- Training Program for Nurses in Dubai: Best Practices in Maternity Nursing offered twice over three full days at the Continuing Education Center at Sharjah, UAE. March-April 2019
- Attended the ICN Congress at Marina Bay Sands, Singapore. June 27-July1, 2019

Angela Massouh

- Cardiology Clinical Nurse Specialist. Joint Appointment, American University of Beirut Medical Center.
- Cardiology Nurses Committee. Order of Nurses, Lebanon.
- Appointed as the Clinical Nurse Leader for Research, Education, and Innovation at the American University of Beirut Medical Center.
- Seminar Lead and Presenter. Committee on COVID-19 Training for Critical Care Nurses at the Order of Nurses, Lebanon.
- Seminar Director and Presenter. MENA Capacity Building Program for Heart Failure. Novartis Training Program, Jordan.
- Seminar Director and Presenter. Lebanon Capacity Building Program for Heart Failure. Novartis Training Program, Order of Nurses in Lebanon.
- Seminar Director and Presenter. Online Webinar on Updates in Anticoagulation Management. American University of Beirut Medical Center, Continuing Medical Education.

Samar Noureddine

- Founding President, the Lebanese Society of Cardiovascular Nurses
- Presented on 'Designing and Conducting Mixed Methods Research' for faculty members at Sultan Qaboos University College of Nursing, Muscat, Oman. April 23, 2019
- External referee for faculty applications for promotion for Philadelphia University and Al Al Bayt University, Amman, Jordan: Fall of 2019
- Founder, Lebanese Cardiovascular Nursing Society, January 2019

Lina Younan

- Coordinated the Epic training of concerned HSON instructors, faculty, and students.
- Continue chairing the Taskforce to convert the delivery method of the current Masters in Nursing Administration and Management program into a Blended one.
- Re-Designed and delivered N404 informatics course for undergraduate students MSN Class Advisor, 2019.
- Developed two Online Training Module for Nurses Working in Primary Health Care Centers in Lebanon.

HSON STANDING COMMITTEES

Advisory and Search Committee:

1. Dr. Laila Farhood (Chair)
2. Dr. Samar Noureddine
3. Dr. Nuhad Dumit
4. Dr. Hala Darwish

Administrative Committee:

1. Dr. Laila Farhood (Chair)
2. Dr. Nuhad Dumit
3. Dr. Samar Noureddine

Graduate Studies Committee:

1. Dr. Hala Darwish (Chair)
2. Dr. Nuhad Dumit
3. Dr. Gladys Honein
4. Dr. Houry Puzantian
5. Dr. Lina Younan (Appointed)
6. Dr. Soha Fares (Appointed)
7. Dr. Samar Noureddine (ex-officio and representative on the Board of Graduate Studies)

Graduate Studies Departmental Assessment Committee:

1. Dr. Lina Younan (Chair)
2. Mrs. Mary Arevian
3. Dr. Souha Fares
4. Dr. Samar Noureddine (ex-officio)

Undergraduate Curriculum & Undergraduate Student Academic Affairs Committee:

1. Dr. Lina Kantar (chair)
2. Mrs. Mary Arevian
3. Dr. Nour Alayan
4. Dr. Suzanne Dhaini
5. Mrs. Hera Tashjian
6. Dr. Dina Madi (Appointed)
7. Dr. Ghada Assaf (Appointed)
8. Dr. Angela Massouh (Appointed)
9. Dr. Nuhad Dumit (Ex-Officio)
10. Dr. Hala Darwish (Representative on the University Academic Development Committee)

Undergraduate Admissions and Financial Aid Committee:

1. Dr. Dina Madi (Chair)
2. Mrs. May Khoury

3. Mrs. Danielle Damianos
4. Dr. Ghada Assaf
5. Dr. Marina Adra (Appointed)
6. Dr. Lina Kantar (Representative on the University Admissions Committee)

Undergraduate Studies Departmental Assessment Committee:

1. Dr. Angela Massouh (Chair)
2. Dr. Marina Adra
3. Dr. Dina Madi
4. Dr. Nuhad Dumit (ex-officio)

Research Committee:

1. Dr. Samar Noureddine (Chair)
2. Dr. Angela Massouh
3. Dr. Suzanne Dhaini
4. Dr. Houry Puzantian
5. Dr. Nour Alayan (Appointed)
6. Dr. Ghada Assaf (Appointed)
7. Dr. Hala Darwish (Representative on the University Research Board)
8. Dr. Lina Badr (Representative of AUBMC Nursing Services)

Student Affairs Committee:

1. Dr. Marina Adra (Chair) and representative on senate Student Affairs Committee
2. Dr. Nour Alayan, class advisor BSN II and Nursing Student Society (NSS) advisor
3. Dr. Ghada Assaf, class advisor BSN III
4. Mrs. May Khoury, class advisor BSN IV
5. Dr. Lina Younan, Graduate Student Advisor

HSON Catalogue Committee

1. Dr. Samar Noureddine; Convener of the Graduate Division
2. Dr. Nuhad Dumit; Convener of the Undergraduate Division

transformation of healthcare education during COVID-19: COVID-19 Healthcare Education Series: A Global Perspective, invited member
Nominating Committee, CVSN, AHA, member

Lina Younan
Disciplinary Board of the Order of Nurses in Lebanon, member (2015-2019).
Order of Nurses in Lebanon, member
Sigma Theta Tau International, Chi Iota Chapter, AUB, member
Member in Students Affairs Committee at HSON (representing Graduate Division)
Continue chairing the Graduate Studies Departmental Assessment committee at HSON.

VI. LOOKING AHEAD

New Academic Programs: HSON plans to expand its current undergraduate and graduate academic programs and continue to contribute to the development of healthcare in Lebanon and the region.

- At the undergraduate level, HSON plans to evaluate and revisit the second degree program to attract more BA/BS graduates.
- The proposal to launch a TS-BSN program at AUB AREC in the Beqaa area is being finalized and will be launched as soon as university approval is secured.
- At the graduate level, HSON will be launching an online/hybrid MSN track in Nursing Administration and Management. The Nursing Education hybrid track is still under discussion.

Other Developments:

- New strategies in Student recruitment will be developed. HSON continues to award merit scholarships and coordinate with the Financial Aid and the Office of Development to provide additional support in the absence of student loans.
- More emphasis will continue to be placed on graduate recruitment at the national, regional, and international levels in close collaboration with the AUB Graduate Council.
- Increasing the number of scholarships remains a major priority for HSON and is critical to the success of current and new programs. The establishment of more endowed funds remains a strategic goal for HSON.

American University of Beirut
Rafic Hariri School of Nursing

Annual Report 2018

PREFACE

The AUB Board of Trustees (BOT) voted in June 2018 to grant the Rafic Hariri School of Nursing (HSON) independent faculty status and to appoint Dr. Huda Abu-Saad Huijer founding dean effective September 1, 2018. Efforts to achieve independent faculty status started in 2010, when a full proposal and a five-year business plan were submitted to the AUB administration. This was followed by an external review in November 2016 to assess the school's readiness for independent faculty status. HSON revised bylaws were approved by the Senate and then the BOT in November 2018. This was an historic development and a milestone achievement for HSON.

The PhD program in nursing science was launched in fall 2018. Eighteen applications were received and three students were selected and have enrolled. The PhD program is offered in close collaboration with HSON international partners, Johns Hopkins University (JHU) and University of Michigan (UM) Schools of Nursing. The Ministry of Higher Education approved the PhD program in nursing science on August 14, 2018.

We are proud that we have the largest number of faculty with PhD degrees in Lebanon. HSON also has the highest number of funded research projects and the highest publication rate in Lebanon. HSON faculty have published in top-tier refereed journals and are among the most productive and impactful nurse researchers in the Arab world. A number of HSON faculty have either a joint appointment or clinical associate positions with the Faculty of Medicine/AUB Medical Center. They have excelled clinically by establishing collaborative clinics in their areas of specialty thus setting the stage for many more such collaborations in the future.

We are also excited to be launching a number of online hybrid programs at the graduate level and to have pioneered new modalities in program development.

HSON continues to place emphasis on research and scholarly productivity, teaching excellence, faculty and student recruitment, and on expanding HSON academic programs based on new and innovative strategic initiatives. We continue to be proud of our achievements, which are detailed in this annual report.

Huda Abu-Saad Huijer RN, PhD, FEANS, FAAN

Professor and Founding Dean

Zeinati Jeanette, Secretary

C. RECRUITMENT

HSON continues to advertise for regular faculty positions and for the Hariri Endowed Chair in Research. These positions are advertised on the AUB and HSON websites, in the Chronicle of Higher Education, on the recruitment site Inside Higher Ad, and on social media through LinkedIn. Recruitment information is also mailed to leading schools of nursing, professional organizations, and to mailing lists in the United States and Europe.

D. CCNE ACCREDITATION

- The BSN and MSN programs continue to be accredited by the Commission on Collegiate Nursing Education (CCNE) (http://www.aacn.nche.edu/ccne-accreditation) in the USA.
- HSON submitted the Continuous Improvement Progress Report (CIPR) to CCNE as required.
- HSON continues to be a regular member of the American Association of Colleges of Nursing.

E. HONORS, AWARDS, AND RECOGNITIONS

Huda Abu-Saad Huijer

Received the Lebanese National Center for Scientific Research (CNRS) Career Excellence Award for 2018 in recognition of contributions to the field of pain management and palliative care nationally and globally.

Received the AUB Nurses' Alumni Chapter Award in 2018, in recognition of her HSON, national, and international nursing achievements.

Continues to be a member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP).

Hala Darwish

Fellow of the American Academy of Nurses, November 2018

Silva Dakessian

Distinguished Research Award from the Scientific Society of Arab Nursing Faculties, November 2018

Nuhad Dumit

Received the 2018 Leader in LGBT Health Equality Award granted by The Lebanese Medical Association for Sexual Health.

Received the award for women leaders as Presidents of Orders'/Associations' granted by the Young Women Christian Association in Beirut, 2018

Laila Farhood

World Psychiatric Association (WPA), elected as a board member for the International Association for Women's Mental Health regional section, Berlin, Germany, December 2017 till present

F. INTERNATIONAL PARTNERSHIPS

HSON has ongoing Memoranda of Understanding (MOUs) to enhance research collaboration and student and faculty exchanges with the following institutions:

- Johns Hopkins University School of Nursing, Baltimore, Maryland, United States of America
- University of Maryland School of Nursing, Baltimore, Maryland, United States of America
- University of Michigan School of Nursing, Ann Arbor, Michigan, United States of America
- Villanova University College of Nursing, Radnor Township, Pennsylvania, United States of America
- University of Science and Technology, Sydney, Australia

G. SIGMA THETA TAU INTERNATIONAL (STTI) HONOR SOCIETY

The board of the Chi Iota Chapter is as follows:

- President: Dr. Dina Madi
- President-elect: Dr. Lina Kantar
- Vice president: Ms. Ursula Rizk
- Treasurer: Dr. Hiba Deek
- Secretary: Ms. Bahia Abdallah El-Moufti
- Counselor: Dr. Angela Massouh
- Founding President: Dr. Huda Abu-Saad Huijer
- Immediate Past President: Ms. Mary Arevian

Chi Iota Committees

Leadership Succession Committee

- Mrs. Helen Nuwayhid; Chair
- Dr. Nour Alayan; Member
- Mrs. Tamar Avedissian; Member

Governance Committee

- Dr. Samar Noureddine; Chair
- Mrs. Danielle Damianos; Member
- Ms. Roula Awwad; Member

Activities

Induction Ceremony: May 8, 2018. Total 27 inductees; 8 graduates, 3 leaders, and 16 undergraduates. Mrs. Zeina Kassem, founder and president of Roads for Life (RFL): the Talal Kassem Fund for Post-Accident Care, addressed the members. Her speech was very touching. A short video of the ceremony was posted on the Chi Iota Chapter Facebook page.

Skype Business meeting: May, 2018, with Jessica Wendorf, Sigma, Chapter and Regional Operations Manager and Sabrina Collins-Christie, Sigma Membership Manager, to discuss logistical matters related to the chapter.

Annual Business meeting of the Chi Iota Chapter: November 30, 2018, Hisham Jaroudi Auditorium, HSON. The guest speaker Dr. Michel Kalach el Khoury, a psychotherapist, discussed self-care and when to seek professional help from mental health experts.

H. HSON NEWSLETTER

HSON issue Number 7 was circulated in March 2018. The newsletter included:

- A message from the HSON director, Dr. Huda Abu-Saad Huijer
- Message from the President of the Order of Nurses in Lebanon, Dr. Nuhad Dumit
- Launching the PhD program
- HSON research highlights
- HSON undergraduate and graduate student testimonials
- Awards
- Nursing Society Students activities
- New incoming faculty and staff

I. HSON REGIONAL EXTERNAL PROGRAMS

Continuing Education in UAE

The Rafic Hariri School of Nursing (HSON) in collaboration with the Continuing Education Center of the office of Regional External Programs (REP) provided a number of courses to registered nurses and nurse leaders in the United Arab Emirates in 2018. These offerings are part of an agreement that was signed and renewed between AUB REP and "The United Arab Emirates Ministry of Health" to support nursing training and education.

Course Name	Faculty names	Dates	Location
Advanced Physical Assessment	Dr. Angela Massouh and Mrs. Hera Tashjian	March 11-13, 2018	UAE, Sharjah
Suctioning and Catheterization Training	Mrs. Talin Gulgulian and Mrs. Tamar Avedissian	April 3-5, 2018	UAE, Sharjah
Sedation Course	Dr. Ghassan Kanazi and Mrs. Rafika Zaatari	April 30-May 1, 2018	UAE, Sharjah
EKG Course	Dr. Bernard Abi Saleh and Dr. Angela Massouh	September 10-12, 2018	UAE, Sharjah
Neonatal Course	Mrs. May Khoury and Mrs. Talin Gulgulian	November 18-20, 2018	UAE, Sharjah

Each course was provided over a period of 2-3 days. Some were repeated to accommodate the higher than expected number of nurses. Different teaching methods were used by HSON faculty such as: case scenarios, role playing, simulation sessions, hands-on activities, and videos. The variety of teaching methods made these continuing education offerings especially fruitful and highly interactive.

Mohammad Al Mana' College for Health Sciences (MACHS)

In February 2017, an agreement was signed between the Mohammad Al Mana' College for Health Sciences (MACHS) in Khobar, Kingdom of Saudi Arabia and AUB REP. Based on this agreement, AUB has agreed to contribute to MACHS's efforts in an advisory, training, and management capacity.

Dr. Huda Abu-Saad Huijer and Dr. Nuhad Dumit are members of the project's steering committee and coordinate the work among the different departments.

HSON faculty were involved in the following consultations in 2018:

- Reviewed MACHS documents that addressed accreditation readiness, curriculum, and courses and provided appropriate recommendations.
- Dr. Marina Adra and Mrs. Mary Arevian conducted a site visit to review MACHS academic programs and provided feedback accordingly.

HSON will continue to be involved in future MACHS-related projects, as needed, by providing workshops and training on nursing simulation, assisting MACHS in setting up its own simulation lab, reviewing MACHS post-graduate programs, and assisting MACHS in the recruitment for key administrative and teaching positions.

11. FACULTY ACTIVITIES

A. EDUCATIONAL PROGRAMS

BSN:

Course descriptions, credit hours, and learning objectives did not change over the year as student evaluations were positive. We were, however, required to provide two sections of junior-year courses because of the large class size.

Simulation activities were included in most clinical nursing courses, which used a combination of skill improvement and practice through scenarios.

Objective Structured Clinical Examination (OSCE) was used in all clinical nursing courses.

MSN:

A total of 58 students enrolled in the MSN program in October 2018.

Four tracks continue to be offered: Adult Gerontology Clinical Nurse Specialist, Nursing Administration and Management, Psychiatry and Mental Health Clinical Nurse Specialist, and Community and Public Health Nursing.

A number of students did residencies at:

- AUBMC
- Evidence-Based Healthcare Management Unit (EHMU) at AUBMC
- Cleveland Clinic Abu Dhabi, UAE
- Mwaadieh Center, Beirut, Lebanon
- John Hopkins University (JHU), Baltimore, Maryland, USA
- Best Start by Health Nexus, Toronto, Canada
- Soins Infirmiers et Development Communitaire, Beirut, Lebanon
- Ministry of Public Health, Beirut, Lebanon
- Ibad Al Rahman, Barbour, Lebanon
- University of Maryland Medical Center (UMMC), Baltimore, Maryland, USA

17 students were inducted in the HSON Chi Iota Chapter in spring 2018.

Town meetings were held to discuss student concerns, residencies, projects, and comprehensive exams.

Information on the specific tracks is detailed below.

Adult Gerontology Clinical Nurse Specialist track:

2 students graduated in 2018.

A total of 17 students were enrolled in October 2018.

Students in the Adult Gerontology Clinical Nurse Specialist track completed residencies at Johns Hopkins University and the University of Maryland.

Nursing Administration and Management track:

A total of 5 students graduated in 2018.

A total of 17 students were enrolled in October 2018.

Students in the Nursing Administration and Management track completed residencies at EHMU, AUBMC, and Cleveland Clinic Abu Dhabi.

Psychiatry and Mental Health Clinical Nurse Specialist track:

One student graduated in 2018.

A total of 9 students were enrolled in October 2018.

Students in the Psychiatry and Mental Health Clinical Nurse Specialist track completed residencies at AUBMC, Mwaadieh Center, and Soins Infirmiers et Development Communitaire.

Community and Public Health Nursing track:

Three students graduated in 2018.

A total of 15 students were enrolled in October 2018.

Students in the Community and Public Health Nursing track completed their residencies at Health Nexus, Toronto, John Hopkins University (Baltimore), Ministry of Public Health and Ibad Al Rahman Barbour.

One student is undertaking a double major in Community and Public Health Nursing and Psychiatry and Mental Health Clinical Nursing.

PhD Program:

The PhD proposal was approved by HSON Graduate Division, Graduate Studies Committee, HSON External Advisory Board, Board of Graduate Studies, AUB Senate, Board of Trustees, and the New York State Education Department (NYSED).

The PhD program was officially launched in September 2018. A total of 18 applications were received, 7 were short-listed and interviewed, and 3 were accepted and enrolled.

The doctoral program aims to provide rigorous training for research careers in the nursing and healthcare arenas. It will provide students with the opportunity to develop their capacity for scholarly and independent work, improve critical analytical thinking, refine their ability to communicate knowledge and ideas, and be able to translate research findings into healthcare practice.

B. FACULTY TEACHING

Spring term 2017-18

Course Number	Course name	Credits	Faculty
NURS 200	Introduction to Nursing	2	G. Assaf
NURS 201	Introduction to Nursing Practice	2	S. Dakessian Sailian, L. Kantar
NURS 202	Health Assessment	2	T. Gulgulian, D. Madi
NURS 203	Biostatistics for Nurses	3	S. Fares
NURS 302	Nursing Care of Adults II	5	M. Adra, N. Alayan, S. Dakessian Sailian, A. Massouh, H. Tashjian
NURS 306	Nursing Care of Children	5	T. Avedissian, D. Damianos, S. Dhaini, T. Gulgulian, M. Khoury, D. Madi
NURS 402/312	Mental Health and Psychiatric Nursing	5	G. Assaf , H. Masalkhi, M. Saadeh

NURS 408	Community Health Nursing	5	M. Arevian, T. Avedissian, G. Honein
NURS 410/313	Leadership & Management Theory	5	S. Dakessian, D. Damianos, H. Tashjian, L. Younan
NURS 411	Leadership & Management Practicum	0	H. Tashjian, L. Younan,
IPEC 300	Inter-professional Education		M. Adra, N. Dumit ,G. Honein, S. Noureddine
NURS 502	Advanced Nursing Research	3	H. Darwish, S. Fares
NURS 503	Advanced Health Assessment	3	A. Massouh, S. Noureddine
NURS 503A	Advanced Health Assessment	1	A. Massouh, S. Noureddine
NURS 505B	Advanced Practice in Adult Gerontology	4	H. Darwish, S. Noureddine
NURS 506	Residency-Advanced Practice in Adult Gerontology	4	S. Noureddine
NURS 508	Residency-Advanced Practice in Nursing Administration	4	M. Clinton, N. Dumit, H. Huijer, L. Younan
NURS 509	Role Development in Nursing Education	3	L. Kantar
NURS 518	Group and Family psychotherapy	3	L. Farhood
NURS 519	Clinical Residency in Acute Psychiatric Care	4	L. Farhood
NURS 520	Managing Quality with Teams	3	N. Dumit
NURS 522	Principles and Practice of Community/ Public Health Nursing	3	M. Arevian, G. Honein
NURS 524	Residency in Community Health Nursing	4	M. Arevian, G. Honein
NURS 525	Transformational Leadership for Nursing Practice	3	M. Clinton
NURS 526	Comprehensive exam	0	L. Farhood

NURS 598 , 598A, 598C	Project	3	M. Arevian, M. Clinton, H. Darwish N. Dumit, L. Farhood, H. Huijer, G. Honein, S. Noureddine, L. Younan
NURS 599, 599A, 599B	Thesis	6	M. Arevian, M. Clinton, H. Darwish N. Dumit, L. Farhood, H. Huijer, G. Honein, S. Noureddine, L. Younan
NURS 200	Introduction to Nursing	2	G. Assaf
NURS 201	Introduction to Nursing Practice	2	S. Dakessian Sailian, L. Kantar
NURS 202	Health Assessment	2	T. Gulgulian, D. Madi
NURS 203	Biostatistics for Nurses	3	S. Fares

Summer 2018

Course Number	Course name	Credits	Faculty
NURS 210	Pathophysiology	2	A. Massouh
NURS 307	Practicum I	0	T. Avedissian, S. Dakessian, D. Damianos, T. Gulgulian, H. Masalkhi H. Tashjian
NURS 506	Residency-Advanced Practice in Adult Gerontology	4	S. Noureddine
NURS 508	Residency-Advanced Practice in Nursing Administration	4	L. Younan
NURS 519	Clinical Residency in Acute Psychiatric Care	4	L. Farhood
NURS 524	Residency in Community Health Nursing	4	M. Arevian, G. Honein
NURS 598	Project	3	L. Farhood, H. Huijer
NURS 598A	Project	3	H. Darwish, G. Honein
NURS 598B	Project	3	M. Arevian, N. Dumit
NURS 599	Thesis	6	L. Farhood, H. Huijer
NURS 599A	Thesis	6	H. Darwish

Fall term 2018-19

Course Number	Course name	Credits	Faculty
NURS 200	Introduction to Nursing	2	G. Assaf, T. Gulgulian, M. Khoury
NURS 300	Nursing Care of Adults I	5	M. Adra, S. Dakessian Sailian, L. Kantar
NURS 304	Nursing Care of the Expectant Family	5	T. Avedissian, D. Damianos, T. Gulgulian, M. Khoury, D. Madi
NURS 406	Nursing Research	3	S. Dhaini, G. Honein
NURS 404	Nursing Informatics	2	I. Fakih
NURS 400	Critical Care Nursing	4	S. Dakessian Sailian, A. Massouh, H. Tashjian
NURS 402	Mental Health and Psychiatric Nursing	5	G. Assaf, L. Farhood, H. Masalkhi, M. Saadeh
NURS 408	Community Health Nursing	5	M. Arevian, T. Avedissian
IPEC 300	Inter-professional Education	1	M. Adra, N. Alayan, N. Dumit, A. Massouh

NURS 601	Philosophical And Theoretical Perspectives In Nursing Science	3	L. Farhood
NURS 602	Quantitative Research Designs	3	S. Noureddine

C. SIMULATION TECHNOLOGY AT HSON

Academic Year 2017-18

During 2018, the Simulation and Clinical Competency Center (SCCC) was used for activities/services for both AUB and non-AUB users in line with its mission statement. Users included HSON students enrolled in undergraduate and graduate programs (HSON users), nutrition and dietetics students, medical students, residents, and faculty members and nurses from AUB and elsewhere (non-HSON users).

The figures below summarize activities conducted at the SCCC by term

For the year 2018, there were 410 simulation training activities/ experiences at SCCC involving 10,533 participants, including HSON and non-HSON users. This shows a 1.9% decrease in activity and a 12.8% increase in the number of participants since 2017. The fall term had the highest number of activities (47.6%) and the highest number of users (55.5%). (See Figures 1 and 2 below.)

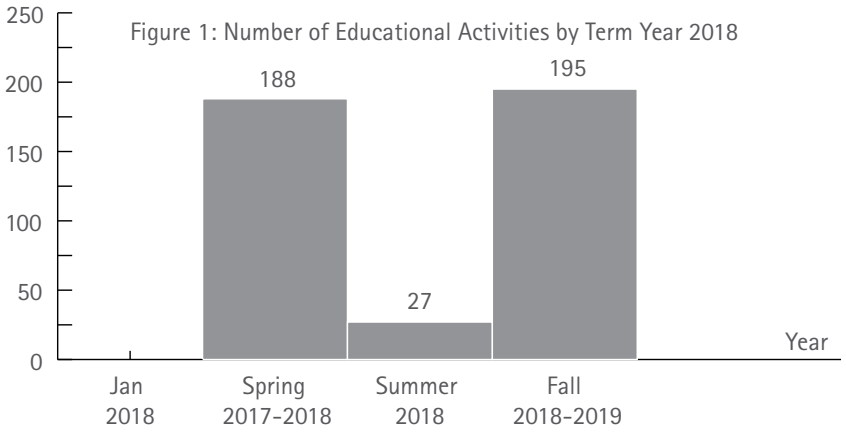

Figure 1: Number of Educational Activities by Term Year 2018

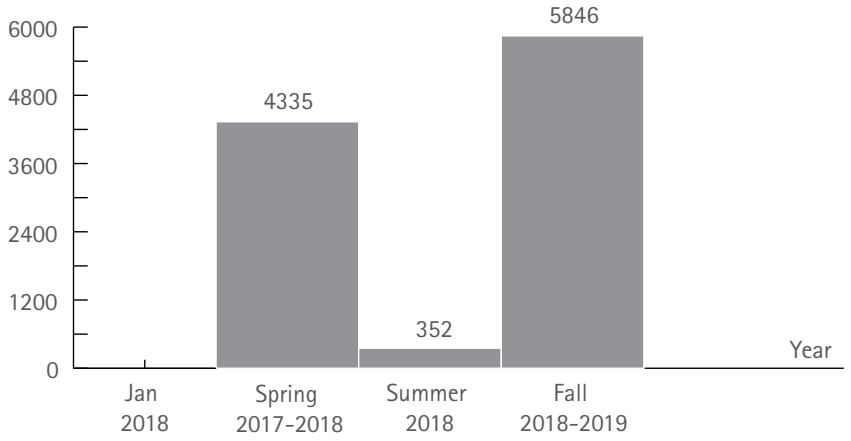
Educational Activity: each time the lab is utilized regardless of the objectives or content of the learning/teaching that is taking place.

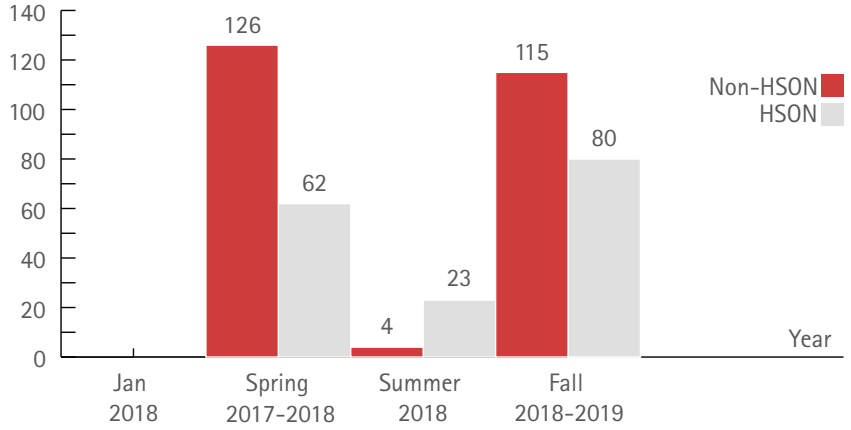
Figure 2: Number of Participants by Term Year 2018



Participant: any person using the lab.

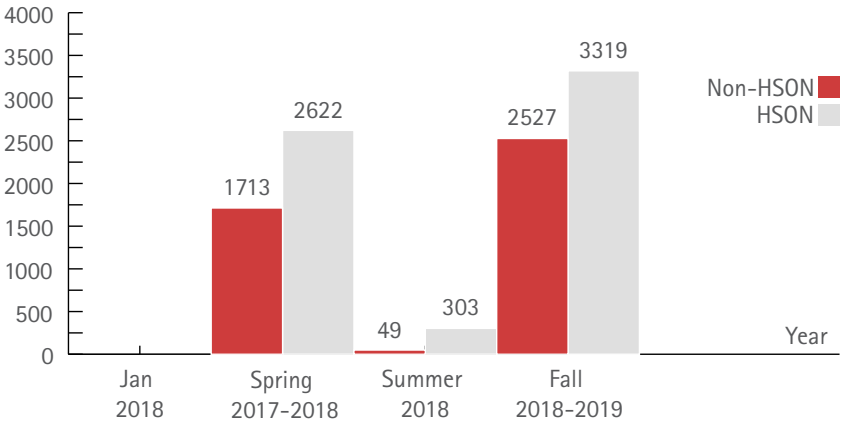
During the spring and fall terms, HSON activities outnumbered non-HSON activities. During the summer, there were more non-HSON activities in the lab, as FM finishes its term much later than HSON. (See Figure 3).

Figure 3: HSON vs Non-HSON Activity-Term



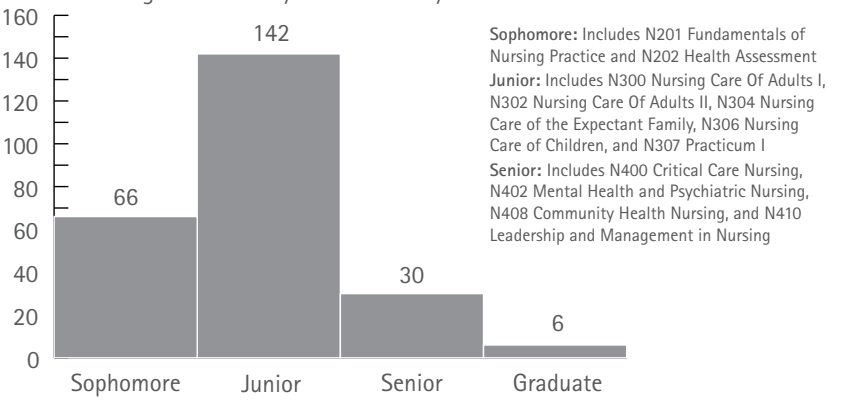
There were 33.6% more users in the fall term than in the spring term. There were more non-HSON users than HSON users in all terms. (There were 53% more non-HSON users in the spring and 34.8% more in the fall.) Medicine have larger classes-around 110 students are enrolled yearly. (See Figure 4).

Figure 4: HSON vs Non-HSON Partipants-Semester



The use of the facility by HSON faculty and students peaks in the junior year. In the MSN program, the SCCC is used in N503 Advanced Health Assessment course and in N509 Role Development in Nursing Education course. There were a total of 6 activities in these graduate courses this past year, as shown in Figure 5 below.

Figure 5: Activity HSON Users by Level



D. STUDENT PROJECTS, THESES, RESIDENCIES

MSN STUDENT PROJECTS AND THESES

Name	Track	Defense Date	Project/ Thesis	Project title	Project/ Thesis Committee
Grace Hakim	Adult Care	February 5, 2018	Thesis	Sex Difference in Outcomes of Adult Patients with Traumatic Brain Injury	Dr. Darwish, Noureddine, El Sayed, Tamim
Joelle Bassila	Administration	March 5, 2018	Project	Developing a Bereavement Program for Palliative Care Patients at AUBMC	Dr. Dumit, Osman
May Dassouki	Nursing Administration	April 11, 2018	Project	Role Expectations of Master's Student Prepared Nurses	Dr. Younan, Clinton
Lina Al Wattar	Nursing Administration	April 24, 2018	Project	Improving Patient Satisfaction by Providing Empathy Training Sessions for Healthcare Professionals	Dr. Clinton, Younan
Lana Iskandarani	Nursing Administration	April 24, 2018	Project	Nurse-led Patient Access Line for Oncology Patients	Dr. Dumit, Clinton
Linda Mardinian	Nursing Administration	April 27, 2018	Project	Fear of Becoming a Robotic Registered Nurse	Dr. Clinton, Younan

Name	Track	Defense Date	Project/ Thesis	Project title	Project/ Thesis Committee
Hind Abdel Massih	Adult Care Nursing	May 2, 2018	Project	Educational Program for Hospital Nurses on Diabetes Mellitus	Dr. Noureddine, Kantar
Marwa Ahmad	Community and Public Health Nursing	May 3, 2018	Project	Cervical Cancer Prevention/ Awareness Program	Ms. Arevian, Dr. Kantar
Mariam Assaf	Community and Public Health Nursing	December 7, 2018	Project	Developing and Disseminating the Panel Management Approach for Improving Cancer Screening Services in Primary Healthcare Centers in Lebanon	Dr. Honein, Abi Fakhr

MSN STUDENT RESIDENCIES

Name	Track	Residency Term	Residency Supervisor	Residency Site	Preceptor	Preceptor title
Sarah Abu Rihan	Psychiatric Mental Health Nursing Clinical Nurse Specialist	Summer 2017-18	Laila Farhood	AUBMC Psychiatry in-patient Mwaadieh Center Teaching education N402 students at HSON	Laila Farhood	Professor, Psychiatry Mental Health

Name	Track	Residency Term	Residency Supervisor	Residency Site	Preceptor	Preceptor title
Zepur Aharonian	Nursing Administration and Management		Lina Younan	Evidence-Based Healthcare Management Unit (EHMU), AUBMC	Hussein Souiedan	EHMU Coordinator
Mariam Assaf	Community and Public Health Nursing	Fall 2017-18	Gladys Honein	4 weeks at Ministry of Public Health	Imad Haddad	Non-communicable Diseases (NCD) Coordinator
				2 weeks research with Dr. Honein	Gladys Honein	Assistant Professor
Mireille Chehade	Adult Gerontology Clinical Nurse Specialist	Summer 2017-18	Samar Nouredine	Johns Hopkins University Hospital, Baltimore, Maryland	Tania Randell	Clinical Nurse Specialist
					Tim Madeira	
				AUBMC	Angela Massouh	Assistant Professor
Nay Ezzeddine	Community and Public Health Nursing	Spring 2017-18	Mary Arevian Bakalian	Ibad Al Rahman, Barbour	Nizar Lababidi	Director
Linda Fakhreddine	Psychiatric Mental Health Nursing Clinical Nurse Specialist	Summer 2017-18	Laila Farhood	Psychiatry Department, AUBMC, both in- and out-patient units	Laila Farhood	Professor, Psychiatry Mental Health
Miray Harakeh	Community and Public Health Nursing	Summer 2017-18	Mary Arevian Bakalian	Ministry of Public Health	Imad Haddad	Accreditation and NCD Coordinator

Name	Track	Residency Term	Residency Supervisor	Residency Site	Preceptor	Preceptor title
Elsa Jarawan	Psychiatric Mental Health Nursing Clinical Nurse Specialist	Summer 2017-18	Laila Farhood	Mwaadieh Center	Maya Bizri	Clinical Instructor, Department of Psychiatry, AUBMC
				Psychiatry Department, AUBMC, both in- and out-patient units	Laila Farhood	Professor, Psychiatry Mental Health
Melissa Makhoul	Adult Gerontology Clinical Nurse Specialist	Fall 2018-19	Samar Nouredine	Acute Pain Management Services, Shock Trauma Center (STC), University of Maryland Medical Center (UMMC), Baltimore, Maryland	Patricia B. Casper	Certified Registered Nurse Practitioner, CRNP
Bisan Mousa	Psychiatric Mental Health Nursing Clinical Nurse Specialist	Fall 2018-19	Laila Farhood	Psychiatry Department, AUBMC, both in- and out-patient units	Laila Farhood	Professor, Psychiatry Mental Health
				Teaching education N402 students at HSON		

Name	Track	Residency Term	Residency Supervisor	Residency Site	Preceptor	Preceptor title
Nadia Omeish	Nursing Administration and Management	Summer 2017-18	Lina Younan	Cleveland Clinic Abu Dhabi	Antoinette Zakhour	Program Manager-Academic Partnership & Specialty Certification
Lubna Rajab	Psychiatric Mental Health Nursing Clinical Nurse Specialist	Summer 2017-18	Laila Farhood	Soins infirmiers et development communitaire	Chirine Tohme	Clinical Psychologist , SIDC
				Psychiatry Department, AUBMC, both in- and out-patient units	Laila Farhood	Professor, Psychiatry Mental Health
Cynthia Rizkallah	Community and Public Health Nursing	Spring 2017-18	Gladys Honein	2 weeks at Hopkins Obstetrics/ Gynecology Department, Baltimore	Shirl Kowalewski-	Assistant Director
					Barbara Lamartina	Nurse Manager
				4 weeks at Best Start by Health Nexus-, Toronto	Louise Choquette	Bilingual Health Promotion Consultant
Ahmad Termos	Adult Gerontology Clinical Nurse Specialist	Fall 2018-19	Samar Nouredddine	Johns Hopkins University Hospital, Baltimore, Maryland	Rose Ostendarp	Clinical Educator, Emergency Department

III. STUDENT-RELATED ACTIVITIES

A. STUDENT ENROLLMENT/SCHOLARSHIPS

- The total number of applicants to the BSN program for 2018-19 was 417 including applicants sponsored by USAID and the MasterCard Foundation. The total number of accepted students was 168 and the total number who confirmed their enrollment was 66. This includes 2 students accepted as early admission, 3 transfer students from outside AUB, 3 transfer students from within AUB, 6 students sponsored by USAID, and 4 students working for a second degree.
- The total number of applicants to the MSN program for 2018-19 was 30; the total number of accepted students was 23 and the total number who confirmed their enrollment was 17.
- The first cohort of PhD students started in fall 2018-19. The total number of applicants was 20, 4 were accepted, and 3 enrolled.
- A total of **59** interviews were conducted with new and currently registered BSN students; **50** were recommended for scholarships, and **32** were enrolled. The 60% (Financial Aid and HSON scholarship) is still attracting students who select a nursing major as their 3rd, 4th, or 5th choice when they apply to AUB.

	Total
Interviewed	59
Recommended	50
Total new scholarships offered to new and current students	40

- The table below shows student enrollment for the last five years:

	BSN				
	2014-15	2015-16	2016-17	2017-18	2018-19
Regular applicants	259	259	276	376	226

B. STUDENT RECRUITMENT AND MARKETING

Student recruitment and marketing of the BSN and MSN programs remain a priority at HSON. The marketing strategy for student recruitment in 2018 included various activities:

- **Graduate Open House:** HSON participated in the Graduate Open House on February 20, 2018 organized by the Graduate Council to promote graduate programs. The event was very successful and around 38 potential applicants attended and visited the HSON stand.
- **School visits:** The HSON team visited 21 high schools to recruit students. School counselors were contacted and a poster was sent to all schools inviting high school students to visit the simulation lab at HSON.
- **Visits to HSON:** A 4-hour orientation and mentoring program has been prepared for all visiting high school students who are interested in learning more about the nursing profession:
  - » **First session:** informational session at HSON by the Student Services Office (SSO) about the nursing profession, work opportunities, admission requirements, and the BSN program at HSON
  - » **Second session:** simulation lab session
  - » **Third session:** class attendance
  - » **Fourth session:** volunteering at the AUBMC Courtesy Office (to get exposed to a healthcare setting)
- **HSON received 6 high school students who were interested to visit HSON.** They attended the 4-hour orientation program and expressed their satisfaction in the program. They became more interested in the nursing profession and in applying to the BSN program
- **AUB Annual School Fair:** HSON participated in the AUB Annual School Fair for undergraduate programs in April 2018 organized by the Office of Admissions.
- **AUBMC Open House:** On May 2, 2018, HSON participated in the AUBMC Open House to recruit nurses from all over Lebanon. The SSO had a booth to promote the MSN program.

- **Orientation of new nurses at AUBMC:** During the orientation for new nurses at AUBMC in February, March, May, August, October, and December 2018, the SSO presented the MSN program requirements. This presentation became part of the orientation program organized by the AUBMC Clinical and Professional Development Center (CPDC).
- **Marketing and promotion of HSON academic programs is also done through:**
  - » **Social media:** In addition to Facebook, LinkedIn and YouTube, a twitter account has been created.
  - » **Nursing Centralized Application System (CAS) portal:** to recruit students from North America for the MSN program and for the BA/BS-BSN second degree accelerated program.

C. STUDENT ACTIVITIES

Nursing students were involved in various community projects and activities in their Community Course and in events organized by the Nursing Students Society (NSS) in 2018:

- **New Student Orientation:** During the orientation of newly-enrolled students, some undergraduate and graduate students provided testimonials and success stories about the nursing profession.
- **AUB Mentorship in Nursing:** In 2017, HSON launched the AUB Mentorship in Nursing (AMIN) program that provides new students with mentors to help and guide them as needed. AMIN was founded by Elizabeth Cantrell and is managed by the NSS. AMIN reports to the NSS advisor, Dr. Angela Massouh. Rami Al Chami was selected to be the head mentor for the 2018-19 academic year.

The following mentors were selected for fall 2018-19:

Mentors at AMIN		
Sibelle Bou Nassif	Lana Nehmani	Mohammad Sweidan
Rami Al Chami (Head)	Rana Samad	Laya Nour Yammout
Maya Kabakibi	Zeina Sayegh	Yousra Al Zahabi
Aya Moreno	Zuhat Shehimi	

- **School Fair:** BSN and MSN students participated in the AUB School Fair that was open to students from different high schools. HSON had a stand at the Olayan School of Business to inform visitors about the BSN program at AUB.
- **The AACN Graduate Nursing Student Academy (GNSA):** Ninar Skheita was selected to be the new GNSA liaison for HSON graduate students. She informs graduate students about upcoming events, news, conferences, career fairs, etc.
- **The Middle East Student Ambassador Program by Elsevier:** Elsevier has launched the Middle East Student Ambassador Program to connect with the university and support students throughout their careers. One of the nursing students was selected as a student ambassador to help Elsevier engage with other students on campus. The main goal of the ambassador is to help Elsevier to write book reviews whenever they want to promote titles, increase the visibility of Elsevier through social media, and conduct surveys for market research.
- **Medical Research Volunteer Program (MRVP):** Occasionally, undergraduate nursing students volunteer to participate in the Medical Research Volunteer Program (MRVP) organized by AUB.
- **AUB Outdoors** Nursing students participated in the AUB Outdoors activities in May 2018.
- **NSS elections:** Elections for the Nursing Student Society were held in September 2018 and the cabinet was formed as follows:
  - » President: Aya Moreno
  - » Vice President: Zuhat Ali Shehimi
  - » Vice President: Jaafar Hoteit
  - » Treasurer: Hiba Fadlallah
  - » Treasurer: Anas Intabli
  - » Secretary: Yousra Al Zahabi
  - » Public Relations; Mohamed Sweidan
  - » Member at Large: Maya Kabakibi

- **SRC and USFC elections:** Elections for the SRC and USFC were held in October 2018 and the results were as follows:

Department	Election Pool	Name
Nursing	FM USFC	Tarek Youssef (Nursing)
Nursing	NURSING IV and GR	Sary M Faraj
Nursing	NURSING II and III	Mohammad Ziad Z Bakkar

- **AMIN coffee hour:** AMIN mentors organize a coffee hour for new and returning students so that, for example, new students can find out from senior students about the program, activities, etc.
- **General Assembly for NSS**

  On November 6, 2018, NSS held its first General assembly of the year. The cabinet was introduced to the students, and students were informed about NSS, its mission and activities. Students suggested several activities to be placed on the agenda of NSS. In the end, a fun game was held, and pizza & drinks were served.

- **Introducing the nursing major to freshman students**

  On November 26, 2018, NSS took part in the Major's event for freshman student. The nursing major was introduced to freshman students at AUB.

- **Activities for a good cause**

  On December 3,2018, NSS's first movie night was held! The movie Venom was screened, and proceeds where donated to Home of Hope NGO.

  Also, On December 4, 2018, a fundraising activity was done for a good cause on AUB campus. The profits were donated to the Home of Hope NGO, which serves abandoned, abused, and orphaned children in Lebanon.

- **Christmas Tree Decoration**

  Students came together on December 4, 2018 to decorate the Christmas Tree at the School of Nursing.

- **Trivia Night**

  On March 6, 2019, the first Trivia Night was held by NSS. Students grabbed their general knowledge and fun spirits and got competitive. In the end, the winning three teams got valuable prizes from sponsers: Latte Art, Spiced and Sliced, The Conut, Roadster Dinner, and Crepaway!

- **LGBT Health Workshop**

  On March 17,2019, NSS and LEBMASH held the LGBT Health Student Workshop. This workshop provided students with basic knowledge about sexual health, health concerns, and disparities of lesbian, gay, bisexual, and transgender communities. The workshop used active learning strategies to provide students with opportunities to practice affirming and inclusive health regardless of sexual orientation or gender identity.

- **Nursing Mini-Conference:** Undergraduate nursing students in their senior year submitted abstracts and developed research proposals as part of their assignments in the NURS406 research course and to help them develop the skills they would need to be nursing researchers. The conference was organized by Dr. Gladys Honein and Dr. Suzanne Dhaini.

D. OTHER STUDENT SERVICES AND RESOURCES

- **Credentialing Requests of Nursing Graduates**

  With the great demand for certification in different areas of nursing, the number of requests for credentials from graduates has increased. In 2018, HSON received 14 requests by foreign institutions to complete students' credentials; the majority were submitted to the Commission on Graduates of Foreign Nursing Schools (CGFNS) in the USA.

CGFNS International, USA	10
Department of Consumer Affairs (DCA), USA	2
Ordre des infirmiers et infirmieres du Quebec, Canada	1
Nursing and Midwifery Council (NMC), UK	1

At the request of the Student Services Office, a new online credentialing request has been developed by the IT Department that enables nursing alumni to request and pay for their credentials online. The service is expected to go live in early 2019.

- **Online Petition Form System**

  A total of 172 petitions were processed in 2018. The majority were related to underload credits and late course withdrawal. Ongoing enhancements were done to improve the Online Petition Form System.

- **Students Evaluation and Scholarship Database**

  The project has been initiated by the Student Services Office to automate the student evaluation and scholarship process. It is a major project that involves other parties at AUB, such as the Offices of Admissions and Financial Aid. It is still pending the automation of other processes in other related departments, such as the financial aid application.

- **Electronic Archiving System**

  HSON is trying to implement an electronic archiving system mainly for all student files. The project is being implemented in coordination with the IT team and other departments at AUB who have similar archiving systems.

IV. RESEARCH AND SCHOLARLY ACTIVITIES

A. CURRENT HSON FACULTY RESEARCH

Principal Investigator: Huda Abu-Saad Huijer
Palliative Care in Older Adults in Lebanon
The purpose of this study is to evaluate the quality of palliative care (PC), the quality of life (QoL), symptom management, and functional ability among hospitalized older adults in need of palliative care in Lebanon.
Co-investigators: Marina Adra, Suzan Dhaini, Souha Fares, Hussam Ghusn, Ramzi Hajjar, George Karam, **Samar Noureddine**
Funding: CNRS
Status: Data collection completed. Data analysis and write-up in progress.

Principle Investigator: Huda Abu-Saad Huijer
Chronic Pain: The Development and Psychometric Validation of an Arabic-Language Version of the Pain Catastrophizing Scale (PCS-A)
Chronic pain is believed to be a disease on its own and has been increasing in prevalence. The 13-item Pain Catastrophizing Scale (PCS) is the most widely used measure of pain-specific catastrophizing and assesses three dimensions: rumination, magnification, and helplessness. The purpose of the project is to develop and psychometrically evaluate PCS in Arabic among a sample of 150 adult chronic pain patients in Lebanon.
Co-investigators: Souha Fares, Douglas French
Funding: Pfizer
Status: Completed. One article published and others in preparation.

Principal Investigator: Lina Abi Fakher Kantar
Preceptors' Perspectives on their Teaching Practice: Implications for Academia and Service
This study aims at exploring the experiences of preceptors in the clinical teaching of nursing students to assess their educational needs and preparedness for teaching. Qualitative, focus group interviews will be used to gain insights into the experiences of 30 clinical preceptors, situated in three recognized healthcare facilities in Beirut. The emergent themes will guide both academia and service in the development of a curriculum targeting the teaching behaviors and teaching practices of preceptors.
Co-investigator: None
Funding: Center for Teaching and Learning – AUB (2017-19)
Status: Data collection.

Principal Investigator: Lina Abi Fakher Kantar
Preceptor Pedagogy in Nursing Education: A Cognitive Task Analysis Research
This study aimed at assessing the pedagogical principles of the preceptor-driven model in undergraduate nursing programs.
Co-investigators: Sawsan Ezzeddine, Ursula Rizk
Funding: URB
Status: Publication submitted to Nurse Education Today.

Principal Investigator: Lina Abi Fakher Kantar
Preceptors in Clinical Teaching of Nursing Students: Are We on the Right Track?
This study aimed at understanding the preceptors' conceptions of teaching in learner-centered clinical teaching.
Co-investigators: Sawsan Ezzeddine, Ursula Rizk
Funding: URB
Status: Paper accepted for presentation at the 45th Annual National Conference of the Professional Nurse Educators Group (PNEG), Wayne Forte, Indiana, USA.

Principal Investigator: Lina Abi Fakher Kantar
Case-based Learning and the Development of Professional Skills: Perceptions of Nursing Students
This study aimed at exploring perceptions of nursing students who had completed two undergraduate nursing courses using case-based learning, to be able to identify professional skills that may be gained from this instructional approach.
Co-investigator: None

Funding: None
Status: Paper presented at the 2nd International Nursing Conference of the Order of Nurses in Lebanon. Beirut, Lebanon.

Principle Investigator: Marina Adra
Exploring Resident Staff Relationships in Nursing Homes in Lebanon
To explore the prevailing relationships between nursing home residents and staff and to elicit the factors that influence these relationships.
Co-investigators: Zepur Aharonian, Abla Sibai
Funding: MPP
Status: Study completed, paper written, to be submitted to the Journal of Gerontological Nursing.

Principal Investigator: Marina Adra
Promoting a Culture of Community in Nursing Homes in Lebanon through Forging Partnerships
The aim of this study is to contribute to the understanding of how the formation of significant relationships in care homes in Lebanon may support the development of a culture of community.
Co-investigators: Zepur Aharonian, Abla Sibai
Funding: URB
Status: Institutional Research Board (IRB) approval in progress.

Principal Investigator: Elie Akl
Exploring the Factors Impacting the Trust of the Lebanese Public in Physicians: a Qualitative Study
The aim of this qualitative study is to explore the factors that impact the trust of the Lebanese public in physicians.
Co-investigators: Gladys Honein, Bashir Shaya, Ali Khalil, Nadine Al Homsi, Kevin Eid, Zeinab Haidar, Kelly Merheb
Funding: None
Status: Manuscript submitted for publication to BMC Health Services Research.

Principal Investigator: Elie Akl
Fellowship and Residency Research Program at AUBMC - Moving Forward
The aim of this qualitative study is to evaluate the fellowship and residency program at AUBMC and explore the barriers they face in order to suggest measures for improvement.
Co-investigators: Gladys Honein, Pamela Abi Khalil
Funding: AUBMC
Status: Manuscript in preparation.

Principal Investigator: Nour Alayan
Nurses' and Pediatricians' Attitudes, Perceptions, and Practices of Screening, Brief Intervention, and Referral to Treatment (SBIRT) for Adolescent Substance Use: A Multisite Cross-Study in Primary Care and School Settings
This study aims to explore nurses' and pediatricians' attitudes, perceptions, and practices regarding adolescent substance use screening and interventions.
Co-investigators: Tamar Avedissian, Ghada Assaf, Farid Talih
Funding: URB
Status: Ongoing.

Principal Investigator: Marlene Chakhtoura
Research Fellowship Program at AUBMC
The aim of this qualitative study is to explore research fellows' and mentors' views about research training at AUBMC and the challenges they face. Taking into consideration the currently available models in the USA, and based on the suggestions and needs identified locally, we will establish a formal training program for research fellows.
Co-investigators: Gladys Honein, Rola Rassi, Elie Akl
Funding: AUBMC
Status: Manuscript in preparation.

Principal Investigator: Michael Clinton

From Education to Practice: The Challenges that Nursing Students and Novice Nurses Face in Lebanon

This qualitative study involves three university sites and three hospitals in Lebanon. The study is designed to investigate from the point of view of students and registered nurses (RNs) in the first year of practice the challenges they face as they engage in clinical nursing practice. The study focuses on challenges that are unique to Lebanon. Separate focus groups will be formed at the three universities. The three focus groups will explore the challenges students face as they transition to the clinical experience in BSN IV. Separate focus groups will be established at three hospitals in Beirut. The hospitals will be those that generally recruit the most graduates from the respective universities. The three focus groups will focus on the challenges RNs face in their first year of practice in Lebanon. Thematic analysis and the constant comparative method will be used to analyze the data. The study findings may suggest strategies for reducing attrition in BSN programs in Lebanon and may assist hospital administrations to reduce attrition of RNs in their first year of practice.

Co-investigators: Myrna Doumit, Sawsan Ezzeddine, Ursula Rizk

Funding: None

Status: Manuscripts published.

Principal Investigator: Michael Clinton

Comparison of Organizational Research Climates in Universities in Lebanon, Canada, and Australia: An Initial Study

The strategic purpose of this initial study is to establish an international program of research focused on the regulation of human subject research. In this initial study the organizational research climates of selected universities in Lebanon, Canada, and Australia will be described and compared. Subject to ethical and institutional approval the study will be conducted at the American University of Beirut, the Lebanese American University, the University of Saskatchewan, and the University of Newcastle, New South Wales. This survey is the first of its kind to assess from the perspective of investigators and graduate students the

organizational research climate in three countries. The results will provide a basis for expanding the survey to other universities in Lebanon and the wider region, Canada, and Australia.

Co-investigator: Dr. Rusla Anne Springer, University of Saskatchewan, Canada

Funding: None

Status: Analysis for the Lebanon and Canada arms of the study complete. Institutional issues to be explored prior to publication of study findings.

Principal Investigator: Laila Farhood

Promoting Psychosocial and Mental Healthcare through Community-based Educational Workshops for Teachers and Parents: A Follow-up to Mental Health Assessments in Civilians Exposed to Traumatic Events of War in the South of Lebanon

This intervention study employs a quantitative, quasi-experimental pre-post design in which community-based educational programs with teachers and parents were implemented in two schools in South Lebanon. The study consisted of two phases. In the first phase audio taped focus groups with teachers and parents were conducted in order to identify their attitudes and beliefs towards mental illness, symptoms and treatment (this paper was published in JTN). Based on the identified themes, community-based educational programs with the same sample were implemented. Mental health educational workshops were conducted by mental health professionals in psychiatry and psychology over the course of six weeks (two per weekend) in one venue at Marjeyoun National School. Both teachers and parents participated in the workshops, which sought to address various topics on mental health and psychosocial care. The efficacy of this intervention was assessed by comparing scores on PTSD, General Health, Strengths and Difficulties, and Attitudes towards Mental Illness Questionnaires prior to and after its implementation, as well as at 1.5 year follow up.

Co-investigators: Fadi Maalouf, Myrna Doumit, Souha Fares

Funding: MPP and URB

Status: Published.

Principal Investigator: Laila Farhood

An Investigation of War Trauma Experiences and Post-Traumatic Stress Reactions in a South Lebanese Civilian Sample: How Does Gender Fit in the Equation?

This study is part of a bigger one assessing PTSD, Depression and other psychiatric morbidities and their mediating factors in a civilian population exposed to war. The study aimed to assess gender differences in: (1) PTSD prevalence; (2) reported trauma types; (3) reported clusters of symptoms of trauma; and (4) risk factors associated with PTSD. These findings, in turn, enabled us to draw different PTSD symptom, trauma-vulnerability, and risk factor profiles for civilian men and women exposed to war traumas. These profiles would yield insight on alternative assessment and intervention strategies that are sensitive to both genders and strategies that are not necessarily considered in today's approach to PTSD assessment and intervention.

Status: Ongoing.

Principal Investigator: Hala Darwish

Environmental Enrichment and Exercise (EE+Ex) Affects Object Recognition, Spatial Learning and Memory, and Epigenetic Events Post Severe Traumatic Brain Injury

Severe Traumatic Brain Injury (TBI) survivors suffer from persistent cognitive deficits. Similarly, long-term recognition, temporal order, and spatial learning and memory deficits follow experimentally induced severe TBI in rats. Therapies such as environmental enrichment (EE) and exercise are promising and enhance memory functions post severe TBI. However, few studies have examined epigenetic, astrocytic changes in relation to memory functions after EE and exercise. Severe TBI using controlled cortical impact head injury in mice will be used. After 14 and 21 days of EE coupled with daily exercise, spontaneous object recognition, temporal order, and spatial learning and memory will be assessed using an open field and Morris water maze. Neurogenesis, epigenetic events, and astrocytes changes will be measured using immunohistochemistry labeling and quantitative real time PCR. Decreased memory impairment and increase in neurogenesis in the experimental group compared to controls is expected; in addition to an elevation in the number of astrocytes as well as up-regulation in GFAP and Vimentin expression. Decreased DNA methylation and increased histone acetylation in the hippocampus are expected as well. Controlling and modifying the severe TBI survivors' environment as well as exercise to stimulate and restore sensory, motor, and cognitive function is of great clinical importance.

N-Acetylation Traits as Effect Modifiers of the Association Between Smoking-based Arylamine Exposure and Tumorigenic Outcome in Lebanese Urothelial Bladder Cancer Patients

The study aims to investigate a potential association between smoking and tumorigenic outcome in urothelial bladder cancer patients, as well as to examine the modifying effect of metabolic N-acetylation traits. This study is expected to improve our understanding of the etiology of bladder cancer. We anticipate providing evidence in support of a gene-environment interaction that may underlie the unusually high incidence of bladder cancer in Lebanon.

Funding: Global Health Institute

Status: Qualitative data collection completed; manuscript in press to the Journal of Nursing Scholarship; quantitative data collection commenced in March 2019. Quantitative data collection in process.

Principal Investigator: Souha Fares

Abnormal Blood Pressure Complexity and Fluctuation: An Indicator of Vascular Disease Independent of Blood Pressure

The research proposal is focused on the use of non-conventional blood pressure variability (BPV) metrics (complexity measures and detrended fluctuation analysis exponents) to examine the potential role of this novel cardiovascular risk factor in the adult Lebanese population. Our primary objective is to determine the effect of weight loss through bariatric surgery on blood pressure dynamics in obese and morbidly obese normotensives (No-HTN), pre-hypertensive (pre-HTN), and hypertensive patients (HTN). We also aim to show that beat-to-beat BP complexity and fluctuation metrics will provide superior discrimination between No-HTN, pre-HTN, and HTN subjects, and will differ for demographic sub-cohorts. Another objective is to quantify the impact of BPV on the normal and shear stresses at the walls of the blood vessels.

Principal Investigator: Gladys Honein

Exploring the Benefits and Drawbacks of a New Approach for Managing Conflict of Interest in Guideline Development

The Canadian guideline for use of opioids in chronic non-cancer pain used an innovative approach for the management of financial and intellectual conflicts of interest, which was to have a team of unconflicted clinician-methodologists serving on the voting guideline panel, and to have a team of content experts, including individuals with financial and/or intellectual conflicts of interest, to guide the panelists and provide content expertise. This study aims to explore the benefits and drawbacks of this approach, and whether it could serve as a potential model for managing important aspects of conflict of interest in future guidelines.

Principal Investigator: May Khoury
Palliative Care: Educational Intervention for Nurses in Lebanon: An Attempt
The purpose of this study is to assess the effectiveness of palliative care continuing educational intervention for registered nurses at the American University of Beirut Medical Center and to recommend future educational programs.
Co-investigators: Mary Arevian, Suha Fares, Ghina El Khatib
Funding: None
Status: Data analysis in progress.

Principal Investigator: Samia Khoury
Microglial Activation and Neural Stem Cells Cross Talk Post Traumatic Brain Injury
Microglia are macrophage cells in the Central Nervous System (CNS), at the front line of CNS immunological defense. They play an important role in Mild Traumatic Brain Injury (mTBI) which may be beneficial or detrimental depending on their state of activation. This project aims to:
Evaluate spatio-temporal activation of microglia cells and the role of microglial activation at 2, 7, and 35 days post-TBI, in rodents.
Characterize the behavioral deficits post-TBI and correlate outcomes with neural injury and immunological indices.
Co-investigators: Hala Darwish, Firas Kobeissy
Funding: Office of Naval Research, US Department of Defense (DOD)
Status: Ongoing.

Principal Investigator: Salwa Kobaissi
Evaluation and Challenges of a Smoking Cessation Program (SCP): The Experience of a Referral Center in the Eastern Mediterranean Region
The aim of this qualitative study is to evaluate the obstacles and facilitators faced by practitioners in the delivery of service.
Co-investigators: Gladys Honein, Nadim Kanj, Maya Romani
Funding: AUBMC
Status: Manuscript in preparation.

Principal Investigator: Dr. Tamara Lotfi
Cross-sectoral Evidence Synthesis and Knowledge Translation in 37 Centers from 24 Low and Middle Income Countries: a Needs Assessment Study
To assess the needs of GESI Network members in order to tailor capacity strengthening activities.

Funding: None
Status: Manuscript in preparation.

Principal Investigator: Angela Massouh
Determinants of Self-care in a Sample of Lebanese Patients with Heart Failure
The primary purpose of this study is to describe self-care behaviors and their determinants in a sample of Lebanese patients with heart failure and subsequently make recommendations for interventions to promote self-care among this vulnerable patient population. The specific aim of this study is to describe the relationships among clinical and sociodemographic characteristics, functional ability, and psychological status and self-care in a sample of Lebanese patients with heart failure.
Co-investigators: Huda Abu-Saad Huijer, Paula Meek
Funding: URB
Status: Finalized, writing manuscripts.

Principal Investigator: Angela Massouh

Dyad Engagement in Heart Failure Self-Care

The primary aim of this study is to identify patient and dyadic determinants of self-care in heart failure care dyads while controlling for dyadic interdependence. Secondary aims of this study are: (1) to typify distinct patterns of heart failure patient-caregiver dyads engagement in self-care and link these patterns to heart failure disease outcomes and (2) to establish a neurocognitive profile of the heart failure patient and determine whether an association exists between the severity of heart failure and cognitive abilities as well as cognitive abilities and self-care.

Co-investigators: Huda Abu-Saad Huijer, Souha Fares, Hala Darwish, Hadi Skouri, Paula Meek

Funding: URB

Status: In process.

Principal Investigator: Nadine Moacdieh

Perceptions of Music and Noise in AUBMC Operating Rooms

The goal of this research is to analyze the perceived effects of noise and music in the OR on the performance and attention of medical personnel.

Resuscitation in the Intensive Care Unit: A Survey of Physicians in Lebanon

The aim of this study is to explore the practices, attitudes, and challenges experienced by intensive care physicians related to in-hospital resuscitation. Lime Survey methodology was used to administer the survey online to 196 members of the Lebanese Society of Critical Care Medicine and 254 members of the Lebanese Society of Cardiology. Results will inform development of a national policy on cardiopulmonary association.

Co-investigators: Ahmad Husari, Mira Obeid, Hussain Isma'eel

Funding: In-kind support by the Vascular Medicine Program, AUBMC

Status: Data analysis.

Principal Investigator: Samar Noureddine

Survey of the Knowledge, Attitude, and Practices Related to Out of Hospital Resuscitation Among Nurses in Lebanon

The aim of this study is to examine the knowledge, attitudes, and practice of nurses in Lebanon related to out of hospital cardiopulmonary resuscitation. A second aim is to identify factors associated with the willingness of nurses to attempt resuscitation outside the hospital setting. The study uses a descriptive quantitative design. A total of 770 nurses will be recruited, including 556 nurses from a sample of 30 hospitals randomly selected from the 5 governorates, and 204 nurses working in all the primary health care centers in the country. A self-administered questionnaire developed for this study and validated by experts in resuscitation will be mailed to the nurses. The items address training received by nurses in resuscitation and their related knowledge, experience, and attitudes regarding out of hospital cardiac arrest resuscitation, and the perceived importance of factors that may influence the nurse's decision to attempt resuscitation outside the hospital setting, in addition to demographic questions.

Co-investigators: Tamar Avedissian, Nina Khatib, Joanna Irani

Funding: Order of Nurses in Lebanon

Funding: Duke University
Status: Manuscript in preparation.

Principal Investigator: Ahmad Al Yazbi
Modulation of Metabolic Stress-induced Neuro-inflammation by Oral Anti-diabetic Drugs: A Proposed Role for Activation of Autophagy
Metabolic syndrome (MetS) remains a public health challenge with significant increase in diabetes and cardiovascular disease risk. A less studied consequence of MetS is the ensuing central nervous system (CNS) inflammation. Recent evidence suggests an association between neuro-inflammation in MetS with cognitive impairment. With a high incidence of diabetes in Lebanon, as estimated by the International Diabetes Federation, a significant proportion of the population would be at risk of developing detrimental cognitive consequences of metabolic stress. Thus, studying the mechanistic link leading to neurobehavioral consequences in metabolic disorders becomes of great local public health value. Additionally, the recent introduction of new anti-diabetic agents with presumed pleiotropic effects on the associated inflammatory processes sets the stage for further investigation of the potential CNS protective effect of these drugs in the context of MetS.
Our intent in this proposal is to use a newly developed rat model of metabolic stress to investigate behavioral changes occurring in the context of the pre-diabetes, study the underlying pathology, and examine the effect of early treatment with some of the anti-hyperglycemic drugs with presumed benefit. Our goal is to identify targets for early therapeutic interventions and uncover the mechanism for potential corrective effects of oral anti-hyperglycemic drugs.
Co-investigators: Hala Darwish, Firas Kobeissy
Funding: CNRS
Status: Pending funding from CNRS.

Research/Continuing Education Seminars

The HSON Research Committee (RC) organized a series of research seminars. The aim of these seminars is to disseminate the research findings of HSON faculty and alumni to the AUB community and to get acquainted with other AUB faculty members' research work. The following were invited to share their research findings:

- Dr. Ghassam Hamade, January 24, 2018. Title: Overview of Reporting and Clinical Research in EPIC.
- Dr. Angela Massouh, April 25, 2018. Title: Determinants of Self-care in a Sample of Lebanese patients with heart failure.
- Dr. Fadia Homeidan, November 28, 2018. Title: How OGC can help PIs identify funding and what else OGC offers in terms of services.
- Dr. Issam Lakkis, December 12, 2018. Title: Beirut Pollution Map.

C. EDITORIAL POSITIONS

Huda Abu-Saad Huijer

1994 Ongoing	Associate editor and later member of Editorial Board, International Journal of Nursing Studies
1999 Ongoing	Editorial Board, Journal of Transcultural Nursing
2005 Ongoing	Editorial Board, Journal of Nursing Scholarship
2005 Ongoing	Reviewer, European Journal of Pain
2006 Ongoing	Editorial Board, Japanese Journal of Nursing Science
2008 Ongoing	Reviewer, Lebanese Medical Journal
2009 Ongoing	Reviewer, Pediatric Pain Newsletter, IASP

2011 Ongoing	Reviewer, Journal of Palliative Medicine
2011 Ongoing	Editorial Board, IASP Insight Newsletter
2011 Ongoing	Editorial Board, Nursing Children and Young People
2012 Ongoing	Reviewer, Health Promotion International
2012 Ongoing	Reviewer, Europe's Journal of Psychology
2012 Ongoing	Reviewer, Journal of Pain and Symptom Management
2013 Ongoing	Editorial Board, Annals of Palliative Medicine
2014 Ongoing	Editorial Board, Alexandria Scientific Nursing Journal (ASNJ)

Nour Alayan

2015 Ongoing	Reviewer, Journal of Addictions Nursing
2015 Ongoing	Reviewer, Japan Journal of Nursing Science

Mary Arevian

2006 Ongoing	Reviewer, Journal of Interprofessional Care
2006 Ongoing	Reviewer, Journal of Transcultural Nursing
2008 Ongoing	Reviewer, Journal of Women's Health
2012 Ongoing	Reviewer, The Japanese Journal of Nursing Sciences
2012 Ongoing	Reviewer, Journal of Health Promotion International

Michael Clinton

2010 Ongoing	Editorial Board, Journal of Mental Health
2010 Ongoing	Editorial Board, Journal of Ethics in Mental Health
2010 Ongoing	Editorial Board, International Journal of Evidence-Based Healthcare

2010 Ongoing	Review Panel, Contemporary Nurse
2010 Ongoing	Review Panel, Journal of Nursing Measurement
2010 Ongoing	Reviewer, Journal of Adolescent Health
2018 Ongoing	Reviewer, International Journal of Nursing Studies.

Hala Darwish

2011 Ongoing	Editor, The AUBMC Abu Haidar Neuroscience Institute Newsletter
Ongoing	Reviewer, Electrophoresis (Peer Reviewed Journal)
2012 Ongoing	Reviewer, Journal of Neurotrauma
2012 Ongoing	Reviewer, Journal of Clinical Immunology
2013 Ongoing	Editorial Board, Frontiers of Neurotrauma
2015 Ongoing	Reviewer Plos One
2017 Ongoing	Journal of Nursing Scholarship

2014 Ongoing	Nurse Education Today, Elsevier
2014 Ongoing	Nurse Education in Practice, Elsevier

Samar Noureddine

2016 Ongoing	Reviewer, BMC Health Services Research
2015 Ongoing	Reviewer, Lebanese Nursing Journal
2014 Ongoing	Reviewer, Sultan Qaboos University Medical Journal
2013 Ongoing	Editorial Board, European Journal of Cardiovascular Nursing
2012 Ongoing	Reviewer, Heart & Lung: The Journal of Acute and Critical Care
2011 Ongoing	Reviewer, Journal of Cardiovascular Nursing
2011 Ongoing	Reviewer, Journal of Clinical Nursing
2011 Ongoing	Reviewer, Pan African Medical Journal
2009 Ongoing	Reviewer, International Journal of Nursing Studies

2009 Ongoing	Reviewer, Journal of Nursing Scholarship
2009 Ongoing	Reviewer, European Journal of Cardiovascular Nursing
2009 Ongoing	International Editorial Board, Metas de Enfermiera' Nursing Journal
2008 Ongoing	Reviewer, American Journal of Critical Care
2008 Ongoing	Editorial Board, Journal of Transcultural Nursing

Lina Younan

2018	Abstract reviewer for the ICN Congress in Singapore, June 27-July 1, 2018 (reviewed 78 abstracts Oct/Nov 2018).
2018	Reviewer, Journal of Nursing Management

D. SCIENTIFIC CONTRIBUTIONS AND RESEARCH GRANT REVIEWS

Huda Abu-Saad Huijer

2014-18	PhD supervision of Ms. Angela Massouh, University of Colorado, USA
2014-18	PhD supervision of Farah Chamaa, Department of Anatomy Cell Biology and Physiological Sciences, Faculty of Medicine, AUB
2016 Ongoing	Faculty mentoring of Dr. Rihab Nasr, Department of Anatomy, Cell Biology and Physiological Sciences, Faculty of Medicine, AUB
2018 Ongoing	Faculty mentoring of Dr. Wassim Abi-Kheir, Department of Anatomy, Cell Biology and Physiological Sciences, Faculty of Medicine, AUB

Hala Darwish

2011 Ongoing	Reviewer of Medical Practice Plan, Faculty of Medicine Research Committee, AUB

Nuhad Dumit

2009 Ongoing	Reviewer, Western Institute of Nursing conference Abstracts
2011 Ongoing	Reviewer, "Effective Teaching and Learning in Higher Education," organized by the Center for Teaching and Learning (CTL) and IT Academic Core Processes and Systems (IT ACPS), AUB
2012 Ongoing	Reviewer, ICN Congress/conference Abstracts
2016 Ongoing	Appraiser, McMaster Online Rating of Evidence (MORE), McMaster University

Laila Farhood

2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, AUB (upon request)
2013-14	Ongoing MPP/URB funding for the Intervention study "Promoting psychosocial and mental healthcare through community-based educational workshops for teachers and parents: A follow-up to mental health assessment in civilians exposed to traumatic war events in the South of Lebanon"

Gladys Honein

2016 Ongoing	Abstract reviewer, North American Primary Care Group, November 9-12, 2016

Lina Kantar

2013 Ongoing	Center for Teaching and Learning (CTL) grant reviews, AUB

Samar Noureddine

2012 Ongoing	Abstract reviewer, Annual Spring Meeting of the Cardiovascular Council of Nurses and Allied Professionals
2011 Ongoing	Reviewer for Sultan Qaboos University, Research and Innovations Department
2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, Faculty of Medicine Research Committee, AUB

Lina Younan

- Younan, L. Prevalence and Relationship of Work-Related Musculoskeletal Injuries, Work-Related Fatigue, and Work organization among Lebanese Nurses. 2nd International Nursing Conference organized by the Order of Nurses in Lebanon at the Habtour Hotel, Sin el-fil, Beirut, Lebanon. May 11, 2018.

V. PROFESSIONAL PRACTICE/ SERVICE

A. PROFESSIONAL PRACTICE

Huda Abu-Saad Huijer

- Member, Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP). Ongoing.
- Founding President, Chi Iota Chapter, Sigma Theta Tau International Honor Society in Nursing in Lebanon.
- Consultant, WHO EMRO on the Future of Nursing and Midwifery in the Eastern Mediterranean Region.
- Member, Advisory Committee, Center for Research, Training, and Policy in Arab Mental Health, Faculty of Medicine, AUB.
- Member, Public Advisory Board, Lebanese Society of Family Medicine.
- Vice-President, National Committee on Pain Relief and Palliative Care (Appointed by Minister of Health); Chair, Research Committee.
- Past president, Lebanese Society for the Study of Pain.
- Member, UC Davis, Advancing Pain Relief Education: Anchoring Pain Competencies around the World
- Member, Advisory Board of the Order of Nurses in Lebanon.
- Member, Association of Deans and Directors of Schools of Nursing in Lebanon.

Marina Adra

- Consultation with the Nursing Program at Mohamad Al Mana College of Health Sciences (MACHS).

Nour Alayan

- Member, Academic and Curriculum Committee, HSON, AUB.
- Member, Learning Collaborative for Adolescent SBIRT in Social Work & Nursing Education, the Non-partisan and Objective Research Organization (NORC), University of Chicago, USA.

Nuhad Dumit

- President, Order of Nurses in Lebanon.
- Member, Western Institute of Nursing.

Hala Darwish

- Continuing education program/curriculum for Lebanese neuroscience nurses. Leading a team of 5 neuroscience nurses to train 180 nurses. This is part of a capacity building, train the trainer program, project led by the Lebanese Order of Nurses, spring-summer 2018.

Laila Farhood

- Psych Mental Health track coordinator.
- Clinical Associate, Department of Psychiatry, Faculty of Medicine. Clinical activities include psychiatric assessment and psychotherapy (individual, couple, and family therapy) in in-patient and out-patient settings.

Gladys Honein

- Session Chair, Introduction to qualitative research, Global Health Institute, Seminar, 2018.
- Session Chair, Introduction to qualitative research, Fellowship Program, Lecture, 2018.
- Oral Presenter, Facilitators and barriers to participation in colorectal cancer screening, launch of the national guidelines for colorectal cancer screening, Ministry of Public Health, Conference, 2018.

Lina Kantar

- Coordinator, CNE and Offshore Projects / REP.
- Coordinator, Hybrid Nursing Education / HSON.

May Khoury

- Active member in Pain Relief and Palliative Care Education Sub-Committee of the National Committee for Pain Relief and Palliative Care established by the Ministry of Public Health.

- Coordinator and presenter: Workshop on Evidence Based Nursing in Neonatal Care at the Training and Development Center in Dubai. November 25-27, 2018.
- Active member, Pediatrics Educational Council at AUBMC.

Dina Madi

- Attended and participated (moderator of a session) in the International Congress of the Order of Nurses.
- Participated in AUB Philanthropy Week as a team leader of the nursing group at quiz night.
- Sigma Theta Tau International, Chi Iota Chapter, president until October 2018.

Angela Massouh

- Cardiology Clinical Nurse Specialist. Joint Appointment, AUBMC.
- Heart Failure Specialists of Tomorrow, European Society of Cardiology, Nucleus Committee Member.
- Sigma Theta Tau International, Chi Iota Chapter, president since November 2018.
- Cardiology Nurses Committee. Order of Nurses, Lebanon.

Samar Noureddine

- Moderated a session titled 'Surgical Patient Management and Care' at the 21st Congress of the Lebanese Society of General Surgery, Order of Physicians, Beirut, Lebanon. June 30, 2018.
- Moderated a session titled 'Nursing Care in NCDs' at the 2nd international conference of the Order of Nurses in Lebanon in Habtoor Hotel, Lebanon. May 10, 2018.
- Moderated a session titled 'Nursing care in NCDs' at the 2nd international conference of the Order of Nurses in Lebanon in Habtoor Hotel. Lebanon. May 11, 2018.
- Co-chair, Scientific Committee, Second International Conference of the Order of Nurses in Lebanon Nurses Leading The Vision For Global Health planned for May 9-11, 2018.

- President; Nurses' Chapter, Worldwide Alumni Association of the American University of Beirut, since February 2015.

Lina Younan

- Coordinated the Epic training of concerned HSON instructors, faculty, and students.
- Member of a task force for developing the nursing code of ethics for Lebanon.

B. SERVICE

HSON STANDING COMMITTEES

Advisory Committee:

- Dr. Huda Abu-Saad Huijer (Chair)
- Dr. Michael Clinton
- Dr. Laila Farhood
- Dr. Samar Noureddine
- One member to be elected from associate professor rank when bylaws are approved

Administrative Committee:

- Dr. Huda Abu-Saad Huijer (Chair)
- Dr. Nuhad Dumit
- Dr. Laila Farhoud
- Dr. Samar Noureddine

Graduate Studies Committee:

- Dr. Michael Clinton (Chair)
- Dr. Gladys Honein (to replace Dr. Hala Darwish during fall 18-19)
- Dr. Nuhad Dumit

- Dr. Samar Noureddine (ex-officio and representative of the Board of Graduate Studies)
- Dr. Laila Farhoud (ex-officio)
- Dr. Houry Puzantian (Appointed)

Graduate Studies Departmental Assessment Committee:

- Dr. Lina Younan (Chair)
- Mrs. Mary Arevian
- Dr. Souha Fares
- Dr. Samar Noureddine (ex-officio)

Undergraduate Curriculum Committee & Undergraduate Student Academic Affairs Committee:

- Dr. Dina Madi (chair)
- Mrs. Mary Arevian
- Dr. Nour Alayan
- Dr. Lina Kantar
- Dr. Ghada Assaf (Appointed)
- Dr. Suzanne Dhaini (Appointed)
- Dr. Angela Massouh (Appointed)
- Dr. Nuhad Dumit (ex-officio)
- Dr. Hala Darwish (Senate representative)

Undergraduate Admissions and Financial Aid Committee:

- Mrs. May Khoury (Chair)
- Mrs. Danielle Damianos
- Mrs. Talin Gulgulian
- Dr. Dina Madi
- Mrs. Hera Tashjian

- Mrs. Tamar Avedissian
- Dr. Ghada Assaf (Appointed)
- Mrs. Tamar Avedissian (Appointed)
- Dr. Lina Kantar (Representative on Senate Admissions Committee)
- Mrs. Lynn Berbary (SSO)

Undergraduate Studies Departmental Assessment Committee:

- Dr. Marina Adra (Chair)
- Dr. Dina Madi
- Dr. Angela Massouh
- Dr. Nuhad Dumit (ex-officio)

Research Committee:

- Dr. Soha Fares (Chair)
- Dr. Marina Adra
- Dr. Gladys Honein
- Dr. Angela Massouh
- Dr. Samar Noureddine (representative on URB)
- Dr. Suzanne Dhaini (Appointed)
- Dr. Houry Puzantian (Appointed)
- Dr. Lina Badr (representing AUBMC)

Senate Committees:

- Senate: Dr. Huda Huijer and Dr. Nuhad Dumit
- University Admissions Committee: Dr. Lina Kantar
- Board of Graduate Studies: Dr. Samar Noureddine
- University Disciplinary Commitee: Dr. Dina Madi
- Library Committee: Dr. Souha Fares
- University Publications Committee: Dr. Gladys Honein

- University Research Board: Dr. Samar Noureddine
- University Committee on Student Affairs: Dr.Marina Adra
- Academic Development Committee: Dr. Hala Darwish
- Senate Steering Committee: Dr. Nuhad Dumit

Representative on FM Research Committee: Dr. Souha Fares (appointed)

Student Affairs Committee:

- Dr. Marina Adra (Chair) and representative on Senate Student Affairs Committee
- Dr. Dina Madi, class advisor BSN II
- Mrs. May Khoury, class advisor BSN III
- Dr. Marina Adra, class advisor, BSN IV
- Dr. Lina Younan, Graduate Student Advisor
- Dr. Angela Massouh, NSS advisor assisted by Dr. Nour Alayan
- Mrs. Lynn Berbary (SSO)

HSON Search Committee:

- Dr. Huda Abu-Saad Huijer (Chair)
- Dr. Michael Clinton
- Dr. Nuhad Dumit
- Dr. Laila Farhood
- Dr. Samar Noureddine

HSON Catalogue Committee:

- Dr. Samar Noureddine; Chair of Graduate Department
- Dr. Nuhad Dumit; Chair of Undergraduate Department

HSON Newsletter Committee:

- Dr. Gladys Honein (Chair)
- Dr. Marina Adra

- Mrs. Lynn Berbary Najem
- Mrs. Talin Gulgulian
- Ms. Angela Massouh
- Ms. Nisrine Ghalayini

HSON Social Committee:

- Ms. Randa Farha (Chair)
- Mrs. Talin Gulgulian (co-chair)
- Mrs. May Khoury
- Mrs. Lynn Berbary
- Mrs. Silva Dakessian
- Mrs. Danielle Damianos
- Dr. Ghada Assaf

HSON Selection Committee for MCF scholars:

- Dr. Samar Noureddine (or a delegate)
- Ms. Nisrine Ghalayini

HSON PhD Program Steering Committee:

- Dr. Huda Abu-Saad Huijer (Chair) until September 2018
- Dr. Michael Clinton (Chair)
- Dr. Laila Farhoud
- Dr. Jason Farley (representing Johns Hopkins University School of Nursing)
- Dr. Jodi Lori (representing University of Michigan School of Nursing)
- Dr. Samar Noureddine

Lina Younan

Disciplinary Board of the Order of Nurses in Lebanon, member

Order of Nurses in Lebanon, member

Sigma Theta Tau International, Chi Iota Chapter, AUB, member

VI. LOOKING AHEAD

New Academic Programs: HSON plans to expand its current undergraduate and graduate academic programs and continue to contribute to the development of healthcare in Lebanon by preparing high quality graduates to meet the strong demand schools/colleges of nursing, hospitals, and health services.

- At the undergraduate level, we plan to evaluate and revisit the second degree program to attract more BA/BS graduates.
- The proposal to launch a TS-BSN program at AUB AREC in the Beqaa area is being finalized and will be launched soon.
- At the graduate level, HSON will be launching an online/hybrid MSN track in Nursing Administration and Management. The Nursing Education hybrid track is still under discussion.

Other Developments:

- Student recruitment will continue to be a priority. HSON will continue to award merit scholarships to BSN students.
- More emphasis will continue to be placed on graduate recruitment at the national, regional, and international levels in close collaboration with the AUB Graduate Council.
- Increasing the number of scholarships remains a major priority for HSON and is critical to the success of current and new programs. The establishment of more endowed funds remains a strategic goal for HSON.
- The recruitment of PhD-holder and research-active faculty and filling the endowed chair to direct HSON's Center for Nursing Research will continue to be a priority.
- HSON will be a major building block of the university's Health Sciences Campus and Health 2025 vision.

American University of Beirut
Rafic Hariri School of Nursing

Annual Report 2017

PREFACE

In 2017, the Rafic Hariri School of Nursing (HSON) PhD in Nursing Science proposal was approved by the Board of Graduate Studies, the AUB Senate, the Board of Trustees, and the New York State Education Department (NYSED). It will be launched AY 2018-19 in close collaboration with Johns Hopkins University and University of Michigan Schools of Nursing and with the Faculty of Medicine and the Faculty of Health Sciences at AUB.

We are proud to report that HSON has the highest number of PhD-holder nursing faculty in Lebanon and that its faculty has authored the highest number of scientific publications. On research productivity, we are proud to report that HSON accounts for 85 percent of Lebanon's and nearly 10 percent of the Arab world's nursing research output; its faculty are among the most productive and impactful nurse researchers in the Arab world.

In 2017, HSON ranked 147 out of 503 schools of nursing that offer graduate programs in the U.S. News & World Report Ranking.

The school continues to place emphasis on research and scholarly productivity, teaching excellence, faculty and student recruitment, and on expanding HSON academic programs based on new and innovative strategic initiatives. We continue to be proud of our achievements, which are detailed in this annual report.

Huda Abu-Saad Huijer RN, PhD, FEANS, FAAN

Professor and Director,

Rafic Hariri School of Nursing

I. The School of Nursing

A. FACULTY

Director of the School of Nursing – 2003 to present

Huda Abu-Saad Huijer, RN, PhD, FEANS, FAAN, Professor

Faculty Members

Lina Abi Fakhr Kantar, RN, EdD, Clinical Assistant Professor

Marina Adra, RN, M S Physiology, PhD, Clinical Assistant Professor; BSN Coordinator

Nour Alayan, RN, M SN, Clinical Instructor; PhD; Promoted to Assistant Professor effective September 1, 2017

Mary Arevian, RN, M PH, Clinical Associate Professor

Tamar Avedissian, RN, M SN, Clinical Instructor

Michael Clinton, RN (CARNA), RGN RPN (AHPRA), PhD, M Sc, BA (Hons.), Professor, with FM Institutional Review Board (IRB) Office as Vice-Chair of the Social and Behavioral Sciences Institution Review Boards

Silva Dakessian Sailian RN, M PH, Clinical Instructor

Danielle Damianos, RN, M SN, Clinical Instructor

Hala Darwish, RN, PhD, Associate Professor, with FM/AUBM C as Managing Director, Abu-Haidar Neuroscience Institute

Nuhad Dumit, RN, M A, PhD, Associate Professor, CE/Offshore Program Coordinator; Undergraduate Division Convener

Souha Fares, PhD, Assistant Professor

Laila Farhood, RN, PhD, CS, Professor and Clinical Associate, Psychiatry Department, Faculty of Medicine; Graduate Division Convener

Talin Gulgulian, RN, M SN, Clinical Instructor

Gladys Honein, RN, PhD, Assistant Professor

May Khoury, RN, BSN, M SN, Clinical Assistant Professor

Dina Madi, RN, TD, M A Education, PhD, Clinical Assistant Professor; BA/BS-BSN Coordinator

Angela Massouh, PhD, MSN, CNS; Promoted to Assistant Professor effective September 1, 2017 and Cardiology Clinical Nurse Specialist
Samar Noureddine, RN, PhD, FAHA, FAAN, Professor; Assistant Director for Academic Affairs
Hera Tashjian, RN, MSN, Clinical Instructor
Lina Younan, RN, MSN, DNP, Clinical Assistant Professor

New Faculty

Suzanne Dhaini, RN, Master in Child Studies, PhD, Assistant Professor effective September 1, 2017
Ghada Najjar Assaf, MHS (Mental Health), PhD, Visiting Clinical Assistant Professor effective September 1, 2017

Part-Time

Ibrahim Fakih, BS, MPH, Nursing Informatics Post Graduate, Instructor, effective August 2017
Hanadi Masalkhi, RN, MSN, Clinical Instructor
Myrna Saadeh, BS, MSN, Clinical Instructor, effective January 2017

Adjunct Faculty

Continuing

Patricia Abbott, PhD, RN, FAAN, RN, PhD, Associate Professor, University of Michigan School of Nursing, USA
Debra Barton, RN, PHD, AOCN, FAAN, Mary Lou Willard French Professor of Nursing, University of Michigan School of Nursing
Barbara L. Brush, PHD, ANP-BC, FAAN, Carol J. and F. Edward Lake Term Clinical Professor, University of Michigan School of Nursing
Jacqueline Campbell, PhD, RN, FAAN, Professor, Anna D. Wolf Chair, Johns Hopkins University School of Nursing
Patricia M. Davidson, Professor and Dean, Johns Hopkins University School of Nursing, USA

Cheryl Dennison, PhD, RN, ANP, FAAN, Professor, Director, Office of Science and Innovation, Johns Hopkins University School of Nursing
Ivo D. Dinov, PhD, Associate Director for Education and Training, University of Michigan School of Nursing
Jason E. Farley, PhD, MPH, ANP-BC, FAAN, AACRN
Christopher Frieze, PHD, RN, AOCN, FAAN, Professor, University of Michigan School of Nursing
Nancy E. Glass, PhD, MPH, RN, FAAN, Professor, Associate Director for Research, Associate Director, Johns Hopkins Center for Global Health, Johns Hopkins University School of Nursing

Patricia Assaf Chedid, BA, MBA, Executive Officer/Financial Officer
Lynn Berbary Najem, BBA, MBA, Student Services and Recruitment Officer
Ibrahim Bikdashi, BS, IT Field Support Technician; effective March 2017
Rabih Daher, Junior Clerk
Alaa Fawzi Dika, BS, IT Field Support Technician until February 2017
Randa Farha, BSN, MSN, MPH, Simulation and Clinical Competency Center Coordinator
Nisrine Ghalayini, BA, Graduate Division Administrative Assistant
Maher Itani, IT Manager, Masters in Engineering, CCE; effective October 2017.
Marwa Soubra, IT Manager BS, MBA, Faculty of Medicine and Hariri School of Nursing until October 2017.
Jeanette Zeinati, Secretary

C. RECRUITMENT

HSON continues to advertise for regular faculty positions and for the Hariri Endowed Chair in Research. These positions are advertised on the AUB and HSON websites, in the Chronicle of Higher Education, on the recruitment site Inside Higher Ad, and on social media through LinkedIn. Recruitment information is also mailed to leading schools of nursing, professional organizations, and to mailing lists in the United States and Europe.

D. CCNE ACCREDITATION

- The BSN and MSN programs continue to be accredited by the Commission on Collegiate Nursing Education (CCNE) (http://www.aacnnche.edu/ccne-accreditation) in the USA.
- The revised MSN program based on the Master's Essentials was approved by CCNE in August 2017 and by the Department of Education in New York State.
- HSON submitted the Continuous Improvement Progress Report (CIPR) to CCNE on December 1, 2017. The CIPR is required for accreditation.
- HSON continues to be a regular member of the American Association of Colleges of Nursing.

E. HONORS, AWARDS, AND RECOGNITIONS

Huda Abu-Saad Huijer

Received the Princess Mona Regional Award for Excellence in Nursing for 2017 in recognition of significant contributions to healthcare across borders and dedication and leadership in nursing at the regional level.

Continues to be a member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP).

Hala Darwish

Received the International Organization of Multiple Sclerosis Nurses Award (IOMSN).

Nuhad Dumit

Received the Maha Khoury Award granted by the Faculty of Nursing, Universite Saint Joseph (USJ). Received a Recognition of Achievement award by the Ambassador/Embassy of Kingdom of Saudi Arabia, May 13, 2017

Laila Farhood

Elected as a board member for the International Association for Women's Mental Health regional section.

Received the Distinguished Nursing Research Award by the Scientific Society of Arab Nursing Faculties.

F. INTERNATIONAL PARTNERSHIPS

HSON has ongoing Memoranda of Understanding (MOUs) to enhance research collaboration and student and faculty exchanges with the following institutions:

- Johns Hopkins University School of Nursing
- University of Michigan School of Nursing
- Villanova University College of Nursing
- University of Maryland School of Nursing
- University of Science and Technology, Sydney, Australia

G. HSON EXTERNAL ADVISORY BOARD (EAB)

Mandate and Purpose of the EAB

The External Advisory Board of the Rafic Hariri School of Nursing includes invited members from leading universities engaged in baccalaureate and graduate nursing education and research, leaders of nursing and healthcare institutions, and dignitaries with established track records in related fields. The EAB advises the director by serving as a bridge between HSON and the international nursing community.

The Advisory Board has approved the PhD in Nursing Science proposal and the proposal on achieving full Faculty status for HSON. EAB is consulted on a regular basis on important academic developments at HSON.

H. SIGMA THETA TAU INTERNATIONAL (STTI) HONOR SOCIETY

The board of the Chi Iota Chapter is as follows:

A. President: Dr. Dina Madi
B. President- elect: Dr. Lina Kantar
C. Vice president: Mrs. Ursula Rizk
D. Treasurer: Dr. Hiba Deek
E. Secretary: Mrs. Bahia Abdallah El-Moufti
F. Counselor: Dr. Angela Massouh
G. Founding President: Dr. Huda Abu-Saad Huijer
H. Immediate Past President: Mrs. Mary Arevian

Chi Iota Committees:

Leadership Succession Committee:

1. Mrs. Helen Nuwayhid; Chair
2. Dr. Nour Alayan
3. Mrs. Tamar Avedissian

Governance Committee:

1. Dr. Samar Noureddine; Chair
2. Mrs. Danielle Damianos; Member
3. Ms. Roula Awwad

ACTIVITIES:

Induction Ceremony in May 2017 during which Dr. Myrna Doumit, the regional STTI representative, addressed the members.

Business meeting planned for November was postponed until January 2018 for logistical reasons.

Created a Facebook account for the Chi Iota Chapter.

I. HSON NEWSLETTER

HSON issue Number 6 was circulated in March 2017. The newsletter included: a message from the HSON Director, important HSON and faculty news, Chi Iota Chapter Activities, and interviews with new faculty..

J. HSON REGIONAL EXTERNAL PROGRAMS

Continuing Education in UAE

The Hariri School of Nursing (HSON) in collaboration with the Continuing Education Center of the office of Regional External Programs (REP) provided a number of courses to Registered Nurses and Nurse Leaders in the United Arab Emirates in 2017. These offerings are part of an agreement that was signed and renewed between AUB REP and "The United Arab Emirates Ministry of Health" to support nursing training and education.

In 2017, 210 participants from different hospitals and centers in Dubai attended the following courses:

- "Pain Assessment and Management" provided by Dr. Dina Madi and Mrs. Janane Hanna in February 2017 and then again in October 2017.
- "Medication Management Principles and Practice" provided by Dr. Lina Kantar and Mrs. Danielle Damianos in February 2017 and by Dr. Nour Alayan and Mrs. Danielle Damianos in September 2017.
- "Clinical Leadership Course Part I" provided by Dr. Rana Abdel Malak and Dr. Gladys Honein in March 2017.
- "Oncology Course" provided by Mrs. Danielle Damianos and Mrs. Rebecca Al Asmar in September 2017.
- "Clinical Leadership Course Part II" provided by Dr. Rana Abdel Malak and Mrs. Hera Artinian in October 2017.

Each course was provided over a period of 2-3 days. Some were repeated to accommodate the higher number of nurses. Different teaching methods were used by HSON faculty such as: case scenarios, role playing, simulation sessions, hands-on activities, and videos. The variety of teaching methods made these series of continuing education offerings fruitful and highly interactive.

Mohammad AlMana' College for Health Sciences (MACHS)

In February 2017, an agreement was signed between the Mohammad AlMana' College for Health Sciences (MACHS) in Khobar, Kingdom of Saudi Arabia and AUB REP. Based on this agreement, AUB has agreed to contribute to MACHS efforts in an advisory, training, and management capacity.

Dr. Huda Abu-Saad Huijer and Dr. Nuhad Dumit are members of the project's steering committee and coordinate the work among the different departments.

HSON faculty were involved in the following consultations in 2017:

- In April 2017, HSON faculty met the MACHS team and started the planning phase. They also worked with students to demonstrate several case scenarios of different specialties in the simulation lab thereby providing MACHS with an introduction to how simulation technology can be used in teaching.
- In October 2017, the faculty reviewed more than 40 MACHS documents that addressed accreditation readiness, curriculum, and courses and provided appropriate recommendations.

HSON will be involved in future MACHS-related projects such as providing workshops and training on nursing simulation, assisting MACHS in setting up their own simulation lab, reviewing MACHS post-graduate programs, and assisting MACHS in the recruitment of key administrative and teaching positions.

II. FACULTY ACTIVITIES

A. EDUCATIONAL PROGRAMS

Bachelor of Science in Nursing (BSN):

Course descriptions, credit hours, and learning objectives did not change over the year as student evaluations were positive. We were, however, required to provide two sections of junior-year courses because of the large class size.

Simulation activities were included in most clinical nursing courses, which used a combination of skill improvement and practice through scenarios.

Objective Structured Clinical Examination (OSCE) was used in all clinical nursing courses.

Master of Science in Nursing (MSN):

A total of 45 students enrolled in the MSN program in October 2017.

Four tracks continue to be offered: Adult Gerontology Clinical Nurse Specialist, Nursing Administration and Management, Psychiatry and Mental Health Clinical Nurse Specialist, and Community and Public Health Nursing.

A number of students undertook residencies at Johns Hopkins University, the University of Maryland, Partners MS Center at Brigham and Women Hospital in Boston, and the Cleveland Clinic in Dubai.

Nine students were inducted in the HSON Chi Iota Chapter spring 2017. Town meetings were held to discuss student concerns, residencies, projects, and comprehensive exams.

Information on the specific tracks is detailed below.

Adult Gerontology Clinical Nurse Specialist track:

Three students graduated in 2017.

A total of 17 students were enrolled October 2017.

Students in the Adult Gerontology Clinical Nurse Specialist track completed residencies at the Partners MS Center at Brigham and Women Hospital in Boston (1) and at AUBMC (4).

Nursing Administration and Management track:

A total of 7 students graduated in 2017.

A total of 15 students were enrolled October 2017.

Students in the Nursing Administration and Management track completed residencies at Johns Hopkins University (1), AUBMC (2), and Cleveland Clinic Dubai (1).

Psychiatry and Mental Health Clinical Nurse Specialist track:

A total of 6 students were enrolled October 2017.

Community and Public Health Nursing track:

One student graduated in 2017.

A total of 11 students were enrolled October 2017.

One student is undertaking a double major in Community and Public Health Nursing and Psychiatry and Mental Health Nursing

One student is doing a double major in Community and Public Health Nursing and Adult Care Nursing.

PhD Program :

HSON prepared and submitted a PhD proposal in close collaboration with the Faculties of Health Sciences and Medicine and with international partners, namely, Johns Hopkins University School of Nursing and the University of Michigan School Of Nursing. The doctoral program aims to provide rigorous training for research careers in nursing and the healthcare arena. It will provide students with the opportunity to develop their capacity for scholarly and independent work, improve critical analytical thinking, refine their ability to communicate knowledge and ideas, and to be able to translate research findings into healthcare practice.

The PhD proposal was approved by HSON Graduate Division, Graduate Studies Committee, HSON External Advisory Board, Board of Graduate Studies, AUB Senate, Board of Trustees, and the New York State Education Department (NYSED) and will be launched AY 2018-19.

B. FACULTY TEACHING

Spring semester 2016-2017

Course Number	Course name	Credits	Faculty
NURS 200	Introduction to Nursing	2	L. Younan
NURS 201	Introduction to Nursing Practice	2	L. Kantar, S. Dakessian Sailian
NURS 202	Health Assessment	2	D. Madi, T. Gulgulian
NURS 203	Biostatistics for Nurses	3	S. Fares
NURS 302	Nursing Care of Adults II	5	M. Adra, A. Massouh, N. Alayan, S. Dakessian Sailian
NURS 306	Nursing Care of the Children	5	M. Khoury, D. Madi, T. Gulgulian, D. Damianos
NURS 402/312	Mental Health and Psychiatric Nursing	5	L. Farhood, H. Masalkhi, M. Saadeh

NURS 408	Community Health Nursing	5	M. Arevian, G. Honein, T. Avedissian
NURS 410/313	Leadership & Management Theory	5	L. Younan, T. Avedissian, H. Tashjian, D. Damianos, S. Dakessian
NURS 411	Leadership & Management Practicum	0	L. Younan, T. Avedissian, S. Dakessian Sailian
IPEC 300	Inter-professional Education		M. Adra, N. Dumit, S. Noureddine, G. Honein
NURS 502	Advanced Nursing Research	3	H. Darwish, S. Fares
NURS 503	Advanced Health Assessment	3	S. Noureddine
NURS 503A	Advanced Health Assessment	1	S. Noureddine
NURS 505B	Advanced Practice in Adult Gerontology	4	S. Noureddine, H. Darwish
NURS 506	Residency-Advanced Practice in Adult Gerontology	4	S. Noureddine
NURS 508	Residency-Advanced Practice in Nursing Administration	4	M. Clinton, N. Dumit, H. Huijer, L. Younan
NURS 509	Role Developpment in Nursing Education	3	L. Kantar
NURS 512	Advanced Psychiatric and Mental Health Assessment	2	L. Farhood
NURS 516	Psychopathology and Human Behavior	3	L. Farhood
NURS 520	Managing Quality with Teams	3	N. Dumit
NURS 522	Principles and Practice of Community/Public Health Nursing	3	M. Arevian, G. Honein
NURS 524	Residency in Community Health Nursing	4	M. Arevian, G. Honein
NURS 525	Transformational Leadership for Nursing Practice	3	M. Clinton
NURS 526	Comprehensive exam	0	L. Farhood

NURS 598	Project	3	M. Arevian, M. Clinton, n. Dumit, L. Farhood, H. Darwish, G. Honein, H. Huijer, S. Noureddine, L. Younan
NURS 598A	Project	3	M. Arevian, M. Clinton, n. Dumit, L. Farhood, H. Darwish, G. Honein, H. Huijer, S. Noureddine, L. Younan
NURS 599	Thesis	6	M. Arevian, M. Clinton, n. Dumit, L. Farhood, H. Darwish, G. Honein, H. Huijer, S. Noureddine, L. Younan

Summer semester 2016-2017

Course number	Course name	Credits	Faculty
NURS 210	Pathophysiology	2	A Massouh
NURS 307	Practicum I	0	T. Gulgulian, T. Avedissian, D. Damianos, S. Dakessian, H. Tashjian, H. Masalkhi
NURS 506	Residency-Advanced Practice in Adult Gerontology	4	H. Darwish, S. Noureddine

C. SIMULATION TECHNOLOGY at HSON

In 2017, the SCCC provided activities/services – for both AUB and non-AUB users – in line with its mission statement. Users included HSON students enrolled in undergraduate and graduate programs (HSON users), nutrition and dietetics students, medical students, residents, faculty members and nurses from AUB, and elsewhere (non-HSON users).

This year all undergraduate nursing courses integrated simulation in their training and included an objective structured clinical examination (OSCE) as part of the course assessment. In addition, more simulation scenarios were developed in-house using all simulation modalities.

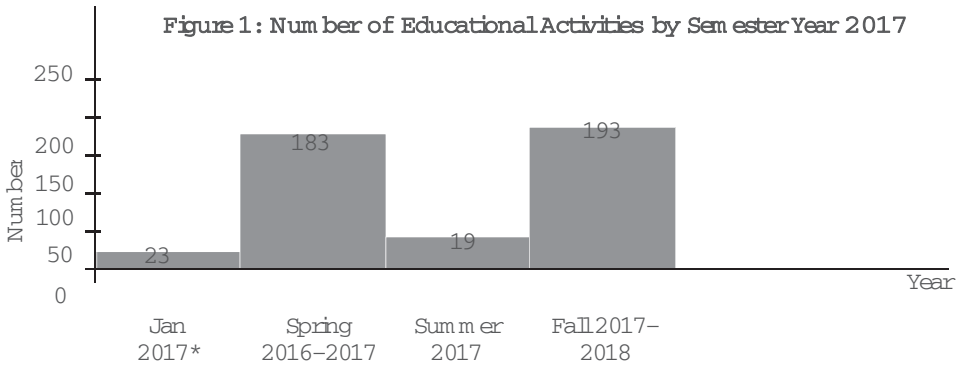
The SCCC continued to support non-nursing AUB/AUBMC users. For the first time, the Department of Nutrition & Food Sciences has included a simulation component in its medical nutrition therapy courses. The experience was very much appreciated by both students and faculty.

More residents from AUBMC specialties like emergency and obstetrics came in for high-fidelity and skill training this year. There was an increase in use of the simulation facility by AUBMC to address clinical performance issues. The two "In situ simulation" programs, or simulation that is physically integrated into the clinical environment, continued to serve as adjuncts to the quality and system improvements initiatives at the AUBMC Obstetrics and Emergency Departments. Around 24 in-situ simulation sessions were conducted this year in the Emergency Department and two in the Obstetrics Department.

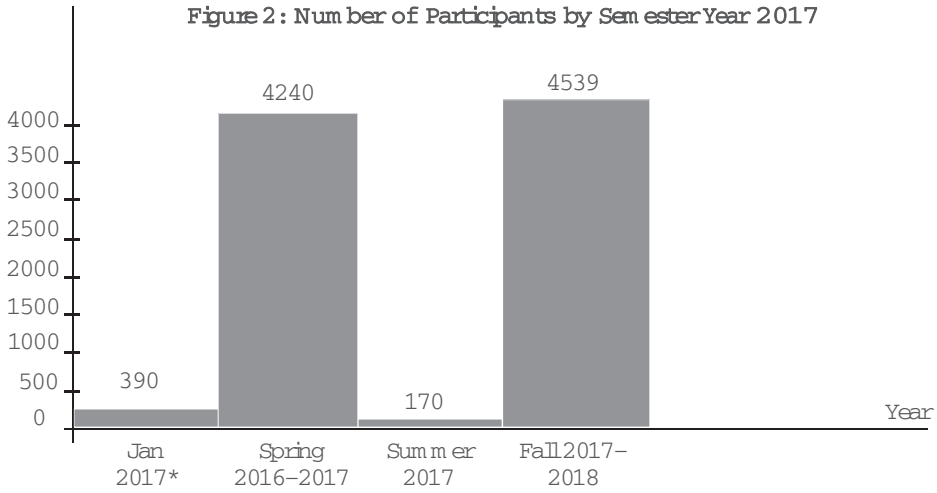
The figures below summarize activities that took place at the SCCC by semester

In 2017, SCCC supported 418 simulation training activities/experiences and 9,339 participants, including HSON and non-HSON users. This shows a 24% increase in activity and a 21% increase in number of participants since 2016. The fall semester had the highest number of activities (46%) and the highest number of users (49%) (Figure 1 and Figure 2 respectively).

Figure 1: Number of Educational Activities by Semester Year 2017



Educational Activity defined as each time the lab is utilized regardless of the objectives or content of the learning/teaching that is occurring.



Participant: a person using the lab whether student, resident, nurse, or employee from AUB/AUBMC community or outside.

* (before the start of Spring 2016 – 2017)

During the spring and fall semesters, HSON activities outnumbered non-HSON activities with 69% of all activities conducted in the spring. During this summer, the lab received more non-HSON users, as the Faculty of Medicine finish its semester much later than nursing (see Figure 4). During the spring, an equal number of HSON and non-HSON participants used the lab. A decline in numbers is noted in the fall as HSON users accounted for 31% of total users.

Figure 3: HSON vs Non-HSON Activity – Semester

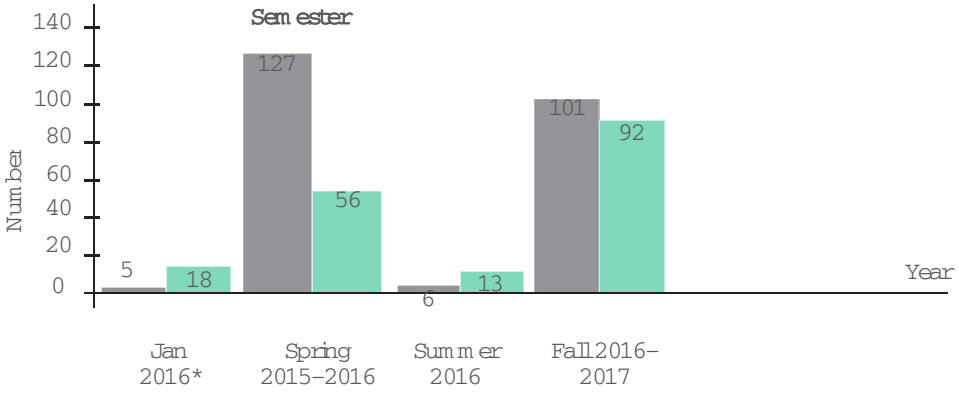


Figure 4: HSON vs Non-HSON Partipants – Semester

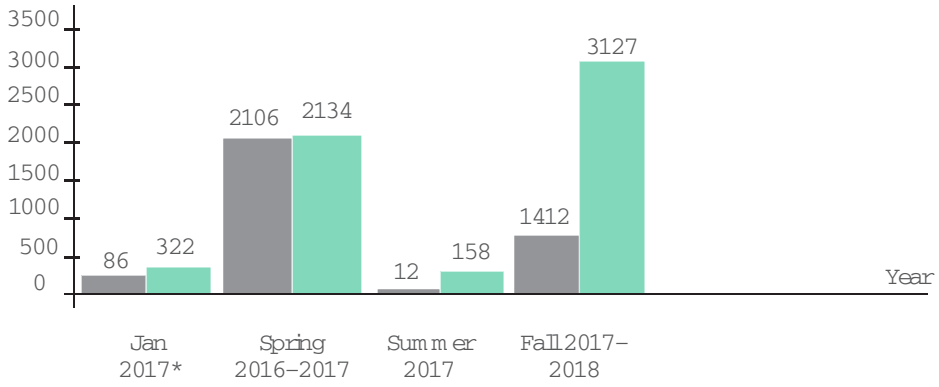
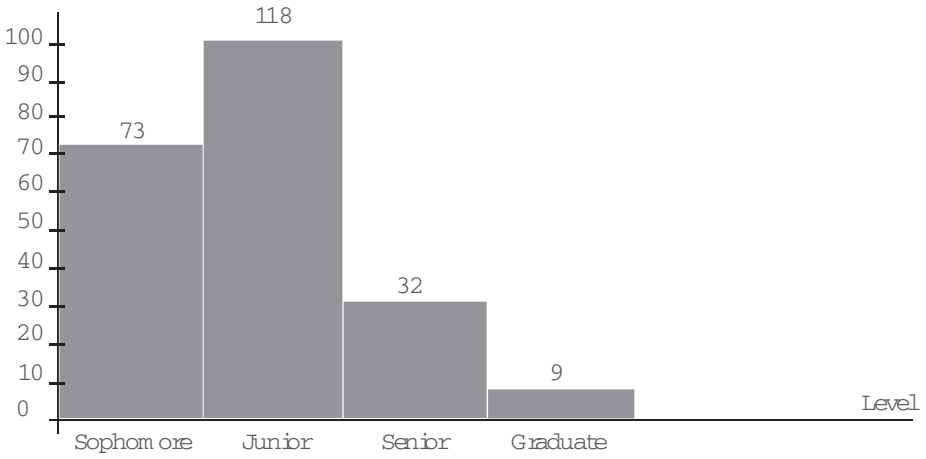


Non-HSON
HSON

The use of the facility by HSON, which peaks in students' junior year, doubled the number of activities in 2016. In the MSN program, the SCCC is only used in the advanced assessment course (N503). There were a total of 9 activities in this course this past year, as shown in Figure 5 below.

Figure 5: Activity HSON Users by Level



Sophomore: Includes N201 Fundamentals of Nursing Practice and N202 Health Assessment

Junior: Includes N300 Nursing Care Of Adults I, N302 Nursing Care Of Adults II, N304 Nursing Care of the Expectant Family, N306 Nursing Care of Children, and N307 Practicum I

Senior: Includes N400 Critical Care Nursing, N402 Mental Health and Psychiatric Nursing, N408 Community Health Nursing, and N410 Leadership and Management in Nursing

III. STUDENT-RELATED ACTIVITIES

A. STUDENT ENROLLMENT/SCHOLARSHIPS

- The total number of applicants to the BSN program for 2017-18 was 490 including applicants sponsored by USAID and by the MasterCard Foundation. The total number of accepted students was 165 and the total number who confirmed their enrollment was 61. This includes 1 student accepted as early admission, 4 transfer students from outside AUB, 1 transfer student from within AUB, 2 students sponsored by USAID, 1 working for a second degree, and 1 sponsored by the MasterCard Foundation.
- The total number of applicants to the MSN program for 2017-18 was 32; the total number of accepted students was 26 and the total number who confirmed their enrollment was 9.
- A total of 65 interviews were conducted with new and currently registered BSN students; 52 were recommended for scholarships, and 32 were enrolled. This scholarship is still attracting students who select a nursing major as their 3rd, 4th, or 5th choice when they apply.

	Total
Interviewed	65
Recommended	52
Enrolled with scholarships	32
Total new scholarships offered to new and current students	36
New students recipients of Samira Fadli Scholarship	2

- The table below shows student enrollment for the last five years:

Student Enrollment	BSN				
	2013-14	2014-15	2015-16	2016-17	2017-18
Applied	285	349	341	356	490
Accepted	141	179	186	182	165
Enrolled	64	70	55	65	61
Yield	45%	39%	30%	36%	37%
Committed	52	54	39	55	55
Total Enrollment	167	185	172	163	160
Female	81%	77%	72%	68%	68%

International	7%	6%	7%	10%	11%
BSN /MSN Graduates	10	17	16	12	

B. STUDENT RECRUITMENT AND MARKETING

Student recruitment and marketing of the BSN and MSN programs remain a priority at HSON. The marketing strategy for student recruitment in 2017 included various activities:

- **Graduate Open House:** HSON participated in the Graduate Open House organized by the Graduate Council to promote graduate programs on February 22, 2017. Similar to previous years, only a very few applicants interested in the MSN program attended the open house.
- **School visits:** The HSON team visited 13 high schools to recruit students. School counselors were contacted and a poster was sent to all schools inviting high school students to visit the simulation lab at HSON. The SSO will continue to visit schools during the Spring 2017-18 semester.
- **AUB Annual School Fair:** HSON participated in the AUB Annual School Fair for undergraduate programs in April 2017.
- **AUBMC Open House:** On May 17, 2017, HSON participated in the AUBMC Open House to recruit nurses from all over Lebanon. The Student Services Office (SSO) had a booth for the MSN program.
- **Orientation for new nurses at AUBMC:** During the orientation for new nurses at AUBMC in February, March, May, August, October, and December 2017, the SSO presented the MSN program requirements. This presentation became part of the orientation program organized by AUBMC CPDC.
- **Marketing and promotion of HSON academic programs** is done also through:
  - Social media: Facebook, LinkedIn, YouTube, and on the website

- Nursing Centralized Application System (CAS) portal: to recruit students from North America for the MSN program and for the BA/BS-BSN second degree accelerated program. In 2017, we enhanced the features of the HSON programs display on Nursing CAS to become more attractive and provided applicants/potential students with a link to a webinar on HSON academic programs.
- Big choice portal: to recruit students from Asia, Africa, and South America, for undergraduate and graduate programs.

C. STUDENT ACTIVITIES

Nursing students were involved in various community projects and activities in their Community Course and in events organized by the Nursing Students Society (NSS) in 2017:

- **New Student Orientation:** During the orientation of newly enrolled students, some undergraduate and graduate students provided testimonials and success stories about the nursing profession.
- **AMIN:** A new initiative at HSON was the AUB Mentorship in Nursing (AMIN) program that provides new students with mentors to help and guide them as needed. AMIN is headed by Ms. Elizabeth Cantrell and will be one of the responsibilities of the NSS. AMIN reports to the NSS advisor, Dr. Angela Massouh.

The following mentors were selected for Fall 2017-18:

Mentors at AMIN
Nour Abdullah
Elizabeth Cantrell
Oday Hamade
Michael Kassis
Amr Kayali
Dayana Traboulsi

- **Student recruitment:** Some BSN students participated in school visits with the student services officer.
- **LebMASH Seminar:** A seminar was held on January 25, 2017 at the Hisham Jaroudi Auditorium about the "ethics of treating homosexual patients" by LebMASH, the Lebanese Medical Association for Sexual Health. Questions ranging from confidentiality to specific healthcare needs were addressed.
- **School Fair:** Students from the BSN and MSN programs participated in the AUB School Fair that was open to students from different high schools. HSON had a stand at the Olayan School of Business to inform visitors about the BSN program at AUB.
- **The Middle East Student Ambassador Program by Elsevier:** Elsevier has launched the Middle East Student Ambassador Program to be able to connect with the University and to support students throughout their careers. One of the nursing students was selected as a Student Ambassador to help Elsevier engage with other students on campus. The main goal of the ambassador is to help Elsevier in writing book reviews whenever they want to promote titles, increase the visibility of Elsevier through social media, and to conduct surveys for market research.
- **Medical Research Volunteer Program (MRVP):** Occasionally, undergraduate nursing students volunteer to participate in the Medical Research Volunteer Program (MRVP) organized by AUB.
- **AUB Outdoors** Nursing students participated in the AUB Outdoors activities in May 2017.
- **NSS elections:** Elections for the Nursing Student Society were held in September 2017 and the cabinet was formed as follows:
  - President: Dayana Traboulsi
  - Vice President: Elizabeth Cantrell
  - Treasurer: Michael Kassis
  - Secretary: Amr Kayali
  - Member at Large: Rami Al Chami

- **SRC and USFC elections:** Elections for the SRC and USFC were held in October 2017 and the results were as follows:

Department	Election Pool	Seats
NU	NURSING IV and GR	Nour Abdallah
NU	NURSING II and III	Jaafar Hoteit

- **NSS coffee hour:** the coffee hour was on November 28, 2017. It was an in-depth open discussion about a wide range of topics focused primarily on:
  - Instructor Course Evaluation (ICEs) and the concept of objectivity.
  - Loss and Grief in the Clinical Setting.
- **Bake Sale:** As an annual fundraising activity, NSS organized a bake sale in December 2017.
- **AIDS Awareness Day:** The NSS was active on campus in December 2017 to raise awareness about AIDS.

D. OTHER STUDENT SERVICES AND RESOURCES

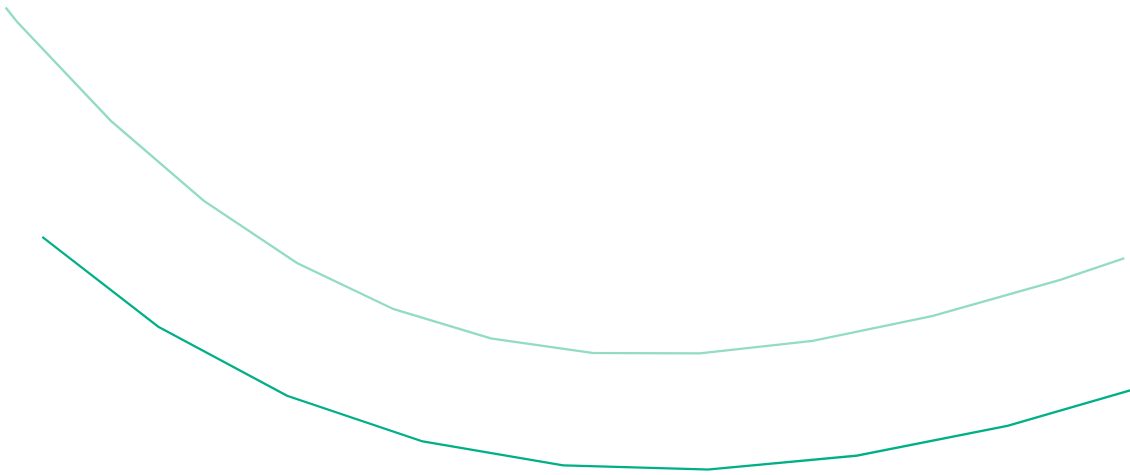
- **Credentialing Requests of Nursing Graduates:**
  With the great demand for certification in different areas of nursing, the number of requests for credentials from graduates has increased. In 2017, HSON received 21 requests by foreign institutions to complete students' credentials; the majority were submitted to the Commission on Graduates of Foreign Nursing Schools (CGFNS) in the USA.

- **Online Petition Form System :**
  A total of 110 petitions were processed in 2017. The majority were related to underload credits and late course withdrawal. Ongoing enhancements were done to improve the Online Petition Form System .

- **Students Evaluation and Scholarship Database:**
  The project has been initiated by the SSO to automate the student evaluation and scholarship process. It is a major project that involves other parties at AUB, such as the Office of Admissions and Financial Aid. It is ongoing and expected to be completed by the end of spring 2017-18.

- **Student Surveys:**
  Student Exit Surveys are now part of the Clearance process. This has improved the response rate.

- **Electronic Archiving System :**
  HSON is trying to implement an electronic archiving system mainly for all student files. The project is being implemented in coordination with the IT team and other departments at AUB who have similar archiving systems.



IV. RESEARCH AND SCHOLARLY ACTIVITES

A. CURRENT HSON FACULTY RESEARCH

Principal Investigator: Huda Abu-Saad Huijer

Palliative Care in Older Adults in Lebanon

The purpose of this study is to evaluate the quality of palliative care (PC), the quality of life (QoL), symptom management, and functional ability among hospitalized older adults in need of palliative care in Lebanon.

The study follows the observational survey design. Data is being collected from three hospitals: AUBMC, St. George, and Ain Waezein. Face to face interviews are carried out using the Quality of Palliative Care Questionnaire-Adult (QPCQ-A) that was constructed using several instruments measuring quality of life, symptom prevalence and management, quality of care, and functional ability.

Co-Investigators: Marina Adra, Hala Darwish, Souha Fares, Hussam Ghusn, Ramzi Hajjar, George Karam, **Samar Noureddine**

Funding: CNRS

Status: Data collection completed. Data analysis and write-up in progress.

Principle Investigator: Huda Abu-Saad Huijer

Chronic Pain: The Development and Psychometric Validation of an Arabic-Language Version of the Pain Catastrophizing Scale (PCS-A)

Chronic pain is believed to be a disease on its own and has been increasing in prevalence. While reporting or anticipating pain, patients experience a negative "mental set" of catastrophizing that has been described as an exaggerated cognitive-affective response to actual or anticipated pain. The 13-item Pain Catastrophizing Scale (PCS) is the most widely used measure of pain-specific catastrophizing and assesses three dimensions: rumination, magnification, and helplessness. The PCS has been translated and validated in several languages though no Arabic version exists that measures an important predictor of pain and pain-related outcomes. Thus, the purpose of the project is to develop and psychometrically evaluate PCS in the Arabic language among a sample of 150 adults in Lebanon.

Co-investigators: Dr. Douglas French, Professor of Psychology, University of Moncton, Canada
Funding: Pfizer
Status: Completed. One article published and others in preparation.

Principal Investigator: Wassim Abou Kheir
Young versus Old: A Potential Role for Vitamin D Supplementation in Modulating Adult Neurogenesis and Hippocampal-Related Functions
The overall aim of this study is to examine the effect of the supplementation with the active metabolite of Vitamin D on hippocampal neurogenesis and hippocampal-related functions in 2-3 months young as well as 24-25 months older adult mice. Our current hypothesis is that Vitamin D3 supplementation will increase the rate of hippocampal neurogenesis and will enhance the hippocampal-related functions, especially in the older adult mice group that is subjected to continuous supplementation. This work will show the importance of Vitamin D in protecting cognitive functions and in inducing adult neurogenesis.
Co PI: Hala Darwish and Noel Ghanem
Funding: Farouk Jabre Award
Status: Ongoing.

Principle Investigator: Marina Gharibian Adra
Exploring Resident staff relationships in nursing homes in the Lebanon
To explore the prevailing relationships between nursing home residents and staff and to elicit the factors that influence these relationships.
Co-investigators: Zepur Aharonian, Abla Sibai
Funding: MPP
Status: Ongoing.

Principal Investigator: Elie Akl

Exploring the factors impacting the trust of the Lebanese public in physicians:

a qualitative study

The aim of this qualitative study is to explore the factors that impact the trust of the Lebanese public in physicians.

Co-investigators: Gladys Honein, Bashir Shaya, Ali Khalil, Nadine Al Homsi, Kevin Eid, Zeinab Haidar, Kelly Merheb.

Funding: None

Status: Manuscript in preparation.

Principal Investigator: Elie Akl

Characterizing the interaction between physicians, pharmacists and pharmaceutical representatives in a middle-income country: a qualitative study

The aim of this qualitative study is to explore the nature, intensity, and effect of the interactions between pharmaceutical companies, physicians, and pharmacists on drug prescription and dispensing practices in Lebanon, a middle-income country.

Co-investigators: Gladys Honein, Rima Hajjar, Mohammed Cheaito, Aya Bassatne

Funding: None

Status: Accepted for publication in PLOS ONE on August 30, 2017.

Principal Investigator: Elie Akl

Using Media to impact health policy making: A systematic integrative review This integrative systematic review aims to assess the effects of planned media – including social media – interventions on the health policymaking process.

Co-investigators: Lama Bou-Karroum , Fadi El-Jardali, Nour Hemadi, Yasmine Faraj, Utkarsh Ojha, Maher Shahrour, Andrea Darzi, Maha Ali, Carine Doumit, Etienne Langlois, **Gladys Honein.**

Funding: Alliance for Health Policy and Systems Research, World Health Organization

Status: Published in Implementation Science, July 2017.

Principal Investigator: Monique Chaaya

Dementia in Lebanon: a follow-up study

This proposed study aims to follow up on the initial cohort of 408 older adults in order to assess the risk of dementia in terms of incidence and to provide an update on its prevalence. In addition, the study will investigate risk factors of dementia, mortality and morbidity levels, and major health outcomes, specifically hospitalization and nursing home placement. The study also aims to measure caregivers' mental health and burden of care.

Co- PI: Hala Darwish, Ramzi Hajjar

Funding: CNRS

Status: Ongoing.

Principal Investigator: Monique Chaaya

Building the cohort of older adults in Lebanon: Establishing the baseline in Beqaa

This proposed study aims to build a larger community cohort by expanding to other areas of Lebanon, specifically the Beqaa area, collecting comprehensive baseline data from older adults aged 65 years and above. Beqaa represents 13% of the elderly population and is chosen because of its unique socio demographic profile with high consanguinity and high exposure to pesticides due to the reliance on agricultural activities.

Co PI: Hala Darwish and Ramzi Hajjar

Funding: URB

Status: Ongoing.

Principal Investigator: Marlene Chakhtoura

Research Fellowship Program at AUB-MC

The aim of this qualitative study is to explore research fellows' and mentors' views about research training at AUBMC and the challenges they face. Taking into consideration the currently available models in the US, and based on the suggestions and needs identified locally, we will establish a formal training program for research fellows.

Co-investigators: Gladys Honein, Rola Rassi, Elie Akl
Funding: AUBMC
Status: Data analysis in progress.

Principal Investigator: Michael Clinton
From Education to Practice: The Challenges that Nursing Students and Novice Nurses Face in Lebanon
This qualitative study involves three university sites and three hospitals in Lebanon. The study is designed to investigate from the point of view of students and registered nurses (RNs) in the first year of practice the challenges they face as they engage in clinical nursing practice. The study focuses on challenges that are unique to Lebanon. Separate focus groups will be formed at the three universities. The three focus groups will explore the challenges students face as they transition to the clinical experience in BSN IV. Separate focus groups will be established at three hospitals in Beirut. The hospitals will be those that generally recruit the most graduates from the respective universities. The three focus groups will focus on the challenges RNs face in their first year of practice in Lebanon. Thematic analysis and the constant comparative method will be used to analyze the data. The study findings may suggest strategies for reducing attrition in BSN programs in Lebanon and may assist hospital administrations to reduce attrition of RNs in their first year of practice.

Comparison of organizational research climates in universities in Lebanon, Canada and Australia: An initial study
The strategic purpose of this initial study is to establish an international program of research focused on the regulation of human subject research. In this initial study the organizational research climates of selected universities in Lebanon,

Canada and Australia will be described and compared. Subject to ethical and institutional approval the study will be conducted at the American University of Beirut, the Lebanese American University, the University of Saskatchewan, and the University of Newcastle, New South Wales. This survey is the first of its kind to assess from the perspective of investigators and graduate students the organizational research climate in three countries. The results will provide a basis for expanding the survey to other universities in Lebanon and the wider region, Canada and Australia.

Brief International cognitive assessment for MS (BICAMS)-Arabic

The aim of this study is to validate the well-established Brief International Cognitive Assessment for Multiple Sclerosis (BICAMS) in Arabic.

The test stimuli and administration procedures will be standardized in Arabic. The validity and the test-retest reliability of the different tests will be assessed. Finally, we will establish the normative data for Lebanon.

Environmental enrichment affects spontaneous object recognition, temporal order memory, and epigenetic events post mild traumatic brain injury

In this study, an animal model of TBI is induced using controlled cortical impact head injury at mild intensity to cause the trauma. The aim of the study is to examine the effect of Complex Enrichment (EC) on cognitive deficits and evaluate the injury-induced epigenetic events and cellular damage associated with mild traumatic brain injury.

Co-PI: Elie Al-Chaer

Funding: MPP-RFA

Status: Ongoing.

Principal Investigator: Hala Darwish

Longitudinal effect of Vitamin D3 replacement on cognitive performance and MRI markers in Multiple Sclerosis patients: A single-Blind Randomized Clinical Trial

This is a longitudinal single blind randomized trial to test the effects of high compared to low dose Vitamin D3 supplementation on cognitive performance at 6 and 12 months, and MRI measures of 12 months duration.

Co-PI: Samia Khoury, Nabil El Ayoubi, Salem Hannoun

Funding: MPP

Status: IRB review.

Principal Investigator: Hala Darwish

Environmental Enrichment and Exercise (EE+Ex) affects object recognition, spatial learning and memory, and epigenetic events post severe traumatic brain injury

Severe Traumatic Brain Injury (TBI) survivors suffer from persistent cognitive deficits. Similarly, long-term recognition, temporal order and spatial learning and memory deficits follow experimentally induced severe TBI in rats. Therapies such as environmental enrichment (EE) and exercise are promising and enhance memory functions post severe TBI. However, few studies have examined epigenetic, astrocytic changes in relation to memory functions after EE and exercise. Severe TBI using controlled cortical impact head injury in mice will be used. After 14 and 21 days of EE coupled with daily exercise, spontaneous object recognition, temporal order and spatial learning and memory will be assessed using an open field and Morris water maze. Neurogenesis, epigenetic events and astrocytes changes will be measured using immunohistochemistry labeling and quantitative real time PCR. Decreased memory impairment and increase in neurogenesis in the experimental group compared to controls is expected; in addition to an elevation in the number of astrocytes as well as up-regulation in GFAP and Vimentin expression. Decreased DNA methylation and increased histone acetylation in the hippocampus are expected as well. Controlling and modifying the severe TBI survivors' environment as well as exercise to stimulate and restore sensory, motor and cognitive function is of great clinical importance.

Principal Investigator: Hassan Dhaini
N-Acetylation Traits as Effect Modifiers of the Association between Smoking- based Arylamine Exposure and Tumorigenic Outcome in Lebanese Urothelial Bladder Cancer Patients
The study aims to investigate a potential association between smoking and tumorigenic outcome in urothelial bladder cancer patients, as well as to examine the modifying effect of metabolic N-acetylation traits. This study is expected to improve our understanding of the etiology of bladder cancer. We anticipate providing evidence in support of a gene-environment interaction that may underlie the unusually high incidence of bladder cancer in Lebanon.

Analyzing the Antecedents of Nurses Absenteeism in Medical Centers in Lebanon

The main aim of this study is to examine sickness absences at major medical centers across the country in terms of prevalence, nature, causes, trends, frequency, cost, and impact on services provided. Another aim is to explore reasons for sickness absence in order to recommend and implement appropriate intervention(s) for effective absence management. A third aim is to validate the JOINT model created in a systematic literature review (article published) by the investigators.

Abnormal Blood Pressure Complexity and Fluctuation: An Indicator of Vascular Disease Independent of Blood Pressure

The research proposal is focused on the use of non-conventional blood pressure variability (BPV) metrics (complexity measures and detrended fluctuation analysis exponents) to examine the potential role of this novel cardiovascular risk factor in the

adult Lebanese population. Our primary objective is to determine the effect of weight loss through bariatric surgery on blood pressure dynamics in obese and morbidly obese normotensives (No-HTN), pre-hypertensive (pre-HTN) and hypertensive patients (HTN). We also aim to show that beat-to-beat BP complexity and fluctuation metrics will provide superior discrimination between No-HTN, pre-HTN and HTN subjects, and will differ for demographic sub-cohorts. Another objective is to quantify the impact of BPV on the normal and shear stresses at the walls of the blood vessels.

Promoting Psychosocial and Mental Healthcare through Community-based Educational Workshops for Teachers and Parents: A Follow-up to Mental Health Assessments in Civilians Exposed to Traumatic Events of War in the South of Lebanon

This intervention study employs a quantitative, quasi-experimental pre-post design in which community-based educational programs with teachers and parents were implemented in two schools in South Lebanon. The study consisted of two phases. In the first phase audio taped focus groups with teachers and parents were conducted in order to identify their attitudes and beliefs towards mental illness, symptoms and treatment (this paper was published in JTN). Based on the identified themes, community-based educational programs with the same sample were implemented. Mental health educational workshops were conducted by mental health professionals in psychiatry and psychology over the course of six weeks (two per weekend) in one venue at Marjeyoun National School. Both teachers and parents participated in the workshops, which sought to address various topics on mental health and psychosocial care. The efficacy of this intervention was assessed by comparing scores on PTSD, General Health, Strengths and Difficulties, and Attitudes Towards Mental Illness Questionnaires prior to and after its implementation, as well as at 1.5 year follow up.

An Investigation of War Trauma Experiences and Post-Traumatic Stress Reactions in a South Lebanese Civilian Sample: How Does Gender Fit in the Equation?

This study is part of a bigger one assessing PTSD, Depression and other psychiatric morbidities and their mediating factors in a civilian population exposed to war. The study aimed to assess gender differences in: (1) PTSD prevalence; (2) reported trauma types; (3) reported clusters of symptoms of trauma; and (4) risk factors associated with PTSD. These findings, in turn, enabled us to draw different PTSD symptom, trauma-vulnerability, and risk factor profiles for civilian men and women exposed to war traumas. These profiles would yield insight on alternative assessment and intervention strategies that are sensitive to both genders and strategies that are not necessarily considered in today's approach to PTSD assessment and intervention.

Exploring the benefits and drawbacks of a new approach for managing conflict of interest in guideline development

The Canadian guideline for use of opioids in chronic non-cancer pain used an innovative approach for the management of financial and intellectual conflicts of interest, which was to have a team of unconflicted clinician-methodologists serving on the voting guideline panel, and to have a team of content experts, including individuals with financial and/or intellectual conflicts of interest, to guide the panelists and provide content expertise. This study aims to explore the benefits and drawbacks of this approach, and whether it could serve as a potential model for managing important aspects of conflict of interest in future guidelines.

Microglial activation and neural stem cells cross talk post Traumatic Brain Injury

Microglia are macrophage cells in the Central Nervous System, at the front line of CNS immunological defense. They play an important role in Mild Traumatic Brain Injury (mTBI) which may be beneficial or detrimental depending on their state of activation. This project aims to:

1. Evaluate spatio-temporal activation of microglia cells and the role of microglial activation at 2, 7 & 35 days post-TBI, in rodents.

2. Characterize the behavioral deficits post TBI and correlate outcomes with neural injury and immunological indices.

Survey of the knowledge, attitude and practices related to out of hospital resuscitation among nurses in Lebanon

The aim of this study is to examine the knowledge, attitude and practice of nurses in Lebanon related to out of hospital cardiopulmonary resuscitation. A second aim is to identify factors associated with the willingness of nurses to attempt resuscitation outside the hospital setting. The study uses a descriptive quantitative design. A total of 770 nurses will be recruited, including 556 nurses from a sample of 30 hospitals randomly selected from the 5 governorates, and 204 nurses working in all the primary health care centers in the country. A self-administered questionnaire developed for this study and validated by experts in resuscitation will be mailed to the nurses. The items address training received by nurses in resuscitation and their related knowledge, experience and attitudes regarding out

of hospital cardiac arrest resuscitation, and the perceived importance of factors that may influence the nurse's decision to attempt resuscitation outside the hospital setting, in addition to demographic questions.

Modulation of metabolic stress-induced neuro-inflammation by oral anti- diabetic drugs: A proposed role for activation of autophagy

Metabolic syndrome (MetS) remains a public health challenge with significant increase in diabetes and cardiovascular disease risk. A less studied consequence of MetS is the ensuing central nervous system (CNS) inflammation. Recent evidence suggests an association between neuro-inflammation in MetS with cognitive impairment. With a high incidence of diabetes in Lebanon, as estimated by the International Diabetes Federation, a significant proportion of the population would be at risk of developing detrimental cognitive consequences of metabolic stress. Thus, studying the mechanistic link leading to neurobehavioral consequences in metabolic disorders becomes of great local public health value. Additionally, recent introduction of new anti-diabetic agents with presumed pleiotropic effects on the associated inflammatory processes sets the stage for further investigation of the potential CNS protective effect of these drugs in the context of MetS.

Our intent in this proposal is to use a newly developed rat model of metabolic stress to investigate behavioral changes occurring in the context of the pre-diabetes, study the underlying pathology, and examine the effect of early treatment with some of the anti-hyperglycemic drugs with presumed benefit.

Our goal is to identify targets for early therapeutic interventions and uncover the mechanism for potential corrective effects of oral anti-hyperglycemic drugs.

How Nursing Work Is Organized in Lebanese Hospitals and Its Effects on Nurses' Wellbeing

The study investigates the relationship among three important variables that are not usually explored together: organization of nursing work, fatigue and musculoskeletal injuries. The sample includes 3,157 nurses working in acute care units located in 39 hospitals across the five districts of Lebanon. The knowledge to be generated from this study will help nurse administrators and regulators identify:

1. The delivery models of nursing care in use in Lebanese hospitals and their prevalence.
2. The types of activities that nurses actually perform and accordingly delineate the real scope of practice of nurses with different educational levels.
3. Nursing staffing patterns in Lebanese hospitals (mainly nurse-to-patient ratios, staff-mix, and educational level of RNs,) and compare them to international standards.
4. The relationships between level of nurses' professional education, nursing staffing patterns, models of nursing care and the incidence of nursing fatigue and musculoskeletal injury among nurses.

Research/Continuing Education Seminars

The HSON Research Committee (RC) organized a series of research seminars. The aim of these seminars is to disseminate the research findings of the HSON faculty and alumni to the AUB community and to get acquainted with other AUB faculty members' research work. The following were invited to share their research findings:

- **Dr. Fadi Zaraket:** March 29, 2017. Title: Information extraction from medical documents
- **Dr. Shadi Saleh:** April 19, 2017. Title: HEALTH 2025
- **Dr. Lamis Jomaa:** November 29, 2017. Title: Nutrition security of refugees during a protracted crisis: The Case of Lebanon

C. EDITORIAL POSITIONS

Huda Abu-Saad Huijer

1994 Ongoing	Associate editor and later member of Editorial Board, International Journal of Nursing Studies
1999 Ongoing	Editorial Board, Journal of Transcultural Nursing
2005 Ongoing	Editorial Board, Journal of Nursing Scholarship
2005 Ongoing	Reviewer, European Journal of Pain
2006 Ongoing	Editorial Board, Japanese Journal of Nursing Science
2008 Ongoing	Reviewer, Lebanese Medical Journal
2009 Ongoing	Reviewer, Pediatric Pain Newsletter, IASP
2011 Ongoing	Reviewer, Journal of Palliative Medicine
2011 Ongoing	Editorial Board, IASP Insight Newsletter
2011 Ongoing	Editorial Board, Nursing Children and Young People
2012 Ongoing	Reviewer, Health Promotion International
2012 Ongoing	Reviewer, Europe's Journal of Psychology

2012 Ongoing Reviewer, Journal of Pain and Symptom Management
2013 Ongoing Editorial Board, Annals of Palliative Medicine
2014 Ongoing Editorial Board, Alexandria Scientific Nursing Journal (ASNJ)

Nour Alayan

2015 Ongoing Reviewer, Journal of Addictions Nursing
2015 Ongoing Reviewer, Japan Journal of Nursing Science

Mary Arevian

2006 Ongoing Reviewer, Journal of Interprofessional Care
2006 Ongoing Reviewer, Journal of Transcultural Nursing
2008 Ongoing Reviewer, Journal of Women's Health
2012 Ongoing Reviewer, The Japanese Journal of Nursing Sciences
2012 Ongoing Reviewer, Journal of Health Promotion International

Michael Clinton

2010 Ongoing Editorial Board, International Journal of Mental Health Nursing, formerly the Australian and New Zealand Journal of Mental Health Nursing
2010 Ongoing Editorial Board, Journal of Psychosocial Nursing and Mental Health Services
2010 Ongoing Editorial Board, Journal of Mental Health
2010 Ongoing Editorial Board, Journal of Ethics in Mental Health
2010 Ongoing Editorial Board, International Journal of Evidence-Based Healthcare
2010 Ongoing Review Panel, Contemporary Nurse
2010 Ongoing Review Panel, Journal of Nursing Measurement
2010 Ongoing Reviewer, Journal of Adolescent Health Michael Clinton

Hala Darwish

2011 – Present Editor, the Institute – The AUBMC Abu Haidar Neuroscience Institute Newsletter
2012 Ongoing Reviewer, Electrophoresis (Peer Reviewed Journal)
2012 Ongoing Reviewer, Journal of Neurotrauma

2012 Ongoing Reviewer, Journal of Clinical Immunology
2013 Ongoing Editorial Board, Frontiers of Neurotrauma
2015 Ongoing Reviewer Plos One

Nuhad Dumit

2008 Ongoing Reviewer, Journal of Nursing Management
2009 Ongoing Reviewer, Journal of Interprofessional Care
2013 Ongoing Reviewer for the BMC Nursing journal by BioMed Central
2014 Ongoing Reviewer, Journal of Clinical Nursing Research
2014 Ongoing Editorial Board, Nursing Management
2016 Ongoing Nurse rater in McMaster Online Rating of Evidence (MORE EBN)

Laila Farhood

2006 Ongoing Editorial Board and Reviewer, Journal of Transcultural Nursing

Gladys Honein

2014 Ongoing Reviewer: British Medical Journal Open access
2015 Ongoing Reviewer: International Journal of Health Policy and Management
2015 Ongoing Reviewer, Women's Health Issues
2015 Ongoing Reviewer, PLOS One
2017 Ongoing Reviewer, Cancer Causes & Control

Lina Kantar

2013 Ongoing Reviewer: Center for Teaching and Learning (CTL), AUB.
2014 Ongoing Reviewer: Nurse Education Today, Elsevier.
2014 Ongoing Reviewer: Nurse Education in Practice, Elsevier.

Samar Noureddine

2016 Ongoing Reviewer, BMC Health Services Research
2016 Ongoing Reviewer, BMC Health Services Research
2015 Ongoing Reviewer, the Lebanese Nursing Journal
2014 Ongoing Reviewer, Sultan Qaboos University Medical Journal

2013 Ongoing	Editorial Board member, European Journal of Cardiovascular Nursing
2013 Ongoing	Editorial Board of the European Journal of Cardiovascular Nursing
2012 Ongoing	Reviewer, Heart & Lung: The Journal of Acute and Critical Care
2011 Ongoing	Reviewer, Journal of Cardiovascular Nursing
2011 Ongoing	Reviewer, Journal of Clinical Nursing
2011 Ongoing	Reviewer, Pan African Medical Journal
2009 Ongoing	Reviewer, International Journal of Nursing Studies
2009 Ongoing	Reviewer, Journal of Nursing Scholarship
2009 Ongoing	Reviewer, European Journal of Cardiovascular Nursing
2009 Ongoing	International Editorial Board of Metas de Enfermiera' Nursing Journal
2008 Ongoing	Reviewer, American Journal of Critical Care
2008 Ongoing	Editorial Board, Journal of Transcultural Nursing

Lina Younan

2014 Ongoing	Reviewer, Journal of Nursing Management
2016 Ongoing	Reviewer for the University Research Board of the American University of Beirut

D. SCIENTIFIC CONTRIBUTIONS AND RESEARCH GRANT REVIEWS

Huda Abu-Saad Huijer

2010 Ongoing	Reviewer of Medical Practice plan, Faculty of Medicine Research Committee, AUB
2014-2017	PhD supervision of Ms. Angela Massouh, University of Colorado, USA

2014-2015 Ongoing	PhD supervision of Farah Chamaa, Department of Anatomy Cell Biology and Physiological Sciences, Faculty of Medicine, AUB
2016 Ongoing	Faculty mentoring of Dr. Rihab Nasr, Department of Anatomy, Cell Biology and Physiological Sciences, Faculty of Medicine, AUB.

Hala Darwish

2011-2017	Reviewer of Medical Practice Plan, Faculty of Medicine Research Committee, AUB

Nuhad Dumit

2009 Ongoing	Reviewer, Western Institute of Nursing conference Abstracts
2011 Ongoing	Reviewer, "Effective Teaching and Learning in Higher Education," organized by the Center for Teaching and Learning (CTL) and IT Academic Core Processes and Systems (IT ACPS), AUB
2012 Ongoing	Reviewer, ICN Congress/conference Abstracts

Laila Farhood

2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, AUB (upon request)
2013-2014	Ongoing MPP/URB funding for the Intervention study "Promoting psychosocial and mental healthcare through community-based educational workshops for teachers and parents: A follow-up to mental health assessment in civilians exposed to traumatic war events in the South of Lebanon".

Gladys Honein

2016 Ongoing	Abstract reviewer, North American Primary Care Group, November 9-12, 2016
2016 Ongoing	International Undergraduate Awards, Nursing and midwifery panel, June 2016

Lina Kantar

2013 Ongoing	Reviewer for: Center for Teaching and Learning (CTL), AUB.

Samar Noureddine

2017	Reviewer of research proposal for the Faculty Advancement Program at AUBMC
2012 Ongoing	Abstract reviewer, Annual Spring Meeting of the Cardiovascular Council of Nurses and Allied Professionals
2011 Ongoing	Reviewer for Sultan Qaboos University, Research and Innovations Department
2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, Faculty of Medicine Research Committee, AUB

E. SCHOLARLY LECTURES

Huda Abu-Saad Huijer

- Abu-Saad Huijer, H. Looking Forward; HSON Facts & Figures. Lecture given at AUB Alumni Association Abu-Dhabi. May 3-5, 2017.
- Abu-Saad Huijer, H. Palliative Care in Lebanon. Basics in Palliative and End-of-Life Care-3. AUB. September 15-16, 2017

Marina Adra

- Adra, M. Nursing Home Quality of Life: A Theoretical Model Integrating the views of Residents, Staff, and Family Members. Presented at 7th International Conference on Geriatrics Gerontology and palliative Nursing, September 4-5, 2017, Edinburgh, Scotland.
- Adra, M. Strengthening Humanitarian Action through the Integration of Older Adults in the Community" A workshop given over 3 days. The audience included 20 participants from Amel Association International, Imam Sadr Foundation, Makassed Foundation and the Young Men Christian YMCA-Lebanon. The workshop was planned in agreement with the Center for Public Health practice- Faculty of Health Sciences, AUB and Help Age through the Regional and External Programs office of AUB. April 25, 26, 27, 2017

Nour Alayan

- Alayan, N. Heart Rate Variability Biofeedback for College Students Recovering From Substance Use Disorder: A Longitudinal Analysis of Craving Changes, June 16th 2017, Rutgers University, USA
- Alayan, N., & Damianos, D. Medication Management Course. United Arab Emirates, September 17-19, 2017

Hala Darwish

- Darwish, H. MS preceptorship for Iraqi Nurses CME program - coordinator and lecture on Advanced pathophysiology of MS and clinical concerns- August 2017
- Darwish, H. Psychology Colloquium at AUB- Improving Cognitive Function after Traumatic Brain Injury (TBI): The Use of Environmental Enrichment and Exercise- October 2017-Invited
- Darwish, H. Second meeting on Neuropsychology - Lebanon memory group for clinical research. The Modified Brief International Cognitive Assessment for Multiple Sclerosis (mBICAMS): Evidence of Validity for the first Arabic version- November 2017

- Darwish, H. AUBMC MS weekly conference- Cognitive performance and physical activity before and early after MS diagnosis- October 2017
- Darwish, H. International Brain Research Organization (IBRO) MENA advanced School and conference on Neurodegenerative Disorders: Translation into clinical neurology. Behavioral assessment techniques of small animals and Vitamin D and MS conference and school in Irbid-Jordan- Lectures to be given via Skype expected on Nov 23-2017.
- Darwish, H. Kaafarani A., Nasrallah L., Karout M. &, Kobeissy, F. Environmental Enrichment and Exercise affects memory and epigenetic events post severe traumatic brain injury. Presented at the annual Society for Neuroscience meeting in Washington DC, 2017. November 12, 2017.
- Darwish, H. Haddad, R. Osman, S. Ghassan, S. Yamout, B. Tamim, H. and Khoury, S. Effect of Vitamin D Replacement on Cognition in Multiple Sclerosis Patients. Poster presentation at the MENACTRIMS-Dubai November 24-25 2017
- Darwish, H. Farran, N. Zeinoun, P. Yamout, B. Khoury, S. Modified Brief International Cognitive Assessment for Multiple Sclerosis (mBICAMS): Towards validating the first Arabic version. Poster presentation MENACTRIMS meeting in Dubai-November 24 -25 2017
- Zeinoun, P. Farran, N. Khoury, S. Darwish, H. Development of the Verbal Memory Arabic Test (VMAT). Poster presentation at the 3rd MENACTRIMS meeting- Dubai November 24-25 2017

Nuhad Dumit

- Invited to speak in a panel discussion addressing "Diabetes in Lebanon, Where are we Standing," organized by the Lebanese Society of Endocrinology, Diabetes, and Lipids in collaboration with the Ministry of Public health, May 5, 2017
- Invited to speak in a panel addressing "the Labor Laws affecting the Palestinian nurses in Lebanon," organized by Issam Fares Institute, AUB, May 4, 2017

- Invited to speak on "Nursing Practice Regulation as a Foundation for Nursing Specialization" during the "5th annual Beirut Breast Cancer Conference" organized by AUBMC, February 10, 2017

- Invited to speak on a panel addressing the judicial session on "Co-Responsibilities between the Surgeon and the Team Worker" during the "20th Spring Lebanese Congress of Surgery" organized by the Lebanese Society for General Surgery, April 28, 2017
- Invited to speak in a stakeholder dialogue on the subject of "Reducing Preventable Preterm" organized by the Knowledge to Policy (K2P) Center at AUB and the Ministry of Health in Lebanon, Thursday April 6, 2017

Souha Fares

- Fares, S. Complexity of nursing activities in the first Arabic version of the Actual Scope of Nursing Practice Scale. A multidimensional scaling approach. Nurses at the Forefront Transforming Care. International Council of Nurses Congress. Barcelona, Spain. May 27 – June 1, 2017
- Fares, S. Data Analysis Methods for Nursing Research. Invited to give a session to the CPDC, April 25, 2017

Laila Farhood

- Farhood, L. attended World psychiatric Association WPA congress October 8-12, 2017, Berlin, Germany
- Farhood, L. (invited symposium), Risk Factors and Mental Health in Female Populations Exposed to Traumatic Events in South Lebanon. Symposium Presented at 7th Int. congress on women's mental Health, March 6-9, 2017, Dublin Ireland.
- Farhood, L. (Invited Symposium), an Investigation of Experienced War Trauma Types, Symptom Clusters, and Risk Factors Associated with Post-Traumatic Stress Disorder in a South Lebanese Civilian Sample: How Does Gender Fit in the Equation? Symposium Presented at 7th Int. congress on women's mental Health, March 6-9, 2017, Dublin Ireland

Lina Kantar

- Kantar L. A 3-day-course on "Medication Management" offered to nurses in the UAE (February, 2017).
- Kantar L. Seminar on OSCE in Nursing Education: Theoretical Perspectives and Application, offered to the faculty at the HSON on November 11, 2016.
- Kantar L. 'Myths and Truths about investing in Preceptors in Nursing Education'. Paper accepted for presentation at the 44th Annual National Conference of the Professional Nurse Educators Group (PNEG), November 10-12, 2017. Pittsburgh, PA, USA.

May Khoury

- Khoury, M. Poster presentation in 49th Annual Congress of the International Society of Pediatrics Oncology (SIOP 2017), held in Washington, D.C., October 12-15, 2017.
- Khoury, May. History and Evolution of Palliative Care; Philosophy & Principles of Palliative Care and Elements and Models of End-of-Life Care. Basics in Palliative and End-of-Life Care-3. AUB. September 15-16, 2017.
- Khoury, May. Avoiding Compassion Fatigue & Burnout. Basics in Palliative and End-of-Life Care-3. AUB. September 15-16, 2017.

Dina Madi

- Madi, D. "Pain Assessment & Management Workshop," given twice, over three full days at the Continuing Education Center at Sharjah, UAE. 2016-2017

Angela Massouh

- Massouh, A. Hemodynamics Monitoring. Critical Care Conference. Ragheb Harb Hospital. August 2017.
- Massouh, A. Ethics in Critical Care. Critical Care Conference. Ragheb Harb Hospital. August 2017
- Massouh, A. Determinants of Self-Care in a Sample of Lebanese Patients with Heart Failure: A Lebanese Study. American University of Beirut Medical Center Grand Round. July 2017.
- Massouh, A. Educating Asthmatic Patients. Presentation at the "Back to Lebanon: The International Medical Forum" Seminar. Regency Palace Hotel, Adma Lebanon, July 2017.
- Massouh, A. 'Evidence based Approaches to Cardiovascular Care'. Course Coordinator. American University of Beirut Medical Center. January 2016 through March 2017.
- Massouh, A. 'Heart Failure Self-Care Education: Non-pharmacological Management'. Presentation at the Heart Failure Nurse Training Seminar. Lebanon, April 2016.
- Massouh, A. e-CME001 Updates in Critical Care Nursing'. Course director and speaker, Continuing Medical Education, AUB, Lebanon. October 2016.

Samar Noureddine

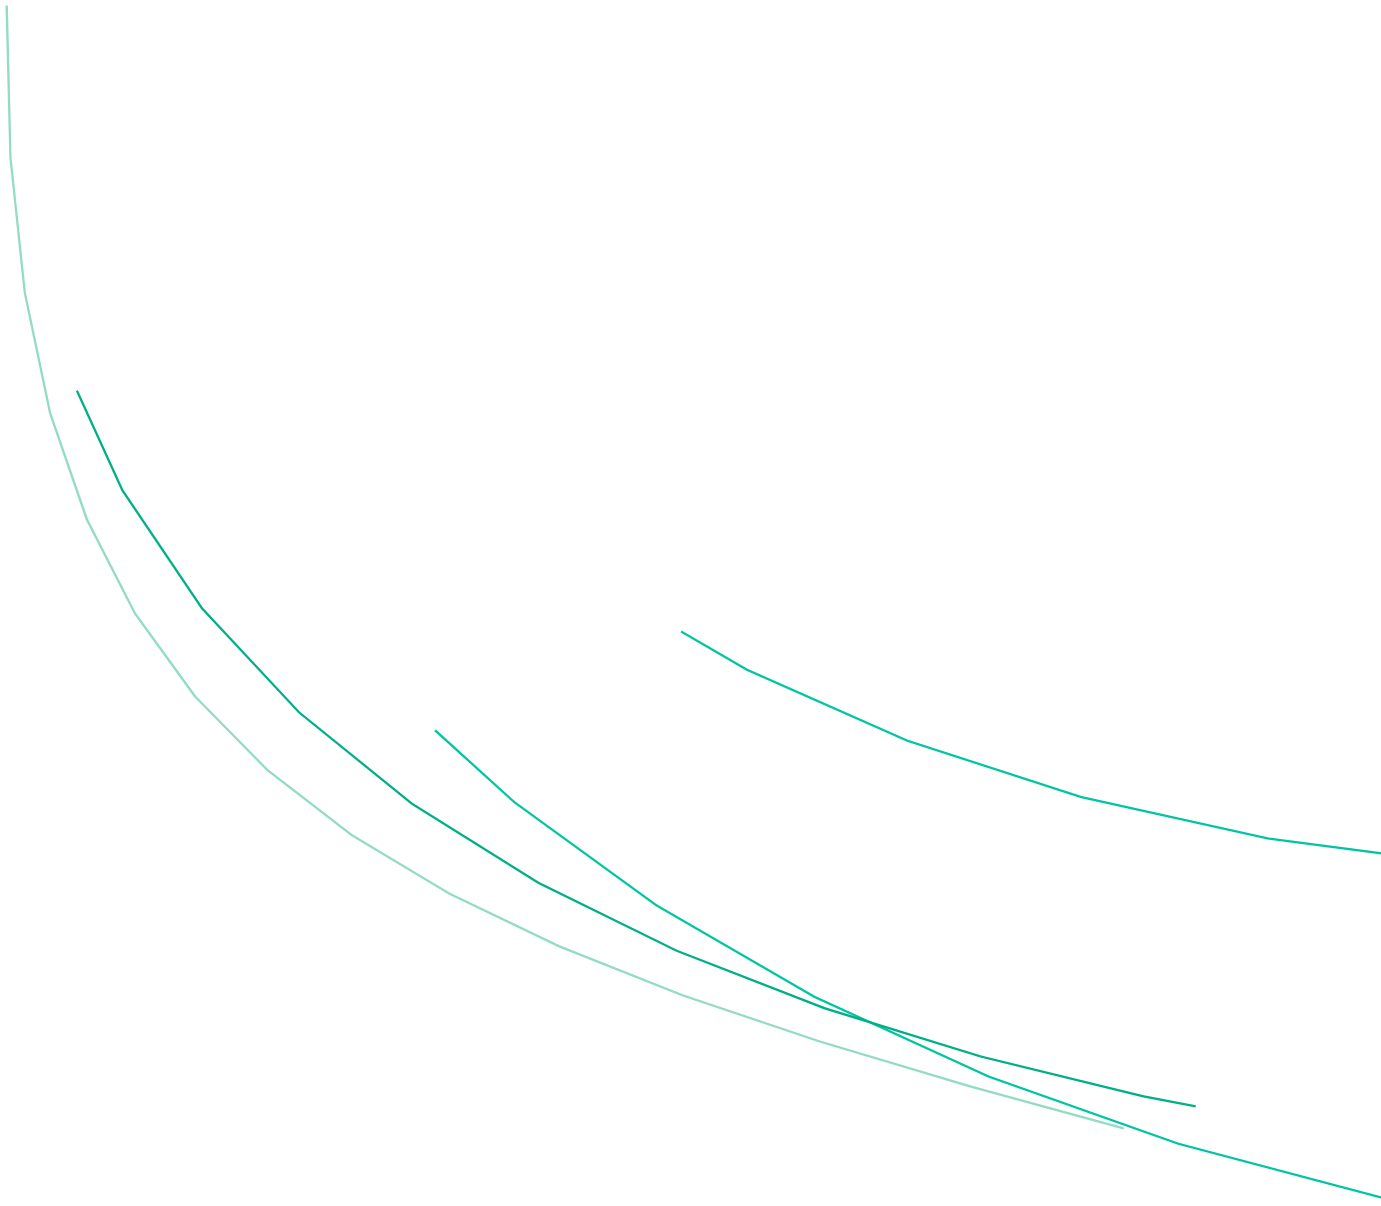
- Noureddine S. Nursing and Midwifery Research in the Eastern Mediterranean Region. Presentation at the third Global Summit on Strengthening Clinical Nursing Research: Moving the Agenda Forward for Nursing and Midwifery Clinical Research Strengthening the Bridge between the Southern/Eastern African and Eastern Mediterranean Regions by Columbia University Global Center, Amman, Jordan, June 25, 2017 **[Invited Presentation].**
- Noureddine S. Smoking in Cardiac Patients: An exemplar of Clinical nursing Research. Presentation at the third Global Summit on Strengthening Clinical Nursing Research: Moving the Agenda Forward for Nursing and Midwifery Clinical Research Strengthening the Bridge between the Southern/Eastern

African and Eastern Mediterranean Regions by Columbia University Global Center, Amman, Jordan, June 24, 2017 **[Invited Presentation].**

- Noureddine S. Factors that Make Patients Continue Smoking after Myocardial Infarction. Presentation at the International Council of Nurses conference in Barcelona, Spain, May 28, 2017.
- Noureddine S. The role of nursing in cardiovascular disease prevention: What does the research evidence show? The 5th International Nursing conference: Scientific Research in the Light of Contemporary Global Changes; Tanta University, Egypt, March 15, 2017 **[Invited keynote address]**.

Lina Younan

- Younan L. Invited by the Order of Nurses to present in the training the trainer program about "Organizational Communication" (2 hrs), August 2017.
- Younan L. Prepared seven presentation as part of a clinical leadership course for UAE nurses, Jan 2017.
- Younan L. Guest speaker on "Financial Planning" to senior BSN students at LAU, February 2017. As part of their Leadership & Management course (2 hrs).



VI. PROFESSIONAL PRACTICE/SERVICE

A. PROFESSIONAL PRACTICE

Huda Abu-Saad Huijer

- Member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP). Ongoing.
- Past President, Chi Iota Chapter, Sigma Theta Tau International Honor Society in Nursing in Lebanon.
- Consultant to WHO EMRO on the Future of Nursing and Midwifery in the Eastern Mediterranean Region.
- Member, Advisory Committee, Center for Research, Training, and Policy in Arab Mental Health, Faculty of Medicine, AUB.
- Member of the Public Advisory Board, Lebanese Society of Family Medicine.
- Vice-President, National Committee on Pain Relief and Palliative Care (Appointed by Minister of Health) and chair of the Research Committee.
- Past president Lebanese Society for the Study of Pain.
- Member, IASP Developping Countries Working Group
- Member, UC Davis, Advancing Pain Relief Education: Anchoring Pain Competencies around the World
- Member of the Scientific Committee, Oxford Global Health Research Congress, St. Hughes College, Oxford.
- Member of the Advisory Board of the Order of Nurses in Lebanon.
- Member of the Association of Dean and Directors of Schools of Nursing in Lebanon.

Marina Adra

- Hariri School of Nursing representative to the National Colloquium Committee. Participated in computerizing the colloquium exam.
- Consultation with the nursing director of Dar Al Ajaza Islamiyah Hospital to select nurse managers and supervisors and help develop leadership skills.

Nour Alayan

- Member, Academic and Curriculum Committee, HSON, AUB
- Member, Learning Collaborative for Adolescent SBIRT in Social Work & Nursing Education, the Non-partisan and Objective Research Organization (NORC) at the University of Chicago, USA

Nuhad Dumit

- President of the Order of Nurses in Lebanon
- Member of the Western Institute of Nursing
- Member of the advisory board of the Faculty of Health Sciences Beirut Arab University
- Member of the Task Force on Lives and Careers of Women Faculty at AUB

Laila Farhood

- Clinical Associate, Department of Psychiatry, Faculty of Medicine. Clinical activities include psychiatric assessment and psychotherapy (individual, couple, and family therapy) in in-patient and out-patient settings.
- Member, American Psychiatric Nurses Association (APNA)
- Member, International Society for Traumatic Stress (ISTSS)
- Member, European Society for Traumatic Stress (ESTSS)

Lina Kantar

- Member, Scientific committee on the 2nd Simulation-Based Medical Education conference, LAU (March, 2017)

May Khoury

- Active member in Pain Relief and Palliative Care Education Sub-Committee of the National Committee for Pain Relief and Palliative Care established by the Ministry of Public Health.

- Organizer and participant of The "Basics in Palliative and End-of-Life Care" PC3 workshop.
  It was offered to health professionals in Lebanon and the Region on September 15 and 16, 2017 at Hisham Jaroudi Auditorium, Hariri School of Nursing (AUBMC).
- Active member in the Pediatrics Educational Council at AUBMC to disseminate the revised policies of pediatric manuals; a series of sessions were held September-October 2017.

Dina Madi

- Participated in a community service program held by the Order of Nurses "Likaa fikulkadaa"
- Represented the Director of the Order of Nurses at the Lions' Award ceremony and gave a speech.
- Represented the Director of the Order of Nurses at "Kabiruna Project" in collaboration with AUBMC at Al Markaz Al Islami-Aicha Bakkar
- Participated in preparing a webinar and videotaping a powerpoint about the BS-BA/BSN program.

Angela Massouh

- Cardiology Clinical Nurse Specialist. Joint Appointment. American University of Beirut Medical Center.
- Represented Lebanon in the Heart Failure Middle East and North Africa Roadmap; Dubai.
- Leadership Succession Committee, AUB Honor Society, member.
- Participated in the formulation of the case studies and multiple choice questions for the electronic Colloquium exam for nurses at the Order of Nurses; co-chaired Critical Care Group.
- Organizing Committee, Critical Care Society National Conference, Phoenicia Lebanon.

Samar Noureddine

- Invited to moderate a session titled 'Better Communication leads to Better Education' at the Congress titled 'Back to Lebanon: The International Medical Forum', organized by the St. Pantaleon Group at the Regency Hotel, Adma, Lebanon, July 27, 2017.
- Gave a Workshop on Writing for Publication: Why and How. Presented to faculty members at Tanta University, Egypt.
- Gave a workshop on Writing for Publication: Why and How to faculty members at Tanta University, Egypt, March 16, 2017t.
- Made presentation on programs of research at HSON to the Nursing Advancement Program in Clinical Research at AUBMC, March 9, 2017
- Co-chair, Scientific Committee, Second International Conference of the Order of Nurses in Lebanon Nurses Leading The Vision For Global Health planned for May 9-11, 2018 since March 2017
- President; Nurses' Chapter, Worldwide Alumni Association of the American University of Beirut since 2014.

Lina Younan

- Nominated as a "subject matter expert" to review and validate hospital accreditation standards in Lebanon. the Ministry of Public Health in Lebanon has initiated the TrAcc Project (Transforming Hospital Accreditation System in Lebanon).The project aims to revise and develop new Lebanese hospital accreditation standards according to latest evidence and international best practices and also to comply with International Society for Quality in Healthcare (ISQua) requirements (2016-2017).
- Appointed by the Order of Nurses as a member of a task force for reviewing and updating the Nursing Practice Act.
- Appointed by the Order of Nurses as a member of a task force for reviewing and updating the competencies for registered nurses.

- Appointed by the Order of Nurses as a member of a task force for developing the nursing code of ethics for Lebanon.
- Elected as member in the Disciplinary Board of the Order of Nurses in Lebanon.

Sigma Theta Tau International, Chi Iota Chapter, AUB, member
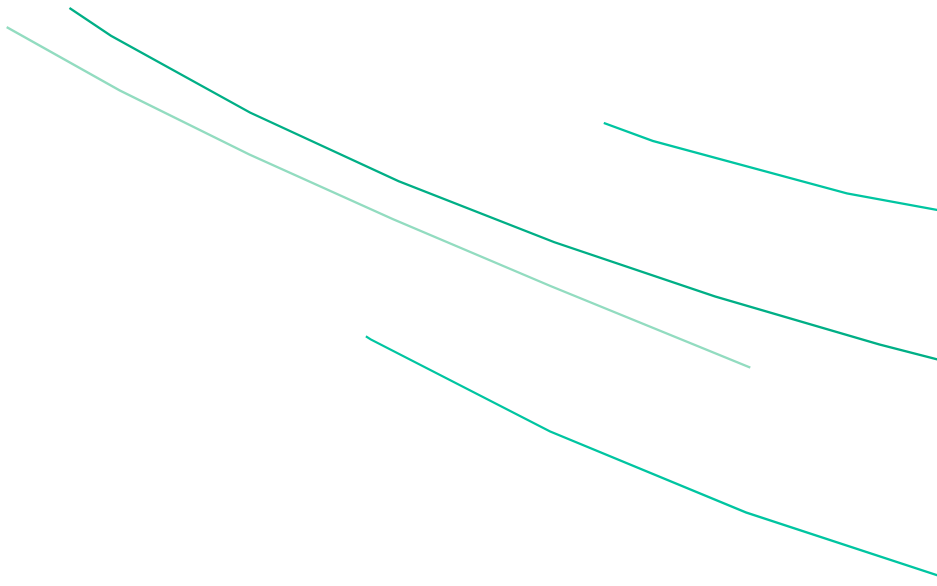
Order of Nurses in Lebanon, Member



VI. LOOKING AHEAD

HSON plans to launch a number of new academic programs:

A collaborative PhD in Nursing Science will be launched in 2018-19. The proposed PhD program is yet another first for Lebanon, and will add further capacity for HSON and the region by producing researchers needed to advance nursing science and improve healthcare.

New Academic Programs: HSON plans to expand its current undergraduate and graduate academic programs and continue to contribute to the development of healthcare in Lebanon by preparing high quality graduates for which there is a strong demand in schools/colleges of Nursing, hospitals, and health services.

- At the undergraduate level, we plan to evaluate the second degree program to attract more BA/BS graduates.
- The proposal to launch a TS-BSN program at AUB AREC in the Bekaa area to eligible technical degree programs is approaching completion and will be launched when approved.
- At the graduate level, HSON will be launching two new online/hybrid MSN tracks in Nursing Administration and Management and Nursing Education.

Other developments:

- Student recruitment will continue to be a priority. HSON will continue to award merit scholarships and is currently working with AUBMC to secure bursaries for BSN students.
- More emphasis will be placed on graduate recruitment at the national, regional, and international levels in close collaboration with the AUB Graduate Council.

- The availability of scholarships remains a major priority for the success of the current and new programs. The establishment of more endowment funds remains a strategic goal for HSON.
- The recruitment of PhD-holder and research active faculty and the endowed chair to direct HSON's Center for Nursing Research will continue to be a priority.
- Collaboration with AUBMC/Nursing Services continues to be an important priority for HSON.
- The alignment of HSON strategic goals with the AUBMC 2020 vision continues to aim at developing a national campaign for student enrollment and nurse recruitment and retention and at developing innovative strategic initiatives to advance collaboration and partnership in research and clinical nursing education.
- HSON will be a major building block of the proposed Health Sciences Campus at AUB as part of the Health 2025 vision.

AMERICAN UNIVERSITY OF BEIRUT

Annual Report
2016

1905-2015 110 YEARS

1866 AUB

Rafic Hariri School of Nursing

CCNE ACCREDITED

The baccalaureate and master's programs at the American University of Beirut Rafic Hariri School of Nursing are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.
The school is also a full member of the American Association of Colleges of Nursing.

PREFACE

In 2016, the Hariri School of Nursing (HSON) continued to celebrate 110 years of excellence in nursing education, research, leadership, and service under the motto 'Expanding Boundaries and Enhancing Partnerships'. The HSON also celebrated AUB's 150th anniversary, by organizing a number of national and international celebratory events.

A symposium in celebration of International Nurses Day '*Celebrating Nursing Developments; Past and Present Achievements'* took place on May 11, 2016 and hosted a number of local and international speakers. The symposium was followed by a fashion show organized by HSON students.

The second celebratory event was an international nursing research conference '*Development of Evidence-Based Nursing in an Interdisciplinary Era: Achievements & Prospects'.* The conference which took place October 6-8, 2016, was held in close collaboration with a number of partners. It hosted a large number of distinguished nurse leaders and scholars from different disciplines as speakers from the USA, Canada, the Netherlands, Australia, Jordan, and Lebanon.

The third celebratory event took place on October 6, 2016 and was held in close collaboration with the Association of Arab Nursing Faculties (AANF). More than 60 deans of SON in the Middle East attended this meeting to celebrate these milestones with HSON.

I am also happy to announce that the HSON PhD in Nursing Science proposal was approved by the Board of Graduate Studies and the AUB senate. It was also positively reviewed by two external examiners in October 2016. The PhD program will be launched when approved by the BOT and the New York State Department of Education.

On research productivity, we are proud to report that HSON accounts for 85% of Lebanon's and nearly 14% of the Arab world's nursing research output; its faculty are amongst the most productive and impactful nurse researchers in the Arab world. HSON ranked 149 out of 503 schools of nursing offering graduate programs based on U.S. News & World Report Ranking.

The school continues to place emphasis on research and scholarly productivity, teaching excellence, faculty and student recruitment, and on expanding our academic programs based on new and innovative strategic initiatives. We continue to be proud of our achievements, which are detailed in this annual report.

C. RECRUITMENT, APPOINTMENTS

Recruitment:
HSON continues to advertise for regular faculty positions and for the Hariri Endowed Chair in Research. These positions are advertised on the AUB and HSON websites, at the American Academy of Nursing (AAN), in the *Chronicle of Higher Education*, at Sigma Theta Tau Nursing International (STTI), at the American Association of Colleges of Nursing (AACN), in Minority Nurse, and at the Royal College of Nursing (RCN). Recruitment information is also mailed to leading schools of nursing, professional organizations, and to mailing lists in the United States and Europe.

Appointments
Hera Tashjian, RN, MSN, CCNS, clinical instructor

D. ACCREDITATION

CCNE ACCREDITATION

- The BSN and MSN programs continue to be accredited by the Commission on Collegiate Nursing Education (CCNE) (http://www.aacn.nche.edu/ccne-accreditation) in the USA.
- The revised MSN program based on the Masters Essentials was approved by the Board of Graduate Studies at AUB and by CCNE and submitted to the Department of Education in New York State for approval.
- HSON continues to be a regular member of the American Association of Colleges of Nursing.

E. 110th CELEBRATIONS

In 2015, HSON celebrated its 110th anniversary under the motto "Expanding Boundaries and Enhancing Partnerships." The school organized a number of activities including public lectures by prominent alumni of the school and roundtable discussions with deans and directors of schools of nursing from Lebanon and the region. Discussion focused on possible research collaboration based on the WHO established research priorities and on initiating meetings with directors of hospitals and nursing services in Lebanon to promote and enhance the position of advanced practice nurses in Lebanon.
In 2016, HSON continued to celebrate 110 years of excellence in nursing education, research, leadership, and service and AUB's 150th anniversary by organizing a number of national and international celebratory events.
A symposium in celebration of International Nurses Day '*Celebrating Nursing Developments; Past and Present Achievements'* took place on May 11, 2016 and hosted a number of local and international speakers. The symposium was followed by a fashion show organized by HSON students and a reception.
The second celebratory event was an international nursing research conference '*Development of Evidence-Based Nursing in an Interdisciplinary Era: Achievements & Prospects'.* The conference which took place October 6-8, 2016, was held in close collaboration with a number of partners and hosted a large number of distinguished nurse leaders and scholars from different disciplines from the USA, Canada, the Netherlands, Australia, Jordan, and Lebanon.

The third celebratory event took place on October 6, 2016 and was held in close collaboration with the Association of Arab Nursing Faculties (AANF). More than 60 deans of SON in the Middle East attended this meeting to celebrate these milestones for HSON.

F. HONORS, AWARDS, AND RECOGNITIONS

Dr. Huda Abu-Saad Huijer appointed Honorary Member, International Association for the Study of Pain (IASP) for outstanding contribution to the fields of pain research and management, 2016.
Dr. Huda Abu-Saad Huijer was inducted into the International Nurse Researcher Hall of Fame of Sigma Theta Tau International (STTI) Honor Society, 2016.
Dr. Huda Abu-Saad Huijer continues to be a member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP).
Dr. Nuhad Dumit elected President of the Lebanese Order of Nurses.

G. INTERNATIONAL PARTNERSHIPS

HSON currently has Memoranda of Understanding (MOUs) to enhance research collaboration and student and faculty exchange with the following institutions:

- Johns Hopkins University School of Nursing
- University of Michigan School of Nursing
- Villanova University College of Nursing
- University of Maryland School of Nursing
- University of Science and Technology, Sydney, Australia

H. HSON EXTERNAL ADVISORY BOARD (EAB)

Mandate and Purpose of the EAB
The External Advisory Board of the Rafic Hariri School of Nursing consists of invited members from leading universities engaged in baccalaureate and graduate nursing education and research, leaders of nursing and health care institutions, and dignitaries with established track records in related fields. The EAB advises the director by serving as a bridge between HSON and the international nursing community.
Purpose of the EAB:

- To provide strategic advice relevant to current and proposed initiatives of HSON and provide feedback on the progress of the school against its strategic goals.
- To assist HSON in realizing its mission by promoting it to organizations and individuals with the potential to contribute to student scholarships, research, and faculty development.
- To encourage HSON in its developments of nursing education and nursing research especially as they relate to CCNE accreditation, international benchmarking, and opportunities for collaborative funded research, doctoral studies, and student and faculty exchanges.
- To promote the continued dialogue between HSON and the professional community with the goal of improving academic program quality and societal relevance.
- To advise on marketing and public relations opportunities to improve the status of the profession and student recruitment.

Members

- Dr. Martha N. Hill; Dean Emerita. Professor of Nursing, Medicine and Public Health, Johns Hopkins University, School of Nursing (Chair)
- Dr. Walid Ammar, Director General, Ministry of Health (MOH)
- Dr. David Benton, CEO, International Council of Nurses (ICN)
- Dr. Louise Fitzpatrick, Connelly Endowed Dean and Professor, College of Nursing, Villanova University
- Former First Lady Mrs. Mona Hrawi
- Dr. Hester C. Klopper, Former President Sigma Theta Tau International Honor Society of Nursing
- Dr. Rowaida Al-Maaitah Advisor to HRH princess Muna Al Hussein for Health and Community Development, Former Minister of Higher Education and Scientific Research, Professor at Jordan University of Science and Technology.
- President of the Lebanese Order of Nurses, Dr. Nuhad Dumit

The HSON EAB was consulted through its chair Dr. Martha Hill on the PhD in Nursing Science Proposal and on the proposal for achieving Faculty Status for HSON.

I. SIGMA THETA TAU INTERNATIONAL (STTI) HONOR SOCIETY

The Hariri School of Nursing American University of Beirut Nursing Honor Society was approved and chartered as an official chapter of the Honor Society of Nursing, Sigma Theta Tau International (STTI), on Saturday September 13, 2014. The Chi Iota Chapter was officially recognized by Sigma Theta Tau International at the 43rd Biennial Convention of STTI November 7-11, 2015 in Las Vegas, USA.

The Chi Iota chapter currently has 173 members; 131 were inducted during the chartering ceremony in September 2014, 23 were inducted in May 2015 and 19 were inducted in May 2016. Membership in STTI continues to be by invitation and is extended to undergraduate students, graduate students, faculty, and professional nurses who have demonstrated superior scholastic, leadership, and nursing achievements. STTI is a not-for-profit organization whose mission is to improve the health of people worldwide through leadership and scholarship in practice, education, and research. Founded in 1922, this organization's members include practicing nurses, faculty, researchers, policymakers, entrepreneurs, and others.
The HSON Chi Iota Chapter is the first STTI chapter in the Middle East.

The board of the Chi Iota Chapter is as follows:

A. President : Mrs. Mary Arevian
B. President- elect: Dr. Dina Madi
C. Vice president : Mr. Ghassan Afram
D. Treasurer: Dr. Hiba Deek
E. Secretary: Mrs. Bahia Abdallah El-Moufti
F. Counselor: Dr. Lina Kantar

J. SUMMER NURSING INSTITUTE

For the nine year in a row, HSON organized a Summer Nursing Institute which offered courses of interest to MSN and other AUB students – and also to other students from Lebanon and the region. Below are short course descriptions and the names of the teaching faculty.

Recent Advances in Simulation
May 30-June 3
Healthcare simulation has followed the general patterns set forth by aeronautical and aviation research: that is, how to "practice" for events that can have devastating consequences. In the past ten years, simulation has been employed at universities to teach nursing and medical students, in healthcare settings to allow clinical practice, and as a solution to issues of patient safety.
This asynchronous on- line course will review the current "gold" standard in simulation strategies to engage the learner to think "outside the box". Multiple teaching/learning techniques will be included that range from direct "lecture" via power point, to video on the internet.
Dr. Judith Lambton, EdD, MSN, RN
University of San Francisco, USA

Evidence Based Practice: Cardiovascular Health Promotion and Disease Prevention
June 6-10
Chronic illnesses (heart disease, stroke, cancer, diabetes and chronic respiratory diseases) challenge the welfare of individuals and health care systems across the world, being the leading cause of morbidity and mortality in developed and many developing countries. The global burden of chronic illness provides unique implications for evidence based practice (EBP) relevant to self-care in primary secondary and tertiary prevention. The course focuses on health care interventions globally requiring responsive and targeted nursing interventions within an interdisciplinary context. This course will provide a review of contemporary epidemiology, a review of evidence-based strategies and the importance of different research methodologies that can provide support for EBP in addressing the needs of individuals and communities. A seminar format with active student participation will be used to actively engage participants in the learning process.
Dr. Erika Froelicher, RN, MA, MPH, PhD, FAAN
Professor Emeritus, University of California San Francisco, USA

Creating the conditions for the integration of care, training and research: a primer for nurse managers and leaders
July 20-22 and 25-26
The integration of patient care, training and research is a critical component of an evidence informed and modernized healthcare system.
What models can be used to encourage the integration of care, training and research? How do we balance accountability, evidence informed care, and innovation? This course will provide future nurse leaders and managers with an overview of principles, issues, approaches and relevant literature to consider in practice.
Tina Saryeddine, PhD, MHA, CHE
Executive Director, Research and Innovation, Health Care CAN, Canada

Smoking Cessation as an Example of Behavior Modification
July 18-22
Many people wish to change their own behavior or that of other individuals or groups of people. This course will present smoking cessation as an example of a behavior modification program. Included will be a brief review of behavior modification theory in addition to the evidence for why certain elements should be included in such a program.
Christine Weir Abbyad, PhD, RN, WHNP
Associate Professor in Clinical Nursing, The University of Texas at Austin, USA

K. HSON NEWS LETTER

HSON issue Number 5 was circulated in February 2016. The newsletter included: a message from HSON Director, important HSON and faculty news, Chi Iota Chapter Activities, and interviews with new faculty.

L. HSON REGIONAL EXTERNAL PROGRAMS

The Hariri School of Nursing (HSON) in collaboration with the Continuing Education Center of the office of Regional External Programs (REP) provided four specialized courses to the Registered Nurses in the United Arab Emirates. These offerings were part of an agreement that was signed between AUB REP and "The United Arab Emirates Ministry of Health" with the aim of supporting Nursing training and education.

During the period of December 2015 and January 2016, a total of 161 participants from different hospitals and health care centers in Dubai attended the below courses:

- "Physical Health Assessment workshop for Registered Nurses" provided by Dr. Dina Madi and Mrs. Tamar Avedissian
- "Critical Care Course for registered Nurses" provided by Ms. Angela Massouh, Mrs. Lamia Eid and Mrs. Sabath Jamous
- "Update in Pediatric Nursing Care Course" Provided by Mrs. May Khoury and Mrs. Talin Gulgulian
- "Emergency Obstetrics" provided by Dr. Dina Madi and Mrs. Talin Gulgulian
- And " Nephrology Course" provided by Dr. Samar Noureddine and Mrs. Sylva Dakessian

Each course was provided over a period of three to seven days. Some of them were repeated twice to accommodate the higher number of nurses. Different teaching methods were used by the faculty members such as: case scenarios, role plays, simulation sessions, hands on activities and videos. The variety of the teaching methods made these series of continuing education offerings fruitful and highly interactive.
Furthermore, on December 5, 2016, Dr. Gladys Honein was invited through REP to speak at the UAE "Primary Healthcare Nursing Conference: The Way Forward" and presented a session on "The Transformative Roles of the Primary Health Care Nurse ".

II. FACULTY ACTIVITIES

A. EDUCATIONAL PROGRAMS

BSN:

Course descriptions, credit hours, and learning objectives did not change over the year as student evaluations were positive. There was no need to divide junior year courses into 2 sections due to reasonable class sizes.

Simulation activities were included in most clinical nursing courses, which used a combination of skill improvement and practice through scenarios.

Objective Structured Clinical Examination (OSCE) was used in all clinical nursing courses.

MSN:

A total of 51 students were enrolled October 2016 in the MSN program.

Four tracks continue to be offered: Adult Gerontology Clinical Nurse Specialist, Nursing Administration and Management, Psychiatry and Mental Health Clinical Nurse Specialist, and Community and Public Health Nursing.

The revised MSN curriculum was implemented effective spring semester 2015-16.

A number of students undertook residencies at Johns Hopkins University and the University of Maryland.

A total of 22 students were inducted in the HSON Chi Iota Chapter spring 2016.

Town meetings were held to discuss student concerns, residencies, projects, and comprehensive exams.

Information on the specific tracks is shown below.

Adult Gerontology Clinical Nurse Specialist track:

A total of 6 students graduated in 2016.

A total of 18 students were enrolled October 2016.

Two adult care students did their residencies at the University of Maryland, and 4 at AUBMC.

One MSN student in the adult Gerontology Clinical Nurse Specialist track successfully completed the Scholars in Health Research Program (SHARP) in the summer of 2016.

Nursing Administration and Management track:

A total of 6 students graduated in 2016.

A total of 32 students were enrolled October 2016.

Students in the Nursing Administration and Management track completed residencies at Johns Hopkins University (1), AUBMC (1), Bikhazi Medical Center/ Medical Group (2), and Bellevue Medical Center (1).

One MSN student successfully completed the SHARP program in summer 2016

Psychiatry and Mental Health Clinical Nurse Specialist track:

Two students graduated in 2016

A total of four students were enrolled October 2016

Community and Public Health Nursing track:

One student graduated in 2016.

A total of 7 students were enrolled October 2016.

One student is undertaking a double major in Community and Public Health Nursing and Psychiatry and Mental Health Nursing
Two students completed a double major in Community and Public Health Nursing, and Adult Care Nursing.

PhD Program:
HSON prepared and submitted a PhD proposal in close collaboration with the Faculties of Health Sciences and Medicine and with international partners, namely, Johns Hopkins University School of Nursing and the University Of Michigan School Of Nursing. The doctoral program aims to provide rigorous training for research careers in nursing and the health care arena. It will provide students with the opportunity to: develop their capacity for scholarly and independent work, improve critical analytical thinking, refine their ability to communicate knowledge and ideas, and to be able to translate research findings into healthcare practice.

The PhD proposal was approved by HSON Graduate Division, Graduate Studies Committee, HSON External Advisory Board, Board of Graduate Studies, and the AUB senate. It was also positively reviewed by two external examiners approved by the New York State Department of Education. The PhD program will be launched when approved by BOT and the Department of Education in New York State.

B. FACULTY TEACHING

Spring semester 2016

Course Number	Course name	Credits	Faculty
NURS 200	Introduction to Nursing	2	L. Younan
NURS 201	Introduction to Nursing Practice	2	L. Kantar
NURS 202	Health Assessment	2	D. Madi, T. Gulgulian
NURS 203	Biostatistics for Nurses	3	S. Fares
NURS 302	Nursing Care of Adults II	5	M. Adra, S. Sailian
NURS 306	Nursing Care of the Children	5	M. Khoury, D. Madi, T. Gulgulian, T. Avedissian, D. Damianos
NURS 402	Mental Health and Psychiatric Nursing	5	L. Farhood, H. Masalkhi
NURS 408	Community Health Nursing	5	M. Arevian, G. Honein, T. Avedissian
NURS 410	Leadership & Management Theory	5	L. Younan, A. Massouh, T. Avedissian
NURS 411	Leadership & Management Practicum	0	A. Massouh, L. Younan, D. Damianos, S. Sailian
NURS 502	Advanced Nursing Research	3	H. Darwish, S. Fares
NURS 503	Advanced Health Assessment	3	S. Noureddine
NURS 505	Advanced Practice in Adult Care	4	S. Noureddine, H. Darwish
NURS 508	Advanced Practice in Nursing Administration	4	N. Dumit, H. Huijer, L. Younan
NURS 509	Role Development in Nursing Education	3	L. Kantar
NURS 519	Clinical Residency in Acute	4	L. Farhood

	Psychiatric Care		
NURS 520	Managing Quality with Teams	3	N. Dumit
NURS 522	Principles and Practice of Community/Public Health Nursing	3	M. Arevian, G. Honein
NURS 530	Statistical Reasoning and Application in Nursing Research	2	S. Fares
NURS 531	Practical Applications of Budgeting in Nursing	1	L. Younan
NURS 598	Project	3	M. Arevian, M. Clinton, N. Dumit, L. Farhood, H. Darwish, G. Honein, H. Huijer, S. Noureddine, L. Younan

Summer 2016

Course number	Course name	Credits	Faculty
NURS 210	Pathophysiology	2	A.Massouh
NURS 307	Practicum I	0	T. Gulgulian, D. Damianos, M. Masalkhi, S. Sailian
NURS 506	Advanced Practice in Adult Care II	4	S. Noureddine, H. Darwish
NURS 508	Advanced Practice in Nursing Administration	4	N. Dumit, G. Honein, H. Huijer, L. Younan
NURS 598	Project	3	S. Noureddine

Fall semester 2016

Course Number	Course name	Credits	Faculty
NURS 200	Introduction to Nursing	2	L. Younan
NURS 300	Nursing Care of Adults I	5	M. Adra, L. Kantar, N. Alayan, S. Sailian
NURS 304	Nursing Care of the Expectant Family	5	D. Madi, M. Khoury, T. Avedissian, D. Damianos, T. Gulgulian
NURS 406	Nursing Research	3	S. Fares, G. Honein
NURS 404	Nursing Informatics	2	I. Fakih
NURS 400	Critical Care Nursing	4	A.Massouh, S. Sailian
NURS 402	Mental Health and Psychiatric Nursing	5	L. Farhood, H. Masalkhi
NURS 408	Community Health Nursing	5	M. Arevian, G. Honein, T. Avedissian
NURS 500	Nursing Theory	2	M. Clinton
NURS 501	Foundations of Advanced Nursing Practice	2	L. Farhood
NURS 504	Advanced Pathophysiology	3	S. Noureddine, H. Darwish
NURS 505A	Advanced Practice in Adult Gerontology I	4	S. Noureddine, H. Darwish
NURS 506	Advanced Practice in Adult Care II	4	S. Noureddine
NURS 508	Residency in Nursing Administration	4	N. Dumit

NURS 523	Advanced Community Assessment and Interventions	3	M. Arevian, G. Honein
NURS 524	Residency in Community Health Nursing	4	M. Arevian
NURS 527	Developing Health Services Programs	3	N. Dumit
NURS 598	Project	3	M. Clinton, N. Dumit, H. Darwish
IPEC 300	Inter-professional Education	1	M. Adra, H. Darwish, N. Dumit, G. Honein, L. Kantar, A. Massouh, S. Noureddine

C. SIMULATION TECHNOLOGY at HSON

During 2016, the Simulation and Clinical Competency Center (SCCC) provided activities/services for both AUB and non-AUB users in line with its mission statement. Users included HSON students enrolled in undergraduate and graduate programs (HSON users), medical students, residents, faculty members and nurses from AUB and elsewhere (non-HSON users).

This year all undergraduate nursing courses integrated simulation in their training and most of them included an objective structured clinical examination (OSCE) as part of the course assessment of clinical skills.. Additionally, more simulation scenarios were developed by faculty using a range of simulation modalities.

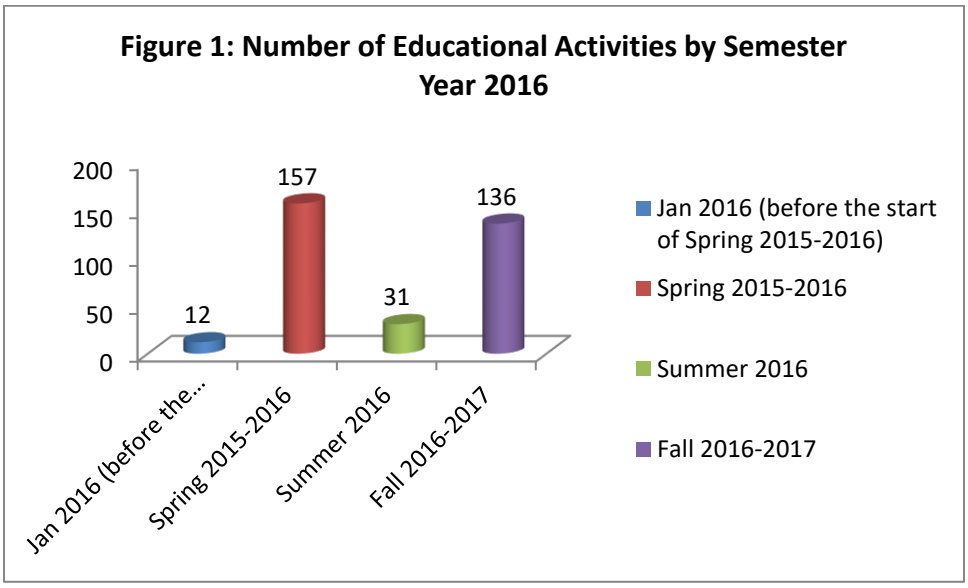
The SCCC continued to support non-nursing AUB/AUBMC users. This year more medical residents from different AUBMC specialties such as emergency, obstetrics and family medicine were scheduled for high-fidelity and skill training. There was an increase in use of the simulation facility by AUBMC this year to address clinical performance issues. Specifically, two “In situ simulation” programs, or simulation that is physically integrated into the clinical environment, were established to serve as adjuncts to the quality and system improvements initiatives at AUBMC Obstetrics and Emergency Departments.

In addition, and with the assistance of the nursing faculty, the SCCC developed and implemented a 5-day simulation-based train-the-trainer course (February 29 - March 4, 2016). The course covered the essential skills for teaching with simulation. The trainees were faculty from Ibn Sina College of Health Sciences, Palestine.

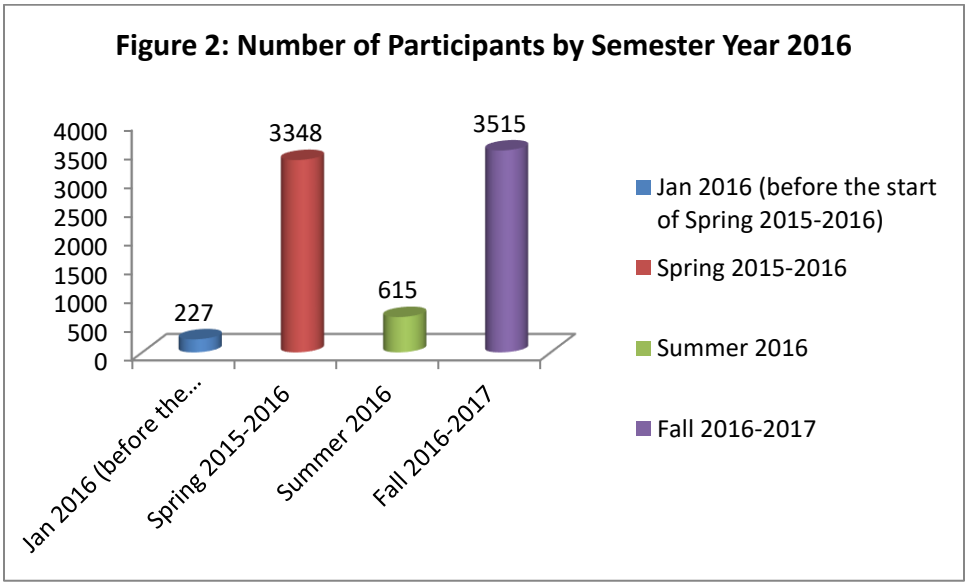
The figures below summarize activities done at the SCCC by semester

For the year 2016, SCCC supported 336 activities or simulation training experiences and 7,705 participants, including HSON and Non-HSON users.

The spring semester had the highest number of activities (47%) and the fall had the highest number of users (46%) (Figure 1 and figure 2 respectively).

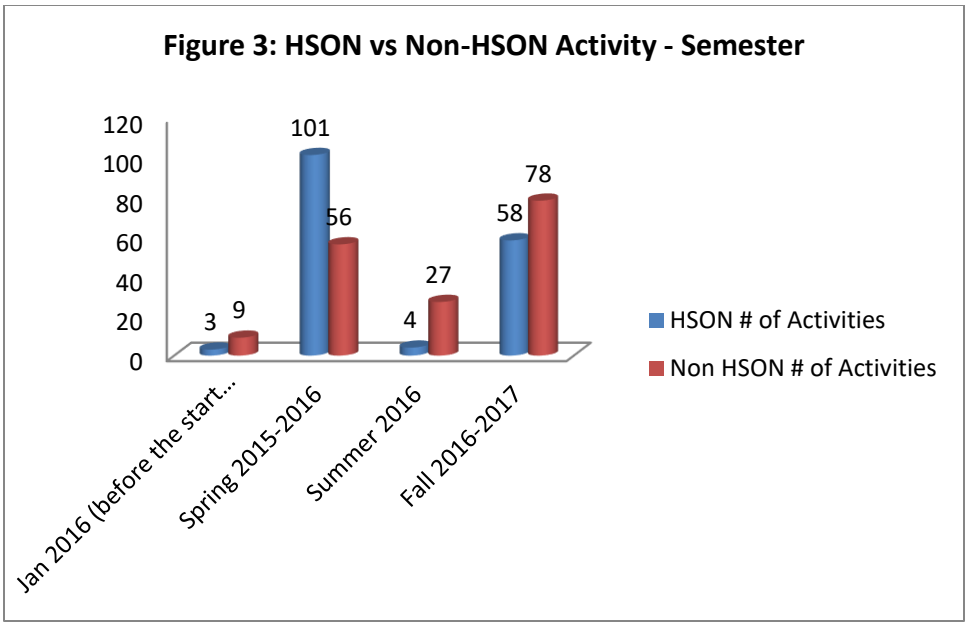


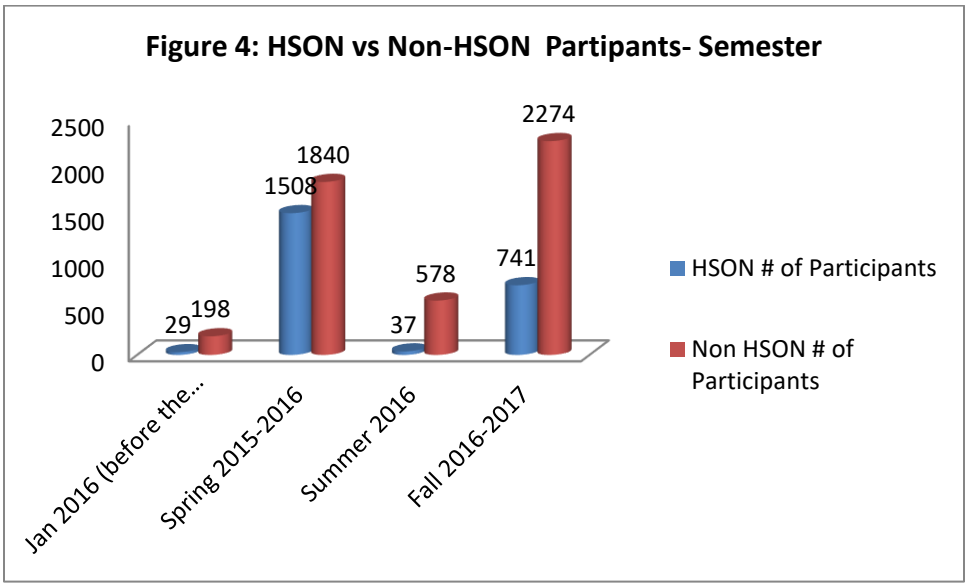
Legend: Educational Activity: each time the lab is utilized regardless of the objectives or content of the learning/teaching that is occurring.



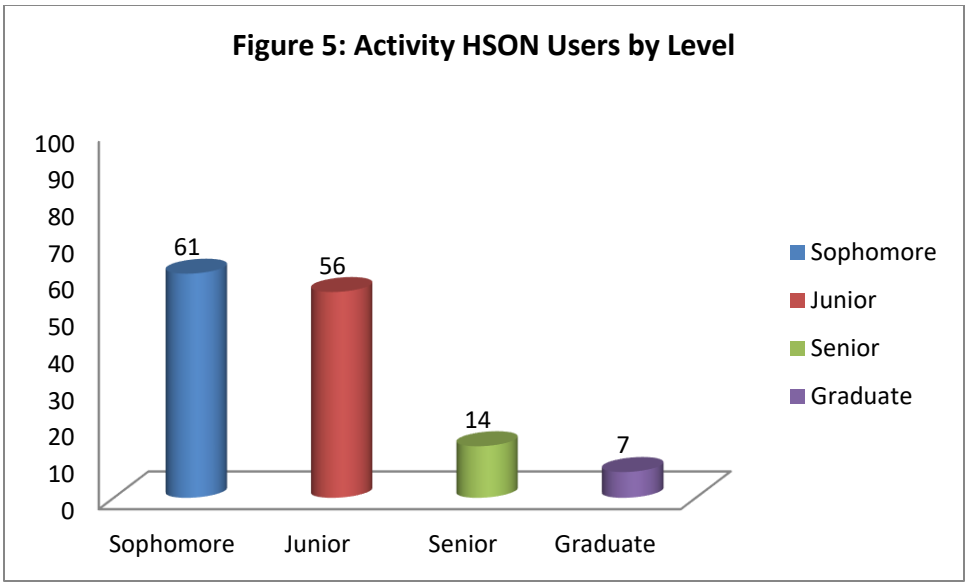
Legend: Participant: a person using the lab whether student, resident, nurse, or employee from AUB/AUBMC community or outside.

During the spring semester, 64% of all activities were conducted by HSON users. In contrast, Non-HSON users had 57% of all activities in the fall (figure 3). All through the semesters, Non-HSON users outnumbered nursing (around 100 students are enrolled in 1st and 2nd year medicine classes). In the summer, the lab continued to receive more Non-HSON users, as medicine end their semester later than nursing (see figure 4).





From the graphs below (figure 5), the use of the facility by HSON decreases from sophomore to senior years. In the MSN program, the SCCC is only used in the advanced assessment course (N503). There were a total of 7 activities in this course this past year.



Legend: Sophomore includes N201 Fundamentals of Nursing Practice and N202 Health Assessment; Junior includes N300 Nursing Care Of Adults I, N302 Nursing Care Of Adults II, N304 Nursing Care of the Expectant Family; N306 Nursing Care of Children and N307 Practicum I; Senior includes N400 Critical Care Nursing, N402 Mental Health and Psychiatric Nursing, N408 Community Health Nursing and N410 Leadership and Management in Nursing.

D. STUDENT PROJECTS, THESES, RESIDENCIES

MSN STUDENT PROJECTS AND THESES

Name	Track	Defense Date	Project or Thesis	Project title	Project/Thesis Committee
Ali Krayani	Adult Care Nursing	12-Dec-16	project	Post-Stroke Depression : A screening protocol for AUBMC	Dr. Hala Darwish; Dr. Laila Farhoud
Mohamad Haidar	Adult Care Nursing	7-Sep-16	project	Survey Of Paramedic Personnel On Attitudes And Practices Related To Resuscitation Of Out Of Hospital Cardiac Arrest Victims In Lebanon	Dr. Samar Noureddine; Dr. Mazen El Sayed
Nada Haidar	Nursing Administration	30-Nov-16	project	Developing a Nursing Research Policy for the Order of Nurses in Lebanon	Dr. Nuhad Dumit; Dr. Michael Clinton
Siham Sleiman	Community and Public Health Nursing	01-Jun-16	project	Protocol For Prevention Of Falls Among Older Adults In Community Settings	Dr. Samar Noureddine; Mrs. Mary Arevian

Abed Al Wahab Al Firikh	Adult Care Nursing	11-Apr-16	Project	Development of an Evidence Based Clinical Pathway for Patients With Aneurysmal Subarachnoid Hemorrhage	Dr. Hala Darwish; Dr. Samar Noureddine
Mohamad Abbas	Nursing Administration	25-Apr-16	Project	Bedside Report: A Patient-Centered Approach to Intershift Handoff	Dr. Lina Younan; Dr. Nuhad Dumit
Hana'a Abdul Salam	Nursing Administration	22-Apr-16	Project	Predictors of resilience among registered nurses at three private hospitals in south Lebanon	Dr. Nuhad Dumit; Dr. Michael Clinton
Joyce Abi Kharma	Adult Care Nursing	25-Apr-16	Project	Improving Nutritional Status in Head and Neck Cancer Patients: A Clinical Guideline	Dr. Samar Noureddine; Dr. Hala Darwish
Nour Jabbour	Psychiatric Mental Health Nursing	22-Apr-16	Project	Designing a Workshop on a Mental Health Toolkit for Media Professionals	Dr. Laila Farhood; Dr. Gladys Honein
Murielle Madi	Nursing Administration	21-Apr-16	Project	"In at the deep end" - A preliminary analysis of focus group discussions with novice nurses in Lebanon	Dr. Michael Clinton; Dr. Dina Madi
Najla Moufarrej	Adult Care Nursing	20-Apr-16	Project	Chemotherapy and Cognitive Function; an Educational Program for Nurses	Dr. Hala Darwish; Dr. Huda Huijer
Dina Mouzayen	Psychiatric Mental Health Nursing	27-Apr-16	Project	Designing an Evidence Based Advanced Practice Psychiatric Nurse Led Breast Cancer Support Group	Dr. Laila Farhood; Dr. Myrna Dumit
Hana Sahyouni	Community and Public Health Nursing	27-Apr-16	Project	Advanced Public Health Nursing: A Guiding Practice Model	Mrs. Mary Arevian; Dr. Lina Kantar
Farah Salhab	Nursing Administration	22-Apr-16	Project	Discharge Planning Policy for Adult Oncology Patients	Dr. Michael Clinton; Dr. Arafat Tfaily
Mariam Shatila	Community and Public Health Nursing	27-Apr-16	Project	Training Primary Health Care nurses on Breast Cancer Screening Awareness	Mrs. Mary Arevian; Dr. Lina Kantar
Hayat Zaatar	Adult Care Nursing	20-Apr-16	Project	Quality Improvement of Interdepartmental Patient Handoff Involving Adult	Dr. Gladys Honein; Dr. Lina Younan

				Patients on High Alert Medications	
Aida Zeaiter	Adult Care Nursing	11-Apr-16	Project	An Evidence Based Protocol For Skin Management of Breast Cancer Patients Receiving Radiation Therapy	Dr. Samar Noureddine; Dr. Fadi Geara
Hasmig Tchaparian	Nursing Administration	03-Feb-16	Project	Fatigue And Turn Out Among AUBMC Bedside Nurses	Dr. Michael Clinton; Dr. Souha Fares
Sabbagh Rachelle	Psychiatric Mental Health Nursing	29-Jan-16	Project	Borderline Personality Disorder : A Proposed Workshop To Empower Psychiatric Nurses And Other Mental Health Professionals	Dr. Laila Farhood; Dr. Gladys Honein

MSN STUDENT RESIDENCIES

Name	Track	Residency Term	Residency Supervisor	Residency Site	Preceptor	Preceptor title
Lina Ahmadieh	Nursing Administration	Summer 2015-2016	Lina Younan	1st: AUBMC; 2nd:EHMU	1: Zeinab Mallah; 2: Miss Nour Hassan	1:Nursing Quality Officer - 2: EHMU coordinator
Shadi Al Halabi	Nursing Administration	Summer 2015-2016	Nuhad Dumit	AUBMC	Maya Nizam	Executive Assistant-Nursing Administration
Mariam Al Sabae	Nursing Administration	Spring 2015-2016	Lina Younan	AUBMC Radiation Oncology	Chirine Chehab	Clinical Department Administrator - Radiation Oncology
Ala'a Awwad	Adult Care Nursing	Summer 2015-2016	Hala Darwish	AUBMC	1: Janane Hanna- 2: Rebecca El Asmar; 3: Dr Raja Sawaya	1:Clinical Nurse Specialist II; 2:Clinical Nurse Specialist II; 3:Professor of Clinical Specialty
Rayane Cheikh	Nursing Administration	Spring 2015-2016	Michael Clinton	AUBMC	Yara Abou Harb	Deputy Director for Patient Affairs
Fatima Chreif	Nursing Administration	Spring 2015-2016	Nuhad Dumit	AUBMC quality control in the surgery department	Rayane Islambouli	Surgical Quality Improvement & NSQIP Coordinator
Ahmad	Nursing	Summer	Honein	AUBMC	Diala Abu	Administrator

Ghaddar	Administration	2015-2016	Gladys	Private clinic administration	Daher	Specialty Clinics and Call Center
Grace Hakim	Adult Care Nursing	Fall 2016-2017	Samar Noureddine	University of Maryland Shock and Trauma center	Carla A Aresco	Nurse practitioner, Senior Clinical Program Manager
Lynda Hashem	Nursing Administration	Summer 2015-2016	Honein Gladys	Children's Heart Center, outpatient department AUBMC	1: Rasha Talhouk; 2: Mrs Maria Atoui El Hajj	1: Executive assistant; 2: Development & Brave Heart Fund administrator & patients relation coordinator
Yara Hazouri	Nursing Administration	Summer 2015-2016	Huda Abu-Saad Huijer	Johns Hopkins Medical Institute - Charlotte Bloomberg Children's Center	Marybeth Vidunas.	Pediatric Nurse Educator
Rony Merhi	Nursing Administration	Summer 2015-2016	Nuhad Dumit	AUBMC	Maya Nizam	executive assistant of the nursing administration
Reem Salem	Adult Care Nursing	Fall 2016-2017	Samar Noureddine	1st:AUBMC – ER + Transfer Center; 2nd:AUBMC – Critical Care 3: Ain Wazain Nursing Home	1: Lamia Eid ; 2: Sabath Jamous; 3: Dr. Husam Ghosn	1: Case Manager; 2: Clinical Nurse Specialist 3: Gerontologist
Victoria Semaan	Adult Care Nursing	Fall 2016-2017	Samar Noureddine	AUBMC	1: Angela Massouh; 2:Rafika Zaatari	1: Heart Failure Clinical Nurse Specialist ; 2:Clinical Educator
Roula Shehadeh	Nursing Administration	Fall 2016-2017	Michael Clinton	1st: Belle Vue Medical Center; 2nd: AUBMC Nursing Quality	1: Rana AbdelMalak; 2:Ms. Zeinab Mallah	Director of Nursing

				Department		
Mona Shorba	Nursing Administration	Summer 2015-2016	Lina Younan	AUBMC	Ms. Nada Nassar	Nurse Quality Manager
Wafaa Skaf	Nursing Administration	Spring 2015-2016	Michael Clinton	AUBMC nursing quality department	Ms Nada Nassar	quality manager
Siham Sleiman	Community and Public Health Nursing	Fall 2016-2017	Mary Arevian	University of Maryland	1: Jodi Berg-Gaither; 2:Lauren Schroeder	1: CRNP,Emergency Medicine Medical Center ; 2:MS, CRNP – maternity leave Senior Nurse Practitioner Emergency Medicine

III. STUDENT- RELATED ACTIVITIES

A. STUDENT ENROLLMENT/SCHOLARSHIPS

- The total number of applicants to the BSN program for 2016-17 was 356; the total number of accepted students was 182 and the total number who confirmed their enrollment was 65. This includes 3 students accepted as early admissions, 1 transfer student from outside AUB, 4 transfer students from within AUB, 3 sponsored by USAID fund, and 2 students working for a second degree.

- The total number of applicants to the MSN program for 2016-17 was 38; the total number of accepted students was 35 and the total number who confirmed their enrollment was19.

- A total of **47** interviews were conducted with new BSN students, **36** were recommended for scholarships, and **31** enrolled. This scholarship is still attracting students who select a nursing major as their 3rd, 4th and 5th choice in their application.

- The table below shows the student enrollment for the last five years:

	BSN					MSN				
	2012-13	2013-14	2014-15	2015-16	2016-17	2012-13	2013-14	2014-15	2015-16	2016-17
Applied	287	285	349	341	356	40	38	47	31	38
Acceptance	151	141	179	186	182	38	33	42	28	35
New Enrolled	72	64	70	55	65	16	26	23	12	19
Yield	48%	45%	39%	30%	36%	42%	79%	55%	43%	54%
Committed	52	52	54	39	55	16	26	22	12	18
Total Enrollment	168	167	185	172	163	52	60	60	55	51
Female	80%	81%	77%	72%	68%	77%	77%	75%	85%	88%
Male	20%	19%	23%	28%	32%	23%	23%	25%	15%	12%
Lebanese	90%	84%	81%	81%	79%	92%	93%	85%	93%	90%
International	10%	14%	19%	19%	21%	8%	7%	6%	7%	10%
BSN /MSN Graduates	31	35	40	40		17	10	17	16	

B. STUDENT RECRUITMENT AND MARKETING

Student recruitment and marketing of the BSN and MSN programs remain a priority at HSON. The marketing strategy for student recruitment in 2015 included various activities:

- **Graduate Open House:** HSON participated on February 3, 2016 in the Graduate Open House organized by the Graduate Council to promote graduate programs. Similar to previous years, few applicants interested in the MSN program attended the open house.

- **School visits:** The HSON team visited 22 high schools to recruit students. School counselors were contacted and a poster was sent to all schools inviting high school students to visit the simulation lab at HSON.

- **AUB Annual School Fair**: HSON participated in the AUB Annual School Fair for undergraduate programs in April 2016.

- **AUBMC Open House:** On the 18th of May, HSON participated in the AUBMC open house to recruit nurses from all over Lebanon. The Student Services Officer (SSO) had a booth for the MSN program and Dr. Samar Noureddine presented the MSN program requirements.

- **Orientation for new nurses at AUBMC:** During the orientation for new nurses in February, March, May, August, October and December 2016 at AUBMC, Dr. Noureddine and Mrs. Berbary presented the MSN program requirements. This presentation became part of the orientation program organized by the CPDC.

- **Marketing and promotion of HSON academic** programs is done also through:
  - Social media: Facebook, LinkedIn, Utube, website
  - Keystone Academic Solutions portal: to recruit students for graduate studies
  - Nursing Centralized Application System (CAS) portal: to recruit students from North America for the MSN program and for the BA/BS-BSN second degree accelerated program. In 2016, we enhanced the features of the HSON programs display on Nursing CAS to become more attractive. The result was that we received more than 230 applications that are still being processed for Fall admissions 2017-18.
  - Big choice portal: to recruit students from Asia, Africa, and South America, for undergraduate and graduate programs.

- **High School student's visits to HSON:** Interested students from Lycee Abdel Kader and ACS visited the school of Nursing. The SSO provided information on the BSN program and FA/scholarships available.

C. STUDENT ACTIVITIES

Nursing students were involved in different community projects and activities in their Community Course and in events organized by the Nursing Students Society (NSS) in 2016:

- **New Student Orientation:** During the orientation of newly enrolled students, some undergraduate and graduate students provided testimonials and success stories about the nursing profession.

- **Student recruitment:** Some BSN students were involved in school visits with the student services officer. These students contacted the school they graduated from and went there to promote the AUB HSON nursing programs.

- **School Fair:** Students from the BSN and MSN programs participated in the AUB school fair that was open to all students from different high schools. HSON had a stand at the Olayan School of Business to inform visitors about the BSN program at AUB

- **The Middle East Student Ambassador Program by Elsevier**: Elsevier has launched the Middle East Student Ambassador Program to be able to connect with the University and to support students through their careers. One of the nursing students was selected as a Student Ambassador to help Elsevier engage with other students on campus.The main goal of the Ambassador is to help Elsevier in writing book reviews whenever they want to promote titles, increase the visibility of Elsevier through social media, and to conduct surveys for market research.

- **Medical Research Volunteer Program (MRVP)**: Occasionally, undergraduate nursing students volunteer to participate in the Medical Research Volunteer Program (MRVP) organized by AUB.

- **Lung Health Awareness**. On March 30, 2016, HSON students raised awareness about lung function, health, smoking effect, third hand smoking, and how to take care of one's lungs.

- **School Awareness & Renovation Project**. On April 16, 2016, HSON students in collaboration with FHS students received some money from the AUB 150th anniversary fund to renovate classrooms in one of the Lebanese schools. The students engaged in an awareness campaigns about environmental and physical health, in two schools.

- **Liqaa' fi kol kadaa'**: Throughout the year, HSON students actively participated in the Order of Nurses 'project entitled Liqaa' fi kol kadaa'. They participated in informing people about the nursing profession and educating them on health issues.

- **May 11, International Nurses Day 2016:** HSON students participated in the celebrations by organizing a fashion show of nursing uniforms and a flash mob. They showcased nursing uniforms from different eras, starting with the early Christian era and projecting into the future, and provided short descriptions of the achievements during each era. They also edited the lyrics of the song: "We are the world" to become "We are the nurses" and sang it all together.

- **May, 2016: AUB outdoors**: Students prepared a stand for the bottle challenge game, and raised funds which were added to the Nursing Student Society account.

- **September 2016:** Elections for the Nursing Student Society were held and the cabinet was formed as follows :
    - President: Nicole Dagher
    - Vice President: Dayana Traboulsi
    - Treasurer: Elizabeth Cantrell
    - Secretary: Amr Kayali
    - Public Relations (PR): Bassem Fakhouri
    - Member at Large: Bassam Fakih
    - Class Representative BSN II: Rasha Houri
    - Class Representative BSN III: Nour Ali Abdallah
    - Class Representative BSN IV: Mirna Hussein

- **October 2016**: Elections for the SRC and USFC were held and the results were as follows :

Department	Election Pool	Seats
NU	FM USFC	Mirna Hussein
NU	NURSING IV and GR	Nayla Moukarzel
NU	NURSING II and III	Hassan Yassine

- **Bake sale:** A bake sale was held and the money raised was donated to families in need.

- **December, 2016**: A food and clothes drive was organized to help needy families.

D. OTHER STUDENT SERVICES AND RESOURCES

- **Credentialing Requests of Nursing Graduates**
  With the great demand for certification in different areas in Nursing, the number of requests for credentials from graduates has increased. In 2016, HSON received 26 requests by foreign institutions to complete students' credentials; the majority were submitted to the Commission on Graduates of Foreign Nursing Schools (CGFNS) in USA.

- **Online Petition Form System**
  As of January 2016, HSON adopted the Online Petition Form System (OPFS) initiated by the Faculty of Arts and Sciences. OPFS was customized to meet the needs of HSON. The types of petitions that were automated include the following: Overload/underload of credits, course withdrawal, extension of residency at AUB, late registration, among others. The Chair of the Academic and Curriculum Committee and the Chair of the Graduate Studies Committee can directly approve straightforward requests. Irregular petitions are usually brought to the attention of the concerned committees. A total of 107 petitions were processed in 2016.

IV. RESEARCH AND SCHOLARLY ACTIVITIES

A. CURRENT HSON FACULTY RESEARCH

Palliative Care in Older Adults in Lebanon
The purpose of this study is to evaluate the quality of palliative care (PC), the quality of life (QoL), symptom management, and functional ability among hospitalized older adults in need of palliative care in Lebanon.
The study follows the observational survey design. Data is being collected from three hospitals: AUBMC, St. George, and AinWaezein. Face to face interviews are carried out using the Quality of Palliative Care Questionnaire-Adult (QPCQ-A) which was constructed using several instruments measuring quality of life, symptom prevalence and management, quality of care, and functional ability.

Chronic Pain: The Development and Psychometric Validation of an Arabic-Language Version of the Pain Catastrophizing Scale (PCS-A)
Chronic pain is believed to be a disease on its own and has been increasing in prevalence. While reporting or anticipating pain, patients experience a negative "mental set" of catastrophizing that has been described as an exaggerated cognitive-affective response to actual or anticipated pain. The 13-item Pain Catastrophizing Scale (PCS) is the most widely used measure of pain-specific catastrophizing and assesses three dimensions: rumination, magnification, and helplessness. The PCS has been translated and validated in several languages though no Arabic version exists that measures an important predictor of pain and

pain-related outcomes. Thus, the purpose of the project is to develop and psychometrically evaluate PCS in the Arabic language among a sample of 150 adults in Lebanon.

Constructing the meaning of quality of life for residents in care homes in Lebanon: Perspectives of Residents, Staff, and Family
Located in two care homes in the Lebanon, the study explores the perceptions, perspectives, and meaning of quality of life for a theoretical sample of care staff, family caregivers, and older people. Results: Four themes emerged from this analytical process: i) Maintaining Family Connectedness; ii) Engaging in Worthwhile Activities; iii) Maintaining and Developing Significant Relationships; and IV). Holding and Practicing Spiritual Beliefs. The emergence of these themes confirmed the complex, interrelated, and multidimensional nature of quality of life for residents and other stakeholders.

Principal Investigator: Monique Chaaya
Dementia in Lebanon: a follow-up study
This proposed study aims to follow up on the initial cohort of 408 older-adults in order to assess the risk of dementia in terms of incidence and to provide an update on its prevalence. In addition, the study will investigate risk factors of dementia, mortality and morbidity levels, and major health outcomes, specifically hospitalization and nursing home placement. The study also aims to measure the caregivers' mental health and burden of care.

From Education to Practice: The Challenges that Nursing Students and Novice Nurses Face in Lebanon
This qualitative study involves three university sites and three hospitals in Lebanon. The study is designed to investigate from the point of view of students and registered nurses (RNs) in the first year of practice the challenges they face as they engage in clinical nursing practice. The study focuses on challenges that are unique to Lebanon. Separate focus groups will be formed at the three universities. The three focus groups will explore the challenges students face as they transition to the clinical experience in BSN IV. Separate focus groups will be established at three hospitals in Beirut. The hospitals will be those that generally recruit the most graduates from the respective universities. The three focus groups will focus on the challenges RNs face in their first year of practice in Lebanon. Thematic analysis and the constant comparative method will be used to analyze the data. The study findings may suggest strategies for reducing attrition in BSN programs in Lebanon and may assist hospital administrations to reduce attrition of RNs in their first year of practice.

Principal Investigator: Michael Clinton
Comparison of organizational research climates in universities in Lebanon, Canada and Australia: An initial study
The strategic purpose of this initial study is to establish an international program of research focused on the regulation of human subject research. In this initial study the organizational research climates of selected universities in Lebanon, Canada and Australia will be described and compared. Subject to ethical and institutional approval the study will be conducted at the American University of Beirut, the Lebanese American University, the University of Saskatchewan, and the University of Newcastle, New South Wales. This survey is the first of its kind to assess from the perspective of investigators and graduate students the organizational research climate in three countries. The results will provide a basis for an expanding the survey to other universities in Lebanon and the wider region, Canada and Australia.
Funding; None
Status: Awaiting IRB approval

Principal Investigator: Hala Darwish
Brief International cognitive assessment for MS (BICAMS)-Arabic
The aim of this study is to validate the well-established Brief International Cognitive Assessment for Multiple Sclerosis (BICAMS) in Arabic
The test stimuli and administration procedures will be standardized in Arabic. The validity and the test-retest reliability of the different tests will be assessed.
Finally, we will establish the normative data for Lebanon

N-Acetylation Traits as Effect Modifiers of the Association between Smoking-based Arylamine Exposure and Tumorigenic Outcome in Lebanese Urothelial Bladder Cancer Patients
The study aims to investigate a potential association between smoking and tumorigenic outcome in urothelial bladder cancer patients, as well as to examine the modifying effect of metabolic N-acetylation traits. This study is expected to improve our understanding of the etiology of bladder cancer. We anticipate providing evidence in support of a gene-environment interaction that may underlie the unusually high incidence of bladder cancer in Lebanon.

Analyzing the Antecedents of Nurses in Private and Public Medical Centers in Lebanon
The main aim of this study is to examine sickness absences at major medical centers across the country in terms of prevalence, nature, causes, trends, frequency, cost, and impact on services provided. Another aim is to explore reasons for sickness absence in order to recommend and implement appropriate intervention(s) for effective absence management. A third aim is to validate the JOINT model created in a systematic literature review (article published) by the investigators.

Assessing Basic and Continuing Education Learning Needs of Nurses in Lebanon
The purpose of the study is to identify the basic and continuing education learning needs and preferred ways of learning of bedside nurses in Lebanese hospitals. It is expected that the results of this study will inform the design of basic and continuing education programs that can be tailored to the needs of bedside nurses. This study is in collaboration with the Order of Nurses in Lebanon and nursing faculty members from the University of Saint Joseph, University of Balamand, and Lebanese University.

Promoting Psychosocial and Mental Health Care through Community-based Educational Workshops for Teachers and Parents: A Follow-up to Mental Health Assessments in Civilians Exposed to Traumatic Events of War in the South of Lebanon
This intervention study is a follow-up to recommendations from previous studies by the PI revealing high rates of psychiatric morbidity in the south of Lebanon. The specific aims of the study are to (1) identify attitudes and beliefs about mental illness, symptoms, and treatment through focus groups conducted with teachers and parents of students; (2) provide psychoeducation (e.g. effects of trauma, depression in children and adolescents) and psychosocial resources (e.g. solutions for student behavioral challenges within the classroom) to parents and teachers through workshops; and (3) test the efficacy of the intervention by administering questionnaires before and after the educational program to observe changes, if any, in reported mental health problems, attitudes, and practices.

Knowledge Retention and the Instructional Approach: Case-Based versus Lecture-Based Learning
The purpose of this study was to identify differences in nursing students' knowledge retention after being exposed to two instructional approaches, the case-based learning and lecture-based learning. Knowledge retention was assessed through scores of students using a selected response multiple choice test. The test content examines knowledge retained from the Nursing Care of Adults I course. Selecting teaching practices that ensure better acquisition and retention of knowledge in nursing students is imperative to safe nursing practice.

The Lebanese Metabolic Health Promotion Trial: The LEBMETPRO trial.
The aim of this randomized controlled trial is to test the efficacy of a 3 months behavioral dietary and physical activity intervention on adherence to the Lebanese Mediterranean diet and to regular moderate physical activity in adults with metabolic syndrome, a group at high risk for cardiovascular disease. The specific aims are: 1) To test the feasibility, acceptability and preliminary efficacy of a culturally sensitive behavioral intervention on dietary consumption and physical activity in adults with metabolic syndrome; 2) To investigate the effect of the intervention on blood pressure, total cholesterol, HDL, triglycerides, body weight, waist circumference and fasting blood sugar; 3) To investigate the effect of the intervention on psychosocial determinants of dietary and physical activity behaviors, namely the knowledge of healthy diet, dietary outcome expectancy, physical activity outcome expectancy, dietary self-efficacy, physical activity self-efficacy, dietary intention and physical activity intention; and 4) to investigate the feasibility and acceptability of mobile phone text messages as a means of supporting the intervention.

How Nursing Work Is Organized in Lebanese Hospitals and Its Effects on Nurses' Wellbeing
The objectives of the study are

1. To describe the organization of nursing work in Lebanese hospitals by identifying the models of nursing care in use and their prevalence.
2. To describe nursing staffing patterns in Lebanese hospitals (mainly nurse-to-patient ratios, staff-mix, and educational level of RNs,) and compare them to international standards.
3. To investigate the relationships between the level of nurses' professional education, nursing staffing patterns, models of nursing care, and the incidence of nursing fatigue and muscular skeletal injury.

Co-investigators: Michael Clinton, Fadi El Jardali, Helen Samaha, Souha Fares
Funding: URB fund
Status: Data analysis in progress.

Principal Investigator: Lina Younan
The organization of nursing work in Lebanese hospitals: What do nurses do and how do models of care affect fatigue.
The study investigates the relationship among three important variables that are not usually explored together: organization of nursing work, fatigue and musculoskeletal injuries. The sample includes 3157 nurses working in acute care units located in 39 hospitals across the five districts of Lebanon. The knowledge to be generated from this study will help nurse administrators and regulators identify:

1. The delivery models of nursing care in use in Lebanese hospitals and their prevalence.
2. The types of activities that nurses actually perform and accordingly delineate the real scope of practice of nurses with different educational levels.
3. Nursing staffing patterns in Lebanese hospitals (mainly nurse-to-patient ratios, staff-mix, and educational level of RNs,) and compare them to international standards.
4. The relationships between level of nurses' professional education, nursing staffing patterns, models of nursing care and the incidence of nursing fatigue and muscular skeletal injury among nurses.

D. SCIENTIFIC CONTRIBUTIONS AND RESEARCH GRANT REVIEWS

Huda Abu-Saad Huijer

2010 Ongoing	Reviewer of Medical Practice Plan, Faculty of Medicine Research Committee, AUB
2015 Ongoing	PhD supervision of Ms. Angela Massouh, University of Colorado, USA
2016 Ongoing	PhD supervision of Farah Chamaa, Department of Anatomy, Cell Biology and Physiological Sciences, Faculty of Medicine, AUB.
2016	External Examiner, Beirut Arab University
2016 Ongoing	Faculty mentoring of Dr. Rihab Nasr, Department of Anatomy, Cell Biology and Physiological Sciences, Faculty of Medicine, AUB.

Hala Darwish

2011-2016	Reviewer of Medical Practice Plan, Faculty of Medicine Research Committee, AUB

Nuhad Dumit

2009 Ongoing	Reviewer, Western Institute of Nursing conference Abstracts
2011 Ongoing	Reviewer, "Effective Teaching and Learning in Higher Education," organized by the Center for Teaching and Learning (CTL) and IT Academic Core Processes and Systems (IT ACPS), AUB
2012 Ongoing	Reviewer, ICN Congress/conference Abstracts

Laila Farhood

2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, AUB (upon request)

Gladys Honein

2016	Abstract reviewer, North American Primary Care Group, November 9-12, 2016
2016	International Undergraduate Awards, Nursing and midwifery panel, June 2016

Lina Kantar

2013 Ongoing	Reviewer, "Effective Teaching and Learning in Higher Education," organized by the Center for Teaching and Learning (CTL) and IT Academic Core Processes and Systems (IT ACPS), AUB.

Samar Noureddine

2016	Abstract reviewer, Pan Arab Critical Care conference, October 15, 16, 2016
2016	Abstract reviewer, University of St. Joseph International conference, November 11, 12, 2016
2012 Ongoing	Abstract reviewer, Annual Spring Meeting of the Cardiovascular Council of Nurses and Allied Professionals
2011 Ongoing	Reviewer for Sultan Qaboos University, Research and Innovations Department
2010 Ongoing	Reviewer of Medical Practice Plan and University Research Board grants, Faculty of Medicine Research Committee, AUB

E. SCHOLARLY LECTURES

Huda Abu-Saad Huijer

- 'Nursing Research in the Region'. Columbia University Global Initiatives. March 16-18, March 2016. Invited.
- Global Advisory Panel: Future of Nursing & Midwifery (GAPHON); Abu-Dhabi Expert Meeting. Presented and chaired sessions. March 23-24, 2016.Invited.
- WHO Abu-Dhabi Expert Meeting. Consultant. March 25-26, 2016. Invited.
- '110 years of Nursing Education at AUB; a Brief Overview'. HSON Symposium on Celebrating Nursing Developments; Past and Present Achievements, May 11, 2016.

- 'Palliative Care; A Program of Research'. Special lecture; International Nurse Researcher Hall of Fame Honoree, 27th Sigma Theta Tau International Nursing Research Congress, Cape Town, South Africa, July 21-25, 2016. Invited.
- 'The Development and Psychometric Validation of an Arabic-Language Version of the Pain Catastrophizing Scale (PCS-A)', IASP 16th World Congress on Pain, Yokohama, Japan, September 26-30, 2016.

Nour Alayan

- Introduction to the use of substance use Screening, Brief Intervention, and Referral to Treatment in Primary Care, Accelerated program, Rutgers Nursing, March 24, 2016

Michael Clinton,

- 'Conceptions of genealogy in Foucault and Agamben: Governing of life or exceptional forms of biopower?' Co-author R.A. Springer. 20th International Philosophy of Nursing Conference & 12th Philosophy in the Nurse's World Conference: Revisiting the Roots of Nursing Philosophy and Critical Theory: Past, Present and Future. Hilton Hotel, Quebec City, Canada. 22nd - 24th August, 2016.
- 'Philosophy lost: A probing inquiry into the implications for graduate nursing education in the corporatized university'. Co-author R.A. Springer. 20th International Philosophy of Nursing Conference & 12th Philosophy in the Nurse's World Conference: Revisiting the Roots of Nursing Philosophy and Critical Theory: Past, Present and Future. Hilton Hotel, Quebec City, Canada. 22nd - 24th August, 2016.

Gladys Honein

- 'Introduction to qualitative research workshop'. Clinical Research Institute. American University of Beirut. January 23 & 30, 2016
- 'Introduction to mixed method research'. Research Education Unit. American University of Beirut. April 21, 2016
- 'The Transformative Roles of the Primary Health Care Nurse'. Primary Healthcare Nursing Conference: The Way Forward. Dubai, December 5, 2016.

Lina Kantar

- Seminar on *Designing Rubrics,* offered to the faculty at the Rafic Hariri University on December 16, 2016.
- Invited presentation on 'Assessing Student Performance Using Rubrics', planned by the CTL and offered to AUB faculty, April, 2016.
- Seminar on *OSCE in Nursing Education: Theoretical Perspectives and Application,* planned for the faculty at the HSON on November 11, 2016.
- 'Knowledge retention and instruction: The nature of the link'. Paper accepted for presentation at the 43rd Professional Nurse Education Group (PNEG) Conference, October 21-23. Columbus, Ohio, USA.

Dina Madi

- "Health Assessment Workshop", given twice, over three full days at the Continuing Education Center at Sharjah, UAE. 2015-2016

- "Health Assessment Workshop", one day workshop offered 5 times in five Lebanese areas organized by the Lebanese Order of Nurses and the Ministry of Health, 2015-2016
- "OBS Emergencies Workshop" given over two full days at the Continuing Education at the Continuing Education Center at Sharjah, UAE. February 2016.

Angela Massouh

- 'Evidence based Approaches to Cardiovascular Care'. Course Coordinator. American University of Beirut Medical Center. January 2016 through March 2017.
- 'Heart Failure Self-Care Education: Non-pharmacological Management'. Presentation at the Heart Failure Nurse Training Seminar. Lebanon, April 2016.
- 'e-CME001 Updates in Critical Care Nursing'. Course director and speaker, Continuing Medical Education, AUB, Lebanon. October 2016.

Samar Noureddine

- '*Attitudes and practices of Lebanese paramedic personnel related to resuscitation of out-of-hospital cardiac arrest'*. The 21st annual conference of the Lebanese Epidemiological Association (LEA). Epidemiology in Health Policy & Practices. Gefinor Rotana Hotel, Lebanon, December 3, 2016.
- *'Can we reduce the mortality of patients with Acute Coronary Syndrome?'* A Symposium on innovations in nursing research and practice. The 2nd International Nursing Congress: The Nursing Profession at the Heart of the Health Care System, Universite St Joseph, Lebanon, November 19, 2016.
- *'Cardiovascular Risk Reduction in Lebanon'.* Presented at the Development of Evidence-Based Nursing in an Interdisciplinary Era: Achievements and Prospects. International Research Conference at the Hariri school of Nursing, American University of Beirut, Lebanon, October 8, 2016.
- *'Summary of Regional Research Meeting & Forward Look'.* Presented at the Columbia University Global Center's Global Nursing and Midwifery Clinical Research Development Initiative Summit Meeting in Amman, Jordan, July 18, 2016.
- 'Factors that influence Resuscitation Practices of Out of Hospital Cardiac Arrest Victims. Exploring the Practice of Cardiopulmonary Resuscitation in Lebanon'. A workshop organized by the Vascular Medicine Program at the American University of Beirut Medical Center and the Lebanese University, Beirut, Lebanon. May 28, 2016. Invited.
- 'Assessment of cardiopulmonary resuscitation practices in emergency departments for out of hospital cardiac arrest victims in Lebanon'. The International Nursing Conference 2016 titled: Improving Clients' Outcomes through Implications of Scientific Evidence at Zarqa University, Jordan April 7, 2016. Invited.
- 'Developing Nursing Education to Achieve Desired Outcomes'. The International Nursing Conference 2016 titled: Improving Clients' Outcomes through Implications of Scientific Evidence at Zarqa University, Jordan April 7, 2016. Invited Keynote Adress.
- Gave a 3-day course on "Renal Nursing' for the Training and Development Center of the Ministry of Health, at Sharjah, UAE, March 27-30, 2016

Lina Younan

- Guest speaker on "Financial Planning" to senior BSN students at LAU, February 2016. As part of their Leadership & Management course (3 hrs).

- Guest speaker on "Handoff Communication" (2hrs) at Lebanese American University Medical Center- Rizk Hospital March 21, 2016.

V. PROFESSIONAL PRACTICE/SERVICE

A. PROFESSIONAL PRACTICE

Huda Abu-Saad Huijer

- Member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP). Ongoing.
- Immediate Past President of the Chi Iota Chapter of Sigma Theta Tau International Honor Society in Nursing in Lebanon.
- Member, International Scientific Advisory Board, Center of Excellence in Pediatric Pain Management, Faculty of Medicine, Kuwait University, Kuwait.
- Consultant to WHO EMRO on the Future of Nursing and Midwifery in the Eastern Mediterranean Region.
- Member, Advisory Committee, Center for Research, Training, and Policy in Arab Mental Health, Faculty of Medicine, AUB.
- Member of the Public Advisory Board, Lebanese Society of Family Medicine.
- Vice-President, National Committee on Pain Relief and Palliative Care (Appointed by Minister of Health) and chair of the Research Committee.
- Past president Lebanese Society for the Study of Pain.
- Member, IASP Developing Countries Working Group
- Member, UC Davis, Advancing Pain Relief Education: Anchoring Pain Competencies around the World

Marina Adra

- Hariri School of Nursing representative to the National Colloquium Committee. Participated in computerizing the colloquium exam.
- Consultation with the nursing director of Dar Al Ajaza Islamiyah Hospital to select nurse managers and supervisors and help develop leadership skills.

Nour Alayan

- Addiction Counseling, Postgraduate Certification, Rutgers, School of Social Work (Partially completed)
- Screening, Brief Intervention, and Treatment for Unhealthy Drinking, Training Program for Workplace Practitioners by the National Association of Alcoholism and Drug Abuse Counselors
- Certification in Effective College Instruction by the American Council on University Education

Nuhad Dumit

- President of the Order of Nurses in Lebanon
- Member of the Western Institute of Nursing
- Member of the advisory board of the Faculty of Health Sciences Beirut Arab University
- Member of the Task Force on Lives and Careers of Women Faculty at AUB

Laila Farhood

- Clinical Associate, Department of Psychiatry, Faculty of Medicine. Clinical activities include psychiatric assessment and psychotherapy (individual, couple, and family therapy) in in-patient and out-patient settings.
- Member, American Psychiatric Nurses Association (APNA)
- Member, International Society for Traumatic Stress (ISTSS)
- Member, European Society for Traumatic Stress (ESTSS)

Gladys Honein

- Capacity building, a collaborative venture between the Order of Nurses and Ministry of Public Health, funded by UNICEF, with special focus on 'Outreach program in community health' (October-ongoing)

Lina Kantar

- Member, Scientific committee on the 2nd Simulation-Based Medical Education conference, LAU

May Khoury

- Active member in Pain Relief and Palliative Care Education Sub-Committee of the National Committee for Pain Relief and Palliative Care established by the Ministry of Public Health.
- Active member in the Pediatrics Educational Council at AUBMC, and on the occasion of the Pediatric nurse's week, I participated in the hosting of the Pediatrics Competency Fair (Blood Transfusion competency) to All Pediatric RNs& PNs held on October 3-7, 2016.

Dina Madi

- Course educator candidate for the Advanced Trauma Life Support (ATLS):
  Received the approval from the Trauma Educational Programs office at the American College of Surgeons (ACS), Chicago on October 2015.
  Attended the ATLS Instructor Course in the capacity as course educator candidate at King Abdul Aziz Medical City- Ryadh, KSA, Feb.14-15, 2016.
- Attended the Faculty Advancement Program in Clinical Research organized by the Research Education Unit (REU) of the Clinical Research Institute (CRI) at AUB- FM, October 2015 until end of June 2016.
- Participated in the formulation of the case studies and multiple choice questions for the electronic Colloquium exam for nurses; chaired the Maternity Group.
- Participated in the HSON International Research Conference as member of the scientific committee, chair of the social committee and as moderator, October 6-8, 2016

Angela Massouh

- Cardiology Clinical Nurse Specialist. Joint Appointment. American University of Beirut Medical Center.
- Represented Lebanon in the Heart Failure Middle East and North Africa Roadmap; Dubai.
- Leadership Succession Committee, AUB Honor Society, member.
- Participated in the formulation of the case studies and multiple choice questions for the electronic Colloquium exam for nurses at the Order of Nurses; co-chaired Critical Care Group.

- Organizing Committee, Critical Care Society National Conference, Phoenicia Lebanon.

Samar Noureddine

- Member, Global Cardiovascular Nursing Leadership Forum since 2014.
- Moderated a session titled 'Amélioration de la qualité des soins' at the second international nursing conference at the Faculty of Nursing Science of St. Joseph University, Beirut, Lebanon, November 19, 2016.
- Moderated a session on 'Regional Barriers and Specific Actions Needed to Address Research Priorities' at the Global Nursing and Midwifery Clinical Research Development Initiative Summit Meeting by Columbia University Global Center in Amman, Jordan, July 19, 2016.
- Moderated a session on 'Integrating Scientific Knowledge into Clinical Practice' at the International Nursing Conference at Zarqa University, Jordan. April 7, 2016
- Member, Scientific Committee, Second International Conference of the Faculty of Nursing, St Joseph University.
- Member, Scientific Committee, Order of Nurses in Lebanon since 2015.
- President; Nurses' Chapter, Worldwide Alumni Association of the American University of Beirut.

Lina Younan

- Appointed by the Order of Nurses as a member of a task force for reviewing and updating the Nursing Practice Act.
- Appointed by the Order of Nurses as a member of a task force for developing the nursing code of ethics for Lebanon.
- Member Disciplinary Board, Order of Nurses in Lebanon,

Science Committee, Council on Cardiovascular Nursing and Allied Health of the European Society of Cardiology, member till September 2016

Lina Younan
Sigma Theta Tau International, Chi Iota Chapter, AUB, member

VI. LOOKING AHEAD

HSON plans to launch a number of new academic programs:

A collaborative PhD in Nursing Science proposal between Johns Hopkins University School of Nursing, University of Michigan SON and with FM and FHS at AUB has been approved and will be launched when approved by BOT and New York State Department of Education. The proposed PhD program is yet another first for Lebanon, and will add further capacity for HSON and the region by producing researchers needed to advance nursing science and improve health care.
A MSN/MBA dual degree program is being prepared in close collaboration with the Olayan School of Business. The graduates will bring a higher level of conceptual and practical expertise to the executive management of nursing and other services in healthcare organizations in Lebanon and the region.
New Academic Programs: HSON plans to expand on its current UG and GR academic programs and as such continues to contribute to the development of healthcare in Lebanon by preparing high quality graduates for which there is a strong demand in Schools/Colleges of Nursing, hospitals, and health services.

- At the UG level, the second degree program will need to be revisited to attract BA/BS graduates.
- The launching of a TS-BSN program to few eligible technical degree programs is being studied. TS graduates are in large numbers in Lebanon and HSON can target a select group who meet AUB admission requirements.
- At the GR level and in addition to the launching of the PhD program in Nursing Science, HSON will study the feasibility of launching new online/hybrid MSN tracks in areas such as Nursing Informatics, Nursing Research, Pediatric Nursing, and Nursing Education.

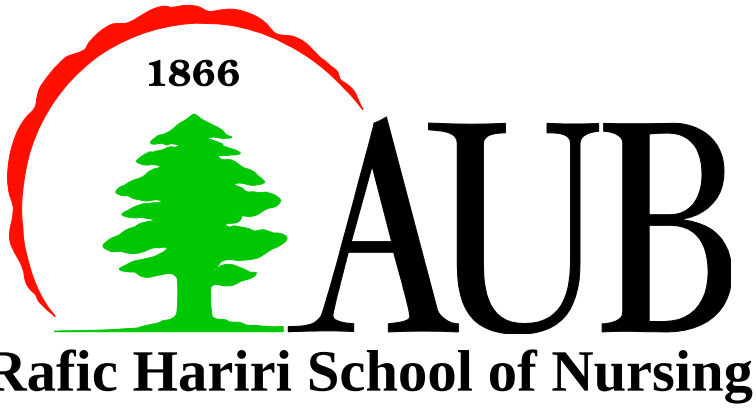
The availability of scholarships remains a major priority area for the success of the current and new programs. Endowment funds to that effect need to be established

- Postgraduate certificates in community nursing, critical care nursing, leadership and management, and nursing informatics will continue to be offered by REP.
- Summer Nursing Institutes: HSON will continue to collaborate with partners in the United States and with experts in the region and in Lebanon to offer high-quality courses on special topics. These courses are open to MSN and other AUB students and to participants from Lebanon and the region.
- Student recruitment will continue to be a priority. HSON will continue to award merit scholarships and is currently working with AUBMC to secure bursaries for BSN students.
- More emphasis will be placed on graduate recruitment at the national, regional, and international levels in close collaboration with AUB's Graduate Council.

- The recruitment of an endowed chair to direct HSON's Center for Nursing Research will continue to be a priority.
- Collaboration with AUBMC/Nursing Services continues to be an important priority for HSON.

AMERICAN UNIVERSITY OF BEIRUT

Annual Report
2015



Rafic Hariri School of Nursing

The baccalaureate and master's programs at the American University of Beirut Rafic Hariri School of Nursing are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.
The school is also a full member of the American Association of Colleges of Nursing.

PREFACE

In 2015, the Hariri School of Nursing (HSON) celebrated 110 years of excellence in nursing education, research, leadership, and service. The school recruited a record number of undergraduate students, approved major revisions to the graduate academic program, and submitted a PhD proposal for approval. In addition, the Chi Iota Chapter of Sigma Theta Tau International (STTI) Honor Society in Nursing was chartered and officially recognized at the STTI convention in Las Vegas in November 2015. The Chi Iota Chapter is the first in the region. In addition, HSON, the director, and a graduate student were rewarded by the Scientific Society of Arab Nursing Faculties for distinguished work in academia and research at an official meeting held at AUB in April 2015.

The HSON 110th anniversary was celebrated under the motto **'Expanding Boundaries and Enhancing Partnerships'.** In recognition of this important milestone a number of activities were planned. The first activity was a meeting on January 30th with directors of hospitals and nursing services in Lebanon. A panel of HSON MSN graduates gave moving presentations of how their education had allowed them to develop their specialized nursing roles in the country. The afternoon was capped with a public lecture by HSON alumna, Dr. Naeema AL-GASSEER, WHO representative for Sudan, who told her personal story of the deep and lasting effect AUB HSON and Lebanon had in shaping her thinking and in influencing her professional trajectory in nursing.

The second event took place on February 25, 2015. All deans and directors of schools of nursing in Lebanon were invited to a roundtable discussion on nursing research collaboration based on the WHO regional research priorities. During the 2 hour meeting, presentations were made by Dr. Huijer and all deans of SON in Lebanon. The third event took place on April 8, 2015 which was held in close collaboration with the Association of Arab Nursing Faculties (AANF). Deans of SON in the Middle East attended this meeting which aimed to explore possibilities for research collaboration at the regional level among research-active schools of nursing. Presentations were made by all attending deans and a summary of possible themes for research collaboration was presented. HSON will continue to coordinate this effort at the regional level.

To celebrate the 110th anniversary a 5' promotional film was produced along with a history booklet on AUB School of Nursing.

The school continues to be proud of its achievements, which are detailed in this annual report.

Huda Abu-Saad Huijer RN, PhD, FEANS, FAAN
Professor and Director,

I. ORGANIZATION OF THE SCHOOL OF NURSING

A. FACULTY

Director of the School of Nursing - 2003 to present
Huda Abu-Saad Huijer, RN, PhD, FEANS, FAAN, Professor

Faculty Members
Christine Abbyad, RN, PhD, Clinical Assistant Professor
Lina Abi Fakhr Kantar, RN, EdD, Assistant Professor
Marina Adra, RN, MS Physiology, PhD, Clinical Assistant Professor; BSN Coordinator
Nour Alayan, RN, MSN, Clinical Instructor, PhD Student on Leave of Absence
Mary Arevian, RN, MPH, Clinical Associate Professor
Tamar Avedissian, RN, MSN, Clinical Instructor
Michael Clinton, RN (CARNA), RGN RPN (AHPRA), PhD, MSc, BA (Hons.), Professor
Silva Dakessian RN, MPH, Clinical Instructor
Hala Darwish, RN, PhD, Assistant Professor
Nuhad Dumit, RN, MA, PhD, Assistant Professor, CE/Offshore Program Coordinator; Undergraduate Division Convener
Souha Fares, PhD, Assistant Professor
Laila Farhood, RN, PhD, CS, Professor and Clinical Associate, Psychiatry Department, Faculty of Medicine; Graduate Division Convener
Talin Gulgulian, RN, MSN, Clinical Instructor
Gladys Honein, RN, PhD, Assistant Professor effective September 1, 2015
May Khoury, RN, BSN, MSN, Clinical Assistant Professor
Dina Madi, RN, TD, MA Education, PhD, Clinical Assistant Professor; BA/BS-BSN Coordinator
Angela Massouh, RN, MSN, Clinical Instructor, PhD Student
Samar Noureddine, RN, PhD, FAHA, Professor; Assistant Director for Academic Affairs
Lina Younan, RN, MSN, DNP, Clinical Assistant Professor

Visiting Faculty
Ibrahim Fakih, RN, MPH, Nursing Informatics Specialist

Adjunct Faculty
Patricia Abbott, PhD, RN, FAAN, RN, PhD, Associate Professor, University of Michigan School of Nursing, USA
Patricia M. Davidson, Professor and Dean, Johns Hopkins University School of Nursing, USA
Martha Hill, PhD, RN, FAAN, Professor and Past Dean, Johns Hopkins University School of Nursing, USA
Shake Ketefian, EdD, RN, FAAN, Professor Emeritus, University of Michigan, USA
Judith Lambton, EdD, MSN, RN, Professor, University of San Francisco, California, USA
Elizabeth Tanner, Associate Professor, Johns Hopkins School of Nursing and Center on Aging and Health, USA
Phyllis Sharps, Professor, Associate Dean, Community and Global Programs Johns Hopkins School of Nursing, USA

Academic Associates
Rana Abdel Malak, RN, MPH, Nursing Director, Bellevue Medical Center
Mona Nasrallah, MD, Associate Professor, AUBMC
Wafa Maalouf, Nursing Director, St. George Hospital
Salah Zein El-Dine, MD, Assistant Professor, Director Pulmonary Physiology Laboratory, Director Graduate Medical Education, AUBMC

Joint Appointments:
Michael Clinton with FM Institutional Review Board (IRB) Office as Vice-Chair of the IRB office for the Social and Behavioral Sciences
Hala Darwish with FM/AUBMC as Managing Director of the Abu Haidar Neuroscience Institute
Hanadi Masalkhi with Nursing Services/AUBMC as Clinical Instructor at the Hariri School of Nursing
Angela Massouh with Nursing Services/AUBMC as Cardiology Clinical Nurse Specialist

Research Assistants
Julien Dirani, MA
Carmen Hamady, MA
Nadine Hamieh, MPH
Nora Kakati, MSN
Rachel Sabbagh, RN
Aida Zaaiter, RN

Clinical Preceptors
Dania Abed, RN
Tracy Aghdamelian, RN
Ghina Arab, RN, MSN
Lamia Eid, RN, MSN
Abdelwahab Firkh, RN, MSN
Nayef Haidar, RN, MSN
Youssef Hajj Ali, RN, MSN
Samer Halabi, RN, MS
Shadi Halabi, RN
Aya Hammoud, RN
Mohammad Issa, RN, MSN
Bashir Itani, RN, MSN
Doaa Kamal, RN
Ahmad Kaskas, RN
Laila Kazan, RN, MSN
Ali Krayani, RN
Nisreen Kumberji, RN, MSN
Murielle Madi, RN
Hanadi Massalkhi, RN, MSN
Reine Nicodeme, RN
Myrna Saadeh, RN, MSN

Diana Wehbe, RN, MSN
Rafica Zaatari, RN, MSN

Graduate Assistants
Hana'a Abdul Salam
Aya El Khatib
Mohammad Hussein Haidar
Miray Harake
Nour Jabbour
Nora Kakati
Carole Maamari
Dina Mouzayen
Hanadi Saad
Rachelle Sabbagh
Hana Sahyoun
Reem Salem
Rola Shehadeh

B. STAFF

Ghassan Afram, BSN, TD, MPH, Executive Officer
Mira Abdallah, BS, Administrative Assistant effective August 18, 2015
Shereen Berjawi, BS, Administrative Assistant until May 6, 2015
Lynn Berbary Najem, BBA, MBA, Student Services and Recruitment Officer
Rabih Daher, Junior Clerk
Alaa Fawzi Dika, BS, IT Field Support Technician
Randa Farha, BSN, MSN, MPH, Simulation and Clinical Competency Center Coordinator
Nisrine Ghalayini, BA, Graduate Division Administrative Assistant effective November 15, 2015
Ilham Rustom, Secretary until October 30, 2015
Marwa Soubra, BS, MBA, IT Manager, Faculty of Medicine and Hariri School of Nursing
Jeanette Zeinati, Secretary

II. FACULTY ACTIVITIES

A. TEACHING ASSIGNMENTS 2014-15

Christine Abbyad

Spring NURS 306A - Nursing Care of Children, Theory, 2cr., Coordinator
NURS 306B - Nursing Care of Children, Practicum, 3 cr., 1.5cr., Clinical Coordinator
NURS 306B - Nursing Care of Children, Simulation, 1 cr.

Fall NURS 304A - Nursing Care of the Expectant Family, Theory, 1.cr., Co-coordinator
NURS 304B - Nursing Care of the Expectant Family, Practicum 1.5cr., Clinical Coordinator
NURS 304B - Nursing Care of the Expectant Family, Simulation, 1 cr.

Huda Abu-Saad Huijer

Spring NURS 508 - Advanced Practice in Nursing Administration, Practicum, 2 cr., Coordinator
NURS 598 - Project
NURS 599 – Thesis

Summer NURS 508 - Advanced Practice in Nursing Administration, Practicum, 2 cr., Coordinator
NURS 598 – Project

Fall NURS 508 - Advanced Practice in Nursing Administration, Practicum, 2 cr., Coordinator
NURS 598 - Project

Marina Adra

Spring NURS 302A - Nursing Care of Adults II, Theory, 1 cr., Coordinator
NURS 302B - Nursing Care of Adults II, 1.5 cr., Clinical Coordinator
NURS 302B - Nursing Care of Adults II, Practicum, 2 cr.
NURS 302B - Nursing Care of Adults II, Simulation, 1 cr.

Summer NURS 210 - Pathophysiology, Theory, 1 cr., Coordinator

Fall NURS 300A - Nursing Care of Adults I, Theory, 1 cr., Coordinator
NURS 300B - Nursing Care of Adults I, Practicum, 2 cr.
NURS 300B - Nursing Care of Adults I, 1.5 cr., Clinical Coordinator
NURS 300B - Nursing Care of Adults I, Simulation, 1 cr.

Mary Arevian

Spring NURS 408A - Community Health Nursing, Theory, 2 cr., Coordinator
NURS 408B - Community Health Nursing, Practicum, 3 cr.

Summer NURS 524- Clinical Residency in Community/Public Health Nursing, 2 cr.

Fall NURS 408A - Community Health Nursing, Theory, 2 cr., Coordinator
NURS 408B - Community Health Nursing, Practicum, 3 cr.
NURS 528 - Advanced Practice in Community/Public Health Nursing, 1cr.

Tamar Avedissian

Spring NURS 408B - Community Health Nursing, Practicum, 3 cr.
NURS 306B - Nursing Care of Children, Practicum, 2cr.
NURS 306B - Nursing Care of Children, Simulation, 1cr.
NURS 410 - Leadership and Management in Nursing, Practicum, 3cr.

Summer NURS 307 – Practicum 1

Fall NURS 408B - Community Health Nursing, Practicum, 3 cr.
NURS 304B - Nursing Care of the Expectant Family, Practicum, 2 cr.
NURS 304B - Nursing Care of the Expectant Family, Simulation, 1 cr.

Michael Clinton

Spring NURS 507 - Role Development in Nursing Administration, Theory, 3 cr., Coordinator
NURS 598 – Project

Summer NURS 508 - Advanced Practice in Nursing Administration, 2 cr.
NURS 598 – Project

Fall NURS 500 - Nursing Theory, 2 cr., Coordinator
NURS 598 - Project

Hala Darwish

Spring NURS 502 - Advanced Nursing Research, Theory, 2 cr., Coordinator
NURS 598 - Project
NURS 599 - Thesis
NURS 505 - Advanced Practice in Adult Care I, 1 cr. Co-coordinator

Fall NURS 406 - Nursing Research, Theory, 1.5 cr., Coordinator
NURS 504 - Advanced Pathophysiology, Theory, 1 cr., Co-coordinator

Nuhad Dumit

Spring NURS 520 - Managing Quality with Teams, 3 cr**.**
NURS 599 - Thesis
NURS 598 – Project

Summer NURS 508 - Advanced Practice in Nursing Administration, 2 cr.
NURS 598 – Project

Fall NURS 527 - Developing Health Services Programs, Theory, 3 cr., Coordinator

NURS 598 – Project

Souha Fares

Spring NURS 502 - Advanced Nursing Research, Theory, 2 cr., Co-coordinator
NURS 598 – Project

Summer NURS 203 - Biostatistics for Nurses, 3 cr.

Fall NURS 406 - Nursing Research, Theory, 1.5 cr., Co-coordinator
NURS 502 - Advanced Nursing Research, Theory, 4 cr., Coordinator
NURS 598 – Project

Laila F. Farhood

Spring NURS 402A - Mental Health and Psychiatric Nursing, Theory, 1 cr., Coordinator
NURS 518A - Group and Family Psychotherapy, Theory, 1 cr., Coordinator
NURS 518B - Group and Family Psychotherapy, Practicum, 2 cr., Coordinator
NURS 598 - Project

Fall NURS 402A - Mental Health and Psychiatric Nursing, Theory, 1 cr., Coordinator
NURS 501 - Foundations of Advanced Nursing Practice, Theory, 3 cr., Coordinator
NURS 519 - Clinical Residency in Acute Psychiatric Care, 2 cr., Coordinator
NURS 598 - Project

Taline Gulgulian

Spring NURS 202- Health Assessment, Practicum, 2cr.
NURS 306 – Nursing Care of the Children, Theory (1 section), 3cr.
NURS 306 – Nursing Care of the Children, Practicum (2 sections), 2cr.

Summer NURS 307- Practicum (2 sections)

Fall NURS 200 - Introduction to Nursing, (2 sections), 2cr.
NURS 304B - Nursing Care of the Expectant Family, Practicum, (2 sections), 4 cr.
NURS 304B - Nursing Care of the Expectant Family, Simulation, (2 sections), 2 cr.

Gladys Honein

Fall NURS 408A - Community Health Nursing, Theory, 1 cr.
NURS 408B - Community Health Nursing, Practicum, 3 cr.

Lina Kantar

Spring NURS 201A - Introduction to Nursing Practice, Theory, 1 cr., Coordinator
NURS 201B - Introduction to Nursing Practice, Practicum, 1 cr.
NURS 201B - Introduction to Nursing Practice, 1.5 cr., Clinical Coordinator
NURS 509 - Role Development in Nursing Education, Theory, 3cr., Coordinator

Fall NURS 300A - Nursing Care of Adults I, Theory, 2 cr., Coordinator
NURS 300B - Nursing Care of Adults I, Simulation, 1 cr.
NURS 300B - Nursing Care of Adults I, Practicum1, 2 cr.
NURS 300B - Nursing Care of Adults I, 1 cr., Clinical Coordinator

May Khoury

Spring NURS 306A - Nursing Care of Children, Theory, 1 cr., Coordinator
NURS 306B - Nursing Care of Children, Practicum, 3 cr.
NURS 306B - Nursing Care of Children, 1.5 cr., Clinical Coordinator
NURS 306B - Nursing Care of Children, Simulation, 1 cr.

Summer NURS 307 - Practicum I, (2 sections), 1 cr. Coordinator
NURS 308V - Maternal and Child Nursing Theory and Practicum 0.5 cr. Coordinator

Fall NURS 304B - Nursing Care of the Expectant Family, Simulation, 1 cr.
NURS 304B - Nursing Care of the Expectant Family, Practicum (2 sections), 6 cr.

Dina Madi

Spring NURS 202A - Health Assessment Course, Theory, 1 cr., Coordinator
NURS 202B - Health Assessment Course, 1.5 cr., Clinical Coordinator
NURS 306B - Nursing Care of Children, Practicum, 3 cr.

Fall NURS 304A - Nursing Care of the Expectant Family, Theory, 1 cr., Coordinator
NURS 304B - Nursing Care of the Expectant Family, Practicum, 4 cr. (2 sections), Clinical Coordinator
NURS 304B - Nursing Care of the Expectant Family, Simulation, 1 cr.

Hanadi Masalkhi

Spring NURS 402 Mental Health and Psychiatric Nursing, Theory, 1 cr., co-coordinator
NURS 403B-Mental Health and Psychiatric Nursing, Clinical, 3 cr.
Clinical Preceptor of NURS 201 Course-Introduction to Nursing Practice, 1 cr.

Summer NURS 307 Course-Practicum I

Fall NURS 402 Mental Health and Psychiatric Nursing, Theory, 1 cr., co-coordinator
NURS 403B - Mental Health and Psychiatric Nursing, Clinical, 3 cr.

Angela Massouh

Spring NURS 410A - Leadership and Management, Theory, 1 cr., Coordinator
NURS 410B - Leadership and Management, Practicum, 3 cr.
NURS 410B - Leadership and Management, 1.5 cr., Clinical Coordinator
NURS 411 - Leadership and Management, Practicum, 3 cr.

Summer NURS 210 - Pathophysiology, Theory, 1 cr., Co-coordinator

Fall NURS 400A - Critical Care Nursing, Theory, 2 cr., Coordinator
NURS 400B - Critical Care Nursing, Practicum, 3 cr.
NURS 400B - Critical Care Nursing, 1.5 cr., Clinical Coordinator

Samar Noureddine

Spring NURS 505A - Advanced Practice in Adult Care I, Theory, 2 cr., Coordinator
NURS 505B - Advanced Practice in Adult Care I, Clinical, 1 cr., Coordinator
NURS 598 – Project

Summer NURS 506 - Advanced Practice in Adult Care II, Practicum, 2 Cr., Coordinator
NURS 528 - Certification Practicum, 1 cr., Coordinator
NURS 598 – Project

Fall NURS 503A - Advanced Health Assessment, Theory, 2 cr., Coordinator
NURS 503B - Advanced Health Assessment, Practicum, 1 cr. Coordinator
NURS 504 - Advanced Pathophysiology, Theory, 2 cr., Coordinator
NURS 505 - Advanced Practice in Adult Care II, Theory, 2 cr., Coordinator
NURS 528 - Certification Practicum, 1 cr., Coordinator
NURS 598 – Project

Silva Salian

Spring NURS 302B - Nursing Care of Adults II, Practicum, (2 sections), 4 cr.
NURS 302B - Nursing Care of Adults II, Theory, 1 cr.

Summer NURS 302B - Nursing Care of Adults II, Theory, Tutoring 1cr.

Fall NURS 300B - Nursing Care of Adults I, Practicum, 3cr.
NURS 400B - Critical Care Nursing, Theory, 1 cr.
NURS 400B - Critical Care Nursing, Practicum, 2 cr.

Lina Younan

Spring NURS 200 - Introduction to Nursing, Theory, 2 cr., Coordinator
NURS 410 - Leadership and Management, Theory, 5 cr., Coordinator
NURS 411 - Leadership and Management, Practicum, 0 cr., Coordinator
NURS 598 – Project

Summer NURS 508 - Advanced Practice in Nursing Administration, Practicum, 2 cr.,
NURS 598 – Project

Fall NURS 200 - Introduction to Nursing, Theory, (2 sections), 4 cr., Coordinator
NURS 507 – Essentials of Nursing Administration & Management, Theory, 2cr., Coordinator
NURS 598 – Project

B. Winter NURSING INSTITUTE

Course Coordinator: Dr. Souha Fares

Course number and title: N530 Statistical Reasoning and Application in Nursing Research

Course Description: This class introduces students to the basic concepts and applications of statistics for Nursing research and how to carry these applications using SPSS. The emphasis is on interpretation and application rather than theoretical details. The course employs a variety of activities including lectures, computer lab sessions and critical appraisal of biostatistics in the health care literature. Topics include types of data, data management, descriptive statistics, and inferential statistics with a main focus on t-tests, ANOVA, chi-squared tests, Fisher's exact test and the assumptions underlying those tests. The primary objective of the course is to provide students with the skills necessary to understand basic statistical analyses and carry out those analyses using SPSS. The course does not require memorization of lengthy statistical formulae.

C. FACULTY RECRUITMENT/APPOINTMENTS

Recruitment:

HSON advertised for regular faculty positions and for the Hariri Endowed Chair in Research at the American Academy of Nursing (AAN) in the *Chronicle of Higher Education*, at Sigma Theta Tau Nursing International (STTI), at the American Association of Colleges of Nursing (AACN), Minority Nurse, and at the Royal College of Nursing (RCN). Recruitment information was also mailed to leading schools of nursing, professional organizations, and to mailing lists in the United States and Europe.

Appointments:

- Gladys Honein, RN, PhD, Assistant Professor effective September 1, 2015

III. EDUCATIONAL ACTIVITIES

A. EDUCATIONAL PROGRAMS

BSN:

- Course descriptions, credit hours, and learning objectives did not change over the year as student evaluations were positive. However, because of the large class size, all BSN III courses were divided into two sections in the spring semester.
- NURS 304 (Nursing Care of the Expectant Family, Theory and Practicum). One section was team taught using a lecture format and modified team-based learning. Simulation activities used a combination of skill improvement and practice through scenarios.
- NURS 306 Nursing Care of Children (Theory and Practicum) was taught using audio enhanced PowerPoints for a team based learning approach.

MSN:

- A total of 60 students were enrolled October 2015 in the MSN program.
- Four tracks continue to be offered: Adult Care, Nursing Administration, Psychiatry and Mental Health Nursing, and Community Health Nursing.

- In light of the new essentials of Graduate Education by the Commission on Collegiate Nursing Education and the Advanced Practice Registered Nursing Model developed by the American Association of Colleges of Nursing, the Graduate Studies Committee revised its MSN program to be launched academic year 2015-2016.
- A number of students continue to do residencies abroad, namely at Johns Hopkins University and the University of Maryland.
- 23 students were inducted in the HSON Honor Society spring 2015.
- Town meetings were held to discuss student concerns, residencies, projects, and comprehensive exams. Information on the specific tracks is shown below.

Adult Care track:
A total of 4 students graduated in 2015.
A total of 17 students were enrolled October 2015.
Two adult care students did their residencies at the University of Maryland, and 4 at AUBMC.
One MSN student in the adult care track completed successfully the Scholars in Health Research Program (SHARP) summer 2015.

Administration track:
A total of 6 students graduated in 2015.
A total of 32 students were enrolled October 2015.
Students in the administration track have done residencies at Johns Hopkins University (1), AUBMC (1), Bikhazi Medical Center/ Medical Group (2), and Bellevue Medical Center (1).
One MSN student successfully completed the SHARP program summer 2015.

Psychiatry and Mental Health Nursing track:
1 student graduated in 2015
4 students are enrolled as of October 2015

Community and Public Health Nursing track:
A total of 7 students were enrolled October 2015.
One student is doing a double major: MSN Community and Public Health Nursing and Psychiatry and Mental Health Nursing
Two students are doing double major community and public health nursing, and adult care nursing.

PhD Program:
HSON prepared & submitted a PhD proposal in close collaboration with the Faculties of Health Sciences and Medicine and with international partners, namely, Johns Hopkins University School of Nursing and the University Of Michigan School Of Nursing. The doctoral program aims to provide rigorous training for research careers in nursing and the health care arena. It will provide students with the opportunity to develop their capacity for scholarly and independent work, critical analytical thinking, and the ability to communicate knowledge and ideas and to translate research findings into healthcare practice.

SIMULATION TECHNOLOGY at HSON:

Summary of Activities:

From January 1 until December 31, 2015, the HSON Simulation and Clinical Competency Center (SCCC) supported 336 activities or simulation training experiences and 7,519 participants including HSON and Non-HSON users. HSON users are AUB nursing students enrolled in undergraduate or graduate nursing programs. Non-HSON users are students or professionals from the AUB community or from outside.

The SCCC has witnessed a 31.5 percent increase in the number of educational activities in the Fall 2015-2016 compared to Spring 2014-2015 (figure 1). An educational activity denotes the use of the lab regardless of the objectives or content of the learning/teaching encounter. Educational activities include a range from training sessions on basic skills to high fidelity simulation activities.

Similarly, the SCCC has witnessed a 24 percent increase in the number of participants in the Fall 2015-2016 compared to Spring 2014-2015 (figure 2). A participant is a person using the lab whether student, resident, nurse, or employee from the AUB/AUBMC community or outside.

HSON ranked the second among the number of participants in the lab during 2015 (figure 4).

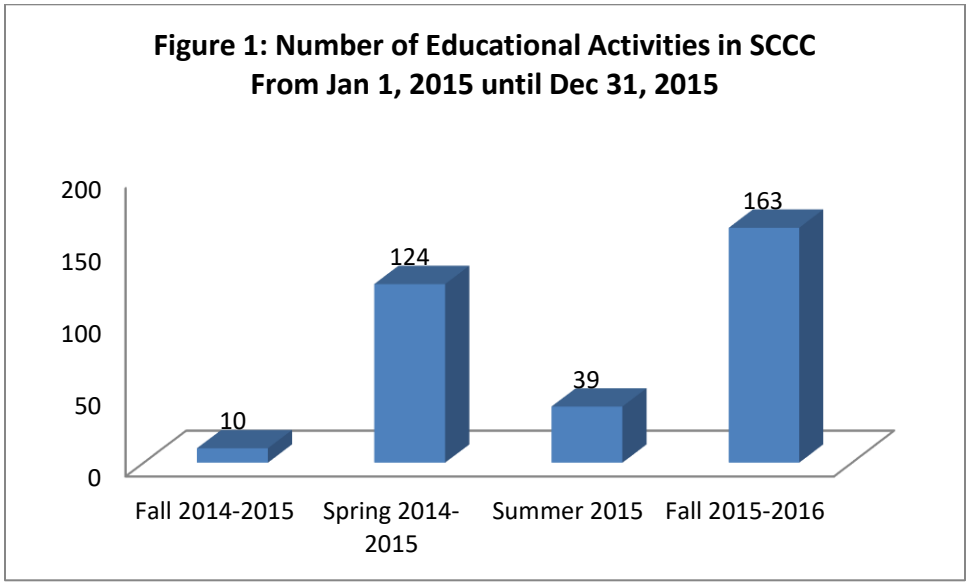

Figure 2: Number of Participants in SCCC From Jan 1, 2015 until Dec 31, 2015

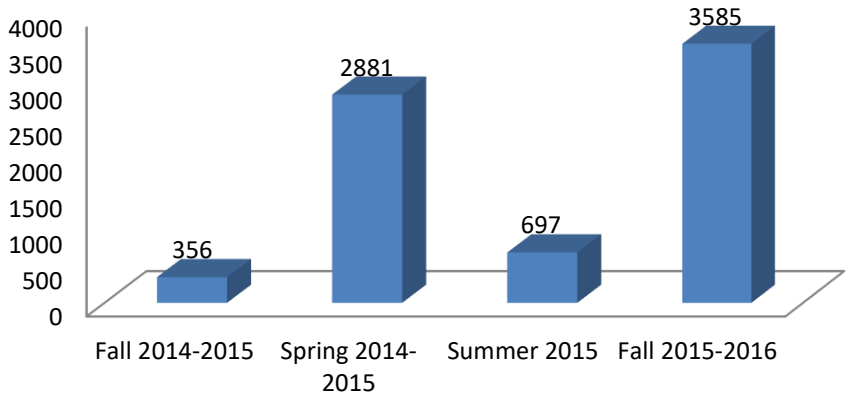

Figure 3: Number of Activities by Department From Jan 1, 2015 until Dec 31, 2015

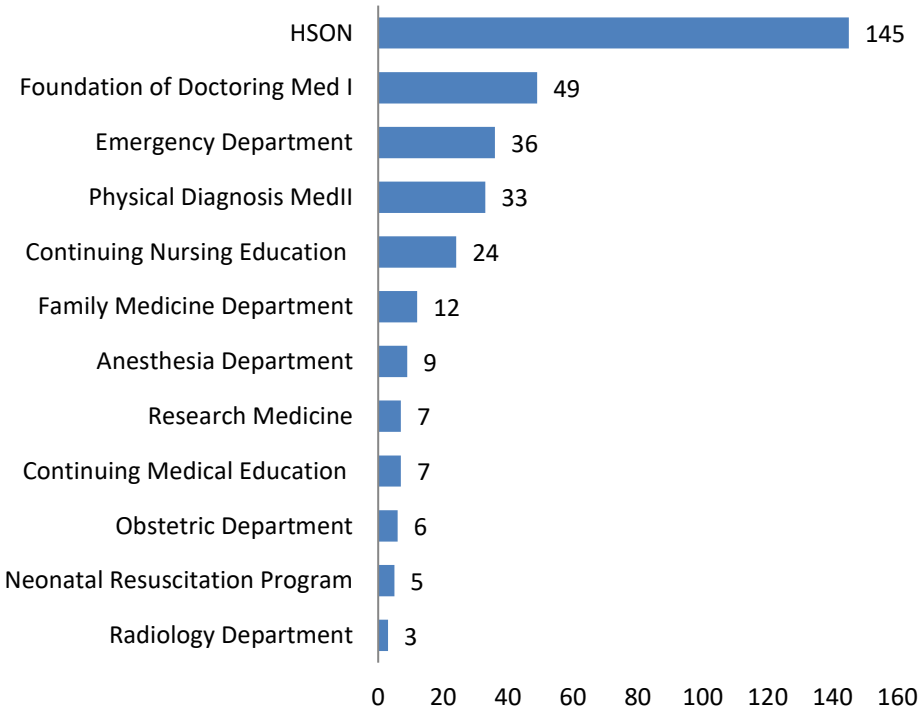

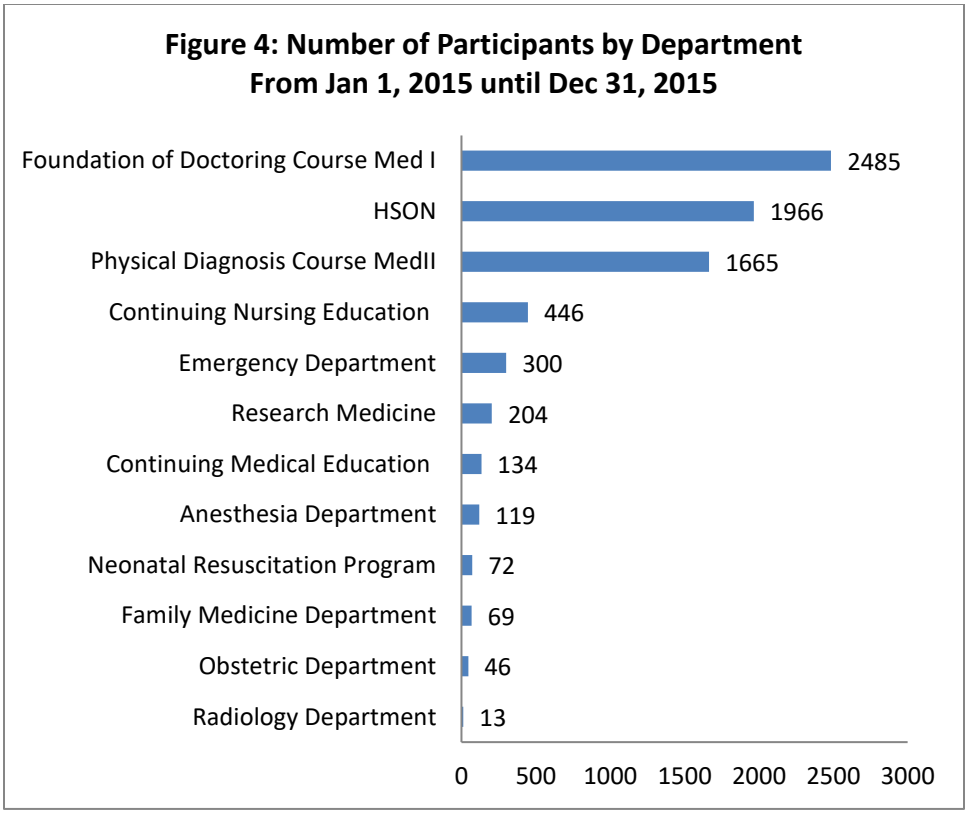

B. STUDENT ENROLLMENT/SCHOLARSHIPS

- The total number of applicants to the BSN program for 2015-16 was 341; the total number of accepted students was 186 and the total number who confirmed their enrollment is 55. This includes 2 early admissions, 5 transfers from outside AUB, 3 sponsored by USAID fund, and 1 working for a second degree.

- The total number of applicants to the MSN program for 2015-16 was 31; the total number of accepted students was 28 and the total number who confirmed their enrollment is 12.

- A total of **49** interviews were conducted with new BSN students, **41** were recommended for scholarships, and **23** enrolled. This scholarship is still attracting students who select nursing as their 3rd, 4th and 5th major choice in their application.

- The table below shows the student enrollment for the last five years:

Student Enrollment	BSN					MSN				
	2011-12	2012-13	2013-14	2014-15	2015-16	2011-12	2012-13	2013-14	2014-15	2015-16
Applied	232	287	285	349	341	46	40	38	47	31
Acceptance	146	151	141	179	186	40	38	33	42	28

C. STUDENT RECRUITMENT AND MARKETING STRATEGY

Student recruitment and marketing of the BSN and MSN programs remain a priority at HSON. The marketing strategy for student recruitment in 2015 included various activities:

- **Graduate Open House:** HSON participated in the Graduate Open House organized by the Graduate Council on February 4, 2015 to promote graduate programs. Similar to previous years, few applicants interested in the MSN program attended the open house.

- **AUB Annual School Fair**: HSON participated in the AUB Annual School Fair for undergraduate programs in April 2015.

- **AUBMC Open House:** On the 14th of May, HSON participated in the AUBMC open house to recruit nurses from all over Lebanon. SSO had a booth for the MSN program and Dr. Samar Noureddine presented the MSN program requirements.

- **Orientation for Palestinian students funded by the Unite Lebanon Youth Project (ULYP).** Upon the request of Mrs. Melek EL Nimer, Lynn Berbary and Tamar Avedissian gave presentations in August 2015 on the HSON nursing programs to potential candidates applying for ULYP funding.

- **Orientation for new nurses at AUBMC:** During the orientation for new nurses at AUBMC, Dr. Noureddine presented the MSN program requirements. This presentation became part of the orientation program organized by the CPDC.

- **School visits:** The HSON team visited eleven schools to recruit students. School counselors were contacted and a poster was sent to all schools inviting high school students to visit HSON simulation lab.

- **High School student's visits to HSON:** Interested students from St Joseph de L'apparition School and from Lycee Abdel Kader visited the school of Nursing. They visited the simulation lab, and Ms. Randa Farha presented a short scenario on the sim man. In addition, SSO provided information on the BSN program and FA/scholarships available.

D. STUDENT PROJECTS, THESES, RESIDENCIES, and ACTIVITIES

MSN STUDENT PROJECTS AND THESES

Name	Track	Project/ Thesis	Project/Thesis Title	Project/Thesis Committee	Defense Date
Belal Al Rajoub	Adult Care Nursing	Project	The Prognostic Value of New Left Bundle Branch Block In Patients with Acute Myocardial Infraction: A systematic Review and Meta-Analysis	Dr. S. Noureddine Dr. E. Akl	16-Jan-15
Samar Al Chami	Adult Care Nursing	Project	Optimizing the Management of Patients Admitted with Acute Heart Failure	Dr. S. Noureddine Dr. H. Huijer	4-Feb-15
Salma Lameh	Nursing Administration	Project	Introducing a New Role in Nursing Administration at AUBMC: The Active Bed Manager	Dr. M. Clinton Dr. L. Younan	04-Feb-15
Sukaina Hijazie	Nursing Administration	Project	A Proposal to Restructure 6 North Pediatric Unit to Improve Bed Management	Dr. L. Younan Dr. M. Clinton	27-Apr-15
Bassam Itani	Nursing Administration	Project	The Feasibility of Implementing the Chronic Care Model in the Management of Diabetes at a Public Health Center in Lebanon	Dr. L. Younan Dr. H. Huijer	27-Apr-15
Zeinab Alfar	Adult Care	Project	Health Education Program for prevention of Coronary Artery Disease in Primary Health Care centers in Saudi Arabia.	Dr. S. Noureddine Mrs. M. Arevian	28-Apr-15

STUDENT ACTIVITIES

Nursing students were involved in different community projects and activities in their Community Course during the 2014-15 academic year:

- **New Student Orientation:** Some undergraduate and graduate students provided testimonials and success stories on the nursing profession during the orientation of newly enrolled students.

- **Student recruitment:** Some BSN students were involved in school visits with the student services officer. These students contacted the school they graduated from and went there to promote the AUB HSON nursing programs.

- **School Fair:** Students from the BSN and MSN programs participated in the AUB school fair that was open to all students from different high schools. HSON had a stand at the Olayan School of Business to inform visitors about the BSN program at AUB

- **Short film on the Hariri School of Nursing:** The Hariri school of Nursing produced a 5' film about the nursing programs at AUB. Some undergraduate and graduate students provided their testimonials and success stories about HSON which will be used for recruitment purposes.

- **Movie night:** Nursing students organized a movie night on April 24, 2015. The movie was "**Fast & Furious 7".** Refreshments were served during the movie

- **Graduation Gala Dinner:** Students, faculty, and staff celebrated the graduation of students at the end of May 2015 at Le Maillon restaurant. The Gala Dinner was animated by the nursing students, who shared their experience with the faculty and staff.

- **Simulation Lab Open House:** On Friday June 12, 2015, faculty, students and professionals participated in an open house organized by the Skills and Simulation Lab Coordinator Ms. Randa Farha, to celebrate the state-of-the-art simulation facility at the Hariri School of Nursing (HSON). HSON faculty and students led scenarios focused on key educational aspects of simulation as practiced at HSON.

- **NSS elections were held in October 2015**: The new cabinet consisted of the following:
  President: Ziad Karameh
  VP: Mohammed Taha
  Treasurer: Fatima Al – Dirani
  Secretary: Alison Haidar
  Class Representative (Junior): Mirna Hussein
  Class representative (Senior): Lara Kabalan
  Class representative (Graduate): Joelle Massouh

- Bake Sale in November 2015: Following the elections of the new NSS cabinet, NSS members organized a bake sale to raise money for the Allaeidine Droubi fund, victim of the November bombing. Students baked and wrapped cakes, biscuits, cookies and brownies to sell. They set a booth on campus, where they shared the cause with students, staff and the AUB community. The money raised through the bake sale and donations was donated to the family of the victim.

- Christmas events during the month of December 2015: Nursing students gathered in the lobby to set the HSON Christmas tree. With some crafting skills, they made their own ornaments from tongue depressors and syringes. They set two beautiful trees that brought a Christmas spirit to the lobby.

- Donation in December 2015: During the month of Christmas, the NSS collected money to give to a needy family. The chosen family consists of a woman with 4 children, a husband with cancer, and a mother-in-law who lives with them and undergoes hemodialysis. The family is in financial need which prompted NSS to collect donations to support them.

IV. ACCREDITATION AND STRATEGIC PLANNING

A. CCNE ACCREDITATION

- The BSN and MSN programs continue to be accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation) in the USA.
- The MSN program was revised based on the Masters Essentials and approved by the Board of Graduate Studies at AUB. The revised MSN program was submitted to CCNE and Department of Education in New York State for approval.
- HSON continues to be a regular member of the American Association of Colleges of Nursing.

B. STRATEGIC PLANNING; GOALS AND OBJECTIVES

The HSON strategic plan was recently revisited and consultations were held with HSON administrative and advisory committees for possible updates. The goals, objectives and strategic initiatives as well as key implementation steps were presented to the AUB administration at a retreat held on October 2-4, 2015. The HSON revised strategic plan and implementation steps are listed below.

Goal 1: To achieve status of free standing faculty
Objective 1.1: Increase the number of PhD prepared and research active faculty
Objective 1.2: Increase BSN and MSN student enrollment

Goal 2: To position HSON as the leading center for nursing education, research, & service in Lebanon and the region
Objective 2.1: Foster excellence in research
Objective 2.2: Foster excellence in teaching
Objective 2.3: Foster excellence in practice
Objective 2.4: Foster excellence in community service

Goal 3: To cultivate professional values of excellence, respect, tolerance, and Integrity

Goal 4: To achieve planned growth in high quality students and PhD prepared faculty
Objective 4.1: Publicize HSON Achievements
Objective 4.2: Recruit diversified high quality students
Objective 4.3: Recruit PhD prepared faculty

Goal 5: To maintain accreditation status

Goal 6: To continue fostering faculty and staff development
Objective 6.1: Foster faculty development
Objective 6.2: Foster staff development

Goal 7: To achieve Fiscal Balance
Objective 7.1: Increase BSN and MSN student enrollment
Objective 7.2: Increase HSON revenues

Strategic Initiatives

Goal 1: To achieve status of free standing faculty

Objective 1.1: Increase the number of PhD prepared and research active faculty

Initiatives:

HSON11 01: Intensify recruitment of PhD prepared and research active faculty
HSON11 02: Appoint endowed chair for research
HSON11 03: Provide support for faculty development at PhD level
HSON11 04: Increase extramural funding for research

Objective 1.2: Increase BSN and MSN student enrollment

Initiatives:

HSON11 05: Intensify student recruitment strategies in Lebanon and internationally
HSON11 06: Reactivate the MSN/MBA program with OSB.
HSON11 07: Launch PhD program in collaboration with FM, FHS, & US university partners
HSON11 08: Launch BA/BS-BSN second degree program
HSON11 09: Develop interdisciplinary IPE courses in collaboration with FM and FHS.

Goal 2: To position HSON as a regional leader in nursing education, research, & service

Objective 2.1: Foster excellence in research

Initiatives:

HSON11 01: Intensify recruitment of PhD prepared and research active faculty
HSON11 10: Create opportunities to engage students in research
HSON11 11: Allocate protected time for research
HSON11 07: Launch PhD program in collaboration with FM, FHS, and US partners
HSON11 12: Launch a Centre of Excellence in Nursing Research
HSON11 13: Coordinate regional research initiatives through launching a WHO Collaborating Center for nursing research
HSON11 14: Establish a network of Arab nurse researchers to promote research through the Association of Arab Nursing Faculties and Schools of Nursing in Lebanon

Objective 2.2: Foster excellence in teaching

Initiatives:

HSON11 15: Apply innovative, state of the art evidence-based teaching methodologies

Objective 2.3: Foster excellence in practice

Initiatives:

HSON11 16: Establish partnerships with AUBMC and other clinical facilities
HSON11 17: Continue engaging graduate students and faculty in evidence-based practice projects

Objective 2.4: Foster excellence in community service

Initiatives:

HSON11 18: Increase Interdisciplinary research with community organizations
HSON11 19: Continue providing service to the community at the national and regional levels.

Goal 3: To cultivate professional values of excellence, respect, tolerance, and Integrity

Initiatives:

HSON11 20: Conduct concept mapping of professional and ethical content of the curriculum

HSON11 21: Organize regular workshops on ethics for all Levels of students.

Goal 4: To achieve planned growth in high quality students and PhD prepared faculty

Objective 4.1: Publicize HSON Achievements

Initiatives:

HSON11 22: Appoint a marketing consultant

Objective 4.2: Recruit diversified high quality students

Initiatives:

HSON11 05: Intensify student recruitment strategies in Lebanon and internationally

HSON11 23: Partner with mastersstudies.com to promote graduate student recruitment

HSON11 24: Continue to recruit international students through the American Association of Colleges of Nursing (AACN) Centralized Application System (CAS)

Objective 4.3: Recruit PhD prepared faculty

Initiatives:

HSON11 01: Intensify recruitment of PhD prepared and research active faculty

Goal 5: To maintain accreditation status

Initiatives:

HSON11 25: Continue quality improvement activities aligned with accreditation requirements

Goal 6: To continue fostering faculty and staff development

Objective 6.1: Foster faculty development

Initiatives:

HSON11 03: Provide support for faculty development at PhD level

HSON11 26: Support faculty exchange with partner universities.

Objective 6.2: Foster staff development

Initiatives:

HSON11 27: Continue to encourage staff to utilize AUB educational support programs

HSON11 28: Establish career ladder for staff

Goal 7: To achieve Fiscal Balance

Objective 7.1: Increase BSN and MSN student enrollment

Initiatives:

HSON11 05: Intensify student recruitment strategies in Lebanon & internationally

HSON11 29: Increase endowment funds for scholarships

Objective 7.2: Increase HSON revenues

Initiatives:

HSON11 30: Launch new degree programs

HSON11 31: Offer post basic certificates

HSON11 32: Continue to offer Summer Nursing Institute, workshops, courses, & consultancies.

Key Implementation Steps

1. **Increase PhD holder & Research-Active faculty**
   - Recruit and appoint 2 new faculty annually. **Target of 2015-2016 achieved.** Currently HSON has 20 full time and 35 part-time.
   - Recruit & appoint endowed chair for Nursing Research. **Recruitment is ongoing**
   - Provide financial support to junior faculty to pursue their PhDs. **Four completed their PhDs and one is expected to finish in 2016.** Continue to support 2 junior faculty to improve capacity building.

2. **Increase student enrollment**
   - Increase student enrollment. **Target of 165 UG students achieved;** new target of 200 conditional availability of bursaries & scholarships.
   - Appoint a full time marketing and student recruitment officer to assist SSO in national, regional, and international student recruitment.
   - Reinstate AUBMC bursaries and increase endowment for merit scholarships.
   - Launch UG second degree programs**; BA/BS-BSN degree launched this year.**

3. **Position HSON as a regional leader in nursing education, research, & service**
   - Launch new (interdisciplinary) Masters & PhD programs**. PhD proposal submitted for approvals.**
   - Launch a Centre for Nursing Research**;** to be eventually designated as a WHO Collaborating Center.
   - HSON to coordinate regional initiatives for research collaboration.
   - Apply innovative state of the art curricular offerings using hybrid and distance learning to increase student enrollment. Install videoconferencing and state of the art facilities.
   - Provide certificate and continuing nursing education programs nationally and regionally through REP**. Four certificates are offered and a good number will be offered in the region this year.**
   - Increase academic space currently dedicated to the School of Nursing in the HSON building. Currently 40% of the space is occupied by AUBMC. In order to achieve the above activities short term, HSON will need to use the full space in the building.

V. RESEARCH AND SCHOLARLY ACTIVITIES

A. CURRENT HSON FACULTY RESEARCH

Principal Investigator: Chris Abbyad
Pregnant Women's Knowledge about Smoking, Breastfeeding, and Breast Cancer
The aim of the study was to determine pregnant women's knowledge about breastfeeding as a protection against breast cancer and about smoking as a risk factor for breast cancer.

Status: Data collection and analysis completed. Podium and poster presentations given. Manuscript is being prepared for publication.

Principal Investigator: Chris Abbyad
The prevalence and risk factors for maternal postpartum depression at AUBMC.
The aim of the study is to ascertain prevalence and risk factors for postpartum women who have delivered at AUBMC.
Status: Data collection.

Principle Investigator: Huda Abu-Saad Huijer
Palliative Care in Older Adults in Lebanon
The purpose of this study is to evaluate the quality of palliative care (PC), the quality of life (QoL), symptom management, and functional ability among hospitalized older adults in need of palliative care in Lebanon.
The study will follow the observational survey design. Data is being collected from three hospitals: AUBMC, St. George, and AinWezein. Face to face interviews are carried out using the Quality of Palliative Care Questionnaire-Adult (QPCQ-A) assembled using several instruments measuring quality of life, symptom prevalence and management, quality of care, and functional ability.
Co-Investigators: **Marina Adra, Hala Darwish, Souha Fares**, Hussam Ghusn, Ramzi Hajjar, George Karam, **Samar Noureddine**
Funding: CNRS
Status: Ongoing

Principle Investigator: Huda Abu-Saad Huijer
Chronic Pain: The Development and Psychometric Validation of an Arabic-Language Version of the Pain Catastrophizing Scale (PCS-A)
Chronic pain is believed to be a disease on its own and has been increasing in prevalence. While reporting or anticipating pain, patients experience a negative "mental set" of catastrophizing that has been described as an exaggerated cognitive-affective response to actual or anticipated pain. The 13-item Pain Catastrophizing Scale (PCS) is the most widely used measure of pain-specific catastrophizing and assesses three dimensions: rumination, magnification, and helplessness. The PCS has been translated and validated in several languages though no Arabic version exists that measures an important predictor of pain and pain-related outcomes. Thus, the purpose of the project is to develop and psychometrically evaluate PCS in the Arabic language among a sample of 150 adults in Lebanon.
Coinvestigator: Dr. Douglas French, Professor of Psychology, University of Moncton, Canada
Funding: Pfizer
Status: Ongoing

Principal Investigator: Marina Adra
Constructing the meaning of quality of life for residents in care homes in Lebanon: Perspectives of Residents, Staff, and Family
Located in two care homes in the Lebanon, the study explores the perceptions, perspectives, and meaning of quality of life for a theoretical sample of care staff, family caregivers, and older people.

Results: Four themes emerged from this analytical process: i) Maintaining Family Connectedness; ii) Engaging in Worthwhile Activities; iii) Maintaining and Developing Significant Relationships; and iv) Holding and Practicing Spiritual Beliefs. The emergence of these themes confirmed the complex, interrelated, and multidimensional nature of quality of life for residents and other stakeholders. Coinvestigators: John Hopton, John Keady.
Status: Manuscript accepted by the *International Journal of Older People Nursing*.

Principal Investigator: Muhieddine Al-Taki
American University of Beirut Medical Center Department of Surgery: Comparing Subacromial Injection of Platelet-Rich Plasma versus Methylprednisolone in Patients with Shoulder Subacromial Impingement Syndrome
The overall aim is to compare two treatments, platelet-rich plasma and corticosteroid injections into the subacromial space, with regards to symptomatic improvement, pain relief, and functional outcome in a randomized controlled clinical trial.
Coinvestigators: **Souha Fares,** Karim Masrouha, Robert Franjie
Funding: Intramural Funding AUBMC
Status: Data collection in progress.

Principal Investigator: Samir Atweh
The Effect of Aspirin and Clopidogrel on Bleeding, Platelet Aggregation, and Neuronal Damage after Moderate Brain Injury
The overall aims are to evaluate the effect of aspirin, clopidogrel, and both aspirin and clopidogrel on bleeding, platelet aggregation, and neuronal damage in rats after moderate brain injury.
Coinvestigators: **Hala Darwish**, Firas Koubaissy, Aida Habib
Funding: CNRS
Status: Ongoing

Principal Investigator: Michael Clinton
From Education to Practice: The Challenges that Nursing Students and Novice Nurses Face in Lebanon
This qualitative study involves three university sites and three hospitals in Lebanon. The study is designed to investigate from the point of view of students and registered nurses (RNs) in the first year of practice the challenges they face as they engage in clinical nursing practice. The study focuses on challenges that are unique to Lebanon. Separate focus groups will be formed at the three universities. The three focus groups will explore the challenges students face as they transition to the clinical experience in BSN IV. Separate focus groups will be established at three hospitals in Beirut. The hospitals will be those that generally recruit the most graduates from the respective universities. The three focus groups will focus on the challenges RNs face in their first year of practice in Lebanon. Thematic analysis and the constant comparative method will be used to analyze the data. The study findings may suggest strategies for reducing attrition in BSN programs in Lebanon and may assist hospital administrations to reduce attrition of RNs in their first year of practice.
Coprincipal Investigators: Myrna Doumit, Sawsan Ezzeddine, Ursula Rizk
Coinvestigators: Nour Alayan and Leila Al-Alti
Design: Qualitative study using focus groups

Status: In progress. Data collection is complete. Transcription of focus group data is in progress.

Principal Investigator: Michael Clinton
Ethical Issues in Nursing: Validating the Ethical Issues Scale for Use in Lebanon
This study examined the cultural fit of the Ethical Issues Scale (EIS) and the Psychometric Characteristics of a 32 Item Modified Version of the Scale. Data were collected from 59 English speaking registered nurses at AUBMC. Data were analyzed using commercial software. Disordered responses may be avoided in the future by using a five Likert scale. All EIS items need to be reworded if the EIS is to be used in studies in Lebanon because the scale is confusing. The dimensionality of the scale needs further exploration because principal component analyses (PCA) of residuals suggest the presence of additional dimensions. Additional EIS items are needed to improve targeting.
Coinvestigators: Nour Alayan and Leila El-Alti
Design: Pilot study
Status: Completed and a manuscript has been published.
Publication: **Clinton, M. E**., Alayan, N., El-Alti, L. Rasch analysis of Lebanese nurses' responses to the EIS questionnaire. SAGE Open Aug 2014, 4(3) DOI: 10.1177/2158244014547182

Principal Investigator: Hala Darwish
Brief International cognitive assessment for MS (BICAMS)-Arabic
The aim of this study is to validate the well-established Brief International Cognitive Assessment for Multiple Sclerosis (BICAMS) in Arabic
The test stimuli and administration procedures will be standardized in Arabic. The validity and the test-retest reliability of the different tests will be assessed.
Finally, we will establish the normative data for Lebanon
Co PIs: Samia Khoury and Bassem Yamout
Funding: Novartis
Status: IRB application

Principal Investigator: Hala Darwish
The EBV Seropositivity, Vitamin D Level and Smoking Rate among Multiple Sclerosis patients compared to Healthy Individuals in Lebanon
The aims of this study are:

- To determine the prevalence of EBV infection in a sample of Lebanese MS and control adult subjects.
- To explore the relationship between viral capsid antigen (VCA) and Epstein-Barr nuclear antigen-1 (EBNA-1) titers with vitamin D levels and smoking among MS patients and controls.
- Examine the effect of vitamin D supplementation on EBNA and VCA titers in MS patients.

Co PIs: Samia Khoury
Funding: MPP- American University of Beirut
Status: ongoing

Principal Investigator: Myrna Doumit
Knowledge, Attitude, and Practice of Lebanese Women towards Breast Cancer, Breast Self-Examination, and Mammography
The overall aim is to assess the knowledge, practices, and attitudes of Lebanese women about breast self-examination (BSE), mammography, and breast cancer, and to identify potential barriers using Champion's Health Belief Model Scales.
Coinvestigators: **Souha Fares, Mary Arevian**
Funding: Lebanese American University
Status: Manuscript writing in process

Principal Investigator: Nuhad Dumit
Analyzing the Antecedents of Nurses in a Private and a Public Not-for-Profit Medical Centers in Lebanon
The main aim of this study is to examine sickness absences at major medical centers across the country in terms of prevalence, nature, causes, trends, frequency, cost, and impact on services provided. Another aim is to explore reasons for sickness absence in order to recommend and implement appropriate intervention(s) for effective absence management. A third aim is to validate the JOINT model created in a systematic literature review (article published) by the investigators.
Coinvestigator: Lina Daouk Oyry
Supported by the Evidence-based Healthcare Management Unit, AUB
Status: Ongoing
Publication: Baydoun, M., **Dumit, N. Y**.; Daouk-Oyry, L. What do nurse managers say about nurses' sickness absenteeism? A new perspective. *Journal of Nursing Management*. In Press.

Principal Investigator: Nuhad Dumit
Assessing Basic and Continuing Education Learning Needs of Nurses in Lebanon
The purpose of the study is to identify the basic and continuing education learning needs and preferred ways of learning of bedside nurses in Lebanese hospitals. It is expected that the results of this study will inform the design of basic and continuing education programs for bedside nurses tailored to their needs. This study is in collaboration with the Order of Nurses in Lebanon and nursing faculty members from the University of Saint Joseph, University of Balamand, and Lebanese University.
Coinvestigators: **Souha Fares**, Marie Therese Sabbagh, Mireille Najjar, Gisel Hajal, Vicky Jubran New project with the support of the Order of Nurses in Lebanon
Status: submitted for IRB approval

Principal Investigator: Laila Farhood
Promoting Psychosocial and Mental Health Care through Community-based Educational Workshops for Teachers and Parents: A Follow-up to Mental Health Assessments in Civilians Exposed to Traumatic Events of War in the South of Lebanon
This intervention study is a follow-up to recommendations from previous studies by the PI revealing high rates of psychiatric morbidity in the south of Lebanon. The specific aims of the study are to (1) identify attitudes and beliefs about mental illness, symptoms, and treatment through focus groups conducted with teachers and parents of students; (2) provide psychoeducation (e.g. effects of trauma, depression in children and adolescents) and psychosocial resources (e.g. solutions for student behavioral challenges within the classroom) to

parents and teachers through workshops; and (3) test the efficacy of the intervention by administering questionnaires before and after the educational program to observe changes, if any, in reported mental health problems, attitudes, and practices.
Coinvestigators: Fadi Maalouf, Myrna Doumit and **Souha Fares**
Funding: Medical Practice Plan (MPP) and University Research Board
Status: Ongoing

Principal Investigator: Ghada El Hajj Fuleihan
Capacity Building in Chronic Non-Communicable Diseases at the American University of Beirut: A Programmatic Multidisciplinary Curriculum Based on Interfaculty Approach
This training grant aims at building research capacity in chronic, non-communicable Diseases and disorders across the lifespan. The grant includes a short-term certificate program, medium-term mentoring of thesis, and long-term training through a master's degree in clinical research. This program involves the Faculty of Medicine, HSON, the Faculty of Health Sciences, and the Faculty of Agricultural and Food Sciences.
Coinvestigators: **Huda Abu-Saad Huijer**, Robert Habib, Nahla Hwalla, Abla Mehio Sibai, and US collaborator Christos Mantzaros
Mentors: **Huda Abu-Saad Huijer**, Monique Chaaya, Ghada El-Hajj Fuleihan, Robert Habib, Nahla Hwalla, Ayad Jaffa, Mona Nabulsi, **Samar Noureddine**, Omar Obeid, Abla Sibai
Co-mentors: **Hala Darwish** and **Nuhad Dumit**
Funding: NIH and Fogarty International. Grant # PAR-10-257: Chronic, Non-Communicable Diseases and Disorders across the Lifespan (D 43)
Status: Ongoing. Three cohorts including two MSN students completed the SHARP summer certificate program.

Principal Investigator: Lina Kantar
Knowledge Retention and the Instructional Approach: Case-Based versus Lecture-Based Learning
The purpose of this study is to identify differences in nursing students' knowledge retention after being exposed to two instructional approaches, the case-based learning and lecture-based learning. Knowledge retention will be assessed through scores of students using a selected response multiple choice test. The test content examines knowledge retained from the Nursing Care of Adults I course. Selecting teaching practices that ensure better acquisition and retention of knowledge in nursing students is imperative to safe nursing practice.
Coinvestigators: Angela Massouh and Silva Dakessian
Status: In progress

Principal Investigator: Lina Kantar
Case-based Instruction: A Framework from Experience
The intent of this research paper is primarily to determine the principles of teaching with case studies and to illuminate the significance of situated teaching in developing the health professionals of the future. Findings converged on four themes which highlight the principles of case-based teaching. The themes include: (1) motivating a dynamic learning environment, (2) realism, (3) prospects for synthesis, and (4) professional formation. An in-depth analysis of each

principle helped reveal directives to effectively structure case studies and to competently contextualize the teaching learning process.
Status: Completed. Article under review by the journal of Nurse Education Today

Principal Investigator: Lina Kantar
Thinking Skills Developed from Case-based Instruction
The study aims at exploring the nature of thinking skills that can be developed from the case-based instructional approach. Data obtained from 16 nursing graduates who were exposed to case-based learning in two junior nursing courses and a senior course will be analyzed to identify the nature of thinking skills, currently perceived as the most essential skill in learning professional practice.
Status: In progress

Principal Investigator: Samia Khoury
American University of Beirut Medical Center Multiple Sclerosis Interdisciplinary Research (AMIR): A Comprehensive Multiple Sclerosis Database
The overall aims are to investigate the immunological regulatory and cognitive functions in multiple sclerosis and to develop database and bio-markers both to diagnose and follow the course of MS disease.
Coinvestigators: **Hala Darwish,** Bassem Yamout, Samir Atweh, Raja Sawaya
Funding: AUBMC MS Center Research Funds
Status: Ongoing

Principal Investigator: Samia Khoury
Immunological Pattern during Multiple Sclerosis Relapses and Response to Treatment (five years)
The overall aims are to investigate the immunological pattern during an MS relapse and response to treatment in order to follow the course of the disease.
Coinvestigators: **Hala Darwish**, Bassem Yamout, Samir Atweh, Raja Sawaya
Funding: AUBMC MS Center Research Funds
Status: Ongoing

Principal Investigator: Samia Khoury
Effect of Vitamin D Replacement on Immune Function and Cognition in MS Patients
The overall aims are to investigate the effect of Vitamin D on the immune system and cognitive performance in MS patients.
Coinvestigator: **Hala Darwish**
Funding: AUBMC MS Center Research Funds and Medical Practice Plan (MPP)
Status: Writing Report

Principal Investigator: Samia Khoury
Cerebrospinal Fluid, Urinary and Plasma Biomarker in Multiple Sclerosis (five years)
The overall aim of this study is to explore the cerebrospinal fluid, urine, and plasma of MS patients for biomarkers that will aid in the diagnosis and management of the disease progression.
Coinvestigator: **Hala Darwish**
Funding: Investigator start-up funds

Status: Ongoing

Principal Investigator: Samia Khoury
Correlation of Retinal Optical Coherence Tomography Findings with Cognitive Function in Patients with Multiple Sclerosis
The overall aim of this study is to explore the relationship between retinal GCIPL and NFL findings and cognitive function, as well as clinical disability. To assess the change in the thickness of the retinal GCIP layer and macular volumes in patients starting on Fingolimod as compared to those started on Interferon**.**
Coinvestigator: **Hala Darwish**
Funding: Investigator initiated grant from Novartis
Status: Ongoing

Principal Investigator: Firas Koubeissy
Developing Sensitive and Specific Biosensor for Traumatic Brain Injury Biomarkers
The aims of this study are:
1. Develop and optimize an advanced conjugated capture TBI biosensor platform that is based on electrochemical techniques.
2. Develop and optimize a colorimetric sensor array based on gold nanoparticles to serve as a TBI biosensor platform
3. Validate the levels and presence of UCH-L1 and GFAP proteins via Western blotting technique. This sub aim serves as a quality control test confirming the correct setup of the above experiment
4. Establish the experimental rat TBI technique (CCI model). Bio fluids and tissue from TBI animals will be assessed using the biosensor assays developed in specific aim 1 and 2.
Co-PI: **Hala Darwish**
Funding: Farouk Jabre Award

Principal Investigator: Samar Noureddine
Knowledge, attitude and practice of substance use among medical students in Lebanon
This survey examined the level of knowledge, attitude and practices related to alcohol and drug use in 231 medical students of 4 major universities in Lebanon.
Other researchers: George Assaf, Silva Kouyoumjian and Jamil El Khoury
Funding: None
Status: Manuscript under review.

Principal Investigator: Samar Noureddine
Smoking behavior after hospitalization with a coronary event.
The aim of the observational longitudinal study is to examine the rates of smoking cessation and relapse following hospitalization with an acute coronary event. A number of psychosocial predictors of cessation and relapse are also investigated.
Other researchers: Habib Dakik and Angela Massouh
Status: Ongoing.

Principal Investigator: Kathy Wood
Symptom Measurement in Patients with Arrhythmias

The aim of this prospective cross-sectional survey is to evaluate the number, incidence of clinical symptoms and depression, as well as the impact of symptoms on patients living with a variety of arrhythmias. Gender differences in symptom perceptions will also be examined. A total of 100 patients with arrhythmias have been recruited from the cardiology clinic at AUBMC.
Other researchers: Marwan Refaat, **Samar Noureddine**, Mostafa Hotait
Funding: Duke University
Status: Data collection in progress

Principal Investigator: Lina Younan
How Nursing Work Is Organized in Lebanese Hospitals and Its Effects on Nurses' Wellbeing
The objectives of the study are

1. To describe the organization of nursing work in Lebanese hospitals by identifying the models of nursing care in use and their prevalence.
2. To describe nursing staffing patterns in Lebanese hospitals (mainly nurse-to-patient ratios, staff-mix, and educational level of RNs,) and compare them to international standards.
3. To investigate the relationships between the level of nurses' professional education, nursing staffing patterns, models of nursing care, and the incidence of nursing fatigue and muscular skeletal injury.

Co-investigators: Michael Clinton, Fadi El Jardali, Helen Samaha, Souha Fares
Funding: HSON Seed money
Status: Data entry in progress.

Research/Continuing Education Seminars

The HSON Research Committee (RC) organized a series of research seminars. The aim of these seminars is to disseminate the research findings of the HSON faculty and alumni to the AUB community and to get acquainted with other AUB faculty members' research work. The following were invited to share their research findings:

- ✓ Dr. Sarah Abboud Title: Understanding Virginity from the Perspectives of Arab American Women; a Phenomenological Approach. **December 19, 2014**
- ✓ Dr. Houry Pouzantian: Title: Cardio-Vascular Investigations in Kidney Dysfunction, Hyperglycemia, and Aging. **January 7, 2015**
- ✓ In collaboration with FHS a joint seminar by Mr. Michael Villeneuve, title "A for spending, C for Results: the enduring paradox of Canada's health care system and lessons for Lebanon and other countries." **December 17, 2014**

VII. 110th celebrations

In 2015, HSON celebrated its 110th anniversary under the motto "Expanding Boundaries and Enhancing Partnerships." The school organized a number of activities including public lectures by prominent alumni of the school, roundtable discussions with deans and directors of schools of nursing from Lebanon and the region to discuss possible research collaboration based on the WHO established research priorities, and a meeting with directors of hospitals and nursing services in Lebanon to promote and enhance the position of advanced practice nurses in Lebanon. The meeting, which took place on January 30, 2015, began with a welcome by Dr. Huijer stressing the important role education plays in the preparation of nursing students and nursing leaders for service in Lebanon, the Middle East, and beyond. This was followed by testimonials from nursing leaders in Lebanon about the importance of their education at AUB and the role that the school had played in their professional and personal lives. During the panel discussion that followed, HSON master's program graduates gave moving presentations about how their education had enabled them to develop their individual specialized nursing roles. The afternoon concluded with a public lecture by Dr. Naeema Al-Gasseer, an alumna of the school and WHO representative for Sudan. Al-Gasseer spoke with great emotion of the deep and lasting effect that AUB, HSON, and Lebanon had had in shaping her thinking and in influencing her career path in nursing.

The meetings with deans and directors of schools of nursing in Lebanon and the region on February 25 and April 8 were equally compelling. Deans and directors presented their schools' programs of research and discussed ways they might work together. HSON will be coordinating this important effort.
AUB has prepared a short film about HSON that will be used to promote the school and its academic programs, and a video featuring students and graduates reflecting on the impact HSON has had on their personal and professional lives. The school will be hosting an international conference in October 2016 as part of the University's 150th anniversary celebrations.

VIII. REGIONAL EXTERNAL PROGRAMS/GULF ACTIVITIES

- HSON is involved in a number of regional consultancy projects coordinated by AUB's Office of Regional External Programs.

1. HSON developed a number of continuing nursing education workshops and short courses for the Ministry of health UAE through AUB REP agreement with the Ministry.
2. HSON started the continuing nursing education workshops and short courses for training nurses from UAE in December 2015 based on the above agreement. The courses/workshops offered so far include health assessment, pediatrics update, and critical care. Except for critical care which is a short course, the other two offerings were given twice to two different groups of nurses. The offering will continue through 2016.

- HSON is collaborating with REP to market its nursing certificate programs to corporate and individual clients nationally and regionally.

In collaboration with the Continuing Medical Education (CME) Office, HSON faculty members offered a full day seminar on palliative care to nurses from Lebanon with CE credits from the Order of Nurses in Lebanon.

IX. HONORS, AWARDS, AND RECOGNITIONS

AUB HSON won three awards offered by the Scientific Society of Arab Nursing Faculties and the awards were given on April 8, 2015.

1. HSON won the award for distinguished academic institution.
2. Dr. Huda Abu-Saad Huijer won the award for distinguished faculty member.
3. Mohamad Saab won the Master's Thesis Award. The thesis committee included Dr. Samar Noureddine (chair) and Dr. Huda Huijer from the school of nursing, and Dr. Jocelyn DeJong from the Faculty of Health Sciences.
4. Dr. Nuhad Dumit was elected president of the Lebanese Order of Nurses, June 2015.
5. Dr. Samar Noureddine was inducted as fellow in the American Academy of Nursing, October 17, 2015
6. Dr. Samar Noureddine was elected as President of the Nurses' Chapter, Worldwide Alumni Association American University of Beirut, January 2015.

Dr. Huda Abu-Saad Huijer continues to be a member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP). The second meeting took place in May 22-24, 2015 at Harvard University, Boston, USA.

X. INTERNATIONAL PARTNERSHIPS

HSON currently has Memoranda of Understanding (MOUs) to enhance research collaboration and student and faculty exchange with the following institutions:

- Johns Hopkins University School of Nursing
- University of Michigan School of Nursing
- Villanova University College of Nursing
- University of Maryland School of Nursing
- University of Science and Technology, Sydney, Australia

XI. SIGMA THETA TAU INTERNATIONAL (STTI) HONOR SOCIETY

The Hariri School of Nursing American University of Beirut Nursing Honor Society was approved and chartered as an official chapter of the Honor Society of Nursing, Sigma Theta Tau International (STTI), on Saturday September 13, 2014. The Chi Iota Chapter was officially recognized by Sigma Theta Tau International at the 43rd Biennial Convention of STTI November 7-11, 2015 in Las Vegas, USA.

The Chi Iota chapter currently has 154 members; 131 were inducted during the chartering ceremony in September 2014 and 23 were inducted in May 2015. Membership in STTI continues to be by invitation and is extended to undergraduate students, graduate students, faculty, and professional nurses who have demonstrated superior scholastic, leadership, and nursing achievements. STTI is a not-for-profit organization whose mission is to improve the health of people worldwide through leadership and scholarship in practice, education, and research. Founded in 1922, this organization's members include practicing nurses, faculty, researchers, policymakers, entrepreneurs, and others.
The HSON Chi Iota Chapter is the first STTI chapter in the Middle East.

The board of the Chi Iota Chapter is as follows:

A. President : Dr. Huda Abu-Saad Huijer
B. President- elect: Dr. Chris Abbyad
C. Vice president : Mrs. Mary Arevian
D. Treasurer: Mr. Ghassan Afram
E. Secretary: Dr. Myrna Doumit
F. Counselor: Dr. Dina Madi

XII. HSON EXTERNAL ADVISORY BOARD (EAB)

Mandate and Purpose of the EAB
The External Advisory Board of the Rafic Hariri School of Nursing consists of invited members from leading universities engaged in baccalaureate and graduate nursing education and research,

leaders of nursing and health care institutions, and dignitaries with established track records in related fields. The EAB advises the director by serving as a bridge between HSON and the international nursing community.
The inaugural meeting of the EAB took place on Monday, September 15, 2014, during which Dr. Martha Hill was elected as chair. Current and future developments at HSON as well as information on current and future academic programs were discussed. The Terms of Reference were revised and future plans for meetings approved.
The second meeting was held by teleconference on October 5, 2015. The agenda included HSON PhD proposal, HSON Centre for Nursing Research with the aim of becoming a WHO Collaborating Centre, BSN & MSN curricular developments, faculty recruitment including the endowed chair for nursing research, and possibilities for fundraising.

Purpose of the EAB:

- To provide strategic advice relevant to current and proposed initiatives of HSON and provide feedback on the progress of the school against its strategic goals.
- To assist HSON in realizing its mission by promoting it to organizations and individuals with the potential to contribute to student scholarships, research, and faculty development.
- To encourage HSON in its developments of nursing education and nursing research especially as they relate to CCNE accreditation, international benchmarking, and opportunities for collaborative funded research, doctoral studies, and student and faculty exchanges.
- To promote the continued dialogue between HSON and the professional community with the goal of improving academic program quality and societal relevance.
- To advise on marketing and public relations opportunities to improve the status of the profession and student recruitment.

Members

- Dr. Martha N. Hill; Dean Emerita. Professor of Nursing, Medicine and Public Health, Johns Hopkins University, School of Nursing (Chair)
- Dr. Walid Ammar, Director General, MOH
- Dr. David Benton, CEO, International Council of Nurses (ICN)
- Dr. Louise Fitzpatrick, Connelly Endowed Dean and Professor, College of Nursing, Villanova University
- Former First Lady Mrs. Mona Hrawi
- Dr. Hester C. Klopper, President Sigma Theta Tau International Honor Society of Nursing
- Dr. Rowaida Al-Maaitah Advisor to HRH princess Muna Al Hussein for Health and Community Development, Former Minister of Higher Education and Scientific Research, Professor at Jordan University of Science and Technology.
- President of the Lebanese Order of Nurses, Dr. Nuhad Dumit

XIII. HSON NEWSLETTER

HSON published its Fall newsletter "2015: The Year in Review". The newsletter includes faculty and school news, student activities, awards received as well as personal news about faculty and staff.

XIV. ACHIEVING FACULTY STATUS FOR HSON

HSON currently functions semi-autonomously:

- Dr. Huda Abu-Saad Huijer is an ex-officio member of the AUB Board of Deans.
- HSON processes all HSON appointments, reappointments, and promotions.
- HSON manages its own budget and continues to use surplus monies for HSON scholarships.
- HSON has a new organizational structure with two divisions.
- HSON currently has representatives on a number of task forces and AUB committees including the AUB Board of Graduate Studies Senate Committee.
- HSON faculty members were moved from 11-months to 9-month contracts
- Achieving full faculty status remains an important strategic goal for HSON.

XV. LOOKING AHEAD

HSON plans to launch a number of new academic programs:

- Accelerated BA/BS-BSN (second degree) program. A promotional campaign using the American Association of Colleges of Nursing Centralized Application Service for Nursing Schools (AACN NURSING CAS) along with national campaigns will continue to be used to recruit students for the program.
- Postgraduate certificates in community nursing, critical care nursing, leadership and management, and nursing informatics are currently being launched by REP.
- A PhD proposal was submitted to AUB for approvals. It will be launched in close collaboration with the Faculty of Health Sciences, the Faculty of Medicine, the Johns Hopkins University School of Nursing, and the University of Michigan School of Nursing.
- HSON is currently exploring the possibility of offering a nurse executive track.
- Summer and Winter Nursing Institutes: HSON will continue to collaborate with partners in the United States and with experts in the region and in Lebanon to offer high-quality courses on special topics. These courses are open to MSN and other AUB students and to participants from Lebanon and the region.
- Student recruitment will continue to be a priority. HSON awarded 25 merit scholarships this year and will continue to work on securing bursaries for BSN students.
- More emphasis will be placed on graduate recruitment at the national, regional, and international levels in close collaboration with AUB's Graduate Council.
- The recruitment of an endowed chair to direct HSON's Center for Nursing Research will continue to be a priority.
- Collaboration with AUBMC/Nursing Services continues to be an important priority for HSON. A number of joint appointments have already been approved.

AMERICAN UNIVERSITY OF BEIRUT

Annual Report
2014

1866

AUB

Rafic Hariri School of Nursing

CCNE ACCREDITED

The baccalaureate and master's programs at the American University of Beirut Rafic Hariri School of Nursing are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.
The school is also a full member of the American Association of Colleges of Nursing.

PREFACE

The Hariri School of Nursing (HSON) witnessed a number of successful milestone events in 2014. The school recruited a record number of undergraduate students, proposed major revisions to the graduate academic program, and launched an external advisory board for HSON. The AUB School of Nursing Honor Society was approved and chartered by Sigma Theta Tau International (STTI) as the first Chi Iota Chapter in the region. In addition, HSON, the director, and a graduate student were rewarded by the Scientific Society of Arab Nursing Faculties for the year 2014 for distinguished work in academia and research.

The current academic programs continue to be aligned with international professional and accreditation standards set forth by the American Association of Colleges of Nursing (AACN) and the Commission on Collegiate Nursing Education (CCNE) in the USA. HSON remains the first school of nursing outside the United States to be accredited by CCNE and to be granted regular membership in AACN.

The school is building on this strong foundation to develop and launch a number of new academic initiatives such as the BA/BS-BSN second degree program, new tracks in the Masters of Science in nursing (MSN) program, and an interdisciplinary PhD program in close collaboration with the Faculties of Medicine and Health Sciences and with our partners in the USA, the Johns Hopkins University School of Nursing and the University of Michigan School of Nursing.

The HSON Honor Society was approved to become a full-fledged STTI chapter and the first in the Middle East. The STTI Chartering of the Chi Iota Chapter took place on September 13, 2014 and 131 members were inducted into this prestigious international honor society in nursing. A two-day research conference was organized to coincide with the chartering ceremony.

The year 2015 will mark the 110th anniversary of the AUB School of Nursing. The school is diligently working on the preparations for this milestone event.

The school continues to be proud of its achievements, which are detailed in this annual report.

I. ORGANIZATION OF THE SCHOOL OF NURSING

A. FACULTY

Director of the School of Nursing - 2003 to present
Huda Abu-Saad Huijer, RN, PhD, FEANS, FAAN, Professor

Faculty Members
Christine Abbyad, RN, PhD, Clinical Assistant Professor; Undergraduate Division Convener
Lina Abi Fakhr Kantar, RN, EdD, Assistant Professor
Marina Adra, RN, MS Physiology, PhD, Clinical Assistant Professor; BSN Coordinator
Nour Alayan, RN, MSN, Clinical Instructor, PhD Student on Leave of Absence
Mary Arevian, RN, MPH, Clinical Associate Professor
Tamar Avedissian, RN, MSN, Clinical Instructor
Michael Clinton, RN (CARNA), RGN RPN (AHPRA), PhD, MSc, BA (Hons.), Professor
Silva Dakessian RN, MPH, Clinical Instructor
Hala Darwish, RN, PhD, Assistant Professor
Nuhad Dumit, RN, MA, PhD, Assistant Professor, CE/Offshore Program Coordinator
Souha Fares, PhD, Assistant Professor
Laila Farhood, RN, PhD, CS, Professor and Clinical Associate, Psychiatry Department, Faculty of Medicine; Graduate Division Convener
Talin Gulgulian, RN, MSN, Clinical Instructor
May Khoury, RN, BSN, MSN, Clinical Assistant Professor
Dina Madi, RN, TD, MA Education, PhD, Clinical Assistant Professor; BA/BS-BSN Coordinator
Angela Massouh, RN, MSN, Clinical Instructor, PhD Student
Samar Noureddine, RN, PhD, FAHA, Professor;Assistant Director for Academic Affairs
Elie Salameh, RN, DNP, Clinical Assistant Professor on Leave of Absence effective February 2013
Lina Younan, RN, MSN, DNP, Clinical Assistant Professor

Visiting Faculty
Ibrahim Fakih, RN, MPH, Nursing Informatics Specialist
Maureen Grady, Professional Specialist, Department of Nursing, Saint Mary's College, Notre Dame, Indiana, USA
Judith Lambton, EdD, MSN, RN, Professor, University of San Francisco, California, USA
Hussein A. Tahan, PhD, RN, Corporate Director of Nursing Education and Research at New York Presbyterian Hospital. Independent Consultant at International Health Care Management and Consulting

Adjunct Faculty
Patricia Abbott, RN, PhD, Associate Professor and Codirector, PAHO/WHO Collaborating Center for Nursing Knowledge, Information Management and Sharing (KIMS), Johns Hopkins University School of Nursing, USA
Patricia M. Davidson, Professor and Dean, Johns Hopkins University School of Nursing
Martha Hill, PhD, RN, FAAN, Professor and Past Dean, Johns Hopkins University School of Nursing, USA
Shake Ketefian, EdD, RN, FAAN, Professor Emeritus, University of Michigan, USA
Judith Lambton, EdD, MSN, RN, Professor, University of San Francisco, California, USA
Elizabeth Tanner, Associate Professor, Johns Hopkins School of Nursing and Center on Aging and Health
Phyllis Sharps, Professor, Associate Dean, Community and Global Programs Johns Hopkins School of Nursing

Academic Associates
Rana Abdel Malak, RN, MPH, Nursing Director, Bellevue Medical Center
Mona Nasrallah, MD, Associate Professor, AUBMC
Anthony Shamoun, MSN-RN, ACNP, Critical Care Nurse Specialist, AUBMC
Wafa Maalouf, Nursing Director, St. George Hospital
Salah Zein El-Dine, MD, Assistant Professor, Director Pulmonary Physiology Laboratory, Director Graduate Medical Education AUBMC

Joint Appointments:
Michael Clinton with FM Institutional Review Board (IRB) Office as Vice-Chair of the IRB office for the Social and Behavioral Sciences
Hala Darwish with FM/AUBMC as Managing Director of the Abu Haidar Neuroscience Institute
Nuhad Dumit with FM/AUBMC as Codirector for Continuing Medical Education (CME) Office
Hanadi Masalkhi with Nursing Services/AUBMC as Clinical Instructor at the Hariri School of Nursing
Angela Massouh with Nursing Services/AUBMC as Cardiology Clinical Nurse Specialist

B. SUMMER NURSING INSTITUTE

For the eighth year in a row, HSON organized a Summer Nursing Institute which offered courses of interest to MSN and other AUB students – and also to other students from Lebanon and the region. Below are short course descriptions and the names of the teaching faculty.

Learning to Work Together to Make Our Patients Safer: Interprofessional Education
May 26 – 30
Though educated in separate disciplines, medical professionals must work together at the bedside to provide the best practice in safe care. Recently, greater emphasis has been placed on teamwork and collaboration to ensure a well-integrated approach to patient management. This course will introduce the learner to the theory and practice of professional collaboration.
Dr. Judith Lambton, EdD, MSN, RN
University of San Francisco

Smoking Cessation as Behavior Modification
June 2 – 6
Many people wish to change their own behavior or that of other individuals or groups of people. This course will present smoking cessation as an example of a behavior modification program. Included will be a brief review of behavior modification theory in addition to the evidence for why certain elements should be included in such a program.
Christine Weir Abbyad, PhD, RN, Women's Health Nurse Practitioner
Clinical Assistant Professor, School of Nursing, AUB

Evidence-based Practice in Maternity Care
June 2 – 6
This course will review the evidence-based nursing practices of the antepartum, intrapartum, postpartum, breastfeeding, and newborn client. Case studies, multimedia, and webinars from professional organizations will be used to enhance class discussion.
Christine Weir Abbyad, PhD, RN, WHNP
Clinical Assistant Professor, School of Nursing, AUB

Case Management
June 11, 12, 13, 16, and 17
This course explores the implementation and evaluation of case management models and the various roles of case managers. The focus is on model design, implementation, evaluation, clinical pathways/case management plans, management of patients with chronic illnesses, outcomes management, and transitions of care.
Hussein A. Tahan, PhD, RN
Corporate Director of Nursing Education and Research at New York Presbyterian Hospital
Independent Consultant at International Health Care Management and Consulting

Therapeutic Communication
June 16 – 21
The course presents an innovative approach to professional and therapeutic strategies of interpersonal communication. Its aim is to teach the nursing student and/or health care practitioner an effective method of verbal interaction that can be utilized to advantage with patients, families, loved ones, professional colleagues, and social relationships beyond the health care setting.
Maureen Grady
Professional Specialist, Department of Nursing, Saint Mary's College, Notre Dame, Indiana

C. FACULTY RECRUITMENT/APPOINTMENTS

Recruitment*:*
HSON advertised for regular faculty positions and for the Hariri Endowed Chair in Research at the American Academy of Nursing (AAN) in the *Chronicle of Higher Education*, at Sigma Theta Tau Nursing International (STTI), at the American Association of Colleges of Nursing (AACN), Minority Nurse, and at the Royal College of Nursing (RCN). Recruitment information was also mailed to leading schools of nursing, professional organizations, and to mailing lists in the United States and Europe.

Appointments:

- Tamar Avedissian, RN, MSN, Clinical Instructor, effective September 2014
- Silva Dakessian RN, MPH, Clinical Instructor, effective September 2014
- Souha Fares, PhD, Assistant Professor, effective September 2014
- Talin Gulgulian, RN, MSN, Clinical Instructor, effective November 2014
- Hanadi Masalkhi, RN, MSN, Clinical Instructor, effective September 2014

III. EDUCATIONAL ACTIVITIES

A. EDUCATIONAL PROGRAMS

BSN:

- Course descriptions, credit hours, and learning objectives did not change over the year as student evaluations were positive. However, because of the large class size all BSN III courses were divided into two sections.
- NURS 300 (Nursing Care of Adults I, Theory and Practicum). One section was taught in a blended format and one section used a case-based approach. Both methods capitalized on student-directed learning.
- NURS 201 based on previous success again used OSCE (objective, structured, clinical exam) to test for clinical competencies.
- NURS 304 (Nursing Care of the Expectant Family, Theory and Practicum). One section was taught using a lecture format and the other section was taught using team-based learning. Simulation activities used a combination of skill improvement and practice through scenarios.
- NURS 307 clinical practicum (Practicum I, 0 credits) was again taught with positive feedback from students about the importance of improved skills, management of patient care, and improved confidence in caring for in-patient clients.

MSN:

- A total of 64 students are currently enrolled (October 2014) in the MSN program.
- Four tracks continue to be offered: Adult Care, Nursing Administration, Psychiatry and Mental Health Nursing, and Community Health Nursing.
- In light of the Advanced Practice Registered Nursing Model developed by the American Association of Colleges of Nursing and its implications on master's education, the Graduate Studies Committee worked on revising the MSN program, with implementation planned for the academic year 2015-2016.
- A number of students continue to do residencies abroad, namely at the University of Michigan, and the University of Maryland.
- Town meetings were held to discuss residencies, projects, and comprehensive exams. Information on the specific tracks is shown below.
- 18 students were inducted in the HSON Honor Society spring 2014.

Adult Care track:

1. A total of 7 students graduated in 2014, including one who did a thesis.
2. A total of 21 students are currently enrolled (October 2014).
3. Three adult care students did their residencies at the University of Maryland, and 5 at AUBMC.
4. Three MSN students in the adult care track completed successfully the Scholars in Health Research Program (SHARP) summer 2014.

Administration track:

1. A total of 4 students graduated in 2014.
2. A total of 21 students are currently enrolled (October 2014).
3. Students in the administration track have done residencies at Johns Hopkins University (1), AUBMC (1), Bikhazi Medical Center Medical Group (2), and Bellevue Hospital (1).

Psychiatry and Mental Health Nursing track:

1. 1 student graduated in 2014.
2. 4 students are enrolled.

Community and Public Health Nursing track:

1. 1 student graduated in 2014.
2. A total of 5 students are currently enrolled.
3. One student is doing a double major: MSN Community and Public Health Nursing and Psychiatry and Mental Health Nursing

PhD Program:

HSON is currently working on a PhD proposal in close collaboration with the Faculties of Health Sciences and Medicine and with international partners, namely, the Johns Hopkins University School of Nursing and the University of Michigan School of Nursing. The doctoral program aims to provide rigorous training for research careers in nursing and the health care arena. It will provide students with the opportunity to develop their capacity for scholarly and independent work, critical analytical thinking, and the ability to communicate knowledge and ideas and to translate research findings into healthcare practice.

SIMULATION TECHNOLOGY at HSON:

Summary of Activities:

Since its launching in 2009, the SCCC continues to witness a steady increase in utilization. From January 1 until December 31, 2014, the HSON Simulation and Clinical Competency Center (SCCC) supported 392 activities or simulation training experiences and 7,918 participants including HSON and Non-HSON users. HSON users are AUB nursing students enrolled in undergraduate or graduate nursing programs. Non-HSON users are students or professionals from the AUB community or from outside.

- The SCCC has witnessed a 25 percent increase in the number of educational activities in 2014 compared to 2013 (figure 1). An educational activity denotes the use of the lab regardless of the objectives or content of the learning/teaching encounter. Educational activities include a range from training sessions on basic skills to high fidelity simulation activities.
- HSON users showed a 50 percent increase in the number of activities in 2014, which can be attributed to the running of two sections for BSN III nursing courses. Also, Non-HSON users had a 6 percent increase in the number of activities (figure 2).
- Similarly, the SCCC witnessed a 46 percent increase in the number of participants using the lab in 2014. This increase is due to the use of the facility for prep-lab by two sections of N304 (figure 3). A participant is a person using the lab whether student, resident, nurse, or employee from the AUB/AUBMC community or outside.
- "Personal Practice," where students practice in the lab with no supervision by faculty, increased by 25 percent in 2014 (figure 4). Students were encouraged to use the lab on their own to practice skills and develop their competence.

B. STUDENT ENROLLMENT/SCHOLARSHIPS

- The total number of applicants to the BSN program for 2014-15 was 349; total accepted 179 and total number of students confirmed 70.
- Admission for Year 2014-15:

	Early Admission - Undergrad.	Standard – Undergrad.	Transfer from outside AUB	Transfer from within AUB	USP (USAID)	Working for a Second Degree	Grand Total
Applied	5	222	13	14	90	5	**349**
Accepted	5	145	10	11	4	4	**179**
Enrolled	0	58	2	6	4	0	**70**

- The marketing strategy at HSON continues to have a great impact on the increasing number of students admitted to the BSN program. The strategy included mainly school visits, student orientation, and open house. In addition, scholarships offered at HSON attracted many qualified students with good academic standing to apply to the BSN program.

Student Enrollment

	BSN					MSN				
	2010-11	2011-12	2012-13	2013-14	2014-15	2010-11	2011-12	2012-13	2013-14	2014-15

- The scholarship attracted students who selected nursing as their 3rd, 4th and 5th major choice in their application. A total of 46 interviews were conducted with new students; 38 were recommended for scholarships and 25 who received the Financial Aid/scholarship confirmed their enrollment in the BSN program.

C. STUDENT RECRUITMENT AND MARKETING STRATEGY

Student recruitment and marketing of the BSN and MSN programs remains a priority at HSON. The marketing strategy for student recruitment in 2013-14 included various activities:

- The HSON team participated in the AUB Annual Fair for undergraduate programs in April 2014. The team also visited seven schools to recruit students. School counselors were contacted and a poster was sent to all schools inviting high school students to attend the HSON open house on March 31, 2014. A total of 15 students attended the open house and showed interest in the nursing profession. They enjoyed the talk, the testimonials, and especially the scenarios at the simulation lab.
- HSON continues to coordinate with the AUB graduate council in disseminating information and distributing brochures during the recruitment visits. In addition, as part of the marketing plan, the faculty, with the assistance of the student services officer, visited a few hospitals and met with RNs interested in pursuing graduate degrees in nursing.
- Future student recruitment plans to attract and retain students include
  - ✓ More effective use of social media, enhancing the website and Facebook page of the school.
  - ✓ Development of a short film for student recruitment to be posted on YouTube.
  - ✓ Annual meetings with student counselors at HSON.
  - ✓ HSON Newsletter to be sent every semester to student counselors and interested students to keep them updated on developments at HSON.
  - ✓ Interested students to be invited to HSON to attend student-related events.
  - ✓ Annual meetings with interested students and their parents.
  - ✓ Open house for interested students.
  - ✓ Hospital visits for student recruitment in the MSN program.

D. STUDENT PROJECTS, THESES, RESIDENCIES, and ACTIVITIES

MSN STUDENT PROJECTS AND THESES

Name	Type	Title	Committee Members	Defense Date

Bachir Itani	University of Maryland	Dr. Samar Noureddine	Dr. Jane Kapustin	Professor	Fall 2014

STUDENT ACTIVITIES

Nursing students were involved in different community projects and activities in their Community Course. In addition, BSN and MSN students participated in the following activities during the 2013-14 academic year:

- **"I Love NSS":** NSS put up a heart-shaped board "I Love NSS" in the HSON lounge for all nursing students to write their wishes on Valentine's day.
- **School Fair:** Students from the BSN and MSN programs participated in the AUB school fair that was open to all students from different high schools. HSON had a stand at the Olayan School of Business to inform visitors about the BSN program at AUB.
- **Nurses Day:** Every year Nurses Day is celebrated on May 12. This year, AUBMC came with a one week plan to celebrate Nurses Day in the week of May 12, and invited the Nursing Students Society to join the event.

  One of the projects that AUBMC nurses worked on is the production of a video portraying professional nursing. The video, which included nursing students, entailed dance moves and scenarios. They met nurses from different hospital units and spent some fun time with their colleagues.
- **Outdoors:** The AUB Outdoors was held on May 24-25, 2014, with the theme, "Take Me to New York." The Nursing Students Society (NSS) set up two stands: One stand portrayed the picture of a baseball field! Foam fingers, baseball gloves, baseballs, and baseball outfits were distributed. In this game stand baseball cans are arranged in a challenging way, and players are requested to hit the cans with baseballs! Stand 2 was the food stand, where delicious corn cups with cheddar cheese, butter, and salt were sold.
- **Gala Graduation Dinner:** Students, faculty, and staff celebrated the graduation of students at the end of May 2014 at Le Maillon. The Gala Dinner was animated by the nursing students, who shared their experience with the faculty and staff. They showed a movie depicting their activities and their best moments during their three-year period of study at HSON. Finally, they thanked HSON faculty and staff in a well-received presentation.

IV. ACCREDITATION AND STRATEGIC PLANNING

A. CCNE ACCREDITATION

- The Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation) reaccredited HSON's baccalaureate and master's nursing programs for 10 years.
- HSON continues to be a regular member of the American Association of Colleges of Nursing.

B. STRATEGIC PLANNING; GOALS AND OBJECTIVES

The HSON continues to monitor its strategic goals and initiatives, aligning them with those of AUB.

Goal 1: To achieve status of free standing faculty

Objective 1.1: Increase the number of PhD prepared and research active faculty
Objective 1.2: Increase BSN and MSN student enrollment

Goal 2: To position HSON as a regional leader in nursing education, research, and community service

Objective 2.1: Foster excellence in research
Objective 2.2: Foster excellence in teaching
Objective 2.3: Foster excellence in practice
Objective 2.4: Foster excellence in community service

Goal 3: To cultivate professional values of excellence, respect, tolerance, and integrity

Goal 4: To achieve planned growth in high quality students and faculty holding PhDs

Objective 4.1: Publicize HSON achievements
Objective 4.2: Recruit diversified high quality students
Objective 4.3: Recruit faculty holding PhDs

Goal 5: To maintain accreditation status

Goal 6: To continue fostering faculty and staff development

Objective 6.1: Foster faculty development
Objective 6.2: Foster staff development

Goal 7: To achieve fiscal balance

Objective 7.1: Increase BSN and MSN student enrollment
Objective 7.2: Increase HSON revenues

V. RESEARCH AND SCHOLARLY ACTIVITIES

A. CURRENT HSON FACULTY RESEARCH

Principal Investigator: Chris Abbyad
Pregnant Women's Knowledge about Smoking, Breastfeeding, and Breast Cancer
The aim of the study is to determine pregnant women's knowledge about breastfeeding as a protection against breast cancer and about smoking as a risk factor for breast cancer. The results will be incorporated into prenatal education programs and teaching materials.
Status: Data collection in progress.

Project Manager: Chris Abbyad
Building Capacity for Family Planning Education and Counselling in Humanitarian Settings
With the increased influx of refugees into Lebanon there has been an urgent need to meet the family planning needs of this population. Therefore, this funded grant's aim was to build the family planning capacity of health care providers working among Syrian and Lebanese populations. With this end in mind, a series of two day workshops was held in six regional areas throughout Lebanon. Workshop attendees included physicians, social workers, nurses, and allied health professionals working either within Ministry of Public Health facilities or those of local and international NGOs.
Copresenters: **Dina Madi, May Khoury**
Funding: UNFPA Lebanon
Status: Completed. Report submitted.

Principal Investigator: Marina Adra
Constructing the meaning of quality of life for residents in care homes in Lebanon: Perspectives of Residents, Staff, and Family
Located in two care homes in the Lebanon, the study explores the perceptions, perspectives, and meaning of quality of life for a theoretical sample of care staff, family caregivers, and older people. Results: Four themes emerged from this analytical process: i) Maintaining Family Connectedness; ii) Engaging in Worthwhile Activities; iii) Maintaining and Developing Significant Relationships; and iv) Holding and Practicing Spiritual Beliefs. The emergence of these themes confirmed the complex, interrelated, and multidimensional nature of quality of life for residents and other stakeholders. Coinvestigators: John Hopton, John Keady.
Status: Manuscript submitted to the *International Journal of Older People Nursing*.

Principal Investigator: Muhieddine Al-Taki
American University of Beirut Medical Center Department of Surgery: Comparing Subacromial Injection of Platelet-Rich Plasma versus Methylprednisolone in Patients with Shoulder Subacromial Impingement Syndrome
The overall aim is to compare two treatments, platelet-rich plasma and corticosteroid injections into the subacromial space, with regards to symptomatic improvement, pain relief, and functional outcome in a randomized controlled clinical trial.
Coinvestigators: **Souha Fares,** Karim Masrouha, Robert Franjie
Funding: Intramural Funding AUBMC
Status: Data collection in progress.

Principal Investigator: Samir Atweh
The Effect of Aspirin and Clopidogrel on Bleeding, Platelet Aggregation, and Neuronal Damage after Moderate Brain Injury
The overall aims are to evaluate the effect of aspirin, clopidogrel, and both aspirin and clopidogrel on bleeding, platelet aggregation, and neuronal damage in rats after moderate brain injury.

Coinvestigators: **Hala Darwish**, Firas Koubaissy, Aida Habib
Funding: CNRS
Status: Ongoing

Principal Investigator: Lina Badr
The Prevalence and Risk Factors for Maternal Postpartum Depression at AUBMC
The purpose of this cross-sectional correlational study is to investigate the prevalence of postpartum depression (PPD) and to assess the psychosocial predictors of PPD among Lebanese women delivering at AUBMC using the Edinburgh post natal depression scale. The relationship between PPD and duration of breastfeeding will also be assessed. Women assessed to have PPD will be referred for counseling or further interventions and treatment through mental health services at AUBMC.
Coinvestigators: Nelly Ayvasian, Salma Lamah, Sandy Aziz, Lama Chanouha, **Souha Fares, Chris Abbyad**
Status: Data collection in progress

Principal Investigator: Michael Clinton
From Education to Practice: The Challenges that Nursing Students and Novice Nurses Face in Lebanon
This qualitative study involves three university sites and three hospitals in Lebanon. The study is designed to investigate from the point of view of students and registered nurses (RNs) in the first year of practice the challenges they face as they engage in clinical nursing practice. The study focuses on challenges that are unique to Lebanon. Separate focus groups will be formed at the three universities. The three focus groups will explore the challenges students face as they transition to the clinical experience in BSN IV. Separate focus groups will be established at three hospitals in Beirut. The hospitals will be those that generally recruit the most graduates from the respective universities. The three focus groups will focus on the challenges RNs face in their first year of practice in Lebanon. Thematic analysis and the constant comparative method will be used to analyze the data. The study findings may suggest strategies for reducing attrition in BSN programs in Lebanon and may assist hospital administrations to reduce attrition of RNs in their first year of practice.
Coprincipal Investigators: Myrna Doumit, Sawsan Ezzeddine, Ursula Rizk
Coinvestigators: Nour Alayan and Leila Al-Alti
Design: Qualitative study using focus groups
Status: In progress. Data collection is complete. Transcription of focus group data is in progress.

Principal Investigator: Michael Clinton
Ethical Issues in Nursing: Validating the Ethical Issues Scale for Use in Lebanon
This study examined the cultural fit of the Ethical Issues Scale (EIS) and the Psychometric Characteristics of a 32 Item Modified Version of the Scale. Data were collected from 59 English speaking registered nurses at AUBMC. Data were analyzed using commercial software. Disordered responses may be avoided in the future by using a five Likert scale. All EIS items need to be reworded if the EIS is to be used in studies in Lebanon because the scale is confusing. The dimensionality of the scale needs further exploration because principal component analyses (PCA) of residuals suggest the presence of additional dimensions. Additional EIS items are needed to improve targeting.
Coinvestigators: Nour Alayan and Leila El-Alti
Design: Pilot study
Status: Completed and a manuscript has been published.
Publication: **Clinton, M. E**., Alayan, N., El-Alti, L. Rasch analysis of Lebanese nurses' responses to the EIS questionnaire. SAGE Open Aug 2014, 4(3) DOI: 10.1177/2158244014547182

Principal Investigator: Hala Darwish
Effect of Vitamin D on Cognitive Function in Older Adults
The aims of this study are to investigate the level of Vitamin D and cognitive function in adults and older adults in Lebanon and to establish the normative values of three very well established cognitive tests in a Lebanese sample.
Coinvestigators: Brigitte Khoury, **Samia Khoury**
Funding: Medical Practice Plan (MPP)
Status: Data analysis and writing the report

Principal Investigator: Hala Darwish
Inflammatory pattern, Vitamin D level, and Cognitive Performance in Adults and Older Adults
The aim of this study is to investigate the correlation between serum levels of Vitamin D and cytokines with cognitive performance in adults (> 30 years) and older adults (> 60 years).
Coinvestigator: **Samia Khoury**
Funding: Medical Practice Plan (MPP)
Status: Ongoing

Principal Investigator: Myrna Doumit
Knowledge, Attitude, and Practice of Lebanese Women towards Breast Cancer, Breast Self-Examination, and Mammography
The overall aim is to assess the knowledge, practices, and attitudes of Lebanese women about breast self-examination (BSE), mammography, and breast cancer, and to identify potential barriers using Champion's Health Belief Model Scales.
Coinvestigators: **Souha Fares, Mary Arevian**
Funding: Lebanese American University
Status: Data analysis in progress

Principal Investigator: Nuhad Dumit
Analyzing the Antecedents of Nurses in a Private and a Public Not-for-Profit Medical Center in Lebanon
The main aim of this study is to examine sickness absences at major medical centers across the country in terms of prevalence, nature, causes, trends, frequency, cost, and impact on services provided. Another aim is to explore reasons for sickness absence in order to recommend and implement appropriate intervention(s) for effective absence management. A third aim is to validate the JOINT model created in a systematic literature review (article published) by the investigators.
Coinvestigator: Lina Daouk Oyry
Supported by the Evidence-based Healthcare Management Unit, AUB
Status: Ongoing
Publication: Baydoun, M., **Dumit, N. Y**.; Daouk-Oyry, L. What do nurse managers say about nurses' sickness absenteeism? A new perspective. *Journal of Nursing Management*. In Press.

Principal Investigator: Nuhad Dumit
Assessing Basic and Continuing Education Learning Needs of Nurses in Lebanon
The purpose of the study is to identify the basic and continuing education learning needs and preferred ways of learning of bedside nurses in Lebanese hospitals. It is expected that the results of this study will inform the design of basic and continuing education programs for bedside nurses tailored to their needs. This study is in collaboration with the Order of Nurses in Lebanon and nursing faculty members from the University of Saint Joseph, University of Balamand, and Lebanese University.

Coinvestigators: **Souha Fares**, Marie Therese Sabbagh, Mireille Najjar, Gisel Hajal, Vicky Jubran
New project with the support of the Order of Nurses in Lebanon
Status: submitted for IRB approval

Principal Investigator: Laila Farhood
Promoting Psychosocial and Mental Health Care through Community-based Educational Workshops for Teachers and Parents: A Follow-up to Mental Health Assessments in Civilians Exposed to Traumatic Events of War in the South of Lebanon
This intervention study is a follow-up to recommendations from previous studies by the PI revealing high rates of psychiatric morbidity in the south of Lebanon. The specific aims of the study are to (1) identify attitudes and beliefs about mental illness, symptoms, and treatment through focus groups conducted with teachers and parents of students; (2) provide psychoeducation (e.g. effects of trauma, depression in children and adolescents) and psychosocial resources (e.g. solutions for student behavioral challenges within the classroom) to parents and teachers through workshops; and (3) test the efficacy of the intervention by administering questionnaires before and after the educational program to observe changes, if any, in reported mental health problems, attitudes, and practices.

Capacity Building in Chronic Non-Communicable Diseases at the American University of Beirut: A Programmatic Multidisciplinary Curriculum Based on Interfaculty Approach
This training grant aims at building research capacity in chronic, non-communicable Diseases and disorders across the lifespan. The grant includes a short-term certificate program, medium-term mentoring of thesis, and long-term training through a master's degree in clinical research. This program involves the Faculty of Medicine, HSON, the Faculty of Health Sciences, and the Faculty of Agricultural and Food Sciences.

Status: Ongoing. Two cohorts including five nursing graduate students completed the SHARP summer certificate program.

Principal Investigator: Lilian Ghandour
American University of Beirut Faculty of Health Sciences: Adaptation of the Addiction Severity Index Version Five to the Lebanese Population
The aim is to examine how the Arabic-Lebanese translated version five of the ASI-5 (AL-ASI-5) behaves in a sample of a clinical population seeking drug treatment in Lebanon. The study examines the psychometric properties including the reliability and validity of the AL-ASI-5 after administering it to a clinical population of drug users seeking treatment in three treatment centers in Lebanon.

Principle Investigator: Huda Abu-Saad Huijer
Palliative Care in Older Adults in Lebanon
The purpose of this study is to evaluate the quality of palliative care (PC), the quality of life (QoL), symptom management, and functional ability among hospitalized older adults in need of palliative care in Lebanon.
The study will follow the observational survey design. Data will be collected from three hospitals: AUBMC, St. George, and AinWezein. Face to face interviews will be carried out using the Quality of Palliative Care Questionnaire-Adult (QPCQ-A) assembled using several instruments measuring quality of life, symptom prevalence and management, quality of care, and functional ability.

Principle Investigator: Huda Abu-Saad Huijer
Chronic Pain: The Development and Psychometric Validation of an Arabic-Language Version of the Pain Catastrophizing Scale (PCS-A)
Chronic pain is believed to be a disease on its own and has been increasing in prevalence. While reporting or anticipating pain, patients experience a negative "mental set" of catastrophizing that has been described as an exaggerated cognitive-affective response to actual or anticipated pain. The 13-item Pain Catastrophizing Scale (PCS) is the most widely used measure of pain-specific catastrophizing and assesses three dimensions: rumination, magnification, and helplessness. The PCS has been translated and validated in several languages though no Arabic version exists that measures an important predictor of pain and pain-related outcomes. Thus, the purpose of the project is to develop and psychometrically evaluate PCS in the Arabic language among a sample of 150 adults in Lebanon.

Case-based Learning: What the Traditional Curriculum Failed to Teach
This study aimed at exploring perceptions of nursing students regarding the use of case-based learning (CBL) in a baccalaureate nursing program at the AUB. The qualitative focus group research technique was used in the exploration process, guided by assessing professional skills which may be developed with CBL.
Results: The study findings converged on four professional attributes that may be developed when integrating the CBL instructional approach in the curriculum. The attributes include: (1) a salience of clinical knowledge, (2) multiple ways of thinking, (3) professional self-concept, and (4) caring. Findings from this study provide evidence regarding the effectiveness of CBL in the preparation of nursing students and health professionals for practice.

Thinking Skills Developed from Case-based Instruction
The study aims at exploring the nature of thinking skills that can be developed from the case-based instructional approach. Data obtained from 16 nursing graduates who were exposed to case-based learning in two junior nursing courses and a senior course will be analyzed to identify the nature of thinking skills, currently perceived as the most essential skill in learning professional practice.
Status: In progress

Principal Investigator: Samia Khoury
American University of Beirut Medical Center Multiple Sclerosis Interdisciplinary Research (AMIR): A Comprehensive Multiple Sclerosis Database
The overall aims are to investigate the immunological regulatory and cognitive functions in multiple sclerosis and to develop database and bio-markers both to diagnose and follow the course of MS disease.

How Nursing Work Is Organized in Lebanese Hospitals and Its Effects on Nurses' Wellbeing
The objectives of the study are

1. To describe the organization of nursing work in Lebanese hospitals by identifying the models of nursing care in use and their prevalence.
2. To describe nursing staffing patterns in Lebanese hospitals (mainly nurse-to-patient ratios, staff-mix, and educational level of RNs,) and compare them to international standards.
3. To investigate the relationships between the level of nurses' professional education, nursing staffing patterns, models of nursing care, and the incidence of nursing fatigue and muscular skeletal injury.

Coinvestigators: **Michael Clinton**, Fadi El Jardali, Helen Samaha, **Souha Fares**
Funding: HSON Seed money
Status: IRB approval was secured and the first phase of the project started (doing the cognitive interviews to test the questionnaire for cultural sensitivity).

Research/Continuing Education Seminars

The HSON Research Committee (RC) organized a series of monthly research seminars. The aim of these seminars is to disseminate the research findings of the HSON faculty to the AUB community and to get acquainted with other AUB faculty members' research work. The following AUB faculty members were invited to share their research findings:

- ✓ Dr. Lina Daouk-Öyry (OSB):"The JOINT model of nurse absenteeism and turnover."
- ✓ Dr. Rima Afifi (FHS): "The consequences of a perception of lack of dignity: Testing a conceptual framework with data from Arab youth."
- ✓ Dr. Elie Akl (FM) presented a seminar entitled "WHO Process for Guideline Development: The Example of Sharps Injury Prevention."

Research Day

The RC in collaboration with the STTI organized the poster presentations of the HSON research day during which research by HSON faculty and graduate students was presented. This event preceded the AUB School of Nursing Honor Society launching of its chapter.

- Breastfeeding Task Force, AUBMC
- Tobacco Control Research Group member
- Mayo Clinic certification as a tobacco treatment specialist
- Offered smoking cessation on an individual basis
- Offered prenatal childbirth classes to members of the AUB community
- Gave basic fetal monitoring workshop to Delivery Suite staff
- Member, AUBMC OB Council

Marina Adra

- Hariri School of Nursing representative to the National Colloquium Committee, 2014.
- Consultation with the nursing director of Dar Al Ajaza Islamiyya Hospital to select nurse managers and supervisors and help develop leadership skills.

Nuhad Dumit

- Chairperson of the Continuing Education Committee of the Order of Nurses in Lebanon

Souha Fares

- Statistical Consultant. National survey of pupils with learning difficulties in Lebanese public schools

Laila Farhood

- Clinical Associate, Department of Psychiatry, Faculty of Medicine. Clinical activities include psychiatric assessment and psychotherapy (individual, couple, and family therapy) in in-patient and out-patient settings.
- Member, Lebanese Order of Nurses (Founding member)
- Member, American Psychiatric Nurses Association (APNA)
- Member, International Society for Traumatic Stress (ISTSS)

Huda Abu-Saad Huijer

- Member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP).
- Organized HSON research conference and chartering ceremony; advanced the nursing research agenda in Lebanon as president of the STTI CHI Iota Chapter Honor Society at AUB.
- Member, International Scientific Advisory Board, Center of Excellence in Pediatric Pain Management, Faculty of Medicine, Kuwait University, Kuwait.
- Member of the World Health Organization (WHO) Expanded Review Panel on Pain Guidelines since 2009.
- Member, Advisory Committee, Center for Research, Training, and Policy in Arab Mental Health, Faculty of Medicine, AUB.
- Member of the Public Advisory Board, Lebanese Society of Family Medicine.
- Vice-President, National Committee on Pain Relief and Palliative Care (Appointed by Minister of Health) and chair of the Research Committee.
- Member scientific committee, World Congress on Pain 2014, Buenos Aires.

Lina Abi Fakhr Kantar

- Faculty Learning Community on Integrating Higher Order Thinking in curriculum, AUB.
- Member, MEMA Taskforce, May 2015.
- Member of Sigma Theta Tau International, CHI Iota Chapter Honor Society, AUB.

May Khoury

- Hariri School of Nursing representative to the National Colloquium Committee, 2014.
- Active member in Pain Relief and Palliative Care Education Sub-Committee of the National Committee for Pain Relief and Palliative Care established by the Ministry of Public Health.
- Active planner and presenter in the project, "Building Capacity for Family Planning Education and Counseling in Humanitarian Settings," organized by the United Nations Population Fund (UNFPA) and the Hariri School of Nursing, Spring 2014.
- Attended the 6th International Pediatric Simulation Symposia and Workshops (IPSSW) and Orchestration of Pediatric Simulation: Elegance and Harmony IPSSW 2014 Symposia and Workshop in Vienna, Austria, April 23- 25, 2014.

Dina Madi

- Nurses Chapter
- AUB, Traditional Orientation Program Committee (TOP), School of Nursing, Corepresentative.
- Advising Website Committee
- Governance Committee, Hariri School of Nursing Honor Society
- Order of Nurses in Lebanon, member
- The Lebanese Health Association, Board Member
- Sigma Theta Tau International, XiPi Chapter, member
- Sigma Theta Tau International, Chi Iota Chapter, member
- ATCN certified member and instructor. Participated in two ATCN workshops given at the HSON to Lebanese nurses from different hospitals.

Angela Massouh

- Heart Failure Working Group, Lebanese Society of Cardiology, member.
- Leadership Succession Committee, AUB Honor Society, member.

Samar Noureddine

- Reviewer of abstracts for the annual spring meeting of the Cardiovascular Council of Nursing and the Allied Professions of the European Society of Cardiology.
- Representative of the Order of Nurses in Lebanon and member of the Scientific Committee of the 10th Diabetes Day by the Lebanese Society of Endocrinology, Diabetes, and Lipids on November 15, 2014
- Gave a session titled "Evidence-based practice: What it is and how to teach it" at the XIth Makassed Medical Congress, Hilton Habtour Grand Hotel, Beirut, Lebanon November 29, 2014.
- Gave a session, "Writing for Publication," for faculty members from Palestine as part of a teaching excellence workshop for nurse educators at the Hariri School of Nursing, Beirut, November 21, 2014.
- Participated in a multidisciplinary panel on diabetes mellitus: Do we control it with a good diet and healthy life style? organized by the Lebanese Society of Endocrinology, Diabetes,

and Lipids at the Metropolitan Hilton-Hilton Hotel on the occasion of International Diabetes Day, Beirut, Lebanon, November 15, 2014.

Elie Salameh

- Member, Sigma Theta Tau International Honor Society
- Member, Nurse Practitioners Association of Maryland (NPAM)
- Member, Bowie State University Alumni Society
- Member of AUB Alumni Society (North America Chapter)

Hera Tashjian

- Scientific Committee of Lebanese Society of Critical Care Medicine, member
- Worked with the Order of Nurses in Lebanon to establish nursing society for critical care

Lina Younan

- Consultant: Two week consultancy at Khoury Hospital, Zahle, June 30 - July 11, 2014
- Participated in preparing a workshop on professional practice for 250 public health nurses across Lebanon. A collaborative venture between the Order of Nurses and the Ministry of Public Health, November-December, 2014.

VII. REGIONAL EXTERNAL PROGRAMS/GULF ACTIVITIES

- HSON is involved in a number of regional consultancy projects coordinated by AUB's Office of Regional External Programs.

1. HSON designed the nursing program for Fahd Bin Sultan University in Tabuk, KSA. A site visit was made by Dr. Nuhad Dumit at the university and Fahd Bin Sultan hospital to assess a clinical site for student clinical placement and instruction, and to assess feasibility of a nursing skills lab.
2. The second project with REP included training nursing faculty members from the West Bank, Palestine on teaching excellence.

- HSON is collaborating with REP to market its nursing certificate programs to corporate and individual clients nationally and regionally.

In their collaboration with the Continuing Medical Education (CME) Office, HSON faculty members offered two short courses in basic oncology nursing to nurses from Iraq.

VIII. HONORS, AWARDS, AND RECOGNITIONS

AUB HSON won three awards offered by the Scientific Society of Arab Nursing Faculties for the year 2014:

1. Dr. Huda Abu-Saad Huijer won the award for distinguished faculty member.
2. HSON won the award for distinguished academic institution.
3. Mohamad Saab won the Master's Thesis Award.

Dr. Huda Abu-Saad Huijer was invited to be a member of the Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP). The first meeting took place September 22-24, 2014 in New York City, USA.

IX. CONFERENCES

The Hariri School of Nursing in close collaboration with the Sigma Theta Tau International (STTI) Chi Iota Chapter Honor Society in Nursing at AUB organized a research conference, Advancing the Nursing Research Agenda in Lebanon. The conference was organized to celebrate the chartering of the Chi Iota Chapter at HSON, the first STTI Chapter in the Middle East.

Day 1: September 12, 2014

8:00-9:00	Registration
Moderators:	C. Abbyad and S. Noureddine
9:00-9:30	Welcome Words
9:30-10:00	Advancing the Nursing Research Agenda at HSON, H. Huijer
10:00-10:30	Advancing the Nursing Research Agenda; Challenges and Opportunities, L. Fitzpatrick
10:30-11:00	International Doctoral Education: Why Does Lebanon Need It? S. Ketefian
11:00-11:30	Coffee Break
Moderators:	L. Farhood and M. Arevian
11:30-12:00	Mental Health Implications of Marital Violence among a Sample of Arab American Women, A. Kulwicki
12:00-12:30	The Health Status of Armenian Immigrant Population in the United States, L. Huckabay
12:30-14:00	Lunch on your own
Moderators:	H. Darwish and D. Madi
14:00-16:00	Viewing Faculty and Student Poster Presentations

Day II: September 13, 2014

Moderators:	M. Clinton and N. Dumit
9:00-9:30	Should Nursing Research be Promoted as a Separate Field in an Interdisciplinary Era? M. Hill
9:30-10:00	The National Council for Scientific Research (CNRS) Research Priorities, M. Hamzeh
10:00-10:30	WHO Nursing Research Priorities, F. Al-Darazi
10:30-11:00	International Council of Nurses Global Research Priorities, D. Benton
11:00-11:30	Coffee Break
Moderators:	M. Doumit and L. Younan
11:30-12:00	Championing Nursing in Lebanon; Perspective of Order of Nurses, H. Nuwayhid
12:00-12:30	Championing Nursing in Jordan: Tuning the Nursing Landscape for the Future, R. Al-Maaiteh
Moderators:	H. Darwish and M. Adra
12:30-13:30	Viewing Faculty and Student Poster Presentations
13:30- 15:00	Lunch on your own

Chi Iota Chapter Chartering Ceremony

15:00-15:10	Welcome and Introductions, H. Huijer
15:10-15:40	STTI and Nursing Scholarship. H. Klopper
15:40-17:00	Chi Iota Chapter Induction; President and Board
17:00-18:00	Reception

X. INTERNATIONAL PARTNERSHIPS

HSON currently has Memoranda of Understanding (MOUs) to enhance research collaboration and student and faculty exchange with the following institutions:

- Johns Hopkins University School of Nursing
- University of Michigan School of Nursing
- University of Villanova College of Nursing
- University of Maryland School of Nursing
- University of Technology, Sydney, Australia

XI. SIGMA THETA TAU INTERNATIONAL (STTI) HONOR SOCIETY

The Hariri School of Nursing American University of Beirut Nursing Honor Society was approved and chartered as an official chapter of the Honor Society of Nursing, Sigma Theta Tau International (STTI), on Saturday September 13, 2014. To celebrate this occasion, a research conference, Advancing the Nursing Research Agenda in Lebanon, took place on September 12-13, 2014 at HSON. Dr. Hester Klopper, STTI president, and Dr. Huda Abu-Saad Huijer, chapter president, and the Chi Iota Board conducted the chartering ceremony at HSON in the Hisham Jaroudi auditorium.

A total of 131 members were inducted into the chapter. Membership in STTI is by invitation and is extended to undergraduate students, graduate students, faculty, and professional nurses who have demonstrated superior scholastic, leadership, and nursing achievements. STTI is a not-for-profit organization whose mission is to improve the health of people worldwide through leadership and scholarship in practice, education, and research. Founded in 1922, this organization's members include practicing nurses, faculty, researchers, policymakers, entrepreneurs, and others.
The honor society's more than 480 chapters are located at institutions of higher education throughout the world. The HSON Chi Iota Chapter is the first STTI chapter in the Middle East.

The current board of the Chi Iota Chapter is as follows:

A. President: Dr. Huda Abu-Saad Huijer
B. President-Elect: Dr. Christine Abbyad
C. Vice President: Mrs. Mary Arevian
D. Secretary: Dr. Myrna Doumit
E. Treasurer: Mr. Ghassan Afram
F. Counselor: Dr. Dina Madi

XII. HSON EXTERNAL ADVISORY BOARD (EAB)

Mandate and Purpose of the EAB

The External Advisory Board of the Rafic Hariri School of Nursing consists of invited members from leading universities engaged in baccalaureate and graduate nursing education and research, leaders of nursing and health care institutions, and dignitaries with established track records in related fields. The EAB advises the director by serving as a bridge between HSON and the international nursing community.

The inaugural meeting of the EAB took place on Monday, September 15, 2014, during which Dr. Martha Hill was elected as chair. Current and future developments at HSON as well as information on current and future academic programs were discussed. The Terms of Reference were revised and future plans for meetings approved.

Purpose of the EAB:

- To provide strategic advice relevant to current and proposed initiatives of HSON and provide feedback on the progress of the school against its strategic goals.
- To assist HSON in realizing its mission by promoting it to organizations and individuals with the potential to contribute to student scholarships, research, and faculty development.
- To encourage HSON in its developments of nursing education and nursing research especially as they relate to CCNE accreditation, international benchmarking, and opportunities for collaborative funded research, doctoral studies, and student and faculty exchanges.
- To promote the continued dialogue between HSON and the professional community with the goal of improving academic program quality and societal relevance.
- To advise on marketing and public relations opportunities to improve the status of the profession and student recruitment.

Members

- Dr. Martha N. Hill; Dean Emerita. Professor of Nursing, Medicine and Public Health, Johns Hopkins University, School of Nursing (Chair)
- Dr. Walid Ammar, Director General, MOH
- Dr. David Benton, CEO, International Council of Nurses (ICN)
- Dr. Louise Fitzpatrick, Connelly Endowed Dean and Professor, College of Nursing, Villanova University
- Former First Lady Mrs. Mona Hrawi
- Dr. Hester C. Klopper, President Sigma Theta Tau International Honor Society of Nursing
- Dr. Rowaida Al-Maaitah Advisor to HRH princess Muna Al Hussein for Health and Community Development, Former Minister of Higher Education and Scientific Research, Professor at Jordan University of Science and Technology.
- Mrs. Helen Samaha Nuwayhid, President of the Lebanese Order of Nurses

XIII. HSON NEWSLETTER

- HSON is in the process of publishing the fifth issue of its newsletter.
- The newsletter includes interviews with new faculty, highlights of current faculty, and interviews with graduating undergraduate and graduate students, as well as results of research projects. A special section is devoted to student activities. Reports on the following are included: the welcome reception for new students, NSS projects, Research Day, award ceremonies, and graduation celebrations. Links to various reports are included as well as personal news about faculty and staff.

XIV. ACHIEVING FACULTY STATUS FOR HSON

HSON currently functions semi-autonomously:

- Huda Abu-Saad Huijer is an ex-officio member of the AUB Board of Deans.
- HSON processes all HSON appointments, reappointments, and promotions.
- HSON manages its own budget and continues to use surplus monies for HSON scholarships.
- HSON has a new organizational structure with two divisions.
- HSON currently has representatives on a number of task forces and AUB committees including the AUB Board of Graduate Studies Senate Committee.
- The proposal to transition HSON faculty members to 9-month contracts was approved effective October 2013.
- Achieving full faculty status remains an important strategic goal for HSON.

XV. LOOKING AHEAD

HSON plans to launch a number of new academic programs:

- Accelerated BA/BS-BSN (second degree) program. A promotional campaign using the American Association of Colleges of Nursing Centralized Application Service for Nursing Schools (AACN NURSING CAS) along with national campaigns will continue to be used to recruit students for the program.
- Postgraduate certificates in community nursing, critical care nursing, leadership and management, and nursing informatics are currently being launched by REP. Plans to move all certificate programs to HSON are underway.
- A PhD program is currently being developed and will be launched in close collaboration with the Faculty of Health Sciences, the Faculty of Medicine, the Johns Hopkins University School of Nursing, and the University of Michigan School of Nursing.
- HSON is currently exploring the possibility of offering a nurse executive track.
- Summer and Winter Nursing Institutes: HSON will continue to collaborate with partners in the United States and with experts in the region and in Lebanon to offer high-quality courses on special topics. These courses are open to MSN and other AUB students and to participants from Lebanon and the region.
- Student recruitment will continue to be a priority. HSON awarded 25 merit scholarships this year and will continue to work on securing bursaries for BSN students.
- More emphasis will be placed on graduate recruitment at the national, regional, and international levels in close collaboration with AUB's Graduate Council.
- The recruitment of an endowed chair to direct HSON's Center for Nursing Research will continue to be a priority.
- Collaboration with AUBMC/Nursing Services continues to be an important priority for HSON. A number of joint appointments have already been approved.
- HSON is preparing to celebrate the 110th anniversary of the school in 2015. Public lectures, academic projects, and an international interdisciplinary conference are some of the activities being planned.

Exhibit II.02: CV of Dean Farhood

CURRICULUM VITAE
LAILA FARIS FARHOOD
Interim Dean and Professor
Hariri School of Nursing
American University of Beirut

Biography
I am a Professor of Psychiatry Mental Health, School of Nursing & Clinical Associate at the Department of Psychiatry. I am an experienced researcher with an impressive list of publications. My Research agenda focuses on complex issues contributing to the physical and psychological wellbeing of those at-risk stressors. I studied PTSD (Post Traumatic Stress Disorder), depression, coping and social support in Beirut and the South of Lebanon & in vulnerable populations. My present research focuses on promoting psychosocial and mental health care through community-based educational workshops for teachers and parents. I have also been an invited speaker at local and international conferences focusing on the above issues.

I have published my research in international refereed journals and have presented scientific papers in National, regional & international academic conferences.

Due to my research focus on the above issues, I was appointed as mental Health coordinator by the World Health Organizations (WHO) to coordinate mental health activities in Lebanon during and after the Israeli war on summer 2006.The main objective for this Mental Health National Plan was to help the traumatized Lebanese cope with war atrocities. I developed a program for training primary health care personnel (Physicians, nurses, psychologists and social workers) so that in turn they help those under their care. Also, I developed training manuals for their use in both languages' Arabic and English. Additionally, I proposed a national mental health plan for sustainability of such program in Lebanon, which was adopted by WHO, and Lebanese Ministry of Health (MOH) long term. Additionally, as a clinician, I practice psychotherapy, family & couple therapy at the psychiatry Department, AUBMC. My expertise falls under a wide variety of concerns such as Anxiety, Depression and Eating and PTSD in addition to more serious mental health issues.

I am the coordinator of MSN psychiatry-mental Health track (CNS) teaching all its graduate courses in addition to PhD courses and supervision of theses and projects.

I. Educational Background

- PhD, May 1993, Psychiatry Mental Health University of Maryland, Nursing Science.
- MSN, CNS, May 1975, Indiana University Perdue University at Indianapolis, Nursing, Psychiatry Mental Health Nursing, Clinical Specialist-Family and Marital Therapy, Individual therapy.
- Bachelor of Science, June 1971, American University of Beirut, School of Nursing, Nursing

II. Employment History

Academic

- Professor, July 1995-present, Hariri School of Nursing (HSON), American University of Beirut (AUB)
- Clinical Associate/Medical Staff (Psychotherapist: individual, couple and family therapy), July 1999-present, Psychiatry Department, American University of Beirut Medical Center
- Associate Professor, Chairperson, Psychiatry-Mental Health Nursing, July 1986-1995, HSON, AUB
- Mental Health Consultant, Family Medicine, American University of Beirut Medical Centre, 2000-2005
- Assistant Professor, Chairperson, Psychiatry-Mental Health Nursing, July 1978-1986, HSON, AUB
- Instructor, Psychiatry Mental Health Nursing July 1975-June 1978, HSON, AUB
- Assistant Instructor, Feb 1972-June 1973 HSON, AUB
- PS, LOA graduate Studies, Indiana University 1973-1975
- LOA PhD Studies, University of Maryland 1990-1993
- Distinguished Dean Colvard Visiting Professor, University of North Carolina, Charlotte, NC, USA February - August 1998

Administrative

- Interim Dean, September 2019-present, Hariri School of Nursing (HSON)
- Associate Dean for Academic Affairs, September 2018-2019, HSON
- Graduate Program Convener, 2011-2018, HSON
- Graduate Program Coordinator, 2003-2011, HSON

III. Awards/Honors

Distinguished Nursing Research Award by the Scientific Society of Arab Nursing Faculties **(October 2017)**

President Faldo Khuri award for dedication of professional life to AUB, (**September 2017)**

Honoring Ceremony Faculty of Medicine (F.M Dean) (also speaker on behalf of honored faculty), (**December 22, 2011)**

Suad Sabbah Award for distinguished research, AUB Alumni Association, (**April 19, 2007)**

Alumni Award, AUB Nurses Chapter, (**2004)**

Distinguished Service Award, Order of Nurses in Lebanon, (**2003)**

WHO's WHO among Students in American Universities and Colleges, (**1993)**

The National Honor's Deans List, USA (**1993)**

Distinguished Graduate Ph.D. Award, Hariri Foundation, (**November 1993)**

Sigma Theta Tau International (Pi Chapter) - Graduate Student
Outstanding Research Award, University of Maryland, (**May 1993)**

(Invited Speaker). "Sex Education in Schools" Panel **presented** at Makassed (published in its continuing education journal), January 22, 1979, Beirut, Lebanon.

(Invited Speaker). "Health Care Delivery: The Team Approach" **presented** at Health Sciences Orientation Day, AUB, Spring 1978, Beirut, Lebanon.

(Invited Speaker). "Coping Difficulties: A Concept for Nursing" **presented** at AUBMC Hospital, In-Service Continuing Education, April 12, 1978, Beirut, Lebanon.

V. GRANTS

1. Empowering Families to cope with adversity: Improving family resilience and individual wellbeing. Submitted proposal in collaboration with IMC (International Medical Corps) and Jones Hopkins University to European R2HC funding (Proposal was not funded March, 2020)

2. Lebanese families' functioning during COVID-19 pandemic: cohesion, stress & abuse submitted June,2020 to Qatar Foundation.

3. MPP/URB funding for the Intervention study "Promoting psychosocial and mental health care through community-based educational workshops for teachers and parents: A follow-up to mental health assessment in civilians exposed to traumatic war events in the South of Lebanon". Renewed 2013-14-present.

4. NIH application January 2012. Nahhas, Z., Amiri, A., Attalla, S., Chayya, M., **Farhood, L.**, Greer, T., Henry, H., Khoury, B., Mousharaffieh, U., Sarhan, W., Trivedi, M., title of proposal: "Investing in Training and Research to Treat Depression and Anxiety" (ITREAT-DA), not funded.

5. WHO fund # 116010-526216 PTSD, Depression & Health status in Civilians from South Lebanon (2007-2009)

6. MPP funding for PTSD/ group intervention in South Lebanon (2008-09).

7. WHO funding for PTSD, Depression study in South Lebanon 2007-2008).

8. PTSD, Depression & Mediating Factors, Effect of Exposure on Population from Southern Lebanon. Funded by USAMRAA, DOD (Department Of Defense) USA, No. W81XWH-05-1-0320, 2005-06 and URB, October 2005. Grant No. DCU 114100 - 48762, URB, 1992 (AUB-URB).

9. Depression and Health Status in Lebanese Prisoners of War. Funded by MPP & URB. Grant No. 116010 48001, 1996-97 (URB-AUB)

10. Short term faculty development – URB spent 14 days at University of Maryland, Baltimore, to finalize research papers and to present a research study at a conference there. Grant No. 55390 - 179960, URB 1993-1994 (AUB). All my research was funded by MPP/URB in addition to WHO and DOD

VI. TEACHING

A. Courses taught

a. PhD

N 601 PhD course (Philosophical and Theoretical Perspectives in Nursing Science), Fall 2018-2021

b. Graduate

Conducted the need assessment project for MSN, 2000.
Initiated the Psychiatry Mental Health Track (Chair), fall 2008-present, teaches all courses in the Psychiatric Mental Health Nursing track
NURS 501 3cr Foundations of Advanced Practice 2003-present (Annually/ fall).

PMHN Track courses:
NURS 517 3 credits Models of treatment-Psychotherapy (annually)
NURS 511K Stress Management: Summer 2007, 2009
NURS 518 3 credits Group & Family Therapy (annually)
NURS 502 (4cr) Advanced Nursing Research Spring 2007-2008
NURS 516 3 credits Psychopathology & Human Behavior (annually)
NURS 512, 2 credits Advanced Psychiatric Mental Health Assessment (annually)
Supervising projects, theses and residency (NURS 519, 528 & 598)
Psychiatry & Psychology course Medicine II, faculty of Medicine, AUB (gave course for more than 10 years – 1979- 2003), Coordinated and taught the course during years of war when psychiatrists were not available at AUB; afterwards gave parts of the course with others professors from the Psychiatry department.
"Theories of Guidance and Counseling". Graduate course in the Education Department which I gave to replace Foreign Professors who left the country due to security situation. Spring 1986
"Psychotherapy", "Family Therapy", spring 1987 – present; and "Marital & Sexual Therapy" Lectures and clinical seminars for Family Medicine Residents, AUB.

Guest lecturer, Lebanese University, Fall 2003-2004. Graduate Program in Nursing, summer 2004 (Mental Health Module); Fall 2005-2006 & 1010-1015.
Seminars **presented** to residents: spring, summer, fall, 1999-2004
at AUB, Family Medicine Department, and each session 3 hours:

- Family Systems Medicine Practicum and Consultation.
- Marital Assessment.
- Primary Care Psychotherapy Clinic.
- Resistance/Compliance.
- Changing Behavior.
- Sexual Abuse.
- Psychotherapy for the Primary Care Physician (Workshop).
- Individual therapy, general systems theory, marital and family therapy.
- Female Sexual Response at Family Medicine
- Cognitive Behavioral Therapy at Family Medicine

c. Undergraduate

N. 402 (3 cr.) Psychiatry - Mental Health Nursing, Theory. Bi- annual
N. 403 (3 cr.) Psychiatry - Mental Health Nursing, Clinical. Bi-annual now 402 is 5 cr. (Th & cl given twice per year) Undergraduate students BSN IV (1975-2017)
These courses are offered Fall and Spring Semesters of every year (1975-2003) concurrently the same courses were offered at OCP Fall l986. After 2003 they were offered annually.
N. 200, 201 Fundamentals of Nursing (team taught) guest lecturer 80's-2002.
N 406 Nursing Research (Introduced the course to the Undergraduate curriculum & taught it for several years (1975-1982)

B. Other teaching positions and guest lectures

Continuing education course: Psychiatry update to 8N Nurses at AUH (10 hours). Fall 1998-99.
Taught the graduate course "Family Health Care: Cultural Issues" at University of North Carolina, Charlotte, Spring-Summer 1998 (During sabbatical leave from AUB).
Psychiatry course at Al-Ain School of Nursing, United Arab Emirates. January 19-February 1, l996.
Guest lecturer at Faculty of Health Sciences, M.P.H. program. Fall & Spring l994, Spring l995.
Psychiatry-Mental Health Nursing course - College of Nursing, Abu-Dhabi. September 16-28, 1989.

C. Master's Thesis Supervision & faculty promotion

Member thesis committee Bayrakdar A., (Noureddine S., Nasrallah N., Farhood L.), Comparison of quality of life in Lebanese Subjects with Type I Diabetes on Insulin Pump and these on multiple daily injections".2009.

Exhibit II.05: Preceptor Contract

PRECEPTOR CONTRACT

TO: Mr. Ali Krayani

FROM: Huda Huijer, RN, PhD, FEANS, FAAN
Founding Dean, Rafic Hariri School of Nursing

DATE: September 01, 2018

SUBJECT: Preceptor agreement

This letter is to confirm your agreement with the Hariri School of Nursing to serve as preceptor in accordance with the following details:

Term:	Fall 2018 – 2019
Course:	NURS. 300 – Section 1 & 2
Course coordinator(s):	Dr. Marina Adra & Lina Kantar
Clinical hours:	Clinical days plus preparation, correction, evaluation and meeting time

Payment:

To make payment possible and easy, please fill your preceptor log sheet (provided by HSON) on a regular basis as applicable. The form has to be submitted at the end of each month, signed both by the preceptor and the course coordinator.

Rate per hour: L.L. 25,000 per hour

cc: Dr. Marina Adra, HSON
Dr. Lina Kantar, HSON
HR-AUBMC

Approved

Iman Al Kouatly, RN, MPH

Director of Nursing

Dear PhD students

I want to thank you all for your time and contribution to N307 during this summer . Our students appreciated and enjoyed your exceptional dedication and hard work that made this course a success. Due to your close students' follow up and professional support, we witnessed many students improving their knowledge and skills and thus passing the course successfully. It was a pleasure working with each and every one of you and I hope we will collaborate together in further upcoming courses.

Sincerely
Danielle Damianos

Course Logistics

Course Title	NURS 501 Professional Foundation of Advanced Practice
Semester	Fall 2020
Credit Load	2 credits; Theory; Blended
Timing	Tuesdays 12 to 2pm; HSON Classroom 218
Zoom	HSON Zoom2 is inviting you to a scheduled Zoom meeting. Topic: NURS 501 Weekly Meeting https://zoom.us/j/91637478767?pwd=S3NrQUROcVVYU09aaTRrc2toTEV4QT09 • Meeting ID: 916 3747 8767 • Passcode: 621036
Course Faculty	**Angela Massouh, PhD, CNS** Assistant Professor | Adult and Critical Care | HSON Nurse Leader | Research, Education and Innovation | AUBMC Cardiology Clinical Nurse Specialist | AUBMC **Office**: HSON Room 411-C | **Work**: +961-1-350000 x 5959 **Office Hours**: By Appointment Only

Course Description

This blended two-credits course is intended to provide the student with knowledge related to the advanced practice roles and highlights the competencies and challenges in today's healthcare environments. Students develop a vision and structure for Advanced Practice Nursing (APN), which includes the Consensus Model for Advanced Practice Registered Nurse (APRN), regulation, credentialing, and emerging professional issues facing APN roles.
The course concentrates on the foundations and philosophy of care in different specialties and health care settings. Legal issues related to APN, and interdisciplinary relationships are highlighted. This two-credits course complements NURS 500: Theories, Concepts and Frameworks for Advanced Nursing practice. It provides theoretical foundations relevant to all the tracks in the Master of Science in Nursing program and serves as a guide to designing relevant intercourse on all the facets of advanced practice.

Course Objectives

Upon the completion of the course, students will be able to:

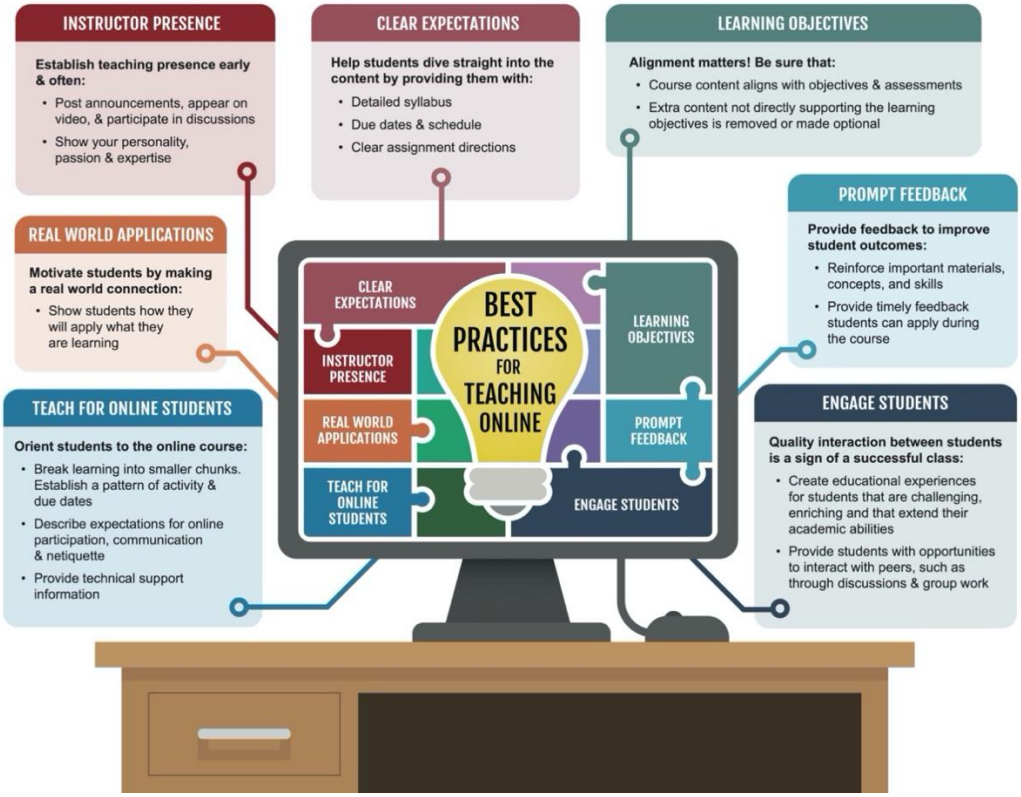
1. Discuss the historical development of Advanced Practice Nursing (APN).
2. Critically evaluate the context in which scientific knowledge develops.
3. Describe the roles and competencies of the APRN including clinical, consulting, research, leadership, collaboration, change agent and ethical decision-maker.
4. Review the philosophy underlying advanced nursing practice.
5. Conceptualize and articulate the distinction between advanced and generalist nursing practice.
6. Analyze the impact of socio-cultural, economic and political issues on nursing practice and health care delivery.

7. Examine the relationship of health care to social and health policy development and implementation.
8. Detail the principles underlying comprehensive professional regulation and standardization.
9. Evaluate research findings on advanced practice roles.

Teaching Methods

1. **Faculty Led:**
   - Face-to-Face lectures and seminars
   - Synchronized and asynchronized online classes
   - Online activities
   - Assignments and Course Papers

2. **Student Led:**
   - Group Projects
   - Independent reading of assigned chapters and materials
   - Active Moodle based participation in class discussions



Textbooks

Required Text

Tracy, M.F & O'Grady E.T. (2019) Hamric & Hanson's Advanced Practice Nursing: An Integrative Approach. (6th Ed.) St. Louis, Missouri: Mosby Elsevier.

Learning Assessment

Your course grade will be divided as follows:

Topic	Grade
Test Your Knowledge	5%
Discussion Boards: due by Sunday 11pm of the assigned week	25%
Paper 1 due October 25 at 11pm	15%
Paper 2 due December 1 at 11pm	30%
Seminar Presentation	25%

Your grade will be posted in letter grade format according to the below scale [as per AUB]:

Course Grade /100	Letter Grade	Course Grade /100	Letter Grade
93-100	A+	69-71	C+
87-92	A	66-68	C
83-86	A-	63-65	C-
79-82	B+	61-62	D+
75-78	B	60	D
72-74	B-	<60	F

Course Assignments

Test your Knowledge

These are multiple choice questions that follow some lectures and will help you make sure you have attained the chapter outcomes and reinforce your learning. Please do this **independently, after you finish the lecture.** You will find these under the chapter pertaining to the Test Your knowledge exercise or embedded throughout the asynchronous interactive lectures.

Paper 1: Collaboration and Role Clarity or International Development

You get to choose between one of the below options:

1. **Collaboration and Role Clarity**

You are asked to submit a one-page paper commenting on the below statement talking about healthcare collaboration from your own experiences: "Physicians are the white people of healthcare professions. We do not always have an appreciation or interest for the roles/experiences of other professionals on our care teams. We are worried that others (Nurse Practitioners or Physician Assistants) will take away our privilege. We need to lateralize the hierarchy." Uche Blackstock, MD.

2. **International Development for Advanced Practice Nursing**

When looking at the different APN roles from an international perspective, it is apparent that each of the roles is evolving with country- or region-specific differences. You are asked to submit a one-page paper reflecting on one difficulty you expect to face APNs working in Lebanon.

Paper 2: Role Development

Throughout the course, you will be interviewing/e-meeting Advanced Practice Nurses and comparing the role of the Advanced Practice Nurse to the theoretical components of the role as outlined in the literature.

This assignment builds on the learning in class to look more closely at what is required for the successful implementation of a new advanced practice role in a health care setting/specialty of your choice. You will be expected to write a maximum 5-page paper [**strictly** following APA guidelines] discussing the issue of role clarity, implementation, and change management at the local level.

Below is the grade rubric:

Outline	**Grade**
Role Definition and Introduction	**5**
Core competencies of the selected role: • Describe and provide examples • Develop a sample job description and attach this as an appendix.	**10**
Role Implementation • Describe how will you prepare/introduce the role • Identify your key stakeholders	**5**
Change management at the local level. • Describe what needs to change to adapt to the healthcare setting you work in.	**5**
Describe how you will deal with issues of **role clarity** and overlap between Advanced Practice Nurses and Physicians.	**5**
	Over 30

Seminar Presentation

In groups of 3, you are expected to present about an advanced role in a specialty of your choice. Evaluation is based on the content, clarity, organization, relevance and creativity.

Your presentations should include the below elements:

- Definitions of terms
- History and overview of the role
- Educational preparation and Comparison of APN Curricula
- Spheres of influence
- Scope of Practice
- Core Competencies
- The Lebanese Situation
- Research and Challenges
- Conclusions
- References

You can invite a guest speaker from AUBMC and outside [names need to be approved by course coordinator]. Possible Guest Speakers include:

- **Adult Care: Clinical Nurse Specialists:**
    1. Dr. Angela Massouh: Cardiology and Heart Failure | AUBMC Lebanon
    2. Mrs. Janane Hanna: Pain and Palliative Care | AUBMC Lebanon
    3. Mrs. Rebecca ElAsmar: Adult Oncology | AUBMC Lebanon
    4. Mrs. Sabat Jamous: Critical Care | AUBMC Lebanon
    5. Mr. Mohammad Issa: Adult Health | AUBMC Lebanon

- **Adult Care: Nurse Practitioners**

1. Dr. Hala Darwish: Neurology and Cognitive Rehab | AUBMC Lebanon
2. Mr. Anthony Shamoun: Neurology | United States
3. Dr. Imtithal Keserwan: Emergency | United States

- **Pediatrics Clinical Nurse Specialists:**
  1. Mrs. Rima Saad: Pediatric Oncology | AUBMC Lebanon

- **Pediatrics Nurse Practitioners:**
  1. Dr. Lina Badr: Pediatrics | United States

- **Psychiatry Clinical Nurse Specialists:**
  1. Dr. Laila Farhood | AUBMC Lebanon
  2. Mrs. Selina Yammout | Lebanon
  3. Ms. Sara Abu Rihan | Dubai

- **Certified Nurse Midwife**:
  1. Dr. Alexandra Michel | United States
  2. Dr. Christine Weir Abbyad | United States

- **Community**:
  1. Dr. Gladys Honein | Lebanon
  2. Ms. Taline Gulgulian | Lebanon

- **Administration**:
  1. Dr. Dany Badreddine: Administrator | SSMC Abu Dhabi
  2. Ms. Grace Kurkjian: Case Manager | AUBMC Lebanon
  3. Dr. Rachel Hamdan: Case Manager | AUBMC Lebanon
  4. Mrs. Nada Nassar: Nursing Quality officer | AUBMC Lebanon

Below is the grade rubric:

Outline	**Grade**
History and overview of the selected APN role	**2**
Educational Preparation ▪ Educational preparation of APNs assuming this role ▪ Comparison of APN Curricula in Europe, US, and Lebanon	**4**
Spheres of **influence**	**3**
Scope of **Practice**	**2**
Core **competencies**	**4**
Example from **Lebanon**	**2**
Research and **Challenges**	**5**
Presentation Style ▪ Flow and Pace ▪ Content ▪ Clarity and Organization ▪ Relevance ▪ Creativity	**3**
	Over 25

Discussion Boards

This course includes 5 discussion boards that you will need to provide input on throughout the semester. Please make sure you respond to these discussions before the assigned deadline.
Topics include:

1. **History of Advanced Practice Nursing in Lebanon**

Two students will lead this activity. Students will interview [using Q&A or a 5-minute Video] Mrs. **Hera Tashjian** or **Ms. Gladys Mouro** or **Dr. Angela Massouh** on the History of Advanced Practice Nursing at the American University of Beirut Medical Center/Lebanon. The interview should focus on knowing how the role started, how it evolved, and major challenges and contributions.
The class is expected to comment on the development of the role in comparison with the evolution of this role in the international literature.

2. **CNSs and Direct Care**

Direct patient care is the heart of the Clinical Nurse Specialist (CNS) role, yet it is easy for the direct care component of the role to be overemphasized or underemphasized because of institutional priorities and competition for CNS expertise.
Two students will explore evidence of these issues with 2 CNSs in a practice setting [Suggestions: Mrs. **Janane Hanna**, Mrs. **Rebecca ElAsmar**, or Dr. **Angela Massouh**]. Specifically, these students will explore the 3 spheres of influence and advanced practice nursing competencies with the CNS as it relates to her/his roles in practice. The students are then asked to lead a discussion group that allows other students to share their points of view.

3. **Outcomes of APNs versus Physicians**

Each student will analyze one research study comparing outcomes of Advanced Practice Nurses and physicians in their area of specialty. Address: Study aim, type, methods, outcome measured, and results.

4. **Career Journey Interviews**

Four students [using Q&A or a 5-minute Video] will interview faculty members and Advanced Practice Nurses on their career journeys.

a. Dr. **Hala Darwish:** address her journey from being an Emergency Department registered Nurse, a Neurology Nurse Practitioner, an academic associate in Cognitive Rehabilitation, and a researcher in Acquired Brain Disease.
b. Dr. **Laila Farhood:** address her journey as Psychiatry and Mental Health Clinical Nurse Specialist, first holder of a PhD in Nursing in Lebanon, an academic associate in the department of Psychiatry, and a researcher in Post-Traumatic Stress Disorder.
c. Dr. **Lina Younan**: address her journey from a bedside nurse to a director of nursing. Discuss her MSN and DNP journeys as well as the move into academia and research. Address the impact of her academic work on nurses in Lebanon.
d. Dr. **Dany Badreddine:** address his journey from a bedside ED registered nurse to an MSN graduate [administration track] to a DNP holder and hospital executive administrator.
e. Mrs. **Rebecca ElAsmar** (Adult Oncology Clinical Nurse Specialist): address her journey from oncology registered nurse to Adult Oncology Clinical Nurse Specialist, her certification, and her involvement in Balsam.

5. **Doctorate in Nursing Practice**

At present, Adult Gerontology Acute Care Nurse Practitioners (AG-ACNPs) are registered nurses who are prepared at the master's level of graduate nursing education. Doctorate in Nursing Practice (DNP) programs are emerging throughout the country and prepare AG-ACNPs with additional knowledge and skills in a clinical practice.

One student will explore the literature to find a sample curriculum for AG-ACNPs at the master's level and another at the DNP level. The group is expected to do an analysis of the curriculum courses to identify the differences and overlap between the levels of preparation of AG-ACNPs.

Post and Response Evaluation Rubric	
Initial Post	**Peer Response**
1. Relevance to the Topic of Discussion: Does the posting address the question? ▪ The posting directly addresses key issues, questions, or problems related to the topic of discussion. ▪ The posting applies course concepts with examples showing applied knowledge and understanding of topic with appropriate use of at least two citations/references. ▪ Post has been submitted by the due date. **2. Insight and Application of Course Concepts:** Does the posting attempt to take ideas from the text and put them into play? Does the posting offer something worthwhile to think about? ▪ The posting offers original and thoughtful insight, synthesis or observation that demonstrates a strong understanding of the concepts and ideas pertaining to the discussion topic (use of examples). ▪ Use of at least two appropriate citations/references to support all claims and facts.	1. **Number** ▪ Two peer responses are provided with at least one peer response that has a citation/reference; each posted on a different day from each other and from the initial post. 2. **Quality** ▪ The response is a substantive interaction that builds on the discussion question and ideas of others while using course content with appropriate citation/references. ▪ Post is made by the due date.

Class Schedule

Date	Time	Topic	Speaker	Student Expectations
August **31**	12 to 1pm	Course Introduction Advanced Practice Nursing (APN) Global and Lebanon	Dr. Angela Massouh	Read Syllabus After Class Plan Your Course Agenda
	1 to 2pm	Conceptualizations and Definition	Dr. Angela Massouh	Tracy and O'Grady Ch. 2 +3
Module 1: Historical and Developmental Aspects of Advanced Practice Nursing				
September **7**	Independent	Evolving and Innovative Opportunities	Dr. Angela Massouh	Tracy and O'Grady Ch. 5
	Independent	International Development for Advanced Practice Nursing	Dr. Angela Massouh	Tracy and O'Grady Ch. 6
September **14**	12 to 1pm	Role Development of Advanced Practice Nursing	Dr. Angela Massouh	Tracy and O'Grady Ch. 4
	1 to 2pm	Clinical Nurse Specialist Example from Lebanon	Mrs. Janane Hanna	None
September **21**	12 to 1pm	Understanding Regulatory and Credentialing Requirements	Dr. S. Noureddine	None
	1 to 2pm	Understanding Regulatory Requirements in Lebanon	Dr. Nuhad Dumit	None
Week of September 20	**Moodle Discussion Board 1: History of APN in Lebanon**		Student Led	Moodle Discussion
Module 2: Competencies of Advanced Practice Nursing				
Week of September 27	**Moodle Discussion Board 2: CNSs and Direct Care**		Student Led	Moodle Discussion
September **28**	1 to 2pm	Direct Clinical Practice	Dr. Angela Massouh	Tracy and O'Grady Ch. 7
	Independent	Evidence Based Practice	Student Led	Tracy and O'Grady Ch. 10
October **5**	12 to 1pm	Guidance and Coaching	Dr. Angela Massouh	Tracy and O'Grady Ch. 8
	1 to 2pm	Consultation	Dr. Angela Massouh	Tracy and O'Grady Ch. 9
October **12**	Independent	Leadership	Student Led	Tracy and O'Grady Ch. 11
	12 to 12:30pm	Examples from Lebanon: Pain and Palliative Care	Mrs. Janane Hanna	None
	12:30 to 1pm	Examples from Lebanon: Adult Oncology	Mrs. Rebecca Asmar	
	1 to 2pm	Collaboration	Dr. Angela Massouh	Tracy and O'Grady Ch. 12
Week of October 11	**Moodle Discussion Board 3: Outcomes of APNs versus Physicians**		Student Led	Moodle Discussion

Date	Time	Topic	Speaker	Student Expectations
October **26**	12 to 2pm	The Clinical Nurse Specialist	Dr. Angela Massouh	Tracy and O'Grady Ch. 14
November **2**	Independent	The Primary Care Nurse Practitioner	Dr. Angela Massouh	Tracy and O'Grady Ch. 15
	Independent	The Adult Gerontology Acute Care Nurse Practitioner	Dr. Angela Massouh	Tracy and O'Grady Ch. 16
	1 to 2pm	Quick Review of Common Concepts	Dr. Angela Massouh	None
Week of November **1**	**Moodle Discussion Board 4: Career Journey Interviews**		Student Led	Moodle Discussion

November **16**	12 to 2pm	**Student Seminar Presentations**	Student Led	None
November **23**	12 to 2pm	**Student Seminar Presentations**	Student Led	None
November **30**	12 to 2pm	**Student Seminar Presentations**	Student Led	None

AUB Policies

Attendance and Grading

Students will adhere to the AUB class attendance policy as stated in the AUB Catalogue and to the code of conduct as stipulated on AUB website.

The grading system outlined in AUB Catalogue for graduate students will be followed in this class and is highlighted under learning assessment above.

Student Conduct

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism.

These kinds of dishonesty include (but are not limited to) the following:

1. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
2. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
3. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University.

Safe Learning Environment

Diverse opinions are encouraged within this course, as that helps to broaden everyone's thinking, and hopefully enrich their knowledge and learning. Everyone has a right to their own opinion, and no one is required to agree with another opinion. However, as communication in this course is being conducted on-line, it can be challenging to ensure the responses are worded in a manner that does not appear disrespectful. I would encourage everyone to assume 'good intent' from all posts, while at the same time being diligent in ensuring an environment of respectful discourse.

Non-Discrimination Policy

AUB encourages a diverse student body and workforce and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments

of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at titleix@aub.edu.lb. The Office of the Provost maintains a resource page on Non-Discrimination, Harassment, and Title IX at:

https://www.aub.edu.lb/President/TitleIX/Pages/default.aspx

AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

Students with Disabilities Policy

AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb or 961-1-350000 x 3246 or West Hall 314.

HARIRI SCHOOL OF NURSING

NURS 507 Essentials of Nursing Administration & Management
Course Syllabus

2019-2020

Faculty: Dr. Lina Younan, Clinical Assistant Professor in Nursing Science
Extension: 5981; Room 522 Rafic Hariri School of Nursing. Email: ly11@aub.edu.lb

Timetable: Monday 1-3pm

Course Description: This **two-credit** course is offered at the beginning of the **administration track** to introduce management concepts and management techniques (often called management tools). It focuses on three core topics: roles and responsibilities of managers; leading organizational effectiveness; and strategic planning. A general management perspective is adopted throughout the course. The course examines conceptual models for management and leadership and applies them to challenges in nursing administration. Participants are encouraged to critically apply the course content to real world challenges with the aim of making the course directly relevant to the workplace. The focus is on using management models and concepts to work towards improved organizational effectiveness. Case studies of organizational problems provide the basis for group practical work. Group projects are intended to improve the functioning of organizational units and clinical departments by strengthening the nursing role in management and administration.

PREREQUISITES: None

REQUIRED TEXTBOOK:

Russell, L.A., Thomas, P.L., Harris, J.L. (2020). Management and Leadership for Nurse Administrators (8th ed.). Burlington: Jones & Bartlett Learning.

American Psychological Association. (latest edition date). Publication manual (APA Manual) (6th ed.).Washington, DC: American Psychological Association

Recommended Textbook:

Marquis, B.L. and Huston, C.J. (2017). Leadership roles and management functions in nursing (9th ed.). Philadelphia: Lippincott Williams & Wilkins.

LEARNING OUTCOMES, INSTRUCTIONAL & ASSESSMENT STRATEGIES:

Learning Outcomes	**Chapters**	**Instructional Strategies**	**Learning Assessment Strategies**
Describe management roles and responsibilities in nursing services	• Conceptualizing Professional Practice	• Assigned reading • Power Point Presentation	In class activity: Case study presentation 6-4 page 131

based on standards of nursing administration practice by ANA 2009		• In class activity: Case study discussion 6-4 page 131	
Examine techniques for improving organizational effectiveness	• Organizational Structure & Analysis • Recruitment, Selection and Retention • Risk Management • Organizational communication and patient safety	• Assigned reading • Power Point Presentation • Discussion Forum • Analysis of selected published research	Group assignment: Root Cause Analysis & Executive summary report
Analyze nursing units and services addressing organizational structure, recruitment and staffing issues	• Organizational Structure & Analysis • Recruitment, Selection and Retention* • Creating a Motivating Climate	• Assigned reading • Power Point Presentation • Analysis of selected published research	Individual assignment: SWOT analysis
Conduct a situation analysis addressing common administrative nursing problem	• Tools for Evaluating Operations and Care Delivery Systems • Systems thinking, polarity thinking, concept mapping	• Assigned reading • Power Point Presentation • Analysis of selected published research	Group assignment: RCA & Executive summary report
Write strategic goals	• Strategic & operational planning • Systems thinking, polarity thinking, concept mapping	• Assigned reading • Power Point Presentation • In class activity: writing SMART objectives	Individual assignment: SWOT analysis & related strategic objectives
Present ideas of how to proactively involve staff in managing change	• Change Management • Healthy work environment • Creating a Motivating Climate	• Assigned reading • Discussion Forum • In class activity: Case study 10-2 p. 244-5	In class activity: Case study presentation 10-2 p. 244-5

Model supportive communication behaviors	• Collaborative Decision Making and Communication • Performance Appraisal • Organizational communication and patient safety • Managing a Culturally Diverse Workforce	• Assigned reading • Power Point Presentation • In class activity: Case study 10-1 p. 243-4	In class activity: Case study presentation 10-1 p. 243-4

GRADING DISTRIBUTION:

- Class participation (case studies) 20 %
- Application of management technique (SWOT) 25%
- Executive summary (RCA group project) 40%
- Group presentations 15%

LEARNING ASSESSMENT DESCRIPTIONS & RUBRICS

Class Participation (20% of Course Grade)

Three in class activities (case sties discussion) and two online discussion forums that will be announced during the course. The focus will be based on the learning model described in Session 1 and the exercises in the set textbook. The assignments will be posted one week before the end of each course module. (20%)

Group Written Assignment (40% of Course Grade)

Purpose of the assignment:

To provide an opportunity for you to demonstrate competence in applying a management tool to a topic of your choice. The topic may be one that you want to work on because it is relevant to something you want to change in the workplace. Work in groups of 2-3 students to prepare an executive summary of the application of concepts covered in the course

Instructions:

This assignment will be written as an executive summary format. You will be given information on how to write an executive summary. For clinical leaders, learning how to write executive summary for administrators and executives is as important as completing the quality improvement project

Rubric:

Title Page and paper format	APA Style (5 points)
Introduction	Very brief overview of what will be covered (5 points)
Identify the key aspects of the issue	very brief- including how you discovered the issue, e.g., from staff members, nurse manager, etc. (15 points)
Describe the root causes	Briefly and how you found the root causes (15 points)
Summary of aggregate data you looked at in evaluating the issue	Brief and how you got data, e.g., from risk management, finance, NDNQI, etc. (15 points)
Barriers & facilitators	List of several barriers & facilitators within unit/organization (15 points)
Recommendations	Brief list or description of potential actions to resolve the issue using concepts in the course. Justify your actions with reference to published research (15 points)

Conclusion	Very brief (5 points)
References	At least 3

Be sure to indicate what each group member has contributed to completion of the exercise and preparation of the group report. Specifically, explain any agreement about authorship of the sections and any other contributions individual group members made to the exercise.

Individual Written Assignment (25% of Course Grade)

Purpose of the assignment:

One of the most important, although sometimes time-consuming, activities that are frequently completed in strategic planning sessions is the Strengths/Weaknesses/Opportunities/Threats (SWOT) analysis. This analysis can be useful in many problem-solving situations that you may face. The SWOT exercise may seem very time-consuming; however, this planning will again help direct where resources are needed and to what extend the resources should be allocated.

Instructions:

- You are asked as part of a working group in your nursing department to do a SWOT analysis of your working unit.
- Identify 2-3 strengths for your unit by asking yourself: “what would patients say that we are best at providing?” (5 points). Similarly, identify weaknesses by asking the question: "What currently causes us trouble in providing the exceptional patient experience that we strive to provide?” (5 points.) Opportunities will be more easily seen after assessing the strengths and weaknesses. The opportunities of the organization will focus on how to optimize the strengths and decrease the weaknesses of the organization (5 points). Last but not least is the assessment of the threats that exist for the organization. These threats can and should include both internal and external threats. Threats are things that might happen and are likely to happen if intervention is not taken to stop them or certainly decrease the chances of them happening (5 points).
- Remember, responses to each strength, weakness, opportunity, and threat include major considerations of human capital, customer bases, quality measures, and financial strengths, just to name a few.
- Accordingly suggest 2-3 strategic objectives for your unit. Objectives should be SMART and are written to target specific measurable outcomes (5 points).

Group presentations (15% of Course Grade)

Purpose of the assignment

To assess your overall synthesis of the three core topics discussed in this course.

Instructions:

You will be divided into 3 groups, each group will present a summary of the important concepts discussed in one of the course sections: foundational thinking skills, strategic management, or human resource management.

Rubric:

- Clarity and organization of ideas (5%)
- Assimilation and understanding of course concepts (5%)
- Delivery and communication skills (5%)

COURSE POLICIES:

1. All course requirements must be completed by student before grades are submitted for credit.
2. Students who miss over one fifth of lecture hours will be asked to drop the course.
3. The passing grade for this course is "70".
4. Students are expected to abide by AUB's policy on student code of conduct.

STUDENT CONDUCT

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
b. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:
http://pnp.aub.edu.lb/general/conductcode/index.html

STUDENT SUPPORT

Technical Support

For Moodle support, contact the IT Academic Services at extension: 3589 or e-mail moodle@aub.edu.lb

Special Needs Support

'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination

policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via Ethics Point atwww.aub.ethicspoint.com.

AMERICAN UNIVERSITY OF BEIRUT

HARIRI SCHOOL OF NURSING

NURS 520 Managing Quality With Teams

Nuhad Dumit, Course Coordinator, Extension: 5955
Email: ny00@aub.edu.lb

Spring 2019

Course Description:

This 3-credit course is designed to prepare nurses to meet the challenge of effectively managing patient care units and health services while focusing on use of the quality team approach to improve work processes and effectiveness. Emphasis is placed on total quality management and continuous improvement concepts, approaches, and tools; designing effective project teams; and decision making tools to achieve quality results. Accreditation, risk management and nurse-sensitive outcomes measures are addressed as measures to assure quality care and achieve patient safety goals.

Learning Outcomes:

Upon completion of the course, the student will be able to:

1. Relate the process excellence approach to management.
2. Compare organizational quality initiatives based on Deming, TQM, Lean, and SixSigma
3. Examine the elements of doing work effectively through teams.
4. Justify the match of team tools to team purpose.
5. Conduct process improvement activity based on process mapping.
6. Become familiar with local and external accrediting bodies.
7. Analyze different approaches to risk management to achieve patient safety goals.

Content Outline:

I. Introduction and Overview
   - A. Managing Quality Totally
   - B. The process excellence approach to management

II. Quality management
   - A. Creating a Common Understanding of Quality Methods
   - B. Three Principles of Total Quality
   - C. Quality Continuum for Organizations

III. Using teams to meet today's challenges
IV. Team Roles and responsibilities
V. Doing work in teams
VI. Using tools to solve problems
VII. Building an improvement plan
VIII. Learning to work together
IX. Dealing with conflict
X. Advanced tools and techniques for team work
XI. Accreditation of Healthcare Organizations

XII. Risk Management
XIII. Nurse-Sensitive Outcomes Measurement

Teaching Methods: Lecture/seminar/team exercises/observations with reports

Evaluation

Active Class Participation	20%
Team observation feedback report	15%
Process Mapping and Improvement Plan	65%

Assignments:

1. **Class Participation (20%)**. Students are expected to come prepared and participate in classroom, project, and group activities. Grading will be based on informed participation in class discussions. **Grade will depend also on evidence of having read the assigned materials and use of the information in class discussion and activities.** Participation in discussions will be evaluated as follows:

Evaluation	Grade point	Performance description
Excellent	16-20	Participates consistently in class discussions based on readings and thoughtful reflections on read material and class discussions.
Good	11-15	Participates most of the time in class discussions based on readings and thoughtful reflections on read material and class discussions.
Fair	6-10	Participates in class discussions but comment reflects limited knowledge and understanding of reading materials.
Fail	0-5	Infrequent contributions to class discussions or makes comments that are tangential to discussion.

2. **Team Observation Feedback Report (15%).** Choose a team/committee meeting to observe in your department/institution.
    - **a.** Analyze the elements of the team effort: team member selection; use of team dynamics; use of team building activities; use of approaches for successful team function; effectiveness of handling 'ten common team problems'; use of team tools/process maps.
    - **b.** Fill the "Meeting Observation Checklist". Please write the roles of participants instead of their names (e.g. Team Leader, Team Member, etc.).
    - **c.** Write a summary of the analysis.
    - **d.** Submit your meeting observation checklist and the summary report using the templates posted on Moodle

	Grade point	Performance description
Team Observation Feedback report	13-15	Accurate analysis of the team efforts; accurate filling of the team observation checklist, and precise summary of analysis
	9-12	Accurate analysis of most of the team efforts elements; accurate filling of most of the team observation checklist, and precise summary of analysis

	5-8	General analysis of the team efforts elements; filling of most of the team observation checklist, and general summary of analysis
	1-4	General analysis of some of the team efforts elements; filling of some of the team observation checklist, and general or unrelated summary of analysis

3. **Process Mapping and Improvement Plan [65%]:**
   a. **Mapping a Process (30%):** Select an organizational process to map. Create a map (flow chart) of the process under observation using Visio or similar programs. Propose alternative process to make it more efficient/effective.

Critical element/content	**Grade point**	**Description of performance**	**N of pages**
Introduction highlighting need for and purpose of process improvement	5/5	Specific and accurate description of significance of the process, rationale for the process (risk management, accreditation requirement, others), and policy governing the process.	2 paragraphs
	3-4/5	General description of significance, rationale and policy	
	1-2/5	General description of one or two of the components of the introduction	
	0	Unrelated description	
Method	5/5	Specific description of the process mapping method: approach to observation, the tools used in observation, preparation for mapping including permission from administration	1 page
	3-4/5	General description of each method component or inconsistent description of each	
	1-2/5	General description of one or two of the method components	
	0/5	Unrelated description	
Result Process-As-Is	9-10/10	Accurate description and mapping of the process including each and every action, time each step takes, persons involved and resources needed with proper use of the symbols, and loopholes	1 page process description + Process map as much as it takes
	6-8/10	Accurate description and mapping of most of the elements of the process and its gaps	
	4-5/10	Inconsistent precision in describing and mapping the process; or general description of the process	
	0-3	General description of few of the process elements and general mapping of the process Or unrelated process description and mapping	
Proposition Process-To-Be	9-10/10	Accurate description and mapping of the process-to-be including each and every action, time each step takes, persons involved and resources needed with proper use of the symbols, and **corrective steps based on evidence from literature**	1-2 pages process description + Process map as
	6-8/10	Accurate description and mapping of most of the elements of the process and its **corrective interventions based on literature**	

	4-5/10	Inconsistent precision in describing and mapping the process; or general description of the process	much as it takes
	0-3/10	General description of few of the process elements and general mapping of the process Or unrelated process description and mapping	

b. Develop an improvement plan incorporating (35%):

1. Two Core Improvement Strategies
2. Team Growth and Team Best Practices:
   Identify members needed for the process improvement team and team development strategies; address conflict resolution approaches and effective communication as essentials for team work
3. Risk Management
4. Time Management
5. Indicate quality outcomes that need to be measured and methods of measuring them

Critical element/content	**Grade point**	**Description of performance**	**# pages**
Two Core Improvement Strategies	5/5	Specific and accurate description of the 2 core strategies.	2 paragraphs
	3-4/5	General description of the 2 core strategies.	
	1-2/5	General description of one of the 2 core strategies.	
	0	Unrelated description	
Team Growth	5/5	Specific description of team growth identifying members needed for the process improvement team and team development strategies	1 page
	3-4/5	General or inconsistent description of team growth, members, and development strategies.	
	1-2/5	General description of team growth without addressing development strategies	
	0/5	Unrelated description	
Team Best Practices	5/5	Accurate description of best 10 practices addressing effective communication and conflict resolution	2 pages
	3-4/5	Accurate description of best 6-8 practices	
	1-2/5	Inconsistent description of team practices	
	0/5	Unrelated description	
Risk Management	5/5	Accurate description of risk management approach/s based on literature	1-2 pages
	3-4/5	Accurate description of some elements of the selected risk management approach/s	
	1-2/5	Imprecise or general description of the selected risk management approach/s	
	0/5	Unrelated description	
Time Management	5/5	Describing accurately how the team will meet its obligations in due time and creating precise and reasonable timetable aligned with team tasks to achieve improvement plan development	1 page
	3-4/5	Creating reasonable timetable aligned with team tasks without description of how to meet charter duly and promptly.	

	1-2/5	Imprecise description and general timetable	
	0/5	Unrelated description	
Quality Outcomes	5/5	Accurately indicating quality outcomes relevant to the process addressed with specific methods of measurement	1-2 pages
	3-4/5	Indicating quality outcomes relevant to the process addressed with general methods of measurement	
	1-2/5	Indicating quality outcomes that are indirectly related to the process addressed with general methods of measurement	
	0/5	Quality outcomes and measurement methods unrelated to the process addressed	
Conclusion	5/5	Accurately summarizes all the main points/issues discussed in the paper	1 or 2 paragraphs
	3-4/5	Accurately summarizes most of the points/issues discussed in the paper	
	1-2/5	Generally summarizes the points/issues discussed in the paper	
	0/5	Unrelated summary

Attendance, Grading, and Conduct:
Students will adhere to the AUB class attendance policy as stated in the AUB Catalog.
The grading system as outlined in the AUB Catalog for graduate students will be adhered to.
Students are expected to read, understand, and abide by the policy on student code of conduct which is displayed on the following website:
http://pnp.aub.edu.lb/general/conductcode/index.html
Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.
In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
b. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit: http://pnp.aub.edu.lb/general/conductcode/index.html

Students with Special Needs

"If you have documented special needs and anticipate difficulties with the content or format of the course due to a physical or learning disability, please contact me and/or your academic advisor, as well as the Counseling Center in the Office of Student Affairs (Ext. 3196), as soon as possible to discuss options for accommodations. Those seeking accommodations must submit the Special Needs Support Request Form along with the required documentation."

Non-Discrimination Policy
AUB encourages a diverse student body and workforce, and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US

Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non-Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

Accessibility

'AUB strives to make learning experiences as accessible as possible. If you anticipate or experience academic barriers due to a disability (including mental health, chronic or temporary medical conditions), please inform me immediately so that we can privately discuss options. In order to help establish reasonable accommodations and facilitate a smooth accommodations process, you are encouraged to contact the Accessible Education Office: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

NURS 520 Managing Quality with Teams SCHEDULE
Spring 2019
Tuesdays 10 am -1 pm

DATE	TOPIC	Reading ASSIGNMENT	Remarks
January 22	▪ Course Introduction & Overview ▪ The process excellence approach to management	Textbook introduction	
January 29	▪ Quality management o Creating a Common Understanding of Quality Methods o Three Principles of Total Quality o Quality Continuum for Organizations	Readings given in class	
February 5	▪ Quality management Cont'd	Readings given in class	
February 12	▪ Using teams to meet today's challenges ▪ Team Roles and responsibilities	Chapters 1 & 2	

Exhibit III-01. Examples of MSN Course Syllabi

DATE	TOPIC	Reading ASSIGNMENT	Remarks
February 19	▪ Doing work in teams o Section A: Team Technique o Section B: Team Leaders	Chapter 3	
February 26	▪ Using tools to solve problems o Processes & Systems o Scientific approach o Tools for collecting data o Tools for mapping processes o Tools for looking at data relationships o The 7-step method	Chapter 4	
March 5 10-1	o Mapping processes o Team work exercise	Experiment with Visio Process Improvement Team observation & practice; Providing Actionable feedback.	
March 12	▪ Building an improvement plan o The 5-step plan for managing & improving daily work o The 7-step method for problem solving: DMAIC, the Six Sigma Improvement approach o The 16 improvement strategies	Chapter 5	
March 19	▪ Learning to work together	Chapter 6	
March 26	▪ Dealing with conflict	Chapter 7	
April 2	▪ Advanced tools and techniques	Chapter 8	
April 9	▪ Accreditation	Readings will be provided	Dr. Younan
April 16	▪ Risk management	Readings will be provided	
April 23	▪ Outcomes measurement	Readings will be provided	
April 30	☆ Project presentations	**In-class project presentations**	
May 7	**Final papers due**

HARIRI SCHOOL OF NURSING

NURS 525 Leadership Theories and Behaviors for Nurse Managers

Course Coordinator: Nuhad Yazbik Dumit
Email: ny00@aub.edu.lb; Ext.: 5955

Spring 2019

NURS 525 is a **3-credit course** offered to Master of Nursing Science Students**.** The aim of this course is to promote critical thinking about, and applications of evidence-based theories of leadership in nursing settings. The course encourages a reflective and analytical approach to cultivating effective personal leadership behaviors. A related theme is how best to facilitate leadership development in others: less experienced colleagues, nursing peers, more experienced leaders and managers. The course introduces the full spectrum leadership model, examines its transformational leadership components in depth, and explores similarities and differences between transformational leadership and selected leadership theories such as strategic leadership, quantum leadership, innovative leadership, authentic leadership, value-based leadership and leadership behaviors based on chaos theory. Participants will assess leadership behaviors, develop strategies to build on leadership strengths, and evaluate progress during the course. The course requires a strong commitment to analyzing set readings, observing leadership behaviors, reflecting on personal behaviors, goal setting and evaluation.

Learning Outcomes [LO]

At the completion of the course, participants will be able to:

1. Classify leadership behaviors observed in others using approaches presented in the literature, assessed in Class activity.
2. Evaluate the evidence made for claims of leadership effectiveness, assessed in Article critique assignment.
3. Differentiate the defining characteristics of various leadership theories, assessed in Class discussion.
4. Explain how the "new theories of leadership" complement the full-spectrum leadership model, assessed in Class discussion.
5. Design leadership interventions to overcome challenges presented in case studies of healthcare organizations, assessed in Class activity.
6. Examine strategies used to apply leadership behaviors effectively in the work setting, assessed in Class discussion.
7. Set short-term, medium-term and long-term leadership goals, assessed in Assignment.
8. Present personal and peer leadership strengths and developmental needs giving constructive feedback to colleagues and demonstrating acceptance of peer feedback, assessed in Assignment.

Pre-requisite: Satisfactory completion of one or more administration courses in the Master of Science Nursing Program, experience in a leadership role; or consent of instructor

Learning Methods: Self-assessment, observation of leadership behaviors, multimedia resources, participation in online activities, analysis of case studies, presentations, weekly reflection and goal planning, and preparation of a personal leadership development plan.

Course Outline

Part I: Leading in times of complexity and rapid change

1. Factors influencing nursing leadership; chapter 1
    a. Future of nursing
    b. Organizational system: context for trends and change
    c. Principles to create future models
    d. Nursing-sensitive and quality indicators, and safety standards

2. Leadership theories and application for nurse leaders; chapter 2 and other readings
    a. What do leaders do?
    b. Leadership versus headship
    c. Leadership theories
        a) Transformational leadership,
        b) Leader-member exchange theory,
        c) Authentic leadership,
        d) Self-leadership,
        e) Shared and distributed leadership,
        f) Strategic leadership,
        g) Quantum leadership,
        h) Innovative leadership
        i) Value-based leadership
        j) Path-goal theory
        k) The Full-Spectrum Leadership Model
    d. Leadership and just culture
    e. Nursing and leadership healthcare policy

3. Executive coaching for leadership professional development; chapter 4
    a. Expectations for nurse leader professional development
    b. Systems thinking as a framework
    c. Qualities and characteristics of effective leaders
    d. Emotional intelligence, burnout and resilience
    e. Leadership coaching

4. Developing leaders of the future; chapter 5
    a. Positioning nurse leaders for success
    b. AONE/L nurse leaders competencies

Part II: Leading the business of healthcare: processes and principles

5. Organizational structure and accountability in healthcare systems; chapter 6
    a. Organizational structures as complex adaptive systems
    b. Decision making and systems thinking
    c. Nurse administrator as leader of nursing systems
    d. Contributing to corporate leadership

e. Ensuring a sustainable nursing workforce

6. Maximizing human capital; chapter 9
    a. Leadership approaches
        a) Contingency theories
        b) Servant leadership
        c) Autocratic, democratic
        d) Transactional, transformational
    b. Leadership accountability chain
    c. Modern leadership competencies
    d. Recruiting and empowering nurses

Part III: Leading for sustainable improvements and outcomes

7. Strategies for leading teams for sustained improvement
8. Leadership qualities for achieving sustainable outcomes
9. Leading and managing population health

Part IV: Under the Hood

10. The Psychodynamics of Leadership
11. Emotional Intelligence

Part V: Emancipatory Perspectives

12. Women and Leadership
13. Culture and Leadership
14. Ethical implication of leadership

Course Assignments and Learning Assessment

I. Participation in class Discussions and Learning Activities (25%), covers all LOs

The following is the criteria for class participation:

a. In-class contribution: 10%
    i. Contribution to classroom discussion based on completion of weekly readings
    ii. Engagement with classroom exercises
b. Online contribution 15%
    i. Initiating discussion themes in the on-line leadership forum; responding to posts on the on-line forum, posting videos, articles, links or other learning resources on the on-line forum. Posting summaries of recent articles (articles published in the past three years) with comments linking them to the content of the course will be highly regarded. Posts should be designed to assist problem solving and leadership development
    ii. Writing weekly reflections on how your reading and our discussions in class relate to your development as a leader

II. Presentation of Article Critique (25%) CL2

Please prepare a presentation on an article selected from the reading list for this semester. Choose an article that interests you and which you think has clear recommendations for effective leadership behaviors. Prepare a presentation of around 20 minutes to be followed by 20 minutes discussion. Presentations will be scheduled for specific sessions agreed on in class. When you have chosen an article to present, please post a message to the Leadership Café to

let everyone know and attach a copy of the key article. When making presentation please focus on the following questions:

- What does the article tell us about leadership?
  - How did the authors define the main concept?
  - What leadership behaviors should we use and why?
- If the article is about transformational leadership, which part of the full-spectrum model of leadership does it focus on? Include a diagram to clarify.
  - If the article is not about transformational leadership, how does the leadership model focused on differ from transformational leadership? Include a table to explain.
- How does the article contribute to your Leadership Development Plan? (One objective from each member of the group)

Steps to completion:

1. Form groups of two members
2. Each group selects by consensus an article to work on from the reading list
3. A member of each group posts a message on the leadership forum announcing the members of the group and the article selected for the presentation.

***Grading Criteria*:**

The following is the criteria used to evaluate your presentation:

1. Accuracy of your summary of the paper 5%
2. Explanation of the relationship between the leadership approach/theory used in the article and the full-spectrum leadership model, or contrasting the model of leadership used in the article with transformational leadership. 15%
3. Specific leadership skills/behaviors stated or implied in the article that you aim to develop yourself in. (One short, medium or long term goal from each group member presented in SMART goals format. 5%

III. Personal Leadership Development Plan: (50%) CL 7 & 8 based on meeting all CLOs

Using the template posted on Moodle, fill the 'Development Goal' section preparing at least one short-term, one medium term, and one long-term SMART goal for your Leadership Development Plan in addition to the desired outcomes, self-understanding and work context. Submit the assignment by November 7. (25%)

Continue using the same template and fill the 'Development Actions' and 'Development Success Factors' you will take for each of the short-term, medium-term and long-term goals. Development actions are guided by the 3As [Awaken Align Accelerate]. Submit the assignment by November 28. (25%)

Template reference: Awaken, Align, Accelerate: A Guide to Great Leadership, ©2017 MDA Leadership Consulting, file:///C:/Users/ny00/Desktop/1-Create-a-Leadership-Development-Plan.pdf

Summary of Course Competency Evaluation	Grade Allocation	Due Date
Course Participation (Classroom and online)	25 %	Every class session
Group Presentation of Article Critique	25 %	To be arranged
Personal Leadership Development Plan	50 %	As scheduled on MOODLE
Total	100 %	

TEXT BOOK:

(1) Roussel, L., Thomas, P.L., & Harris, J.L. (2020). *Management and leadership for nurse administrators* (8th Ed.). Boston: Jones and Bartlett Publishers.

READING:

Further readings will be recommended on a weekly basis from recently published research articles in international refereed.

Participants are strongly encouraged to undertake literature searches to find articles directly relevant to their main leadership interests and to share information about evidence-based leadership practices in nursing or healthcare via the on-line leadership forum.

Attendance, Grading, and Conduct:

Students will adhere to the AUB class attendance policy as stated in the AUB Catalog and to the code of conduct as stipulated on AUB website: http://pnp.aub.edu.lb/general/conductcode/index.html.
The grading system as outlined in the AUB Catalog for graduate students will be adhered to.

Accessible Learning Experiences

AUB strives to make learning experiences as accessible as possible. If you anticipate or experience academic barriers due to a disability (including mental health, chronic or temporary medical conditions), please inform me immediately so that we can privately discuss options. In order to help establish reasonable accommodations and facilitate a smooth accommodations process, you are encouraged to contact the Accessible Education Office: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314.

Class schedule: Academic Year 2019-2020

Date/Content	Session	Assigned readings
Part I **August 29**	Introduction to the course	
September 5	**Part I:** Leading in times of complexity and rapid change 1. Factors influencing nursing leadership 2. Leadership theories and application for nurse leaders	Textbook Chapter 1 Chapter 2 and other readings
September 12	**Part I:** Leading in times of complexity and rapid change **Cont'd 2.** Leadership theories and application for nurse leaders	Readings will be provided
September 19	**Part I:** Leading in times of complexity and rapid change 3. Executive coaching for leadership professional development 4. Developing leaders of the future	 Chapter 4 Chapter 5
September 26	**Part II:** Leading the business of healthcare: processes 5. Organizational structure and accountability in healthcare systems	 Chapter 6
October 3	**Part II:** Leading the business of healthcare: processes & principles 6. Maximizing human capital	 Chapter 9
October 10	**Part III:** Leading for sustainable improvements and outcomes 7. Strategies for leading teams for sustained improvement 8. Leadership qualities for achieving sustainable outcomes	 Chapter 14 &16
October 17	**Part III:** Leading for sustainable improvements and outcomes 9. Leading and managing population health	 Chapter 18
October 24	**Part IV:** Under the Hood 10. The Psychodynamics of Leadership	Readings will be provided
October 31	**Part IV:** Under the Hood 11. Emotional Intelligence	Readings will be provided
November 7	**Workshop**	
November 14	**Part V:** Emancipatory Perspectives 12. Women and Leadership	Readings will be provided
November 21	**Part V:** Emancipatory Perspectives 13. Ethical and cultural implications of leadership	Readings will be provided
November 28	**Workshop**	

Exhibit III.02: Academic and Curriculum Committee meeting minutes of 16.12.2019.

AMERICAN UNIVERSITY OF BEIRUT

Rafic Hariri School of Nursing

Academic & Curriculum Committee
Minutes of Meeting

December 16, 2019

Time and Place: The meeting came to order at 2:30 pm in the Simulation Lab, Hariri School of Nursing.

Presiding Chairperson: Dr. Lina Abu Fakhr

Members Present: Dr Nour Alayan, Mrs Mary Arevian, Dr Ghada Assaf, Mrs Lynn Berbari (invited), Dr Hala Darwish (invited, HSON representative on the Senate's Academic Development Committee), Dr Suzanne Dhaini, Dr. Nuhad Dumit (convener, ex-officio), Dr Dina Madi, Dr Angela Massouh, Mrs. Hera Tashjian.

Agenda: Key Discussion Points	Outcomes (Decisions, Action items)	Responsibility	Timeline
1. Approval of agenda: the agenda was approved without changes/additions.	None	None	None
2. Approval of previous minutes: Minutes of February 25, 2019 were approved without changes.	None	None	None
3. Follow up on items from meeting February 25, 2019:			
a. Student Portfolio and Skills Competency Checklist: Ms Berbari reported that AUB is working on the student eportfolio; nursing will be incorporated in it including the clinical component.	The sub-committee of the ACC will coordinate this initiative with Mrs Berbari and IT team.	Dr Alayan, Dr Kantar, Dr Massouh, and Mrs Berbari	January 2020
b. Those students who did not pass the N307 course are offered remedial clinical rotations in the spring semester, 2 days per week for four weeks. Students will be paying to the preceptors. Mrs Damianos will be following up on the students.	None. No follow up needed by the ACC committee.	None	None

4. NURS 304 course syllabus: Dr Madi briefed the group that faculty involved in the course met and revised the objectives of the course. Edits were made and the community experience was removed from the course since the related objectives were deemed covered in the community course.	The new objectives were approved. Dr Dumit advised that since the changes in the course objectives are not substantial, they do not need to be reviewed by ADC and reported for CCNE accreditation. Dr Dumit will edit objectives before final listing in the course syllabus.	Dr Madi and Dr Dumit	January 2020
5. NURS 306 course syllabus: Dr Dhaini briefed the group on the following changes to the objectives of the course: - The objectives were divided to theory and clinical, and some of them were concised. The word "pediatric" was replaced with "child". - The course objectives were matched with the clinical experience. Based on student feedback, and information from the hospital that on average 3-4 of our students get hired in the pediatric department after graduation, mainly at CCCL inpatient, it was decided to reconsider the clinical rotations of the students in this course and focus on general pediatric training. Thus, it was decided to a) remove the ED experience from this course and integrate in the critical care course; b) discuss the PICU rotation to be integrated in the critical care course as well; c) remove CCCL outpatient rotation and address the relevant objectives in the CCCL inpatient rotation.	Same as in NURS 304 (above)	Dr Dhaini and Dr Dumit	January 2020

6. Online petitions: Mrs Berbari reported that in November and December 2019, 46 petitions were received, mainly related to course withdrawals. There was a directive from the registrar that those students who are underload and those who withdraw after the deadline of drop-and-add, should have a valid reason for withdrawal. It was discussed to offer the students the Psych 201 course in their first semester; advise the students (especially those who take ENG 102) to take the course in the summer; consider accepting course withdrawals below 12 credits in the first semester.	Mrs Berbari will follow up on the suggestions.	Mrs Berbari	January 2020
7. Lippincott curriculum: Dr. Alayan reported that the lists of skills of all courses were revised and aligned. Each course will identify the priority skills. Lippincott can be used to test students online and then utilize it in the simulation and clinical setting. An instructor can sign off a student for a specific skill in the course. Dr Alayan however noted that Mosby, which is accessible to us from our library, has similar features as Lippincott except for the interactive component.	After deliberation, it was decided to suggest to administration to stop subscription to Lippincott for cost-effectiveness; to utilize Mosby for clinical skill teaching and evaluation; to finalize the list of skills for each course (20 per course).	Dr Alayan and taskforce.	February 2020
8. Other items: a. Nominations for student awards: it was suggested to automate the process and that faculty be able to nominate students rather than only students nominating themselves. b. Dr Dumit advised that the TS-BSN bridging program be followed up by this committee.	Mrs Berbari will prepare a proposal and present to faculty. Mrs Tashjian will follow up on the ACC proposal.	Mrs Berbari Mrs Tashjian	February 2020 January 2020

The meeting was adjourned at 3:50 pm.

Recorded by Hera Tashjian

Exhibit III.03: Academic and Curriculum Committee Meeting Minutes of 25.02.2019

AMERICAN UNIVERSITY OF BEIRUT FACULTY OF MEDICINE

Rafic Hariri School of Nursing

Minutes of Academic & Curriculum Committee
Minutes of Meeting

February 25th, 2019

Time and Place: The meeting came to order at 1 pm in the conference, room 6th floor, Hariri School of Nursing.

Presiding Chairperson: Dr. Dina Madi

Members Present: Professor Mary Arevian, Drs. Nuhad Dumit (convener, ex-officio), Nour Alayan, Ghada Assaf, Suzanne Dhaini, Lina Kantar, and Angela Massouh, Mrs. Danielle Damianos (invited), and Mrs. Talin Gulgulian (invited).

Order of Business:

1. **Added Members to the ACC**
   Dr. Dumit highlighted that Dr. Hala Darwish should be invited to all ACC meetings as the HSON representative on the Senate's Academic Development Committee. Dr. Dina Madi confirmed that Dr. Darwish was invited to the meeting.
   The SRC representative will be also invited to represent nursing students.

2. **NURS 307 – Update of Syllabus**
   a. Mrs. Gulgulian reported to committee members the changes made to the NURS307 syllabus as well as feedback from clinical faculty members who teach this course. She reported that Clinical Instructors are concerned that:
      i. We do not have a standardized remedial plan for weak students who pass previous nursing courses but fail NURS307.
      ii. Students who fail NURS307 will be distanced from all types of clinical and nursing-related learning for 1 year which adds to their weakness.
      iii. The problem starts before NURS307 with weak students who pass previous nursing courses despite their weak knowledge base and poor clinical performance.
   b. Mrs. Gulgulian and Damianos reported suggestions from Clinical Instructors teaching NURS307:
      i. Assigning a credit load to NURS307 and a grade instead of the Pass/Fail policy.
      ii. Conducting stricter course evaluation in NURS302 and 306 to avoid passing students with a weak knowledge base.
      iii. Having a standard plan in place for students who fail NURS307.

c. Dr. Dumit clarified that credit allocation does not imply added value to the course and the BSN curriculum at HSON is already overloaded with credits greater than what is required in Lebanon and by AACN. NURS307 is mandatory to all junior students and it is the venue to transition to senior standing. If a student fails NURS307, he or she fails to move to senior year and is required to repeat it in order to proceed.
d. Dr. Massouh suggested creating a standardized remedial plan for the year following failure from NURS307 to avoid distancing students from clinical learning.
e. Dr. Dumit advised that this issue applies to all nursing courses that are offered once per year and that faculty members need to decide on a standardized remedial plan for all such courses including NURS307. Once a remedial plan is decided, it needs to be added to the Catalogue as a school policy.
f. Dr. Madi will propose this discussion item of "Standardized Remedial Plan for students who fail nursing courses offered once per year" to the Agenda of the next Extended Curriculum Committee meeting where all Undergraduate faculty members will join.
g. Corrections to the updated NURS307 syllabus were made by various committee members and shared with Mrs. Gulgulian and Damianos.

3. Student Portfolio and Skills Competency Checklist

a. Dr. Madi raised the issue of re-instating the student portfolio for discussion.
b. Dr. Dumit listed 3 options that may be used: the E-portfolio, Lippincott Procedures, or Moodle.
c. A sub-committee of the ACC, comprised of Drs. Nour Alayan, Lina Kantar, and Angela Massouh, will revisit a previous proposal on BSN e-portfolio.
d. Mrs. Lynn Berbary will orient the faculty on new ORACLE operations instituted by AUB.

4. Mechanism of Analyzing Exit Surveys

Exit survey analysis will be deferred to the Assessment Committee.

5. Others

a. Dr. Dumit announced that Track Coordinators will start assuming their roles beginning in March, 2019.
b. Mrs Khoury and Dr. Dhaini will discuss the revised N.306 learning outcomes (LO) as proposed by Dr. Dhaini. Then, the revised LO will be discussed with Dr. Madi as Track Coordinator. Later, Dr. Madi will discuss them with the Convener before they are presented to the ACC for final approval.

6. Adjournment: The meeting was adjourned at 2:30 pm.

Recorded by Dr. Nour Alayan

Exhibit III.04: Academic and Curriculum Committee Meeting Minutes of 17.02.2020

AMERICAN UNIVERSITY OF BEIRUT

RAFIC HARIRI SCHOOL OF NURSING

MINUTES OF ACADEMIC AND CURRICULUM COMMITTEE MEETING

February 17, 2020

Time and Place: The meeting came to order at 2:00pm in the conference room, 6th floor, Hariri School of Nursing.

Chairperson: Dr. Lina Kantar

Members Present: Dr. Laila Farhood (Interim Dean), Dr. Nuhad Dumit (ex-officio), Drs. Ghada Assaf, Suzanne Dhaini, Dina Madi, Angela Massouh, Mrs. Mary Arevian, Mrs. Hera Tashjian.

Members Absent: Dr. Nour Alayan (excused), Dr. Hala Darwish (Representative on the University Academic Development Committee) (excused).

1. **Approval of Agenda:**

   The agenda was approved after the following additions under "Others" item:

   - Nursing 408.
   - Make up exams regulation across nursing courses.

2. **Approval of Minutes:**

   Minutes of December 16, 2019 were approved as circulated.

3. **Review and approval of the OSCE Policy – Dr. Kantar:**

   Drs. Kantar, Alayan, & Massouh met as a task force and set the criteria for the policy. The policy includes terms and conditions that secure the success of the OSCE, such as: (1) station development, (2) OSCE blue print, (3) setting grade mark for each station, and (4) setting the passing grade. The policy criteria are developed based on the level of the courses in the program.

   Pursuing from the deliberations regarding application criteria, a couple of modifications on OSCE re-do will be changed; once incorporated in the policy, it will be re-distributed for further evaluation by the members, to secure a final approval in the upcoming meeting.

   Members recommended the development of a similar policy targeting the **Clinical Evaluation of students.** Drs. Massouh, Madi, and Assaf will work on developing one.

4. **E-Portfolio proposal – Dr. Massouh:**

   Dr. Massouh introduced a proposal on the E-portfolio, previously developed by a taskforce.
   The intention behind integrating the portfolio in the curriculum, its benefits, and different elements were introduced. The elements include:

- Student Information: name, contact information, major, graduation date, etc.
- Student Goals
- Curricular standards and/or criteria: used to align the contents of the portfolio to institutional, departmental or course curriculum (often accomplished by rubrics)
- Guidelines: used to select appropriate artifacts to keep the collection from growing haphazardly
- Artifacts: examples of student work including documents, images, video, audio, etc. (can be chosen by student, instructor or both)
- Instructor feedback
- Self-reflection pieces: a portfolio without reflections is just a multimedia presentation or an electronic resume

The electronic development of the portfolio by AUB is in progress, especially the incorporation of the clinical appraisal tools in the portfolio.

5. Updates on Mosby's clinical skill list

Dr. Farhood voiced her concern regarding the cost and limited use of the Lippincott Clinical Skill educational program since its purchase; thus justifying the reasons for halting the renewal process with Lippincott. Encouraged instead is the utilization of Mosby package available by SML.

Dr. Dumit will inquire from Dr. Ola Zein (Head of SML) about the possibility of either participating with AUBMC's nursing service to partake in the purchase of Lippincott, or keeping Mosby for utilization by HSON's students.
Updates will be shared in the next ACC meeting.

6. NURS 408 credit redistribution

Mrs. Arevian advised that NURS 408 is a-5-credit course, yet recommended the exchange in credit load between theory and clinical. Theory becomes 3 credits instead of 2 and clinical becomes 2 credits instead of 3.

The modified syllabus will include the changes in credit load, the inclusion of seminar sessions with the theory aspect of the course, and the change of simulation from 1 to ½ credit. The syllabus will be forwarded to the curriculum committee for approval. The modifications must take place in the upcoming catalogue.

7. Online-learning at AUB

Dr. Farhood announced AUB's inclination to adopt the online learning format. Future courses and programs will be transformed with this direction, thus requiring from the faculty to be prepared for this instructional format.

8. Make up exams – standardizing its use

Topic is postponed for deliberation in the next ACC's meeting.

Meeting adjourned at 4 pm.

Jeanette Zeinati

American University of Beirut Hariri School of Nursing
NURS 503 Advanced Health Assessment
Course Syllabus

Semester	Spring 2020
Course Number and Title	NURS 503: Advanced Health Assessment
Number of Credits	3 credits: 2 theory and 1 clinical (3 hours per week)
Days	Lectures: Wednesday 11am to 1pm Clinical Days: Monday through Friday HSON; Classroom 102
Course Coordinator	**Angela Massouh, PhD, MScN, CNS** Assistant Professor Cardiology Clinical Nurse Specialist American University of Beirut Extension: 5959 Mobile: 9613-796199 Email: am50@aub.edu.lb Office Hours: By appointment

Course Description

This course focuses on the comprehensive health assessment of clients using a biopsychosocial approach. Nursing phenomena commonly encountered in diverse client populations will form the basic structure of the course.

Students will build on their knowledge and skills in clinical interviewing, focused history taking, physical assessment and critical analysis of client data to identify actual and potential health problems. Using a case based, problem focused learning framework that integrates theoretical, empirical, and experience-based practice knowledge, students acquire the advanced assessment knowledge and skills that form the basis for clinical reasoning and decision-making.

The course includes classroom discussions and a clinical practicum.

Course Learning Outcomes

Upon completion of the course, the student will be able to:

1. Integrate biopsychosocial theoretical perspectives, empirical and experience-based knowledge into in-depth comprehensive health assessments of clients.
2. Distinguish between a comprehensive health assessment and a symptom-focused assessment.
3. Analyze a presenting symptom or complaint for the development of differential diagnoses.
4. Demonstrate advanced communication skills.
5. Demonstrate advanced physical assessment skills.
6. Demonstrate critical thinking and diagnostic reasoning skills in documentation of assessment findings.
7. Utilize an individualized approach in the assessment that reflects contextual, cultural and developmental variations.

Teaching Methods

- Classroom Discussions
- Case Presentations
- Use of audiovisual resources: Videotapes and CD-ROM for self-study.
- Practicum in health assessment in Simulation Lab, Specialty Clinics, and Primary Care Settings.

Required Textbooks

- Dains, J.E., Ciofu-Baumann, L., & Scheibel, P. (2019). *Advanced health assessment and clinical diagnosis in primary care*. (6th ed.). St. Louis, Missouri: Mosby Elsevier.
- Bickley, L.S. (2019). Pocket Guide to Bate's Guide to physical examination and history taking. (8th ed.). Philadelphia: Wolters Kluwer Health Lippincott Williams & Wilkins.

Recommended Textbook

- Bickley, L. S. (2017). *Bate's Guide to physical examination and history taking.* (12th ed). Philadelphia: Wolters Kluwer Health Lippincott Williams & Wilkins. [Available in Saab Medical Library and Dr. Noureddine's Office]
- *Course pack*: Includes select readings assigned per unit.

Learning Assessment

Your course grade will be divided as follows:

Topic	Grade
Class Participation/ Moodle Case Presentation	10%
One Comprehensive Case Study	20%
One Symptom-Focused Health Appraisal	10%
Final Exam	40%
Clinical Evaluation | OSCE	20%
Final Grade	**/100**

Your grade will be posted in letter grade format according to the below scale [as per AUB]:

Course Grade /100	Letter Grade	Course Grade /100	Letter Grade
93-100	A+	69-71	C+
87-92	A	66-68	C
83-86	A-	63-65	C-
79-82	B+	61-62	D+
75-78	B	60	D
72-74	B-	<60	F

Unit Learning Outcomes and Additional Resources

Clinical Reasoning, Evidence-Based Practice, and Symptom Analysis	
Objectives	• Identify goals of diagnostic reasoning • Describe the diagnostic process: context, symptom analysis, physical exam, and formulating a working hypothesis. • Identify strategies to develop clinical reasoning • Identify characteristics of Evidence-Based Practice
Tasks	• Review the PowerPoint presentation • Read and participate in Class/Moodle Discussions • Read Dains et al. Chapter 1 • Attend to Moodle Reading
Cardiovascular Assessment	
Objectives	• Obtain a relevant history for cardiovascular symptoms. • Perform a systematic cardiovascular assessment. • Identify differentials of common cardiovascular symptoms. • Identify ECG changes associated with Myocardial Ischemia, Injury and Infarction. • Identify Sinus, Atrial, and Ventricular dysrhythmias and AV blocks. • Perform a systematic cardiovascular assessment.
Tasks	• Review the PowerPoint presentations • Read and participate in Class/Moodle Discussions • Read Dains et al. Chapter 8 and 26 • Practice ECG strips • Review/ Watch Moodle Videos and Resources • Attend Simulation Lab Practice
Respiratory Assessment	
Objectives	• Obtain a focused history for respiratory symptoms. • Synthesize subjective (history) and objective (blood gases, pulmonary function tests) findings in the differential diagnosis of respiratory problems. • Describe the main landmarks and variations in densities observed on chest films. • Perform a systematic respiratory assessment. • Identify differentials of common respiratory symptoms.
Tasks	• Review the PowerPoint presentations • Read and participate in Class/Moodle Discussions • Read Dains et al. Chapters 11, 14, and 41 • Attend Simulation Lab Practice
Neurologic Assessment	
Objectives	• Obtain a focused history for neurological symptoms. • Describe assessment of various cognitive, motor, and sensory functions. • Perform a systematic neurological examination.

	• Identify differentials of common neurological symptoms.
Tasks	• Review the PowerPoint presentations • Read and participate in Class/Moodle Discussions • Read Dains et al. Chapters 9, 13, 19, and 33 • Attend Simulation Lab Practice
Mental Health Assessment	
Objectives	• Discuss the components of a comprehensive mental health assessment. • Identify general and specific tests used to diagnose mental health problems.
Tasks	• Review PowerPoint presentation • Read and participate in Class/Moodle Discussions
Gastrointestinal Assessment	
Objectives	• Obtain a focused history for gastrointestinal symptoms. • Identify differentials of abdominal pain. • Perform a systematic abdominal assessment.
Tasks	• Review the PowerPoint presentations • Read and participate in Class/Moodle Discussions • Read Dains et al. Chapters 3, 10, and 20 • Review/ Watch Moodle Videos and Resources • Attend Simulation Lab Practice
Assessment of Women's Health	
Objectives	• Outline factors important to a reproductive and perinatal history. • Identify differentials of Amenorrhea, Vaginal Bleeding, Discharge, and Itching. • Describe the techniques of gynecologic examination.
Tasks	• Review the PowerPoint presentations • Read and participate in Class/Moodle Discussions • Read Dains et al. Chapters 5, 36, and 37
Eye, Ear, Nose and Throat Assessment	
Objectives	• Identify changes that occur with age. • Obtain a relevant history for complaints relating to these structures. • Demonstrate systematic physical assessment of these structures.
Tasks	• Review the PowerPoint presentations • Read Dains et al. Chapters 15, 25, 30, and 32
Assessment of the Older Adult	
Objectives	• Identify potential barriers to reliable history taking in the elderly population and techniques to overcome them. • Discuss special considerations in the physical examination of older adults. • Identify key aspects for assessment of the elderly: cognitive function, functional status…
Tasks	• Review the PowerPoint presentations

	• Read and participate in Class/Moodle Discussions • Read Dains et al. Chapters 9
Musculoskeletal Assessment	
Objectives	• Identify changes that occur with age. • Obtain a focused history for relevant complaints. • Perform a systematic musculoskeletal assessment.
Tasks	• Review the PowerPoint presentations • Read and participate in Class/Moodle Discussions • Read Dains et al. Chapters 22 and 24
Assessment of children from infancy through adolescence	
Objectives	• Outline health history questions that are relevant to the pediatric client • Describe physical assessment methods and findings pertaining to developmental milestones • Discuss assessment of developmental stages of children
Tasks	• Review the PowerPoint presentation

Clinical Practicum

Students spend an average of 3 hours per week for training in history taking and physical exam. Some sessions are done in the simulation laboratory under the supervision of faculty members from the School of Nursing particularly Drs. Angela Massouh and Hala Darwish.

Other sessions occur in a primary care setting, AUBMC's OutPatient Department, practicing history taking and physical assessment, and the formulation of differential diagnoses on a load of clients. Those experiences are under the supervision of attending physicians. In addition, students will do assessment on patients in the specialty clinics:

- Heart Failure Clinic under the supervision of Dr. Angela Massouh
- Multiple Sclerosis Clinic under the supervision of Dr. Hala Darwish
- Family Medicine Clinics under the supervision of Dr. Maya Romani

Students are expected to watch the physical assessment videos that cover the physical examination of various body systems early in the semester to supplement their hands-on training. As part of the clinical practicum, students submit logs on cases they have seen in their clinical rotation electronically to the course coordinator.

Students submit one focused health assessment report and one comprehensive assessment case report. At the end of the semester, students sit for a hands-on exam where they perform a graded history taking and physical examination on a client in the presence of the course coordinator.

Available Clinical Slots

	Monday	Tuesday	Wednesday	Thursday	Friday
AM Slots	**OPD** 8am to 11am	**OPD** 8am to 11am	**OPD** 8am to 11am	**OPD** 8am to 11am	**OPD** 8am to 11am
			MSC 9am to 11am	**MSC** 10am to 12pm	**FM** 8am to 12pm
PM Slots	**MSC** 1pm to 3pm	**MSC** 2pm to 5pm	**MSC** 2pm to 5pm	**MSC** 2pm to 5pm	**MSC** 11am to 2pm
	OPD 1pm to 5pm	**OPD** 1pm to 5pm	**OPD** 1pm to 5pm	**OPD** 1pm to 5pm	**OPD** 12pm to 4pm
			FM 2pm to 5pm	**HFC** 1pm to 5pm	

Class Schedule

Date	Time	Topic	Speakers
January **22**	11am to 12pm	Course Introduction	Dr. Angela Massouh
	12 to 1pm	Clinical Reasoning, Differential Diagnosis, EBP, and Symptom Analysis	
		Anatomy of the Interview	
January 29 **SimLab:** History Taking in Classroom 103 from 8 to 10am			
29	11am to 1pm	**Cardiovascular Assessment and Diagnostic Tests** Chest Pain Assessment and Differentials	Dr. Angela Massouh
Week of February 3 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
February **5**	11am to 1pm	EKG Interpretation	Dr. Angela Massouh
Week of February 10 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
12	11am to 1pm	EKG Interpretation	Dr. Angela Massouh
Week of February 17 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
19	11am to 1pm	**Respiratory Assessment and Diagnostic Tests** ABGs Interpretation	Dr. Angela Massouh
Week of February 24 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
26	11am to 1pm	Dyspnea Assessment and Differentials	Dr. Angela Massouh
March 4 **SimLab:** Cardiovascular and Pulmonary Assessment (9 to 11am: Classroom 102 or SimLab)			
March **4**	11am to 1pm	**Neurologic Assessment**	Dr. Hala Darwish
March 9 **SimLab:** Neurologic Assessment (1 to 3pm in SimLab)			
11	11am to 1pm	Delirium Assessment and Differentials	Dr. Angela Massouh

Week of March 16 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
18	11am to 12pm	Dizziness and Syncope Assessment and Differentials	Dr. Angela Massouh
	12 to 1pm	Headache Assessment and Differentials	Dr. Ashraf Makki
Week of March 23 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
March 25 at 11pm **Symptom-Focused Health Appraisal Assignment Due**			
Week of March 30 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
April **1**	11am to 1pm	**Mental Health Assessment**	Dr. Laila Farhood
Week of April 6 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
8	11am to 1pm	**Gastrointestinal Assessment** Abdominal Pain Assessment and Differentials	Dr. Angela Massouh
Week of April 13 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
15	11am to 1pm	**Assessment of Women's Health** Amenorrhea, Vaginal Bleeding, Discharge, and Itching	Dr. Umaya Musharrafieh
	1 to 2pm	**Ear, Nose and Throat Assessment** Earache, Sinus Congestion, and Sore Throat	Dr. Randa AlBarazi
Week of April 20 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			
22	11am to 12pm	**Assessment of the Child and Adolescent**	Dr. Rana Sharara-Chami
	12 to 1pm	**Ophthalmologic Assessment** and the Red eye	Dr. Bahaa Noureddine
April 22 at 11pm **Comprehensive Case Study Assignment Due**			
Week of April 27 **Clinical Options** [OutPatient Department: OPD; Multiple Sclerosis: MS; Family Medicine: FM; and Heart Failure Clinic: HFC]			

29	11am to 12pm	**Musculoskeletal Assessment** Limb Pain and Low Back Pain	Dr. Imad Uthman
	12 to 1pm	**Assessment of the Older Adult**	Dr. Angela Massouh
May **4, 5, 6, 8, 12, 13,** and **14** **Final Exam OSCE**			
May **11** from **9am to 11am** **Final Exam**			

Student Conduct

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism.

These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
b. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit: http://pnp.aub.edu.lb/general/conductcode/index.html

Non-Discrimination Policy

AUB encourages a diverse student body and workforce and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non- Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will

provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

Students with Disabilities Policy

AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314.

AMERICAN UNIVERSITY OF BEIRUT FACULTY OF MEDICINE

SCHOOL OF NURSING

N505A Course syllabus

***Required COVID-19 Code of Conduct:**

Social Distancing, Face Mask, Sanitizer for any in-class session*

Fall 2020-21

Course number and title: N505A: Advanced Practice in Adult-Gerontology Care I.

Number of credits: 4 credits. Lecture and discussion: 2 hours; clinical practice: 6 hours.

Prerequisite: N503 Advanced Health Assessment.

Co-requisite: N504: Advanced Pathophysiology

Day and Time: Thursdays 9:00 – 11:00 am

Catalogue Course description: This course builds on N504 & N503 and includes a theory and a clinical component. Emphasis is on further refinement and extension of pathophysiological concepts and assessment skills in the management of clients with a spectrum of health problems.

Detailed course description: The theory component of this course focuses on health promotion, disease prevention and management of chronic health problems in adults and older adults. The emphasis is on management of health problems, based on pathophysiological and psychosocial theory, and including pharmacological, invasive and alternative interventions. The nursing process is the organizing framework used. Topics include general risk assessment and risk reduction strategies for screening and health behaviors; diabetes; hypertension; cardiometabolic syndrome; chronic obstructive pulmonary disease and asthma; heart failure; chronic renal failure; cerebrovascular disease; chronic neurologic disorders; and health problems of older adults.

In the clinical component, students begin to explore and practice aspects of the clinical nurse specialist role in their area of interest, focusing on the clinician role. Emphasis is placed on the application and utilization of research evidence and theory relevant to nursing intervention in the care of adults and older adults. Attention is given to the bio-psycho-social, genetic and cultural variables influencing the patient position on the health-illness continuum. Clinical

rounds are incorporated where students analyze and synthesize pathophysiology, assessment and psychosocial data, and practice clinical decision making. Patient/family education and counseling are emphasized.

Faculty: Hala Darwish, PhD, RN ; email: hd30@aub.edu.lb , phone 5938

Samar Noureddine, PhD, RN, FAHA, FAAN; email: sn00@aub.edu.lb. Phone: 5966.

Learning Outcomes:

Upon successful completion of the course, the student will be able to:

1. Discuss epidemiologic trends on the health-illness continuum in adults and older adults.
2. Analyze current biobehavioral research related to the prevention and management of adults and older adults with chronic conditions.
3. Compare and contrast descriptive indices and assessment parameters of health risks and common chronic health problems in adults and older adults.
4. Develop nursing and collaborative diagnoses based on appropriate selection of health assessment data.
5. Select evidence-based advanced nursing interventions relevant to selected diagnoses and adapted to patient and family needs.
6. Evaluate the effectiveness of the plan of care through identified patient outcomes.
7. Participate in the coordination and management of care of adults and older adults in various health settings with the multidisciplinary health care team.
8. Demonstrate competence in educating and counseling adults and older adults regarding healthy lifestyles and self-care.
9. Discuss ethical issues surrounding the care of adults and older adults with chronic illness, and end of life care.

Textbooks:

1. Required:

Foster, J. W., & Prevost, S. S. (2012). *Advanced Practice Nursing of Adults in Acute Care.* (2nd ed). Philadelphia: F. A. Davis.

Bhat, P., Dretler, A., Gdowski, M., Ramgopal, R., & Williams, D. (2016). *Washington Manual of Medical Therapeutics,* (35th ed). Philadelphia: Wolters Kluwer..

Noureddine, S. *Course Reader (extra readings are posted on Moodle).*

2. Recommended (all are available at the Saab Medical Library/Dr. Noureddine's Office):

NANDA International (2014). Nursing Diagnoses: Definitions and Classification (2015-2017)

Philadelphia: Wiley Blackwell. This is an eBook.

Moorhead, S., Johnson, M., & Maas, M. (Eds). (2004). *Iowa outcomes project: Nursing outcomes classification (NOC)*. (3rd ed.) St. Louis, MO: Mosby.

Johnson, M., Bulecheck, G., McCloskey Dochtermann, J., Maas, M., & Moorhead, S. (2001). *Nursing diagnoses, outcomes & interventions: NANDA, NOC and NIC linkages*. (2nd ed). St. Louis: MO: Mosby.

McClockey Cochterman, J. C., & Bulechek, G. (2004). *Iowa outcomes project: Nursing interventions classification (NIC).* (4th ed). St. Louis, MO: Mosby.

Teaching methods:

Classroom or Virtual synchronous discussions of assigned readings.

Precepted clinical practice.

COVID-19 CODE OF CONDUCT

During the deadly pandemic of COVID-19, it is important to keep in mind that we are all responsible for our own health and those of others. Hence, the following precautionary measures always need to be observed, whether at school or in the community.

a. Stay at home if you have symptoms such as fever, cough, body aches, etc. Call youth clinic at 01-350 000 x 3000 for advice before visiting the clinic.
b. Always keep a social distance of at least 2 meters and everywhere.
c. Avoid crowdedness anywhere.
d. Wear mask when you go around the school, campus, or community.
e. Wear mask if you are in a classroom when students are less than 2 meters apart.
f. When you touch doorknobs, benches, lockers, stair railings, clean your hand with sanitizers or wash them with soap and water immediately after.

g. Avoid touching your eye, nose and mouth.
h. The lobby, student lounge, lockers, and NSS room will be closed until further notice.
i. Follow the simulation lab/ classroom instructions posted on the door.
j. In classrooms:
    a. Clean your desks and chairs with sanitizers before and after using.
    b. Clean your hands with sanitizers or washing with soap and water for 20 seconds before and after you leave the class.
    c. Do not share papers, pens and pencils.
    d. Ventilate the room when possible.
    e. Cough and sneeze using your elbow.
k. For office visit:
    a. If you can meet virtually, do it
    b. Make sure you keep a distance of 2 meters.
    c. Wear masks.
    d. Ask to open the window
    e. Do not go inside the office if more than two individuals are there.

Do It For Yourself And For Others

Content outline

Date	Topic	Speaker	Readings
September 10	Introduction to the course. Overview of the roles & competencies of the CNS Health risk appraisal and healthy lifestyle recommendations	H. Darwish	Foster & Prevost: Chapter 1 Course reader: AACN standards of advanced practice NACNS competencies
September 17	Health problems in older adults.	Hala Darwish	Foster & Prevost: Chapter 5
September 24	Management of cognitive impairment in older adults: Dementia and delirium	H. Darwish	Foster & Prevost: Chapter 2 Bhat et al: Chapter 27
October 1	Management of clients with Chronic Obstructive Pulmonary Disease and Asthma. Dyspnea management	S. Noureddine	Foster & Prevost: Chapter 10 Bhat et al: Chapter 9 Course reader: COPD & asthma Management guidelines
October 8	Management of clients with hypertension & Cardiometabolic syndrome.	S. Noureddine	Foster & Prevost: Chap 2, 9, 13 Bhat et al: Chapter 3 Course reader: Hypertension management guidelines
October 15	9:00 AM: Management of clients with irritable bowel syndrome and peptic ulcer disease. 10:00 AM: Palliative Care	S. Noureddine R. Yamout	Foster & Prevost: Chapter 12 Bhat et al: Chapter 18

October 22	Management of clients with chronic kidney disease ***First patient write up due***	S. Noureddine	Foster & Prevost: Chapter 13 Bhat et al: Chapter 13
October 29	Management of Patients with Coronary Heart Disease and Stable Angina	S. Noureddine	Foster & Prevost: Chapter 9 Bhat et al: Chapter 4 Course Reader: Guidelines for Management of Ischemic Heart Disease
November 5	Management of clients with heart failure	A. Massouh	Foster & Prevost: Chapter 9 Bhat et al: Chapter 5 Course reader: Heart Failure Management guidelines
November 12	Management of clients with cerebrovascular accidents	H. Darwish	Foster & Prevost: Chapter 8 Bhat et al: Chapter 27
November 19	Management of clients with degenerative neurologic disorders: multiple sclerosis, Parkinson's disease Anxiety, sleep problems, and depression in chronic illness ***Second patient write up due***	H. Darwish	Foster & Prevost: Chapter 8 Bhat et al: Chapter 27 Foster & Prevost: Chaps 2, 3, 6 Bhat et al: Chapter 10
November 26 4-6 pm	Management of clients with diabetes and its complications	M. Nasrallah	Foster & Prevost: Chapter 11 Bhat et al: Chapter 23 Course reader: Diabetes Management guidelines
December 3-7	Reading Period		
December 10	**Final exam**	**H.Darwish**	

Learning Assessment:

Class participation & student presentations:	20%
Exam	30%
Clinical evaluation, including weekly logs and mini project	35%
Patient write ups	15%

Student participation:

Classes will be interactive in this course. Case studies will be used as the basis for discussing clinical topics throughout the semester. Evidence based guidelines for health risk assessment and management of specific patient populations will be compared and discussed. Research articles related to the clinical topics covered will be assigned for discussion in class. Each student is expected to give a presentation in one of the above areas.

Exam:

Students will sit for an exam that covers material addressed in the course using objective and subjective questions and based on case studies.

Clinical Component:

Students are expected to choose a clinical area in which they wish to develop expertise. Students write behavioral objectives that reflect course objectives and their individual needs and interests. Each week, the student shall indicate objectives to be completed, strategies to achieve them, self-evaluate the outcome, and discuss that in written clinical logs with the faculty.

Students will be assigned one or more preceptors who will guide their practice and participate in their evaluation. The focus in this practicum is on the development of the advanced clinical practice role of the clinical nurse specialist role, using the nursing process in the management of patients. Eight hours of clinical practice are required per week. Students are expected to participate in multidisciplinary clinical rounds where cases are discussed as applicable to their area of interest. Clinical placement shall be in outpatient and inpatient settings.

The evaluation of the clinical will be based on student progress towards their set behavioral objectives, feedback from the assigned preceptor and student, as well as one mini project/product to be prepared by the end of the semester. This project may be a clinical pathway, clinical assessment tool, or a patients/staff teaching session.

Weekly reports of the clinical experience must include:

1. Brief overview of the objectives achieved and activities in which the student was engaged
2. Self-evaluation of/reflection on the experience during that week
3. Description of cases seen using the SOAP format with elaboration on patient management.

Patient write ups:

Students are required to submit 2 patient write ups from the cases encountered in the clinical setting, based on the nursing process. The write ups shall include the following:

- Assessment data base (subjective and objective), including relevant medical and surgical history.
- Nursing/collaborative diagnosis(es)
- Outcome criteria
- An intervention plan within the scope of advanced practice with specific evidence based advanced practice interventions
- The care plan must be organized around the identified diagnoses and related olutcomes.

Students may use an expanded version of the SOAP format if they wish. However the planning/intervention part ought to be elaborated with actions specific to the case. Do not include general actions plans; only specific interventions. Address the patient holistically,

including a biopsychosocial approach and evidence based interventions. Include references at the end of the write up. Note the rubric on Moodle that will be used to grade the write up.

Student conduct

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism. Students' papers shall be submitted on Moodle and will be subjected to a plagiarism check by Turnitin software.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
b. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:
http://pnp.aub.edu.lb/general/conductcode/index.html

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty

and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via EthicsPoint at www.aub.ethicspoint.com.

HD, SN 2020.

AMERICAN UNIVERSITY OF BEIRUT FACULTY OF MEDICINE

SCHOOL OF NURSING

N505B Course syllabus Spring semester 2019-2020

Course number and title: N505B: Advanced Practice in Adult-Gerontology II.

Number of credits: 4 credits. Lecture and discussion: 2 hours; clinical practice: 8 hours.

Prerequisites: N504: Advanced Pathophysiology

Catalogue Course description: This course addresses advanced nursing practice in adult care and includes a theory and a clinical component. Emphasis is on further refinement and extension of pathophysiological concepts and assessment skills in the management of adults and older adults with acute and critical care conditions.

Detailed course description: The theory component of this course covers the early detection and management of acute and critical care health problems in adults and older adults. The emphasis is on holistic management of health problems, based on pathophysiological and psychosocial theory, and including pharmacological, invasive and alternative interventions. The nursing process is used as the organizing framework for the course. Topics include acute coronary syndrome, respiratory failure, acute renal failure, liver failure, shock, sepsis, skin and wound management, traumatic brain injury, spinal cord injury, hematologic malignancies, solid tumors, thyroid and parathyroid problems.

In the clinical component of the course, students train on developing clinical expertise in managing adults and older adults with acute and critical illness. Emphasis is placed on clinical decision making using relevant research evidence and theory, taking into consideration the patient and family preferences for care. Within the clinical setting, attention is given to the bio-psycho-social, genetic and cultural variables influencing the patient and his/her family. Clinical rounds are incorporated where students analyze and synthesize knowledge of pathophysiology, assessment and psychosocial concepts and practice clinical decision making. Patient/family education and counseling are emphasized.

Faculty: Samar Noureddine, PhD, RN, FAHA, FAAN; email: sn00@aub.edu.lb. Office extension: 5966.

Hala Darwish, PhD, RN, FAAN; email: hd30@aub.edu.lb; office extension: 5938

Learning Outcomes:

Upon successful completion of the course, the student will be able to:

1. Discuss ethical issues surrounding the care of adults and older adults with critical illness, and the role of technologic advances in this regard.

2. Analyze current bio-behavioral research related to the prevention and management of acute and critical care conditions in adults and older adults.

3. Analyze and interpret assessment findings of adults and older adults with acute and critical illness.

4. Develop nursing and collaborative diagnoses based on health assessment data.

5. Select evidence-based interventions relevant to selected diagnoses and adapted to patient and family needs.

6. Evaluate the effectiveness of the plan of care through identified patient outcomes, including patient and family preferences.

7. Participate in the coordination and management of care of adults and older adults in acute care settings with the multidisciplinary health care team.

8. Demonstrate competence in education and counseling of patients/families in the setting of acute and critical illness.

Content outline

Date	Topic	Speaker	Readings
January 23 9-11 am	Introduction to the course. The synergy model of patient care	S. Noureddine	Article on Moodle
January 30 9-11 am	Prevention and Management of clients with acute coronary syndrome.	S. Noureddine	Crees et al: Chapter 4 Reading on Moodle
February 6 9-11 am	Management of clients with traumatic brain injury	H. Darwish	Crees et al: Chapter 27 Reading on Moodle
February 13 9-11 am	Management of clients with respiratory failure and ARDS.	S. Noureddine	Crees et al: Chapter 8, p. 238-254
February 20 9-11 am	Management of patients with hematologic malignancies	R. Saad	Crees et al: Chapter 22, p. 770-789. Readings on Moodle
February 27 9-11 am	Management of clients with sepsis. ***First patient write up due***	S. Noureddine	Crees et al: Chapter 8, p. 256-257
March 5 9-11 am	Management of patients with spinal cord injury	I. Omeis	Crees et al: Chapter 27, p. 925-928 Reading on Moodle
March 12 9-11 am	Management of patients with solid tumors	R. El Asmar	Crees et al: Chapter 22 Readings on Moodle
March 19 9-11 am	Pain Management in Acute Illness (9-10 am) Nutrition support in acute illness	H. Darwish J. Jabbour	Crees et al., Chapters 1 (p. 5-8 & 2
March 26 9-11 am	Management of clients with acute renal failure.	S. Noureddine	Crees et al: Chapter 13, p. 418-426, 441-443 Readings on Moodle
April 2 9-11 am	Management of clients with liver failure	S. Noureddine	Crees et al: Chapter 19, p. 658-663 Readings on Moodle
April 9 9-11 am	Prevention and management of common infections: Pneumonia and UTI Skin and wound management.	S. Noureddine	Crees et al: Chaps 14 and 15 Readings on Moodle
April 16 9-11 am	Management of clients with thyroid and parathyroid problems	M. Chakhtoura	Crees et al: Chapter 24

April 23 9- 11 am	Management of clients with shock	S. Noureddine	Crees et al: Chapter 8 pp. 254-263
April 30 9- 11 am	Students' presentations		
May 7	***Paper assignment due***		

Learning Assessment:

Class participation & student presentations:	20%
Paper	30%
Clinical evaluation, including weekly logs and mini project	35%
Patient write ups	15%

Student participation:

Classes will be interactive in this course. Case studies will be used as the basis for discussing clinical topics throughout the semester. Evidence based guidelines for management of specific patient populations will be compared and discussed. Research articles related to the clinical topics covered will be assigned for discussion in class. Each student is expected to give a presentation in one of the above areas. In the last class, students will share their main achievements in the clinical rotation.

Paper guidelines:

Each student will select a clinical topic, using a case study or clinical problem, based on his/her clinical area of interest to develop the paper requirement for this course. This theoretical paper should review and synthesize the state of bio-behavioral knowledge on the problem chosen, with consideration of demographic, genetic and environmental influencing factors. Background data and research evidence will be used to support discussion of the nursing management of the chosen problem within an advanced practice perspective. The paper should not exceed 10-15 pages of double spaced text. You must use APA style. Grading criteria include:

1. Problem definition and incidence/prevalence overview	10%
2. Bio-behavioral knowledge review (pathophysiology, manifestations)	25%
3. Synthesis of related factors (risk factors, co-morbidities)	10%
4. Evidence based advanced practice nursing management	40%
5. APA style, organization, grammar	15%

Papers must be submitted via Moodle. Students are urged to prepare this paper for publication and will be mentored into choosing an appropriate journal and submit it as manuscript.

Clinical Component:

Students are expected to choose a clinical area where they wish to develop expertise. Students shall write behavioral objectives that reflect the course objectives and their individual needs and interests. Each week, the student shall indicate objectives to be completed, strategies to achieve them, self-evaluate the outcome, and discuss that in written clinical logs with the faculty.

Students will be assigned one or more preceptors who will guide their practice and participate in their evaluation. The focus in this practicum is on developing the advanced clinical practice and education roles of the clinical nurse specialist. Emphasis is placed on the utilization of the nursing process in the management of patients. Eight hours of clinical practice are required per week. Students are expected to participate in multidisciplinary clinical rounds where cases are discussed as applicable. Clinical placement shall be in acute care settings.

The evaluation of the clinical will be based on student progress towards their set behavioral objectives, feedback from preceptor and student, and one mini project to be prepared by the end of the semester. The project may be a clinical pathway, clinical assessment tool, or a patients/staff teaching session.

Weekly reports of the clinical experience must include:

9. Brief overview of the objectives achieved and activities in which the student was engaged
10. Self-evaluation of/reflection on the experience during that week
11. Description of cases seen using the SOAP format with elaboration on patient management.

The reporting of clinical experiences will be planned in writing and orally during the semester.

Patient write ups:

Students are required to submit 2 patient write ups from the cases encountered in the clinical setting, based on the nursing process. Students need to have several encounters with the patient and follow them up till discharge from the hospital. The write ups shall include the following:

- Assessment data base (subjective and objective), including relevant medical and surgical history.
- Nursing and collaborative diagnosis(es)
- Outcome criteria
- An intervention plan within the scope of advanced practice with specific evidence based advanced practice interventions
- Organize the care plan around the identified diagnoses and their related outcomes.

Students may use an expanded version of the SOAP format. However, the planning/intervention part ought to be elaborated with actions specific to the case. Do not include general actions plans. Address the patient holistically, including a biopsychosocial approach and use evidence based interventions. Reflect on the management provided versus what you found in the literature. Include references at the end of the write up. Note the grading rubric on Moodle.

Student conduct

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism. Students' papers shall be submitted on Moodle and will be subjected to a plagiarism check by Turnitin software.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
c. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:
http://pnp.aub.edu.lb/general/conductcode/index.html

Non-Discrimination Policy

AUB encourages a diverse student body and workforce, and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and

interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non-Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

Students with Disabilities Policy

'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

AMERICAN UNIVERSITY OF BEIRUT

HARIRI SCHOOL OF NURSING

Course syllabus for N506: Advanced Practice in Adult Gerontology III

Academic year 2018-2019

Course number and title: N506: Advanced Practice in Adult Gerontology III.

Number of credits: Four credits; 16 hours per week.

Prerequisite: N505B: Advanced Practice in Adult Gerontology II.

Catalogue course description: This is a practicum in which students apply content learned in N504, N505A and N505B, and use concepts covered in the role development courses in the advanced management of adult and older adult clients with a variety of illnesses. Interdisciplinary collaboration and case management are emphasized. *Prerequisite: N505B.*

Detailed course description: This course is a clinical residency. Students apply scientific and theoretical knowledge in practice to develop the skills needed for the advanced practice nurse roles of practitioner, educator, consultant and researcher. Students select a specialty area and focus on a patient population of their choosing in developing their clinical expertise and the particular roles they want to emphasize. Students examine the various sociocultural, physiological and organizational factors that influence client care and how they relate to the Advanced practice nurse/clinical specialist roles. Students will be assigned to and supervised by a preceptor in the clinical setting and their experiences will be coordinated with the course coordinator at the Hariri School of Nursing. Weekly or bi-monthly scheduled meetings with the preceptor and on line communication with faculty are required for evaluation of progress.

Course placement: This is the last course in a series designed to prepare clinical specialists in adult gerontology with the subspecialty of the student's choice.

Course coordinator: Samar Noureddine, PhD, RN, FAHA, FAAN.

Course objectives: Upon completion of the course, the student will be able to:

1. Plan, implement and evaluate individual and/or group interventions based on integration of theory and clinical knowledge to meet the educational and health care needs of clients and their families.
2. Critically evaluate the needs of the organization and individual health care providers in coordinating multidisciplinary care for specific client populations.
3. Demonstrate initial competence in the selected clinical nurse specialist roles.
4. Demonstrate plan generation and evaluation in clinical problem solving based on theory, research, and clinical knowledge.
5. Utilize effective communication techniques that are culturally sensitive with clients, families and health care providers.

6. Demonstrate professional integrity, accountability, initiative and autonomy.

Role-specific behavioral objectives

Clinical practice: The clinical nurse specialist (CNS) student will:

1. Write individual behavioral objectives approved by the faculty and preceptor that are consistent with the course objectives.
2. Demonstrate critical thinking and diagnostic reasoning in assessment and decision making.
3. Design, implement and evaluate therapeutic nursing interventions to meet the needs of clients in collaboration with the nursing staff.
4. Coordinate the care of a load of patients with the multidisciplinary team.

Educator: The CNS student will:

1. Identify the clinical specialist role for staff, clients and their families.
2. Implement staff/patient/family teaching based on a plan including objectives, outline and evaluation.

Researcher: The CNS student will:

1. Identify an area of practice and review related research findings and their utilization potential.
2. Develop a research utilization proposal including critical appraisal of the literature, analysis of feasibility of application and implementation plan.

Consultant: The CNS student will:

1. Identify problem areas in clinical practice and suggest evidence based solutions.

Teaching methods:

Precepted clinical experience: A minimum of 240 hours of clinical experience are required for this residency. Students develop their clinical objectives early in the semester and propose a plan to meet them. The clinical experience is planned in coordination with the faculty and under the supervision of the clinical preceptor. The student meets with the preceptor/faculty every week or 2 weeks to discuss progress. Students are encouraged to gain experience in each of the clinical specialist roles. Students are expected to actively participate in multidisciplinary rounds.

Research utilization project: Each student is expected to identify one project that s/he will be involved in. The project may relate to the unit as a whole or to a patient population, and be specified in the student's objectives. The student must submit at the end of the semester a written report (no more than 10 pages) of the project, which may relate to a clinical protocol, case management, or evidence based practice project agreed upon with the preceptor. The written proposal must include:

1. Introduction: Significance of the problem with support from the literature and rationale for the project. Summarize and evaluate the empirical evidence related to the topic.
2. Setting: The place where the project will be conducted and the parties involved. Mention current practice in the setting.
3. Objectives and proposed outcomes of the project.
4. Implementation plan, with discussion of strengths and weaknesses.
5. Evaluation: Proposed evaluation plan of the project.

Case presentations: Students present cases or clinical issues pertinent to the area of specialty to the staff in the clinical setting. The presentation may be done in a multidisciplinary conference or as an in-service session to the staff. Each student is expected to present at least one case. In the event the presentation is about a client-family problem:

- The student chooses a client who needs a CNS intervention for a clinical problem (physical or psychosocial) that may involve the family. Examples include coordination of care by multidisciplinary staff, problem with complex clinical management, or problems related to client coping.
- The student prepares and presents a case analysis, including demographic and clinical data about the client, relevant dimensions of the problem, a proposed plan for evidence-based intervention, and outcomes if available.
- The student must provide an outline and a reference list to the audience and use audio visual aids as feasible.

In case the presentation is about issues related to the clinical nurse specialist practice:

- The student identifies a problem related to CNS practice, such as unit based clinical practice issue, quality improvement, staff development, or problems in nurse-physician collaboration or patient care management, e.g., transfers within the organization.
- The student defines the problem, identifies its dimensions and presents a comprehensive analysis of the situation, including advanced practice interventions and outcomes if available.
- The student must provide the audience with an outline and reference list of the presentation, and use audio visual aids.

Weekly clinical logs: Each student will maintain a written log of the clinical activities for each week to demonstrate progress towards the clinical objectives identified in the beginning of the semester. The logs describe the activities done and how they relate to each of the clinical specialist roles. The logs are communicated to the clinical preceptor and course coordinator. A sample clinical log would briefly described weekly clinical activities under each of the CNS roles using the following format:

Week/role	Practitioner	Educator	Researcher	Consultant	Hours/week
Week 1					

Week 2					
Week 3					
Week 4					
Week 5					
Week 6					

In addition, students need to include the decision making process used in handling dilemmas, what interventions were used and whether they were successful, their thoughts and feelings about the experience, and suggestions for improving the experience.

Independent readings: Students are self-learners who will use library and internet facilities to search the literature needed for their clinical practice and projects. A number of print and electronic resources will be provided for students for reading.

Evaluation: The grade for this course is pass/fail, and is based on the student's achievement of his/her clinical objectives as well as his/her performance. Evidence used for evaluation include:

1. Clinical preceptorship evaluation
2. Clinical logs
3. Research utilization project

AMERICAN UNIVERSITY OF BEIRUT FACULTY OF MEDICINE

SCHOOL OF NURSING

NURS 508 ADVANCED PRACTICE IN NURSING ADMINISTRATION
Fall & Spring 2018

Course Number and Title:

NURS 508 Advanced Practice in Nursing Administration

Number of Credits:

4 credits

Placement of Course:

This course is offered in the final semester of the MSN for the Nursing Administration track.

Course Instructors:
Drs. Huda Huijer RN, PhD, FEANS, FAAN;
Michael Clinton, RN (CARNA) RGN RPN (NMBWA) PhD MSc BA(Hons)
Nuhad Yazbik Dumit, RN, MA, PhD
Lina Younan, RN, MSN, DNP

Course Description:

This practicum focuses on developing advanced management and administrative nursing skills in a variety of health care organizations. The purpose of the practicum is to provide a structured field experience in a health care organization to allow the student to apply the theories, principles, and techniques learned in the didactic portion of the graduate program under the guidance of an experienced preceptor and a faculty advisor. The student, the preceptor, and the faculty advisor collaborate to provide experiences that support the student's meeting the course objectives and working with the organization to achieve its goals and mission. *Prerequisite: NURS 507.*

Learning Outcomes:

Objectives specific to each student's practicum will be developed by the student in conjunction with the preceptor and the faculty advisor, and will form the basis for the Learning Contract. General learning outcomes of the practicum follow:

1. Develop a practical understanding of how administrative and clinical factors interrelate in health care organizations, their suppliers, payers, and regulatory bodies.

2. Refine a personal code of ethics and a philosophy based on a dedication to high ideals and standards of performance which are essential for the effective nursing administrator.

3. Maintain a high level of confidentiality both within and outside the setting, with regard to the organization's information.

4. Apply concepts and principles learned in the didactic portion of the program.

5. Strengthen leadership, judgment, problem-solving, and other administrative skills.

6. Analyze the dynamics of an organization or health care system in relation to the quality of client care provided.

7. Evaluate the strengths, inadequacies, and constraints of the health care delivery system and the role of the nursing administrator in maximizing the quality of services and resources available and accessible in the system.

8. Analyze the congruence of personal strengths and individual career goals.

Course Requirements and Evaluation:

Successful completion of the course and student-specific objectives, as specified in the Learning Contract (evaluation per faculty advisor, supported by feedback from student, preceptor). (80%)

Reflective learning reflected in the weekly journal. (20%)

Professional level of performance and attendance at practicum-related activities and events is required.

Attendance and Grading:

Students will adhere to the AUB class attendance policy as stated in the AUB Catalog. However, the professionalism of the role needed for this practicum requires a very high level of attendance.

The grading system as outlined in the AUB Catalog for graduate students will be adhered to.

STUDENT SUPPORT

Technical Support

For Moodle support, contact the IT Academic Services at extension: 3589 or e-mail moodle@aub.edu.lb

Special Needs Support

'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via Ethics Point atwww.aub.ethicspoint.com.

AMERICAN UNIVERSITY OF BEIRUT

HARIRI SCHOOL OF NURSING

Academic Year 2018-2019

NURS 598 Masters Project: Adult Gerontology Clinical Nurse Specialist Track

Course Number and Title:

N.598 Project: Clinical

Number of Credits:

3 credits

Placement of Course:

This project is in partial fulfillment of the MSN program, clinical track. At the discretion of the instructor, this course may be begun after completion of the core courses of the MSN program, most of the clinical courses and the comprehensive exam.

Prerequisites:

N. 502 and permission of the instructor.

Course Instructor:

Samar Noureddine, PhD, RN, FAHA, FAAN

Course Description:

This course for students in the adult gerontology clinical nurse specialist track provides an opportunity for students to apply aspects of the research or educational process to clinical issues within their area of interest, under the direction of a graduate faculty advisor. Emphasis is on the identification of a practice problem and may involve review of related literature and development of a research utilization/evidence based practice project such as a clinical protocol, guideline or assessment tool, hands-on research experience in research with a faculty members with analysis of existing data and write up of a research report, quality improvement project, or development of educational material for patients or staff.

Course Objectives: Upon completion of the course, the student will:

1. Synthesize the literature relevant to a practice area.
2. Propose a plan/Implement the clinical or education or research project according to the topic or scope of the project.
3. Propose an evaluation plan for the project implementation (if practice or educational).
4. Present the project and findings in a presentation open to the public.

The project may be a small research study such as medical record review or secondary data analysis, during which the student will develop a research proposal, get the needed institutional review board approval, conduct the study, analyze the data and write up the results.

Guidelines for the Project

Project types assume comparable levels of student involvement, performance and scholarship. Projects must be over and above papers and projects completed for course requirements. Options for the project include:

1. **Report of Research Findings**: students may use existing data under a faculty member's guidance to prepare a scholarly paper of publishable quality.
2. **Research Experience**: Active participation in a Faculty member's project with hands-on experience in phases of the project, like writing a proposal, design of the study, data collection, data analysis and reporting of results. The product of this experience would include a summary of the student's learning in the experience, a description of the student's contribution to the project, and a paper on a topic relevant to the project.
3. **Innovations in Practice**: These may include:
    a. **Research Utilization**: Development of an action plan for research utilization in targeted areas. This includes development of the associated protocols/practice guidelines and plans for implementation and evaluation.
    b. **Educational Media**: Development of an instructional media project or web-based instruction and demonstration of the appropriateness of the product to a specific audience.
4. **Policy Development or Analysis:** This may include:
    a. **Organizational/ Institutional Studies**.
    b. **Policy Initiatives**: Development of a position paper which is research-based, aimed at changing a specific policy or policies. This must be aimed at a group of policy makers to effectively promote change.
5. **Other Options**: Any other project of interest to students that is related to significant clinical, theoretical, management or policy topics. All projects should demonstrate a research emphasis.

Procedure for Project Completion

First the project advisement team, which includes a faculty advisor and a reader, is approved by the Graduate Studies Committee. The **faculty advisor** is a faculty member with the primary responsibility of overseeing the ongoing work of the project. The **reader** is not necessarily involved in continuous advisement but he/she brings expertise. His/her role may vary in the amount of involvement.
The student discusses the topic with his/her advisor, then together they agree on the reader. Once the reader is invited and accepts to serve on the advisement team, the student submits a brief **prospectus/abstract (background and significance, method, expected results)** outlining the proposed project and gets approval of the Advisement team. The prospectus and advisement team must be approved by the Graduate Studies Committee. Then the work starts. The student meets regularly with the advisor during the project work. A final meeting is then scheduled with the advisement team to ensure successful completion of the project. The project is presented publicly and evaluated by the advisement team.

Guidelines for the paper and presentation

- The paper and presentation shall include a description of the component(s) of the project, and a critique of the component(s) of the process involved in its preparation and implementation.
- The paper shall provide details of the project.
- The faculty advisor will be given a draft of the presentation in advance for review and approval; at least 2 weeks must be allowed for review.
- The presentation shall be conducted in a formal atmosphere with the public invited, by the deadline for defense that is set by the Registrar.
- The paper and presentation grades will be based on scholarly communication, verbal and written; professional demeanor and presence; and the adherence to scientific principles.
- Students are urged to seek the help of the writing center at AUB for assistance in professional writing for the project paper if needed.

Course Evaluation:

Course grade is pass/Fail. The project is developed and implemented in consultation with the advisor. The advisor and a second reader evaluate the project. Criteria for project evaluation are outlined for the clinical project and education project in the attached appendices.

AUB requirements:

Students must use the library template that can be downloaded from the Jafet library website at
http://www.aub.edu.lb/ulibraries/Documents/ThesisManual/thesis-manual.pdf

NURS 512-Advanced Psychiatric & Mental Health Assessment

COURSE DESCRIPTION

Course Number & Title: NURS 512 Advanced Psychiatric and Mental Health Assessment 2 credits. (1; 1)

Course Placement: Spring 2018-2019

Course Description: This course focuses on the advanced comprehensive mental health assessment of individuals. Students are provided with advanced knowledge and skills in clinical interview, focused history taking, mental status examination and diagnostic reasoning. The student performs comprehensive assessment on adult populations for the purpose of diagnosis and therapeutic intervention.

Placement of the course: Spring Semester 2018- 2019
Wed (Theory) Wed 9-10
Clinical Monday 2-5 pm (or W, Th)
Tuesday 2-5 pm

Faculty responsible for the course: Laila F. Farhood, Ph.D., C.S., RN, Professor
HSON & Clinical Associate, Psychiatric Department, F.M
Email: lf00@aub.edu.lb
Ext. 5951, 5975

Learning outcomes:

Upon the completion of the course, students will be able to:

1. Understand the theoretical basis and historical development of psychiatric classification and diagnosis.

2. Identify the categories used to assess the client's mental status.

3. Utilize the nursing process as a tool to psychosocial assessment.

4. Conduct the psychiatric interview in a variety of settings using focused history taking, mental Status Exam, DSM-5, and diagnostic reasoning.

5. Apply advanced comprehensive mental health assessment of individuals using multidimensional approaches.

6. Provide advanced psychological assessment and clinical judgment to populations with different categories of mental illness.

7. Incorporate research findings in the assessment process.

8. Critique the validity of assessment instruments and research on clinical judgment and decision making.

9. Synthesize theoretical constructs from psychological, social, psychiatric, behavioral, biological sciences and research for assessing clients who demonstrate psychological processes and socially dysfunctional patterns.

Teaching Methods:

Lectures/seminars format, case-based approach, observation of clinical interviews and application of advanced comprehensive assessment on adult clients.

Evaluation

1. Seminar and class participation 25 %

2. Clinical 30 %
Students meet faculty on a weekly basis to discuss additional aspects of clinical situations. Each student performs client assessment and observation of a clinical interview on a weekly basis and in a variety of settings: out patient and in-patient settings at AUBMC, psychiatry Department.

3. Case presentation and reports 25 %

4. Final Exam 20 %

The student is evaluated by her/his demonstration of the defined course objectives.

Course content:

Unit 1 **Introduction to the course**

- Goals for course and general overview of advanced psychiatric assessment.
- Review of psychopathology principles

Readings - Andreason Ch. 1 – Mackinnon Chs. 1&2.

Unit 2 **General principles of the psychiatric interview**

- The clinical interview
- Self report measures.
- Clinical rating scales
- Behavioral assessment and self monitoring
- Behavioral observation of social interaction

Readings - Hersen Ch. 3 & Andreason Ch.2, Videbeck Ch. 8

Unit3 **Assessment**

- Focused history taking
- Mental status exam
- Diagnostic reasoning
- DSM-5 classification

Readings - Hersen Ch. 1,2; Levenson Ch. 1, APA Guidelines Ch. 1

Unit 4 **General principles of Pscychodynamics**

- Etiological considerations
- Familial and genetic
- Learning and modeling
- Life events
- Gender and racial-ethnic
- Biological and physiological
- Neurological/Neurobiology

Readings - Maddux Chs. 1-6; Andreason Ch. 3

Unit 5 Psychiatric Assessment of specific psychiatric disorders. & major clinical syndromes.

Psychiatric assessment and consultation in psychosomatics

Readings - Levenson Ch. 1, Wise Ch.2

Unit 6 Assessment of suicidal clients and trauma
Readings - Somon Ch. 1, Follette Ch. 2&3

Unit 7 Assessment strategies for children and adolescents
Readings - Cohen Ch.2, Simon Ch.2
- Family Assessment
Readings - Cohen Ch. 2 & Videbeck Ch.

Unit 8 Special clinical situations
The Emergency patient, the hospitalized patient & the patient of different background
Readings Mackinnon Ch 16, 17 & 18

Unit 9 Technical factors affecting the interview
Mackinnon Ch 19 & 20

STUDENT CODE OF CONDUCT

Students are expected to abide by AUB's Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

b. Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:

http://pnp.aub.edu.lb/general/conductcode/index.html

Students with Special Needs

"If you have documented special needs and anticipate difficulties with the content or format of the course due to a physical or learning disability, please contact me and/or your academic advisor, as well as the Counseling Center in the Office of Student Affairs (Ext. 3196), as soon as possible to discuss options for accommodations. Those seeking accommodations must submit the Special Needs Support Request Form along with the required documentation."

Non-Discrimination Policy

AUB encourages a diverse student body and workforce, and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non-Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

AMERICAN UNIVERSITY OF BEIRUT

HARIRI SCHOOL OF NURSING

COURSE TITLE: NURS 516 Psychopathology and Human Behavior

COURSE PLACEMENT: Spring 2018-2019

FACULTY: Laila Farhood, PhD, CS, RN
Professor, Psychiatric-Mental Health Nursing
Hariri School of Nursing, AUB
Clinical Associate, Psychiatry Department, F.M.

CONTACT INFORMATION: Phone: Extension, 5975, 5951
E-mail: lf00@aub.edu.lb

COURSE DESCRIPTION

ADVANCED PSYCHOPATHOLOGY AND HUMAN BEHAVIOR (3CR.)

This theory course examines the effects and/or sequels of alterations in selected bio-behavioral processes in the adult human suffering from mental illnesses with critical onset and long term unstable conditions. It focuses on the study of the brain and behavior; the neurological, physiological and biochemical foundations of cognition, mood and affect. Students will be exposed to advanced assessment skills, selected theories & research to identify complex psychiatric disorders and interventions utilizing case studies and patient interviewing.

LEARNING OUTCOMES*:*

At the end of this course students will be able to:

1. Describe the continuum of adaptive and maladaptive neurobiological responses.

2. Identify behaviors associated with maladaptive neurobiological responses

3. Apply the DSM- 5 classification system & Mental Status Exam (MSE) to case scenarios.

4. Understand the role of neurobiological and psychosocial theories in the development of personality, behavior, cognition and learning.

5. Recognize the use of therapies in psychiatric mental health care.

6. Examine the effect and or sequels of alterations in bio-behavioral processes in adults suffering from psychiatric disorders

7. Integrate evidence-based research on the etiology and treatment of psychiatric disorders.

TEACHING METHODS:

This course utilizes several teaching methods such as lectures, class discussions, use of audio visual materials, case presentations and clinical sites.

REQUIRED TEXT:

Diagnostic and Statistical manual of Mental Disorders Fifth Ed (DSM-5)American Psychiatric Association, 2013

Hersen, M., Turner,S. Beidel, D, Editions (2007). Adult Psychopathology and diagnosis, 5th Ed. *Wiley Ic*.

EVALUATION:

1. Class participation 30%
2. Student presentation 30%
3. Final Exam 40%

CLASS SCHEDULE:

Class commences every Wednesday 9am-12n

The following units are covered:

1. Communication & therapeutic relationship
2. Stress, anxiety and coping
3. Neurobiological aspects of behavior
4. Bio-psychosocial components of mental health and illness
5. Social, cultural and environmental context of psychiatric MH care
6. Psychiatric assessment and classification in psychiatry. DSM-5 Model
7. Schizophrenia Spectrum & psychotic disorders (Schizophreniform, schizoaffective, delusional and brief psychotic disorders)
8. Bipolar & related disorders
9. Depressive Disorders
10. Anxiety Disorders
11. Obsessive-Compulsive and related Disorders
12. Trauma- and stressor-Related Disorders
13. Dissociative disorders
14. Somatic symptom and Related Disorders
15. Feeding and Eating Disorders
16. Elimination Disorders

17. Sleep-wake Disorders Sexual disorders
18. Sexual disorders
19. Gender Dysphoria
20. Disruptive, Impulse-Control, and Conduct Disorders
21. Substance- related and Addictive disorders
22. Neurocognitive Disorders
23. Personality disorders
24. Paraphilic Disorders
25. Other Mental disorders
26. Neuro Developmental disorders (childhood and adolescent disorders)
27. Adjustment disorders (crisis & stress models)
28. Medication-Induced Movement disorders and other adverse effects of medications.

The above pathologies will be covered using evidence based practice, assessment, clinical manifestations, diagnosis and management. In addition to lectures, students will present the above disorders.

STUDENT CODE OF CONDUCT

Students are expected to abide by AUB's Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

d. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

e. Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

f. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:

NURS 517 MODEL OF TREATMENT-PSYCHOTHERAPY

COURSE DESCRIPTION

Course Number & Title: NURS 517 Models of treatment-psychotherapy (bio-behavioral nursing interventions) 3 cr. (1, 2)

Course Description: In this course, students learn the models of treatment of psychiatric and mental health disorders, and become trained on psychotherapeutic interventions in acute settings. Theories on individual psychotherapy, crisis intervention, group and family therapy are covered. This course has a clinical component where students have to do practicum in a psychiatric care department.

In this course, students learn the application of the acquired knowledge in the field of practice and start to practice their role.

Placement of the course: Fall Semester 2019-20
Tuesday 10-12 noon,
Clinical Tuesday & Wednesday 1- 4 pm

Faculty responsible for the course: Laila F. Farhood, Ph.D., C.S., RN, Professor
Email: lf00@aub.edu.lb
Ext. 5951, 5975

Learning Outcomes:

Upon completion of the course, the student will be able to:

1. Understands the competencies of psychiatric-mental health nursing practice (2007). The scope and standards of practice for APPN.

2. Comprehends basic concepts and models of treatment of psychiatric and mental health disorders.

3. Formulate a tentative assessment based on observations, patient assessment and other relevant sources for planning a therapeutic intervention.

4. Provide the best available evidence and in dept- examination of psychotherapeutic models to achieve quality clinical; outcomes.

5. Address the contribution of culture to psychotherapy: awareness of culture interfaces with the practice of psychotherapy.

6. Integrate theory and practice in support of psychotherapy for the Advanced Psychiatric Nurse.

7. Apply psychotherapy approaches and techniques for working with individuals with mental disorders.

8. Utilize a model framework for choosing interventions based o n evidence-based research, practice guidelines, and clinical judgment.

9. Integrate a framework for understanding how neuroscience is embedded the treatment of mental disorders.

10. Evaluate effectiveness and clinical competence in initiating, conducting and terminating psychotherapeutic activities.

Teaching Methods

- Seminars, discussion, case-based presentations.
- Use of visual tapes and AV material.
- Clinical/psychotherapy in in-patient and outpatient settings.

Required Textbook

Wheeler Kathleen (2014) Psychotherapy for the Advanced Practice Psychiatric Nurse. 2nd Ed. Springer publishing co.

Other books are available. Copies will be distributed to students

Learning Assessment and Evaluation

Studies are evaluated on their abilities to critically analyze and synthesize knowledge in their participation in seminars and assignments.

1. Class participation	20%
2. Developing a model for therapy	15 %
3. Presentation	15 %
4. Clinical evaluation	50 %

Content:

Classes are held Tuesday 10-12 noon (theory) Tuesday and Wednesday 1-4 (clinical)

Unit I-

Sept. 3, 10, 17

1) Introduction to course.
2) The nurse psychotherapist and framework for practice.
3) The neurophysiology of psychotherapy.
4) Therapeutic communication. The initial contact.
5) Assessment and diagnosis.
6) The frame and working toward change.
7) Treatment and case management.
8) Process recording.

Readings: Wheeler: Ch. 1-5 (text)

Unit II-

Sept 24, Oct.1, 8

1) Developing dynamic model for therapy.
2) Formulation of hypothesis.
3) Designing therapeutic interventions.
4) Developing evaluative criteria and procedures.
5) Utilizing available research data.

Readings: Handouts and Ch. 14 test, Ch. 1-5 (Beck)

Unit III-

Oct 15, 22, 29

1) Initiating, maintaining and terminating a therapeutic relationship.
2) Assessing client's strengths and difficulties in living.
3) Analysis of clinical data.
4) Interviewing/helping clients learn more effective, more adaptive interpersonal patterns.

5) Utilizing the participant-observer role.
6) Evaluating behavioral outcomes of therapy.

Readings: Handouts. Ch. 6-12 (Beck)

Unit IV (This unit will be started earlier throughout the semester**)**

Nov 5, 12, 19, 26 Dec. 3

1) Psychoanalytic theory, Freud.
2) Interpersonal psychotherapy.
3) Cognitive-Behavioral therapy.
4) Psychodynamic psychotherapy.
5) Client centered therapy, Rogers.
6) Gestalt therapy: F. Purls.
7) Rational emotive therapy: Ellis.
8) Brief therapy models.
9) Crisis intervention models.
10) Psych pharmacotherapy and psychotherapy.
11) Psychotherapy with special populations.

Readings: Ch. 6-9, Ch. 12 & 13 Text.

Unit V-

Student Presentations (TBA)

AMERICAN UNIVERSITY OF BEIRUT

HARIRI SCHOOL OF NURSING

NURS 518 Group and Family Psychotherapy

Course Description: **NURS 518 Group and Family Psychotherapy 3cr. (1,2)**

This course is complementary to the "Models of Treatment" (NURS 517) course, and it focuses on group and family psychotherapeutic interventions. Students synthesize knowledge of theories in the provision of care to groups and families with complex Psychiatric problems. Family and group interventions strategies arediscussed in a variety of settings. Students explore the practice of these involvements n psychiatric care departments.

Placement of the course: Spring Semester 2019-2020
Tuesday 9-11
Clinical Monday, Wed, Tues/Thursday 2- 4:30 pm

Faculty responsible for the course: Laila F. Farhood, PhD, C.S., RN,
Professor
Email: lf00@aub.edu.lbExt.
5975/5951

Learning Outcomes:

Upon completion of the course, the student will be able to:

1. Describe family theoretical approaches, assessment, intervention, andoutcome.
2. Understand group processes and approaches to group therapy.
3. Apply basic concepts and models of treatment for families and groups witha variety of mental health problems and in different settings.
4. Use evidence-based research to explore outcomes for family and group interventions.
5. Examine the responsibilities and qualities of APN nurses as group leadersand family therapists.
6. Demonstrate clinical judgment, ethical decision making and culturalsensitivity when working with families and groups.
7. Develop a model/ framework for therapeutic interventions based on evidence-based research, practice guidelines, and clinical judgment.

Teaching Methods

- Seminars, discussions, case-based presentations.
- Use of resources and AV material.
- Clinical: Family & group psychotherapy in in-patient, outpatient settings and in the community.

Required Textbook

Goldenberg H, Goldenberg I, (2008) Family Therapy: An overview 8th Ed, Thomson Brooks-Cole.

Yalom Irvin (2005) The Theory and Practice of Group Psychotherapy 5th Ed. Basic books.

Wheeler Kathleen (2014) Psychotherapy for the Advanced Practice Psychiatric Nurse 2nd Ed. Mosby, El Sevier.

Journal, sites & books are also available. Relevant material will be distributed to students each session.

Learning Assessment and Evaluation

Students are evaluated on their abilities to critically analyze, synthesize and apply knowledge evidenced in their participation in seminars and assignments.

1. Class participation	20%
2. Developing models for therapy	20 %
3. Presentation	10 %
4. Clinical evaluation	50 %

Content:

Unit I-

1) Introduction to course (introductory concepts)
2) Family nursing: Focus, Evolution & Goals
3) Theoretical foundations of family nursing
4) Family communication patterns & processes
5) Adopting a framework for family relationship
6) Family Development: Historical roots
7) Interlocking Systems: The individual & the community
8) Family Therapy Models: Systems theory, Psychodynamic, Bowen's Family Theory, Experiential Models, Strategic, Behavioral & Cognitive-Behavioral Models.
9) Family Assessment & Therapeutic outcomes
10) Comparative View of Family Theories & Therapies

Readings: Text Ch 1, 2, 4, 5, 7-13, 17, 18, Friedman Ch. 1, 2 & 3, Ch. 10

Unit II-

1) Therapy with couples
2) Sex Therapy
3) Family therapy with "medical system" patients

Readings: Mikesell Ch 1-5, Ch 9, 13-16, 21-25

Unit III- Group Therapy

1) General Principles & Dynamics
2) Initiating, Screening & Maintaining groups
3) Therapeutic factors

4) Group Cohesiveness & group behavior
5) The Therapist: Basic Tasks
6) Phases of groups
7) Specialized Therapy Groups
8) Group Therapy for Trauma Victims
9) Psychodrama

Readings: Yalom (text) Ch 1-6, 9,14, 15,17, Corsini Ch14, Klein Ch. 1, 2, 6-8

Unit V-

Student Presentations (throughout the semester)

STUDENT CONDUCT

Students are expected to abide by AUB's policy on student code of conduct. In particular,while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from.Using another person's documented ideas or expressions in one is writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

b. Forging parts of, or signature on, official documents (including both,university documents and relevant outside documents, such as doctors' notes).

c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

LF Jan 28, 2020

AMERICAN UNIVERSITY OF BEIRUT

HARIRI SCHOOL OF NURSING

Course syllabus for N519: Clinical Residency in Acute Psychiatric Care

2019-2020

Number of credits: Four credits; 16 hours per week.

Prerequisite: All Psychiatry clinical courses

Catalogue Course Description: Clinical Residency in Acute Psychiatric Care 0.16; 4 cr.

The purpose of this clinical practicum course is to provide opportunities for students to apply the content learned from courses. Students will use assessment skills, selected theories, and research to identify complex health problems and interventions for diverse populations. The focus is on advanced case management and practice of the role, which is further developed as the student integrates theory and practice skills in acute and chronic or community settings. Students will spend 5 days per week, 8 hours/day at a clinical site with direct supervision from a preceptor.

Detailed course description: This course is a clinical residency. Students apply scientific and theoretical knowledge in practice to develop the skills needed for the advanced practice nurse roles of practitioner, educator, consultant and researcher. Students select a specialty area and focus on a patient population of their choosing in developing their clinical expertise and the particular roles they want to emphasize. Students examine the various psychological, sociocultural, physiological and organizational factors that influence client care and how they relate to the advanced practice nurse roles. Students are assigned to and supervised by a preceptor in the clinical setting and their experiences will be coordinated with the course coordinator at the School of Nursing. Weekly or bi-weekly scheduled meetings with the preceptor and communication with faculty are required for evaluation of progress.

Course placement: This is the last course in a series designed to prepare advanced practice nurses in psychiatric mental health care with the subspecialty of the student's choice.

Course coordinator: Laila F. Farhood, PhD, C.N.S professor

Course objectives: Upon completion of the course, the student will be able to:

1. Plan, implement and evaluate individual, family and group interventions based on integration of theory and empirical evidence to meet the educational and health care needs of clients and their families in a variety of psychiatric settings.
2. Critically evaluate the needs of the organization and individual health care providers in coordinating multidisciplinary care for specific client populations.
3. Demonstrate competence in the selected advanced practice nursing roles: clinical practice, education, research, consultancy, leadership and professional development
4. Demonstrate critical thinking skills in clinical problem solving based on theory, research, and clinical knowledge.
5. Utilize therapeutic communication techniques that are culturally sensitive with clients, families and health care providers.
6. Demonstrate professional integrity, accountability, initiative and autonomy.

Role-specific behavioral objectives

Clinical practitioner: The advanced Practice Nursing (APN) student will:

1. Write individual behavioral objectives approved by the faculty and preceptor that are consistent with the course objectives.
2. Demonstrate critical thinking and diagnostic reasoning in assessment and decision making.
3. Design, implement and evaluate therapeutic nursing interventions to meet the needs of clients in collaboration with the nursing staff.
4. Coordinate the care of a load of patients with the multidisciplinary team.

Educator: The APN student will:

1. Identify the advanced practice role for staff, clients and their families.
2. Implement staff/patient/family teaching based on a plan including objectives, outline and evaluation.

Researcher: The APN student will:

1. Identify an area of practice and review related research findings and their utilization potential.
2. Develop a research utilization proposal including critical appraisal of the literature, analysis of feasibility of application and implementation plan.

Consultant: The APN student will:

1. Identify problem areas in clinical practice and suggest evidence based solutions.

Teaching methods:

Precepted clinical experience: A minimum of 240 hours of clinical experience are required for this residency. Students develop their clinical objectives early in the semester and propose a plan for implementation. The clinical experiences are planned in coordination with the faculty and under the supervision of a clinical preceptor. The student submits weekly logs about clinical activities and interventions.

The student meets with the preceptor/faculty every week or 2 weeks to discuss progress. Students are encouraged to gain experience in each of the advanced practice roles and to participate in multidisciplinary rounds.

Research utilization project: Each student is required to identify one project that s/he will be involved in. The project may relate to the unit as a whole or to a patient population, and be specified in the student's objectives. The student must submit at the end of the semester a written report (no more than 10 pages) of the project, which may relate to a clinical protocol, case management, or evidence based practice project agreed upon with the preceptor. The written proposal must include:

1. Introduction: Significance of the problem with support from the literature and rationale for the project. Summarize and evaluate the empirical evidence related to the topic.
2. Setting: The place where the project will be conducted and the parties involved. Mention current practice in the setting.
3. Objectives and proposed outcomes of the project.
4. Implementation plan, with discussion of strengths and weaknesses.
5. Evaluation: Proposed evaluation plan of the project.

Case presentations: Students present cases or clinical issues pertinent to the area of specialty to the staff in the clinical setting. The presentation may be done in a multidisciplinary conference or as an in-service session to the staff. Each student is expected to present at least one case. If the presentation is about a client-family problem:

- The student chooses a client who needs an advanced practice intervention for a clinical problem (physical or psychosocial) that may involve the family. Examples include coordination of care by multidisciplinary staff, problem with complex clinical management, or problems related to client/family coping.
- The student prepares and presents a case analysis, including demographic and clinical data about the client, relevant dimensions of the problem, a proposed plan for evidence-based intervention, and outcomes if available.
- The student must provide an outline and a reference list to the audience and use audio visual aids as feasible.

In case the presentation is about issues related to the advanced nursing practice:

- The student identifies a problem related to advanced practice, such as unit based clinical practice issue, quality improvement, staff development, problems in nurse-physician collaboration or patient care management, e.g., transfers within the organization.
- The student defines the problem, identifies its dimensions and presents a comprehensive analysis of the situation, including advanced practice interventions and outcomes if available.
- The student must provide the audience with an outline and reference list of the presentation, and use audio visual aids.

Weekly clinical logs: Each student will maintain a written log of the clinical activities for each week to demonstrate progress towards the clinical objectives

identified in the beginning of the semester. The logs describe the activities done and how they relate to each of the clinical specialist roles. The logs are communicated to the clinical preceptor and course coordinator. A sample clinical log would briefly describe weekly clinical activities under each of the advanced practice roles using the following format:

Week/role	Practitioner	Educator	Researcher	Consultant	Hours/week
Week 1					
Week 2					
Week 3					
Week 4					
Week 5					
Week 6					
Week 7					

In addition, students need to include the decision making process used in handling dilemmas, what interventions were used and whether they were successful, their thoughts and feelings about the experience, and suggestions for improving the experience.

Independent readings: Students are self-learners who will use library and internet facilities to search the literature needed for their clinical practice and projects. A number of print and electronic resources will be provided for students for reading.

Evaluation: The course is graded as Pass or Fail, but the components evaluated include:

Clinical preceptorship evaluation
Clinical logs
Research utilization project

Note: Flexibility in planning and organizing the activities within the clinical residency is maintained to accommodate the setting in which the learning takes place. The achievement of the set objectives will determine student success.

Student conduct

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.
In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using

another person's documented ideas or expressions in one is writing without acknowledging the source constitutes plagiarism.
Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
b. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:
http://pnp.aub.edu.lb/general/conductcode/index.html

Substantive Change Notification of the Master of Science in Nursing Program

American University of Beirut Hariri School of Nursing

Overview of the MSN Program

The Master of Science in Nursing (MSN) program was launched in 2003-2004, starting with 2 tracks: Adult Care and Nursing Administration. Moreover, students interested in nursing education could have a minor in education along with their main MSN degree through taking additional courses in education. The current MSN program offers a minimum of 36 credits with a comprehensive exam and the option of either a 6 credit thesis, or a 3 credits graduation project with 3 credits of elective course work.

In 2007, the MSN program received unconditional accreditation from the Commission on Collegiate Nursing Education (CCNE). In 2008, the Psychiatric and Mental Health track was launched and in 2009 the Community and Public Health track was initiated.

In 2012, the MSN program was re-accredited by CCNE for a period of 10 years.

The MSN program currently includes the following components:

1. Nine credits of core courses: Nursing Theory (NURS 500, 2 credits); Foundations of Advanced Practice (NURS 501, 3 credits), and Advanced Nursing Research (NURS 502, 4 credits).
2. One 3 credit role development course (NURS 507: Nursing Administration or NURS 509: Nursing Education)
3. Seventeen to twenty two credits of specialty courses (this varies by track)
4. Six credits thesis or 3 credits project + 3 credits elective coursework
5. One to three credits of Elective coursework.

Students in the adult care track who plan to get certified in their area of specialty in the US may take NURS 528 (2 credits), an additional practicum of 100 hours of clinical training in their area of specialty so that they meet the required 500 hours of clinical within the program.

All tracks currently offer 36 credits except for the psychiatric and mental health track that is 40 credits. The current curricula of all 4 tracks are included in Appendix 1.

June 10, 2015

Rationale for the revision of the MSN program

The MSN program is continuously evaluated by the Graduate Studies Committee and often reviewed at the course level. In 2011, around the time of re-accreditation of the MSN program, CCNE developed new essentials for graduate education. Those new essentials were not imposed on programs undergoing reaccreditation for immediate implementation at the time, but were recommended for implementation soon. The main features of the new recommendations were shifting the focus away from preparation in roles of advanced practice and more towards ensuring generic skills and knowledge for MSN students in all areas of specialty. Another major recommendation in the 2011 essentials was that Masters programs provide core content to all students in the following areas: Organizational culture and assessment; systems theory/thinking; leadership and team building; policy development; politics and ethics; change theory and management; process and quality improvement; problem identification, data driven decision making; health care technology; health information management; and health care economics.
Another factor that drove the revision of the MSN program is the consensus model of Advanced Practice Registered Nurse (APRN) regulation that defined the roles of APRN, namely the certified registered nurse anesthetist, certified nurse-midwife, clinical nurse specialist, and certified nurse practitioner and related competencies, as well as the requirements for APRN education. Thus in light of the above, the Graduate Studies Committee of the Hariri School of Nursing reviewed all the data at hand and revised the MSN curriculum accordingly. Description of the revised program is as follows:

'*The program provides students with a thorough understanding of the theoretical basis of advanced practice and also incorporates managerial, administrative and educational skills. Depending on the track of study, the graduate is expected to be an expert clinician, an informed educator, a knowledgeable researcher and a skilled manager*'.

The curricular revisions of the MSN program include changes to the common core courses that students in all tracks take, in addition to track-specific changes. All changes are in accordance with CCNE requirements detailed in the 2011 Essentials of Graduate Education.

First the MSN program learning outcomes were revised. The table below shows the current and revised MSN program learning outcomes.

Current Program Learning Outcomes	Revised Program Learning Outcomes
Integrate theory and research in nursing and related disciplines as basis for advanced nursing practice and role development.	Integrate theory and research in nursing and related disciplines as basis for advanced nursing practice and role development.
Initiate, participate in, utilize and disseminate nursing research.	Participate in conducting research within collaborative teams to improve care outcomes and support policy changes
Deliver advanced practice nursing based on critical thinking, advanced knowledge and skills in specialized area of nursing.	Deliver advanced practice nursing based on critical thinking, research evidence, and advanced knowledge and skills in specialized area of nursing.
Demonstrate advanced decision-making across health care settings, using multidisciplinary approach.	Demonstrate advanced clinical and data driven decision-making across health care settings.
Analyze the impact of socio-cultural, ethical, legal, and health care policy issues on nursing practice and health care delivery.	Analyze the impact of socio-cultural, economic, ethical, legal and political issues on nursing practice, health promotion strategies, and health care delivery.
Assume leadership roles in education and management to promote health care.	Assume leadership roles in education and management, utilizing inter and intra-disciplinary approaches and systems thinking.
	Analyze current and emerging technologies to optimize patient safety, cost-effective care, quality and health outcomes'.

The new core course work includes 12 credits divided as follows:

- NURS 500: This course remains worth 2 credits but the title is changed to 'Theories, concepts, and ethical practices for advanced nursing practice' to reflect content beyond nursing theories to other related theories and ethics content.
- NURS 501: This course was reduced from 3 to 2 credits with the understanding that specialty-specific roles shall be integrated in specialty courses in the various tracks. The title is changed to 'Advanced Nursing Practice: Scope and Roles'.
- NURS 530: Statistical Reasoning and Application for Nursing Research. This is a new 2-credit course that covers statistical analysis including theory and application in the computer lab on SPSS. This course was added based on students' request for more practice in statistics and in order to better prepare graduates who might be interested in pursuing doctoral study.

- NURS 502: This research course was reduced from 4 to 3 credits. The content is the same except the statistical analysis part was removed since it will be covered in NURS 530.
- NURS 527: This 3-credit course was changed from 'Developing Health Service Programs' to 'Systems Approach to the Development and Evaluation of Health Care Services'. This course, which was offered only to the Administration Track students, will become part of the core courses for students of all tracks, in order to provide content related to leadership, systems thinking, change management, informatics, quality improvement, as well as project development and evaluation.

Appendix 2 shows the current and revised core courses.

The role development courses are no more required from all the students. In the revised program, NURS 507 is reduced from 3 to 2 credits and is required from the revised administration track students. The title is changed from 'Role development in Nursing Administration'' to 'Essentials of Nursing Administration and Management'. On the other hand, NURS 509, 'Role Development in Nursing Education', may be taken by students as an elective.

The revised clinical tracks of the MSN program at AUB are tailored to prepare clinical nurse specialists (CNSs). The decision to have a CNS program is in line with the nursing regulation in Lebanon where the CNS is the only advanced practice role that can be legally recognized.
Below is a description of the changes made in the specialty courses in the various tracks.

Nursing Administration and Management Track

In the revised administration track named 'Nursing Administration and Management Track', students will take the 12 credits worth of core courses. Specialty courses include the revised NURS 507 Essentials of Nursing Administration and Management); NURS 531, a new one credit course titled 'Practical Applications in budgeting for nurse managers'; NURS 525, the transformational leadership course that was expanded from 2 to 3 credits and renamed 'Leadership Theories and Approaches for Nurse Managers'; a new 3 credit course in Nursing Informatics (N 6284: E-Health); the same current NURS 520 'Managing Quality with Teams' course; the same MNGT 332 course titled 'Human Capital Management'; and the same NURS 508 (Advanced Practice in Nursing Administration)'. An agreement was reached with the University of Colorado to have our students take their informatics course online (NURS 6482: e-Health). There is no course currently offered at AUB that provides the content and

practical experiences needed in health/nursing information management; so we thought of using this course until we find the capacity to offer an equivalent course at AUB. HMPD 342, Financial Management and Accounting, was replaced by NURS 531, Practical Applications of Budgeting in Nursing, since the administration and management track is geared to prepare first level managers, whereas HMPD 342 is more appropriate for executive level training. The total number of credits for the Nursing Administration and Management Track is 37 credits. Appendix 3 shows the current and revised specialty courses of this track.

Adult-Gerontology Track

The revised Adult Care Track is named Adult-Gerontology Track in line with accredited US programs. The adult-gerontology students will take the revised core courses described above. The Advanced Assessment, Advanced Pathophysiology and Advanced Pharmacology courses (the 3 Ps) remain as offered now. NURS 505 (Advanced Practice in Adult Care I) is expanded from a one 4-credit course to two 4-credit courses titled 'Advanced Practice in Adult-Gerontology I' and 'Advanced Practice in Adult-Gerontology II'. These 2 courses will provide enough content in gerontology, health promotion and risk reduction, in addition to the management of clients with acute and chronic health problems. Moreover, the additional 2 credits of clinical will ensure that students complete the 500 clinical hours required for APRN programs. NURS 506 (Advanced Practice in Adult Care II) remains 4 credits and is titled 'Advanced Practice in Adult-Gerontology III'. The total number of credits for the Adult-Gerontology Track is 39. Appendix 4 shows the current and revised specialty courses of this track.

Community and Public Health Track

The only change made for this track is the addition of a one 2-credit epidemiology course (EPHD 301). The total number of credits for the Revised Community and Public Health Track is 39 credits. Appendix 5 shows the current and revised specialty courses of this track.

Psychiatric and Mental Health Track

No changes were made to this track since students were already taking the 3 Ps and getting 500 hours of clinical within their program. The total number of credits for this track is 40 credits. Appendix 6 shows the current and revised specialty courses of this track.

The revised curriculum plans of the revised tracks are included in Appendix 7.

Appendix 1: Current Curriculum Plans

Administration Track

	Fall	Credits	Spring	Credits	Summer	Credits
Year 1	NURS 500 NURS 501 NURS 525 NURS 507	2 3 2 3 10	NURS 502 NURS 527 NURS 520 HMPD 342	4 3 3 3 13		
Year 2	MNGT 332 **Comprehensive exam**	3 0 3	Thesis or Project + Elective NURS 508	6 or 3 + 3 4 7	Total credits	36

Adult Care Track

	Fall	Credits	Spring	Credits	Summer	Credits

Susan D. Ruppert, PhD, FNP-C, FAANP, FAAN
Chair, CCNE Board of Commissioners

June 2, 2016

Subject: CCNE Action Report

Dear Dr. Ruppert,

I am in receipt of the CCNE letter dated May 27, 2016 regarding the substantive change notification document which was submitted to CCNE for approvals on June 10, 2015. In particular, this letter aims to clarify the below statement:

'Faculty are academically and experientially prepared for the areas in which they teach (Key Element II-D). Specifically, the master's program must demonstrate that faculty are academically and experientially qualified to teach in the adult-gerontology NP track of the MSN program.

Please allow me first to clarify the point mentioned in your letter regarding adult-gerontology NP track and refer you to the substantive change notification document and in particular to page 4 which states that '*The revised clinical tracks of the MSN program at AUB are tailored to prepare clinical nurse specialists (CNSs). The decision to have a CNS program is in line with the nursing regulation in Lebanon where the CNS is the only advanced practice role that can be legally recognized'.* In other words the MSN program prepares CNSs and not NPs.

For the sake of clarity we are attaching few edits to the substantive notification document by adding the clinical nurse specialist (CNS) title to the adult gerontology track and to other tracks as applicable.
In addition, the total number of credits of the epidemiology course was changed recently from 2 to 3 credits for the community track.

Regarding the comment on the qualifications of faculty teaching in the adult-gerontology CNS track, allow me to share with you the following:

The 2 faculty members teaching in the adult gerontology clinical nurse specialist track are Dr. Samar Noureddine and Dr. Hala Darwish (CVs attached). Dr. Noureddine is trained as a clinical nurse specialist with cardiopulmonary specialty since 1994. She has published in cardiovascular nursing; is Fellow in the American Heart Association and member of the Science Committee of the Cardiovascular Council on Nursing and Allied Professionals of the European Society of Cardiology. Dr. Noureddine was involved in setting the competencies of the clinical nurse specialist at the American University of Beirut Medical Center and nationally at the Order of

Nurses in Lebanon. She has been teaching the adult care track students the advanced assessment, advanced pathophysiology and advanced practice in adult care courses since 2004. She coordinates the clinical training of MSN students with physicians and clinical nurse specialist preceptors. She gets invited to provide lectures in the critical care course offered to nurses at AUBMC and on evidence based practice. She supervised the clinical projects of 40 MSN students in the adult care track and chaired the thesis committees of 6 students.

Dr. Hala Darwish is an acute care nurse practitioner with specialty in neuroscience. Her clinical expertise and research focus is on cognitive function mainly learning and memory and dementia. She has published in neuroscience nursing. She is currently one of the principal investigators of a study entitled: A cohort of older adults in Lebanon: a dementia study. She is also interested in Alzheimer's disease and the challenges that face the caregivers. She is currently working with a multidisciplinary team on developing a training program for the primary health care providers, nurses and psychologists to assist patients with Alzheimer's caregivers at home when faced with challenging behaviors such as agitation and hallucinations. She follows up patients with Multiple Sclerosis at the AUB Medical Center, as she is a certified nurse and specialist in multiple sclerosis. Dr. Darwish is the Managing Director of the Abou Haidar Neuroscience Institute, and the Nehme and Therese Tohme Multiple Sclerosis center at the AUB medical center in addition to her academic appointment at the School of Nursing. She participated in the development of and gave part of the neuroscience core course offered to nurses at AUBMC. She coordinates the clinical training of MSN students specializing in neuroscience and has supervised the clinical projects of many students.

Both Dr. Noureddine and Dr. Darwish are experts in their fields and certainly academically and experientially qualified to teach in the adult-gerontology CNS track.

I would be more than happy to provide more information if deemed necessary.

Regards

Dr. Huda Abu-Saad Huijer RN, PhD, FEANS, FAAN
Professor of Nursing Science
Director Hariri School of Nursing

New York, NY 10017-2322

Dear Dr. Huijer:

On behalf of the Commission on Collegiate Nursing Education (CCNE), I am pleased to advise you that the CCNE Executive Committee reviewed the follow-up report submitted on July 27, 2016 by the master's degree program in nursing at American University of Beirut and determined that the program has demonstrated compliance with Key Element II-D.

As a reminder, programs are expected to comply with the current CCNE standards and procedures throughout the period of accreditation. This includes advising CCNE in the event of any substantive change affecting the nursing program. Substantive change notifications must be submitted to CCNE no earlier than 90 days prior to implementation or occurrence of the change, but no later than 90 days after implementation or occurrence of the change. These reporting requirements are discussed further in the CCNE procedures.

The Commissioners join me in expressing our best wishes as you proceed with tasks important to the future of your nursing program.

Sincerely,

Susan D. Ruppert, PhD, FNP-C, FAANP, FAAN

NURS 200 INTRODUCTION TO NURSING
Fall 2020/2021

Coordinator: Dr. Ghada Najjar Assaf, Ext. 5973, Email: gn29@aub.edu.lb
Room 411D, Office hours by appointment

Co-Coordinator: Mrs. May Khoury, Ext.5957, Email: mn01@aub.edu.lb
Room 312, Office hours by appointment

COURSE DESCRIPTION:

This course is designed to introduce major concepts that are basic to nursing practice. It familiarizes the student with the nature, history and trends of nursing and the nurses' role in meeting health care needs of society in different settings. This course focuses on concepts related to the nurse, client and health care environment, professional nursing practice, family development and human needs. Emphasis is also placed on relating information from current nursing literature to nursing practice. The student is encouraged to be a self-learner; the instructor will be a facilitator of learning.

This course is taught in a blended format which uses a combination of face to face (f2f) modules (in class meetings) and online modules (online activities). In fall 2020/2021, and due to COVID-19 pandemic, most of the activities will be online with few exceptions based on the situation in line with AUB rules and regulations. The exams will take place on campus and in both computer labs (HSON & Van Dyck).

Power point, audio recordings, multimedia and interactive exercises will be used to enhance acquisition of course material. A computer with access to AUB MOODLE is essential. The school's computer lab is open from 8am to 3pm but needs previous reservation as we have limited seats due to COVID-19 pandemic. All course materials can be found on MOODLE.

CREDIT HOURS:

2 credits = 2 lecture hours.

LEARNING OUTCOMES

Upon successful completion of this course, the student shall be able to:

1. Discuss major concepts in nursing in relation to the BSN Conceptual Framework.
2. Describe the development of the nursing profession: history and trends.
3. Recognize the impact of professional nursing as a vital force in a changing society.
4. Identify the nursing roles in multiple settings and their ethical and legal implications.
5. Define the components of the nursing process.
6. Identify life patterns and healthy psychosocial responses in relation to health and illness.
7. Recognize the importance of scientifically based nursing literature to nursing practice.

CONTENT:

Unit I Foundations of Nursing practice

A. Introduction to Nursing
B. Cultural Diversity
C. Health and Illness
D. Health of the Individual, Family, and Community
E. Theory, Research, and Evidence-Based
F. Values, Ethics, and Advocacy
G. Legal Implications of Nursing

Unit II Health Care Delivery

A. The Health Care Delivery System
B. Care Settings and Continuity in Health Care Settings and the Community

Unit III Person- Centered Care and the Nursing Process

A. Blended competencies, clinical Reasoning, and processes of Person-centered care.

Unit IV Promoting Health across the Life Span

A. Developmental Concepts
B. Conception through young adult

Unit V Roles Basic to Nursing Care

A. Communicator
B. Teacher and Counselor
C. Nurse Leader, Manager, and Care Coordinator.

Unit VI Promoting Healthy Psychosocial Responses

A. Self-Concept
B. Stress and Adaptation
C. Spirituality
D. Loss, Grief, and Dying

PLACEMENT OF THE COURSE:

This course is offered twice per year. Fall admission students and spring admission students can take this course in their sophomore year of the Bachelor of Science in Nursing

TEACHING FACILITIES:

Classroom, Computer Lab, Healthcare settings

TEACHING METHODS:

Power point presentations/discussions
Class Activities
Online assignments
Discussion Forums
Visits to healthcare settings
Online exams

REQUIRED TEXTBOOKS:

Taylor C., Lillis C., LeMone P., Lynn, P. (2015). Fundamentals of Nursing (8th Ed.). Philadelphia: Lippincott Co.

COURSE REQUIREMENTS:

Class Activities	5%
Online activities & Forums	30%
Midterm exam	30%
Final examination	35%
Total	100%

POLICIES:

1. Attendance and class participation is expected of all students to all classes. Students who miss over one fifth of lecture hours will be asked to drop the course.
2. Student is expected to be prepared for assigned readings of each class session and a possible pop quiz.
3. Medical library orientation is a required component of the course.
4. An unexcused absence from a scheduled exam or test will result in a grade ZERO for that exam.

5. During an exam, if a student is noticed cheating, he/she is given a ZERO and reported to the School's Disciplinary Committee.
6. All course requirements must be completed by the learner before grades are submitted for credit.
7. A "70" grade must be attained in order to pass this course.

STUDENT CODE OF CONDUCT

Students are expected to abide by AUB's Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
b. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University; for more information, visit:
http://pnp.aub.edu.lb/general/conductcode/index.html

Student Support:

Technical Support

For Moodle support, contact the IT Academic Services at extension: 3589 or e-mail moodle@aub.edu.lb

Special Needs Support

'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to

tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via Ethics Point atwww.aub.ethicspoint.com.

NURS 201: Introduction to Nursing Practice
Spring Semester 2019

BSN II

Course Coordinator	Dr. Lina Kantar
Lecture: 1 h **Credits : 1**	Tuesday 8:30-9:30
Simulation: 2 hrs. **Clinical: 3 hrs.** **Credits : 1**	Friday
Pre-requisite	Human Anatomy & Physiology 244 NURS - 200
Office	310
Tel Ext	5969
Email	la67@aub.edu.lb
Office hours	Monday: 9:00 – 12:00 Thursday 13:00 - 15:00

Course Description

This course focuses on fundamental concepts and principles essential for nursing practice. The course is designed to assist students in developing basic clinical competencies, with the nursing process as a framework. These competencies entail basic nursing skills related to vital signs; oxygenation; asepsis and infection control; safety; hygiene; activity and exercise; nutrition; elimination; skin integrity and wound care; and medication calculation, preparation, and administration. Interpersonal communication, ethical and legal considerations of care, and nursing documentation are emphasized in each of the tackled nursing skills. Students are required to demonstrate the skills in the simulation laboratory and clinical facility under the direct supervision of the faculty and preceptors.

Learning Outcomes

Upon successful completion of this course, the students will be able to:

1. Use the nursing process as a framework to develop concepts of basic nursing practice.
2. Identify the roles of the various members of the health care team who complement the nurse's implementation of the plan of care.

3. Utilize effective methods of communication when interacting with patients, families, colleagues, and members of the health care team.
4. Demonstrate competence while performing the following basic nursing skills: measuring vital signs; delivering oxygen; adhering to infection control and asepsis; applying principles of patient safety, patient exercise, and body mechanics; providing patient hygiene; assessing and providing care related to patient nutrition and elimination; and calculating, preparing, and administering medications in the simulation lab and practice settings.
5. Integrate ethical and legal framework of nursing practice when planning for patient care.

Teaching strategies

A variety of teaching strategies will be utilized including Moodle as a learning management system, lectures, demonstration, return demonstration, discussion, and computer assisted instructions from Mosby's Nursing skills (available at SAAB Medical library) http://www.nursingskills.com/saabmedlibraryaub-lebanon/

Learning Activities

Learning activities include class room discussion, lab practice with return demonstration in the HSON simulation lab, and clinical practice at the American University of Beirut Medical Center.

Evaluation Scheme

The following scheme will be used to assess student learning:

Assessment Tool	Percentage	Date
○ **Test 1**	**20**	**Feb. 28**
○ Test 2	20	**March 24**
○ **Final Theory exam**	40	May 12
○ OSCE **Final Clinical Exam**	**15**	**May 15**
○ **Lab Performance/attendance**	**5**	**End of simulation sessions**
○ Performance Clinical	Pass/Fail	End of clinical rotation
Total	**100**	

Course Topics

- Nursing Process
- Vital Signs
- Oxygenation
- Asepsis & Infection control measures
- Safety
- Patient Hygiene
- Patient Nutrition
- Patient Elimination
- Skin integrity and Wound Care
- Patient activity & positioning
- Medications: calculation, preparation, and administration (oral, sublingual, intradermal, subcutaneous, and intramuscular)

Materials needed during the semester (to be purchased by students)

Stethoscope	Pens (black & blue)
Pen Light	Pair of scissors
Watch with seconds	Note Book

Course Policies

1. All course requirements must be completed before grades are submitted for credit.
2. **A student has to pass the theoretical component of the course (evaluated by combined scores of Tests 1 and 2, & final theory exam) with a minimum score of 70% in order to pass the course regardless of the total course grade.**
3. A student who misses more than one fifth of the sessions will be asked to withdraw from the course.
4. A student who misses an exam without a valid reason will take a zero on that exam.
5. A student who misses a clinical or a class-lab experience will get a zero for that experience.
6. The computation test must be passed with a minimum grade of 80% for progression to the next clinical course. One retake is allowed. A student achieving less than 80% on the test will receive an incomplete grade on NURS 201 and must repeat and pass this portion of the course.
7. **The passing grade of the course is 70%.**
8. **OSCE passing grade is 70%. You need to pass OSCE to pass the course.**
9. Attendance of all scheduled clinical experiences is mandatory.
10. All absences from clinical must be reported to the course coordinator/preceptor prior to commencing duty, and a make-up will be scheduled.

11. All students must adhere to the uniform policy of the HSON when in the clinical areas.
12. Unexcused absence, tardiness, and lack of preparation may constitute grounds for a failing clinical grade.
13. Students are expected to abide by AUB's policy on student code of conduct. Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit http://pnp.aub.edu.lb/general/conductcode/index.html
14. 'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Nursing Process
Week 1 & 2
Simulation Laboratory

Application of the nursing process

You may dwell on two or three of the assigned cases, but not necessarily all of them.

1. Review with the students the various steps of the nursing process as applied to the cases under study; included will be the following:
   i. Identifying data collection approaches used in each case (observing, interviewing, examining)
   ii. Categorizing assessment findings into subjective and objective data
   iii. Appropriately choosing the actual and potential diagnostic labels from the NANDA 2018-2020 list
   The new list is different from the old one. See the list posted on Moodle
   iv. Formulating diagnostic statements (3 parts for the actual and 2 parts for the potential)
   v. Developing outcomes to prevent, reduce or eliminate health problems as applied to the case
2. Refer to the medical surgical book (on the table) to show the students how to select the appropriate interventions that align with the written outcomes

AMERICAN UNIVERSITY OF BEIRUT

HARIRI SCHOOL OF NURSING

NURS 202 HEALTH ASSESSMENT

Spring 2019

Course Description

Nursing 202 is a two credit course offered in the Spring Semester of the Sophomore year of the BSN program. The course focuses on assessment of adult health. It focuses on the development of beginning skills in history taking, physical assessment, and documentation. Emphasis is placed on assessment of the physical, psychosocial, and cultural dimensions of the client. The course helps students acquire the techniques of physical assessment consisting of inspection, palpation, percussion, and auscultation. Interview techniques and communication skills are also stressed. The student will learn to conduct a comprehensive, systematic, and organized health assessment that will provide accurate subjective and objective data needed to formulate nursing diagnoses that will guide the nursing process. Practice will be provided in a laboratory setting through demonstration/return demonstration and simulation activities and in the clinical settings. Students will constantly apply proper ethical/legal considerations into clinical practice.

Course Coordinator:

Preceptors:

Ms. Talin Gulgulian
Email: tg03@aub.edu.lb

Ms. Joyce Abi Kharma
Email: ja73@aub.edu.lb

Ms. Grace Hakim
Email: gh20@aub.edu.lb

Mr. Ahmad Kaskas
Email: ak109@aub.edu.lb

Ms. Asiya Daaboul
Email: ad67@aub.edu.lb

Required Text:

1. Janet Weber & Jane Kelly (2018). Health Assessment in Nursing. Sixth Edition, LWW Lippincott, Philadelphia.

2. Doenges and Mourhouse (2016). Nurses' Pocket Guide: Diagnoses Interventions, and Rationales. F.A. Davis. 14th edition

3. Janet Weber (2018). Nurses' Handbook of Health Assessment. Ninth Edition, LWW Lippincott, Philadelphia.

LEARNING OUTCOMES

Upon completion of the course the student will be able to:

1. Prepare a patient physically and emotionally for a health history and a physical examination.

2. Demonstrate effective communication skills (verbal and written) necessary to elicit a thorough health history.

3. Develop a systematic approach for carrying out a comprehensive health history.

4. Conduct a comprehensive physical exam considering the client's psycho-social, cultural, and spiritual dimensions.

5. Conduct a head-to-toe physical assessment in a systematic manner.

6. Apply appropriate techniques used in physical assessment of all body systems including skills of inspection, palpation, percussion, and auscultation.

7. Discuss the rationale for using specific techniques in physical assessment.

8. Evaluate findings (history and physical) to identify normal and deviations from normal.

9. Demonstrate accurate and appropriate documentation of health history and physical exam findings.

10. Formulate appropriate nursing diagnoses using NANDA that reflect the client's health needs and priorities.

11. Recognize ethical and legal concerns that are specific to nursing assessment.

COURSE OUTLINE

UNIT I: Understanding Assessment:

- Health Assessment and the Nurse.
- The Health History.
- Interview Techniques and Communication Skills.

- Assessing Pain.

UNIT II: Promoting Health:
- Assessing Psychosocial Health.
- Assessing Spirituality.
- Assessing Nutrition.

UNIT III: Physical Assessment:
- Assessing the Integumentary System.
- Assessing the Head, Face, and Neck.
- Assessing the Eye and Ear.
- Assessing the Respiratory system.
- Assessing the Cardiovascular System.
- Assessing the Peripheral Vascular and Lymphatic Systems.
- Assessing the Abdomen.
- Assessing the Female Genitalia.
- Assessing the Male Genitalia.
- Assessing the Musculoskeletal System.
- Assessing the Neurologic System.
-

UNIT IV: Physical Assessment of the Older Adult

Prerequisite Courses: Human Morphology 246, Physiology 246.

Placement: Spring Semester, BSN II Level

Credit Hours: 2 credits
- 1 credit theory
- 1 credit clinical practice

Teaching Methods:

- Classroom lecture and discussion.
- Skills Laboratory/ Clinical practice at AUBMC

Course requirements and evaluation:

Midterm exam	45 %
Final exam/theory	45 %
OSCE	10 %
Two completed history and physical Assessment reports	P or F
Clinical Practice	P or F

Course Policies

1. All course requirements must be completed before grades are submitted for credit.

2. Attendance is expected to all classes. The student will lose **two** points for each incidence of tardiness or absence.

3. The student is expected to come to class prepared. This means that all of the assigned readings and activities will be completed by the beginning of class time. **Drop quizzes are to be expected randomly.**

4. Any student who is late or absent from class lab, or a clinical assignment for a valid reason, and provided the absence does not exceed **one time**, will be requested to repeat that assignment. An absence of more than one day regardless of cause results in dropping the course.

5. Any student who is absent from a clinical assignment due to illness is expected to inform the instructor or the nurse in charge of the unit by 8:00 a.m. on the day of his/her clinical assignment. Clinical absenteeism for medical reasons has to be justified and supported by a <u>medical report</u>

6. All students must adhere to the uniform policy of the school of nursing when in the clinical areas.

7. Absence from a scheduled exam will result in a grade of "0" for that exam. Make up exams when for a valid reason, will be subjective in nature and are left to the discretion of the faculty teaching the course.

8. **<u>Cell-phones must be turned off or put to silent mode during class and clinical. Cell-phones are FORBIDDEN in the exam room.</u>**

9. A grade of "0" will be given to a late assignment.

10. The student will be expected to schedule an appointment with the course coordinator to clarify any concern regarding the course.

11. The student is expected to bring to class and to the clinical units appropriate equipment (stethoscope, flash light, pen, pencil etc …)

12. The passing grade for NURS 202 is 70.

13. **The student has to pass the theoretical component (Exams), with a final score of 70% and the clinical component with a 'P' in order to pass the course. The student will repeat the course in case he/she fails one of the two components (Theory or Practicum).**

14. Students are expected to abide by AUB policy on student code of conduct. Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the university.
    For more information: Full Text
    Appendix I (Theory)
    Appendix II (Practicum)

APPENDIX I

Student Conduct (Theory)

Students are expected to abide by AUB Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

d. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

e. Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

f. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:

http://pnp.aub.edu.lb/general/conductcode/index.html

APPENDIX II

STUDENT CONDUCT (Practicum)

Students are expected to abide by the Nurses' code of ethics. Whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all their actions during clinical practice. Upholding ethical nursing practice incorporates: respecting clients dignity and freedom of choice; acting to promote the good of the clients; treating clients fairly and equally; telling the truth and admitting error in due time; maintaining confidentiality; and more important, doing no harm to

patients by sustaining safe nursing practice. Other actions that require disciplinary actions to be taken are:

a) Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
b) Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
c) Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Students with Special Needs

'AUB strives to make learning experiences as accessible as possible. If you anticipate or experience academic barriers due to a disability (including mental health, chronic or temporary medical conditions), please inform me immediately so that we can privately discuss options. In order to help establish reasonable accommodations and facilitate a smooth accommodations process, you are encouraged to contact the Accessible Education Office: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination Policy
AUB encourages a diverse student body and workforce, and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non-Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

DM/
Revised January, 2019

RAFIC HARIRI SCHOOL OF NURSING
NURS 210A PATHOPHYSIOLOGY I Fall 2019

Course coordinator: Marina Gharibian Adra, PhD, RN
Extension 596 Email: mg00@aub.edu.lb Mobile #: 03/681549

COURSE DESCRIPTION:

N. 210A is a 1-credit course given in the fall semester of the second year concurrently with N. 300, with the intent of making the subject of pathophysiology, an exciting exploration that relates normal body functioning to the physiologic changes that occur because of disease, as well as the body's remarkable ability to compensate for these changes.

Pathophysiology deals with not only the cellular and organ changes that occur with disease but also with the effects that these changes have on total body function. Pathophysiology also focuses on the mechanisms of the underlying disease and provides the background for preventive as well as therapeutic health care measures and practices.

Pathophysiology provides the basic link between the scientific realm of anatomy, physiology, and biochemistry and its application to clinical practice. We expect that students acquire knowledge from these related sciences prior to this course.

PRE-REQUISITES

BIOC 246 Biochemistry
HUMR 244 Introduction to Human Biology
HUMR 248 Human Anatomy and Physiology
MBIM 237 Microbiology & Immunology for Nursing

TEXTBOOK:

Norris, L. T. (2019). Porth's Pathophysiology, Concepts of Altered Health States. 10th Ed., Wolters Kluwer.

LEARNING OUTCOMES:

Upon completion of the course, the student will be able to:

1. Discuss the physiological alterations in system functioning that affect the individual along the health-illness continuum.
2. Relate knowledge acquired from human anatomy and physiology and other related sciences to alterations in human functioning.
3. Describe the features of basic disease processes.
4. Identify the clinical manifestations of selected disorders.
5. Relate the clinical manifestations of diseases to the underlying patho-physiologic processes.
6. Appreciate research findings in relation to human pathophysiology.

TEACHING METHODS:

Interactive lectures and discussions (online synchronous/asynchronous, &/or in-class)

LEARNING ASSESSMENT

Class participation and attendance of synchronized sessions	5%
Mid-term exam	50 %
Final exam	45 %

POLICIES:

1. All course requirements must be completed by the student before grades are submitted for credit.

2. Students are expected to read material on lecture topic in textbook prior to class so they will be prepared to take part in class discussions.

3. A student who misses an exam with a valid excuse may request a make up examination. The final decision for such requests will be taken by the course coordinator.

4. Irrespective of assignments, students must attain an average of 70 in both exams in order to pass the course. Students cannot pass the course if they get a grade below 70 in the exams.

5. The passing grade for this course is "70".

6. Students are expected to abide by AUB's policy on student code of conduct.

7. Mobile phones are strictly prohibited during class & exams.

8. Each student will have an opportunity to write a teacher's and course evaluation at the end of the semester.

9. Please feel free to contact me by e-mail, phone, WhatsApp for any queries.

COURSE SCHEDULE:

Date	**Time**	**N. of hours**	**Assigned Lecture**
Sept. 11 Friday	10-11:30am	1.5 hrs	Course Orientation Concepts of Health and Disease
Sept 15 T	TBA	2 hrs	Cardiovascular and Circulatory Pathophysiology
Sept. 18 Friday	10-12 noon	2 hrs	Respiratory Pathophysiology
Sept 22 T	TBA	2 hrs	Inflammatory Process
Oct. 3	Saturday (Optional)		Review session
Oct. 5 Monday	8-9am		**Mid Term Exam**
Sept. 25 Friday	2-4pm	2 hrs	Oncology/Neoplasia
Oct. 2 Friday	2-3:30pm	1.5 hrs	Hematologic pathophysiology
Oct. 9 Friday	10-11:30am	1.5 hrs	Gastrointestinal pathophysiology

Oct. 16 Friday	10-11am	1 hour	Musculoskeletal Pathophysiology
	TBA		Review session
	TBA		**Final Exam**

Student Code of Conduct

Students are expected to abide by AUB's Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.
In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism. **Plagiarism and cheating will not be tolerated and will result in referring the act to the students affairs committee at HSON.**

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

A. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

B. Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

C. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:
http://pnp.aub.edu.lb/general/conductcode/index.html

Students with Special Needs

If you have documented special needs and anticipate difficulties with the content or format of the course due to a physical or learning disability, please contact me and/or your academic advisor, as well as the Counseling Center in the Office of Student Affairs (Ext. 3196), as soon as possible to discuss options for accommodations. Those seeking accommodations must submit the Special Needs Support Request Form along with the required documentation.

Students with Learning Disabilities

AUB strives to make learning experiences as accessible as possible. If you anticipate or experience academic barriers due to a disability (including mental health, chronic or temporary medical conditions), please inform me immediately so that we can privately discuss options. In order to help establish reasonable accommodations and facilitate a smooth accommodations process, you are encouraged to contact the Accessible Education Office: accessibility@aub.edu.lb; Ext 3246; West Hall, 314.

Non-Discrimination Policy

AUB encourages a diverse student body and workforce, and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb.
The Office of the Provost maintains a resource page on Non- Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-bycase basis.

COVID-19 code of conduct

During the deadly pandemic of COVID-19, it is important to keep in mind that **we are all responsible for our own health and those of others**. Hence, the following precautionary measures need to be observed **at all times, whether at school or in the community.**

a. Stay at home if you have symptoms such as fever, cough, body aches, etc.. Call youth clinic at 01-350 000 x 3000 for advice before visiting the clinic.
b. Keep a social distance of at least 2 meters at all times and everywhere.
c. Avoid crowdedness anywhere.
d. Wear mask when you go around the school, campus, or community.
e. Wear mask if you are in a classroom when students are less than 2 meters apart.
f. When you touch door knobs, benches, lockers, stair railings, clean your hand with sanitizers or wash them with soap and water immediately after.
g. Avoid touching your eye, nose and mouth.
h. **The lobby, student lounge, lockers, and NSS room will be closed until further notice.**
i. Follow the simulation lab/ classroom instructions posted on the door.
j. In classrooms:
    a. Clean your desks and chairs with sanitizers before and after using.
    b. Clean your hands with sanitizers or washing with soap and water for 20 seconds before and after you leave the class.
    c. Do not share papers, pens and pencils.
    d. Ventilate the room when possible.
    e. Cough and sneeze using your elbow.
k. For office visit:
    a. If you can meet virtually, do it.
        b. Make sure you keep a distance of 2 meters.
        c. Wear masks.
        d. Ask to open the window
        e. **Do not go** inside the office if more than two individuals are there.

Do it for yourself and for others

AMERICAN UNIVERSITY OF BEIRUT
HARIRI SCHOOL OF NURSING

NURS 300 NURSING CARE OF ADULTS & OLDER ADULTS I, THEORY & PRACTICUM

Fall Semester 2019- 2020

COURSE COORDINATOR: Marina Adra, PhD, RN, Ext. 5961
Email: mg00@aub.edu.lb

CLINICAL COORDINATOR: Nour Alayan, PhD, RN, Ext. 5960
Email: na62@aub.edu.lb

COURSE DESCRIPTION

Nursing Care of Adults and Older Adults I (NURS 300) is given in the fall semester of the junior year of the program. The course facilitates the development of knowledge and application of scientific principles in the care of clients at risk for or who are experiencing acute medical or surgical problems. Pathologic changes, medical and surgical management, prevention, self-care, and nursing process are discussed at length for each disorder.

PURPOSE

This course articulates the contribution of nursing to health promotion and maintenance, disease prevention, and client wellbeing along the Health - Illness continuum. It helps equip students with an understanding of the cultural influences on the health of the clients and their families, and enables them to identify ethical issues and significance to nursing practice.

Nursing research continues to influence nursing care. Thus, the student is requested to bring to the classroom latest evidence reflecting related research work done on the topic under discussion.

Logistics

Moodle problems; if you face problems logging on to Moodle, please make sure you contact Moodle Administrator from the Academic Computing Center at moodle@aub.edu.lb or by calling extension 3586 - 3519.

Pre-requisites

- NURS 201 & 202
- English 203
- Microbiology 237
- HUMR 248
- NURS 210 Pathophysiology concurrently
- Pharmacology 240 or concurrently

Credit Hours

N. 300 Theory and Practicum 5 credits

Attendance & Participation

You are expected to be ready to participate in class discussions and activities. Class attendance and participation will affect your grade.

Evaluation Scheme

Assessment	Percentage
○ **Test 1**	**20%**
○ **Test 2**	**20%**
○ **Final Theory exam**	**30%**
○ **OSCE**	**15%**
○ **Care plans (6), Reports (OR) and sim lab assignments**	**10%**
○ **Assignments Clinical conference and class assignment**	**5%**
○ **Clinical Performance**	**Pass/Fail**
Total	**100**

Teaching Facility

1. Classroom
2. Simulation center
3. American University Medical Center
   - Medical-surgical units and Operating Room
4. Computer Lab

Teaching Personnel

Dr. Marina Adra (Course Coordinator)
Dr. Nour Alayan (Clinical coordinator)
Dr. Maha El Hachi (Clinical Preceptor) me196@aub.edu.lb, 70/977788
Ms. Hala Dagher (Clinical Preceptor) hd20@aub.edu.lb , 03/262995
Mr. Louay Moussa (Clinical Preceptor) lm63@aub.edu.lb, 70/902027
Mr. Mohammad Abbas (Clinical Preceptor) ma298@aub.edu.lb, 70/625498
Miss Houry Kazarian (Clinical Preceptor) hk87@aub.edu.lb, 71/486899
Ms. Randa Farha (Simulation & Clinical Competency Center Coordinator)

COURSE LEARNING OUTCOMES

Upon completion of this course, the student will be able to:

1. Describe risk factors and related nursing interventions when planning to promote and maintain health in a selected client population.

2. Relate the physiological and socio-cultural theories to the nursing process for the adult and older adult client.

3. Discuss the scientific basis for performing selected diagnostic procedures, outcomes, and related nursing responsibilities.

4. Explain nutritional needs of clients with selected medical/surgical conditions.

5. Assume responsibility for achieving course outcomes through self-evaluation and self-directed learning.

6. Utilize health assessment skills in determining the physical, psychosocial, spiritual, and learning needs of the adult/older adult client.

7. Apply theoretical concepts, scientific principles and research findings in planning client care.

8. Demonstrate competence in presenting findings and implementing nursing interventions to meet planned outcomes.

9. Demonstrate safe administration of drug and parenteral therapy.

10. Plan and conduct teaching sessions based on client or family's recognized learning needs.

11. Demonstrate effective communication skills with client, family, instructor, and health care members.

12. Demonstrate sound decision-making when providing basic nursing care to clients and families.

13. Incorporate ethical nursing principles in the client's plan of care.

COURSE POLICIES

1. All course requirements must be completed by the learner before grades are submitted for credit.

2. You are expected to attend all scheduled activities and to be on time. Attendance, including punctuality, is part of your evaluation for professionalism. Negative evaluations may result in reduced grades. In case of absence it's the student's responsibility to make up the course work. In case of absence without a valid reason you will be given an assignment to complete for the missed class.

3. Absence from a scheduled exam will result in a grade of "O" for that exam. It is left to the discretion of the Faculty teaching the course to accept the reason for absence. Make up exams, for a valid reason, may be essay type questions.

4. A student has to pass the **theoretical component with a minimum score of 70%** in order to pass the course. If the student fails the clinical component of the course, all parts of the course must be repeated.

5. **A Student has to pass OSCE with a minimum score of 70%.**

6. Each group assigned to a unit will have an instructor/preceptor responsible for that unit.

7. All students should adhere **strictly** to the uniform policy.

8. Any student who is late or absent from a clinical assignment for a valid reason, provided the absence does not exceed two times, will be requested to repeat that assignment. Over two weeks of absence regardless of cause results in dropping the course. A student who is late or absent from a clinical assignment for no valid reason will receive a grade of "0" for that assignment.

9. Any student who is absent from a clinical assignment due to illness is expected to inform the instructor/preceptor by seven a.m. on the day of his/her clinical assignment.

10. Each student will be evaluated after the completion of every clinical area with the assigned instructor/preceptor.

11. The student will evaluate the faculty and the course at the end of the semester.

12. Students are expected to abide by AUB's policy on student code of conduct. Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit: http://pnp.aub.edu.lb/general/conductcode/index.html

13. Students are expected to respect their classmates in both classrooms and online environment, and not to infringe on their rights for acquiring knowledge and maximizing opportunities for productive interaction and active listening. All must refrain from side conversation, avoid use of mobile phones, etc. This is all in the spirit of promoting excellence of instruction and learning.

14. 'AUB strives to make learning experiences as accessible as possible. If you anticipate or experience academic barriers due to a disability (including mental health, chronic or temporary medical conditions), please inform me immediately so that we can privately discuss options. In order to help establish reasonable accommodations and facilitate a smooth accommodations process, you are encouraged to contact the Accessible Education Office: accessibility@aub.edu.lb; +961-1-350000, Ext. 3246; West Hall, 314'.

Instructor's Responsibilities

In accordance with the University laws and procedures, the instructor's role is understood as a mentor, a creator of atmosphere conducive to learning, and a manager of various learning activities. The instructor's role includes guiding students in the proper direction by offering sound guidance during class time, office hours, and at additional appointments as agreed on by both parties.

Course Outline

Topic
Nursing Care of the Client Experiencing **Surgery**
Care of the Client with **Gaseous Dysfunction**: - COPD/Pneumothorax/ABGs/PFT - Pneumonia/atelectasis/pleural effusion
Care of the Client with **Cardiovascular Dysfunction** - Ischemic heart disease

▪ Hypertension ▪ Heart failure
Care of the Client with **HIV-AIDS**
Care of the Client with **Neoplastic disorders**
Care of the Client with **Hematologic dysfunction**
Nursing Care of the Client with **Fluid**, **Electrolytes & acid-base imbalances**
Care of the Client with **Gastrointestinal Dysfunction**
Care of the Client with **Musculoskeletal Dysfunction** ▪ Fracture ▪ Low back pain
Exam & OSCE

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via EthicsPoint at www.aub.ethicspoint.com.

AMERICAN UNIVERSITY OF BEIRUT
HARIRI SCHOOL OF NURSING
NURS 302 NURSING CARE OF ADULT & OLDER ADUTLS II
THEORY & PRACTICUM
(Section 1)

Spring Semester 2019-20

COURSE COORDINATOR: Marina Adra, PhD, RN.
HSON, room 313, Ext. 5961
Email: mg00@aub.edu.lb
Mobile: 03/681549

COURSE DESCRIPTION:
NURS 302 Nursing Care of Adults & Older Adults II is given in the spring semester of the third year of the program. This course is a continuation of Nursing Care of Adults & Older Adults I thus it is selected to facilitate development of knowledge and application of scientific principles in the care of clients at risk for or who are experiencing pathophysiologic disorders. It includes knowledge of pathophysiologic disorders as well as medical therapy, modes of prevention, and nursing management to assist clients to achieve their optimal health.

This course articulates the contribution of nursing to health promotion and maintenance, disease prevention, and client well being along the health - illness continuum. It helps equip the nurse with understanding the influence of culture on the client, and the ability to identify ethical issues and their significance to nursing practice.

Nursing research continues to influence nursing care. Thus, the student is given an overview of the diverse nature of research that has been conducted and the importance of such research to nursing practice: key current research studies related to selected topics are covered throughout the course.

The nursing process continues to be the approach used to discuss patho-physiologic disorders and to illuminate nursing care. Nursing care of adults and older adults also provides means for helping students develop and refine critical thinking skills that will allow them to examine issues and problems encountered while providing care to adult & older adult clients and their families during and following hospitalization.

PRE-REQUISITES:
NURS 300 Nursing Care of Adults & Older Adults I; PHRM 240; NURS 210A

CREDIT HOURS:
NURS 302 Theory & Practicum: 5 credits

TEACHING FACILITIES:
1. Classroom
2. Simulation Lab
3. AUBMC
    a. Medical-Surgical Units: Neurology (4N), Oncology (8N), 9 South, 10 South.
    b. Kidney Dialysis Unit
    c. Endoscopy Unit

TEACHING STRATEGIES:

1. Lectures
2. Class and Online Discussions
3. Clinical Conferences
4. Nursing Care Plans and Health Teaching Plan
5. Simulation Lab

CLINICAL INSTRUCTORS/PRECEPTORS:

Mrs. Silva Dakessian Sailian:	**sd61@aub.edu.lb**	03/864070
Dr. Maha El Hashi	**me196@aub.edu.lb**	70/977788
Mrs. Rachele Bejjani	**rrb09@aub.edu.lb**	70/945877

TEXTBOOK:

1. Hinkle, J.L., & Cheever, K.H. (2018). *Brunner & Suddarth's Textbook of Medical Surgical Nursing* (14th ed.). Philadelphia: Lippincott, Williams & Wilkins.

2. Doenges, M. E., Mourhourse, M. F., & Murr, A. C. (2016). *Nurse's pocket Guide, Diagnoses, Prioritized Interventions, and Rationales.* (14th ed.). F. A. Davis company.

3. Vallerand, A.H., & Sanoski, C.A. (2019). *Davis's Drug Guide for Nurses* (16th ed.). F.A.Davis Company.

LEARNING OUTCOMES:

Upon completion of the course, the student will be able to:

1. Discuss the selected Medical-Surgical alterations in adult and older adult clients.

2. Compare normal and abnormal psychophysiological and socio-cultural changes in relation to the health-illness continuum.

3. Utilize nursing research findings to plan care of adult and older adult clients.

4. Devise a comprehensive health teaching plan for adult and older adult clients with specific health needs.

5. Integrate knowledge from health assessment, nursing and related disciplines in implementing a comprehensive plan of care to meet the needs of the adult and older adult clients.

6. Demonstrate sound clinical judgement and competence when providing comprehensive nursing care to adult and older adult clients.

7. Describe common health problems of aging and their effects on the functioning of older adults and their families.

8. Describe drug therapies, their related outcomes and nursing responsibilities for clients undergoing medical/surgical interventions.

9. Demonstrate safe administration of drug and parenteral therapy.

10. Demonstrate ability to collect data independently and correctly relate it to underlying health condition.

11. Demonstrate competence in the new learned skills displayed in the simulation laboratory.

12. Assume responsibility for own actions in terms of self-development and academic achievement.

13. Describe ethical implications involved in the care of the ill client.

14. Incorporate professional conduct and accountability in nursing practice.

LEARNING ASSESSMENT:

Exam I	20 %
Exam II	20%
Final Exam	30 %
Clinical Practice	P & F
Nursing Care Plans	15 %
Health Teaching Plan	5%
OSCE	10%

POLICIES:

1. All course requirements must be completed by the learner before grades are submitted for credit.
2. You are expected to attend all scheduled activities and to be on time. Attendance, including punctuality (class, clinical, sim lab), is part of your evaluation for professionalism. Negative evaluations may result in reduced grades. In case of absence it's the student's responsibility to make up the course work.
3. When the student absence in the course reaches or exceeds 30%, he/she will be withdrawn from the course. **Students will be considered absent if they do not arrive on time.**
4. Absence from a scheduled exam without a valid reason will result in a grade of "O" for that exam. Make up exams when for a valid reason (ex. hospitalization, death of an immediate family member) are left to the discretion of the Faculty teaching the course.
5. A student has to pass the theory component (Exam I, II, and Final Exam) with a minimum grade of 70 % in order to pass the course regardless of total course grade. If the student fails to meet this requirement all parts of the course must be repeated.
6. Students have to pass the clinical/practicum component of the course regardless of the total course grade.
7. Any student who is late or absent from a clinical assignment for no valid reason will receive a written warning from the course coordinator and if repeated will be dropped from the course. The warning will be documented and recorded.

8. If a student is late or absent from a clinical assignment for a valid reason, he/she is expected to inform the instructor by seven a.m., and will be requested to repeat that assignment.
9. Absence from a clinical assignment due to sickness will be considered valid only if the student presents a medical report from the **University health services** to justify the absence.

10. Any student who does not abide by the course policies (**punctuality, preparation, uniform policy, professionalism etc.)** will receive a written warning from the course coordinator; if repeated will be asked to drop the course. The warning will be documented and recorded.
11. Each group assigned to a unit will have an instructor responsible for that unit.
12. Each student will be evaluated after the completion of every clinical area with his/her instructor.
13. The student will evaluate the faculty and the course at the end of the semester.
14. Mobile phones are strictly prohibited in class and during exams. Students are advised to keep their mobile phones in their lockers while in class. Students are allowed to carry their mobile phones during clinical hours to be used **ONLY** when absolutely necessary such as in emergency situations. Students who do not abide by this policy will receive a written warning from the course coordinator; if repeated will be asked to drop the course. The warning will be documented and recorded.

ACADEMIC INTEGRITY:

The mission of AUB includes developing students' sense of ethics, morality, and social responsibility. Students at AUB have the fundamental obligation to conduct themselves with utmost integrity.
Students are expected to abide by AUB"s policy on student code of Conduct (p. 3) as stipulated in the following website: http://pnp.aub.edu.lb/general/conductcode/index.html

STUDENTS WITH SPECIAL NEEDS:
"If you have documented special needs and anticipate difficulties with the content or format of the course due to a physical or learning disability, please contact me and/or your academic advisor, as well as the Counseling Center in the Office of Student Affairs (Ext. 3196), as soon as possible to discuss options for accommodations. Those seeking accommodations must submit the Special Needs Support Request Form along with the required documentation."

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via EthicsPoint at www.aub.ethicspoint.com.

COURSE OUTLINE:

Unit I: Nursing care of the Client Experiencing Neurologic Dysfunction.

Unit II: Specific Aging Related Issues & Changes Associated with Aging.

Unit III: Nursing Care of the Client Experiencing Sensory Dysfunction.

Unit IV: Nursing Care of the Client Experiencing Renal & Urinary Dysfunction.

Unit V: Nursing Care of the Client Experiencing Endocrine Dysfunction.

Unit VI: Nursing Care of the Client Experiencing Infectious Disorders.

Unit VII: Nursing Care of the Client Experiencing Hepatic & Biliary Dysfunction.

Unit VIII: Nursing Care of the Client Experiencing Integumentary Dysfunction.

Unit IX: Nursing Care of the Client Experiencing Sexuality & Reproductive Dysfunction.

Unit X: Overview of Genetics & Genomics in Nursing.

Appendix I

Student Code of Conduct:

Students are expected to abide by AUB's Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.
In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.
Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

D. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
E. Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
F. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension and expulsion from the University. For more information, visit:
http://pnp.aub.edu.lb/general/conductcode/index.html

Course Description:

This course focuses on the individual within the family from conception through the neonatal period. Course content includes application of the theoretical concepts of reproduction to childbearing families in the hospital, outpatient and community settings.
Theoretical content is divided into reproductive health and reproductive risk. Basic concepts include human sexuality, family centeredness, family planning and cultural influences. Major emphasis is placed on basic concepts concerning the family during the antepartal, intrapartal, postpartal, and neonatal periods. Health teaching and counseling address maternal awareness of personal, fetal, and family health.
Clinical application relies on knowledge and skills gained in previous liberal arts, science, and nursing courses, to care for mothers, newborns and their families. The nursing process is used to promote health and to providing acute care.

OTHER:. A computer with access to AUB MOODLE is necessary. The school's computer lab is open from 8am to 5pm. All course materials can be found on MOODLE.
This course is offered on **Monday from 10-12, R. 216**

Course Grade Distribution:

Class	Assignment	Due Date	% of grade
	Class Attendance		**5%**
	EXAM I	Refer to schedule	**20%**
	EXAM II	Refer to schedule	**20%**
	FINAL EXAM	Refer to schedule	**25%**
	Group presentation	Refer to schedule	**5%**
	Teaching project	Refer to teaching schedule	**5%**
	OSCE	Refer to clinical rotation	**10%**
	Reports, care plan, NB Assessment, community		**10%**
OPD(outpatient)	1 teaching project	Set with instructor	
DS (delivery suite)	1 Concept Mapping	By 3pm next day	
PP (postpartum)	1 Concept Mapping	By 3pm next day	
N (nursery)	1 newborn assessment report	By 3pm next day	
NICU(neonatal)	1 Concept Mapping	By 3pm next day	
TOTAL			**100%**

Requirements: All pertinent forms can be found on Moodle

1. A Nursing Care Plan in: 1) labor & delivery 2) postpartum

2. One Newborn Assessment Report.

3. Teaching Session in OPD.

4. A report about an OBS community setting.

5. Group seminar (6-7 per group) on a chosen topic.

6. Oral presentation in the NICU.

7. Two tests and a final exam.

Course Objectives

Upon completion of this course, the student will be able to:

A. Theoretical Learning Outcomes:

1. Integrate theoretical knowledge from psychosocial, biophysical sciences, humanities with that of nursing as basis to care for the childbearing family.

2. Discuss human sexuality as it relates to the childbearing cycle.

3. Identify the various phases of the childbearing cycle and their impact on the family.

4. Discuss common complications of the childbearing cycle and relevant modes of treatment.

5. Identify available alternatives to couples facing difficulties during the childbearing years.

6. Identify nutritional needs of expectant mothers and newborn infants.

7. Identify available maternity services in the community.

8. Identify research findings that have an impact on the well-being of the childbearing family.

B. Practicum Learning Outcomes:

1. Demonstrate understanding of the family as a psychosocial and cultural unit.

2. Utilize the nursing process in providing care to clients during the various phases of the childbearing cycle.

3. Show dexterity in giving care to expectant mothers and newborn babies.

4. Practice therapeutic communication skills with expectant families.

5. Demonstrate knowledge of group process in health teaching of expectant families.

6. Safely administer drugs and parenteral therapy to maternity patients and their newborns.

7. Demonstrate ability to work effectively with the interdisciplinary health care team in providing care to the expectant family.

8. Demonstrate responsibility and accountability for personal and professional growth and development.

PLACEMENT OF COURSE: BSN III, Fall Semester

PREREQUISITES COURSES: English 203, N201, N202, PSYC 201.

CO- REQUISITE COURSES: Pharm. 240; N210

CREDIT ALLOCATION:

This five (5)-credit course is divided as follows:

Theory - 2 credits = 2 hrs per week (30 hrs / semester).
Practicum – 2 credits = 9 hours of clinical per week (81hrs / semester).

Simulation – 1 credit = 3 hours per week (36 hours/semester)

TEACHING FACILITIES:

1. Classroom.
2. American University Medical Center –AUBMC (all on 7th floor)
   a. Delivery Suite.
   b. Post-partum Unit - Seven North.
   c. Nursery - Normal and Intermediate.
   d. NICU – Neonatal intensive care unit
   e. OPD – seven floor
3. Hariri MOPH outpatient department
3. Simulation Laboratory

REQUIRED TEXTBOOK:

Verklan, M. Terese & Marlene Walden *(2015). Core curriculum for neonatal Intensive care nursing*. 5th edition. Elsevier Saunders.

NOTE: **Reference books are available at the Saab Medical Library**

POLICIES:

1. Students are expected to be self-learners with instructors facilitating learning.

2. The student is expected to come to class prepared. This means that all of the assigned readings and activities will be completed by the beginning of class time.

3. Attendance is expected in all classes and clinical areas. Class absences will be handled according to University Policy. Any student who is absent from a clinical assignment due to illness is expected to inform the instructor or the nurse in charge of the unit by 6:45 a.m. on the day of his/her clinical assignment. Clinical absenteeism for medical reasons has to be justified and supported by a medical report from the University Health Service. A make-up might be scheduled.

4. Any student who is late or absent from the clinical area more than three times without an excuse will be given an incomplete for the course.

5. All students must adhere to the uniform policy.

6. **Cell-phones must be turned off or put to silent mode during class and clinical.**

7. Absence from a scheduled exam will result in a grade of "0" for that exam. Make up exams when for a valid reason, will be subjective in nature and are left to the discretion of the faculty teaching the course.

8. Papers are due at 3:00 p.m. as noted in the Course Syllabus. **A deduction of 5% per** day will be made for late papers.

9. All students must abide by the University Policy on Plagiarism.

10. Each student will have an opportunity to write a teacher and course evaluation at the end of the semester.

11. Each student will be evaluated after the completion of every clinical area with her/his instructor.

12. **The passing grade in N.304 is 70%**

13. **A student has to pass the theoretical component (evaluated by combined scores of 2 tests ,a final exam) with a minimum score of 70% in order to pass the course.**
If the student fails the clinical component of the course, all parts of the course must be repeated.

14. Students are expected to abide by AUB policy on student code of conduct. Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the university. For more information: Full Text

APPENDIX I

Student Conduct (Theory)

Students are expected to abide by AUB Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

G. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

H. Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

I. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:

http://pnp.aub.edu.lb/general/conductcode/index.html

APPENDIX II

STUDENT CONDUCT (Practicum)

Students are expected to abide by the Nurses' code of ethics. Whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all their actions during clinical practice. Upholding ethical nursing practice incorporates: respecting clients dignity and freedom of choice; acting to promote the good of the clients; treating clients fairly and equally; telling the truth and admitting error in due time; maintaining confidentiality; and more important, doing no harm to patients by sustaining safe nursing practice. Other actions that require disciplinary actions to be taken are:

d) Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
e) Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
f) Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Students with Special Needs

'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination Policy

AUB encourages a diverse student body and workforce, and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non- Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

DM & MKh
Revised August 2019

AMERICAN UNIVERSITY OF BEIRUT
HARIRI SCHOOL OF NURSING
NURS 306 NURSING CARE OF CHILDREN- THEORY & PRACTICUM

May Naifeh Khoury RN, MSN, Course Coordinator, NURS 306
Extension: 5957 Email: mn01@aub.edu.lb

SPRING SEMESTER 2019

COURSE DESCRIPTION:

NURS 306 Nursing Care of Children focuses on the individual within the family setting from infancy through adolescence. Content includes ambulatory as well as in-patient care, and focuses on primary as well as secondary and tertiary care. Care is based on the nursing process. The role of the nurse as an advocate, health teacher and nurturer is stressed. The nursing care of children is essential so that nursing students will be able to assess health needs of parent(s) and child (ren) based on knowledge of normal growth and development, and on evidence of health and disease; and to implement indicated nursing care. Hence, students will be able to function effectively in the health care delivery system.

To enhance learning outcomes and student's critical thinking abilities in the care of children within the family setting from infancy through adolescence, the course will be partly taught, for the third time this year, in a **blended learning format**. This is a teaching approach which combines **classroom teaching 80% face to face (F2F)** with **20% online teaching**. Some class meetings will be replaced by online activities that should be completed at your leisure but within a certain time frame. It is hoped that this blend between teacher –centered learning and student-centered learning will promote your role as active learners and encourage you to engage in challenging interactive activities.

The major teaching tools in the course consist of classical didactic lectures, class discussions, online forums, and reflective activities. Class and online discussions are considered a major component of the course. These discussions will allow you to interact with your classmates and teachers and get direct help with any problem you encounter.

In addition, you will be given the chance to exchange your views with your friends, reflect on their work, collaborate with them and join your efforts to resolve problems or address a question. I will facilitate your learning by guiding you along these discussions to make sure that you do not get off-track. My role would be as a facilitator to lead you through a self-centered learning process by encouraging reading primary resources, analyzing data and drawing conclusions .I am hoping that through these discussions I can challenge your critical and analytical thinking and foster in you the quality of a successful nurse and a life-long learner.

You will be expected to view audio and video assisted instructional modules, partake in online and F2F discussions, use e mail and read materials posted on Moodle. Some of the sessions will be conducted completely online.

These online activities may consist of any combination of the following:

- Collaborative online assignment
- Individual online assignments
- Voice over PowerPoint presentations (VOP)
- Participation in online forums
- Comments on peer submissions

The reason for turning this course into a blended format instead of simply a web enhanced course is to give you more flexibility and time for learning and reflection as well as for discussion of the issues being raised while keeping the F2F component.

The first part of the course deals with the well child. It reviews principles of growth and development from infancy through adolescence, including nutritional needs, special needs and problems, child health assessment and teaching healthy practices to children and their families. The second part deals with the ill child. The students learn to assess the needs of the acute and chronically ill child and to plan total individualized nursing care. The implementation of their care plan is done through the clinical performance and simulation lab which offers a supportive environment for students with hands-on learning at no risk to their patients. Hence, enabling them to be better prepared for work in the real-world. This is done under the supervision of their instructor. The nursing role in restoring and maintaining optimum health to children and families is stressed. Ethical considerations are discussed.
The units to be covered are as follows: the nursing role in supporting the health of well; ill children and their families; the effects of hospitalization on children and their families; health teaching with children, and nursing care of the child and family both in the hospital and home; ways to modify procedures for children and conduct therapeutic play to reduce the stress of hospitalization; the nursing role in restoring and maintaining the health of children and families when illness occur; disorders are presented according to body systems including the care of children with problems
related to altered growth, defenses, cell metabolism, locomotion or coordination and interpersonal relations.

COURSE OBJECTIVES & LEARNING OUTCOMES:
Upon completion of this course, the student will be able to:

1. - Integrate knowledge from various disciplines such as nursing, psychosocial, biophysical sciences and humanities to the health care of children within the family setting from infancy through adolescence.

2. - Integrate concepts of growth and development to child health nursing care.

3. - Relate the pathophysiology of pediatric alterations along the health-Illness continuum.

4. - Identify available resources for clients in health promotion, maintenance and/or restoration.

5. - Explain nutritional needs and therapeutic diets to children and families.

6. - Utilize health assessment skills in determining the physical, psychosocial and spiritual needs of clients within the family setting from infancy through adolescence.

7. - Employ theoretical concepts, scientific principles and research findings in planning care for the child client.

8. - Utilize the nursing process in formulating nursing care plans for the child based on his/her developmental stage.

9. - Demonstrate clinical competence in the care of pediatric clients in ambulatory and hospital setting.

10.-Promote the need for palliative care for seriously ill children and their families, from the time of diagnosis, as essential to quality care and an integral

component of nursing care.

11. - Educate by communicating effectively and compassionately with the child, family, health care team members, and the public about palliative care issues.

12. - Exercise professional and ethical judgment in selecting appropriate interventions of care to the child client.

13. - Actualize the nurse's ethical responsibilities in caring for patients at the end of life.

14. - Provide health education to the child and his family, based on recognized learning needs.

15. - Administer safely drugs and parenteral therapy.

16. - Communicate therapeutically when interacting with children and their families.

17. - Acknowledge the role of the nurse in providing therapeutic play to children.

18. - Demonstrate ability to work effectively with members of the health team in planning, implementing, Modifying and evaluating health care for children and families.

19. - Demonstrate personal responsibility and professional accountability and self-growth in providing nursing care for the child client.

TECHNICAL SUPPORT:
Moodle problems; if you face problems logging on to Moodle please make sure you contact The Moodle Team from the Academic Core Processes and Systems at moodle@aub.edu.lb or by calling on extension 3580.

PLACEMENT OF COURSE: BSN III, Spring Semester
PREREQUISITE COURSES:

PHRM 240	Pharmacology
PSYC 210	Psychology of Development.
NURS 304	Nursing Care of the Expectant Family

CREDIT ALLOCATION: 5 credits
This five (5)-credit course is divided as follows:

Theory- 2 credits, 2 hours per week (32 hrs. /semester).
Practicum- 2.5 credits, 9 hours of clinical per week (98hrs. /semester).
Simulation-0.5 credits, 2 hours per week (14 hrs. /semester).

GRADE DISTRIBUTION:

Theory/Cognitive Points

a. Two tests and Quizzes	30%
b. Final Exam	20 %
c. Weekly nursing care plan and ER, St. Jude OPD & Community Field trip reports	10%

d. **Online activities**

1. Growth & Development Forum	4%
2. Decisions Concerning End-of-life Care for Their Child" Forum	4%
3. Educating children's nurses for communicating bad news	2%
4. The role of the Pediatric Oncology Nurse	2%
5. Nursing Care of the Child with Cancer	3%
6. The Role of the Nurse while Caring of a Child with an Immune Disorder	5%
Total	20%

TOTAL	**80%**

Practicum/Psychomotor	**Points**
a. Playroom project	3 %
b. Teaching project	5%

	8%

Affective:

a. Class participation	**2%**

OSCE **10%**

TEACHING PERSONNEL:

Clinical Assistant Prof. May Naifeh Khoury
Mrs. Tamar Avedissian Instructor HSON
Mrs.Taline Gulgulian Instructor HSON
Mr. Ali Shalhoub Clinical Preceptor
Ms. Yara Sleiman Clinical Preceptor
Ms. Zeina Itani Clinical Preceptor

TEACHING FACILITIES:

1. Classroom.
2. American University Beirut Medical Center (AUBMC).
   a. Pediatric Private.
   b. Pediatric Emergency Unit.
   c. Pediatric Intensive Care Unit (PICU).
   d. Step Down Unit (SDU).
   e. Playroom.
   f. Pediatric Outpatient Department.
   g. Children Cancer Center in Lebanon - OUT (CCCL).
   h. Pediatric Cancer Patients- In patients
3. Simulation Lab clinical activities- HSON
4. Computer Laboratory- HSON

POLICIES:

1. All course requirements must be completed by the learner before grades are submitted for credit.

2. Students are expected to read material on lecture topic in textbook **prior** to class so they will be prepared to take part in class discussions.

3. Students are expected to participate in all assigned activities and online Learning modules. All assignments must be completed as assigned and on time.

4. As this is a blended course, you are required to log on the Moodle on a regular basis and stay up-to-date on readings, announcements, and assignments. A significant amount of assignments will be submitted via Moodle.

5. Attendance will be taken in all classes.
6. Attendance is expected to all class and laboratory appointments. Class absences will be handled according to University Policy. In case of absence from laboratory appointments, the student is required to notify Instructor to whom he/she is responsible for prior to the appointed time. A make-up for missed laboratories is a must.

7. Students are not allowed to miss any clinical day.

8. Any student who reports sick has to be cleared up by the University Health Services in order for him/her to resume his/her studies.

9. Any student who is late or absent from the clinical area more than three times without excuse will be given an incomplete for the course.

10. All students should adhere to the uniform policy.
11. Each group assigned to a unit will have an instructor responsible for that area.

12. An unexcused absence from a scheduled exam or quiz will result in a mark of **Zero** for that exam.
13. All papers are due at **4:00 p.m.** on the date assigned unless other arrangements have been made. Late papers will result in grade **reduction of 5% per day.**

14. Students are expected to respect their classmates' presence in the classroom and online environments and not to infringe on their rights to acquiring knowledge and maximizing opportunities for productive interaction and active listening. They must abide by **netiquette** and refrain from side conversations, avoid use of mobile phones,etc. This is all in the spirit of promoting excellence of instruction and learning.

15. Each student will be evaluated after the completion of every clinical area with her/his instructor.

16. All students have to abide by the University Policy on plagiarism (see

attached (Student Code of Conduct)and (**NON-DISCRIMINATION POLICY).**

17. Each student will have an opportunity to write a teacher and course evaluation at the end of the semester.

18. The student is encouraged to be a self-learner, the instructors will be facilitators to learning.

19**. Cell-phones must be turned off or put to silent mode during class and clinical.**

20. **A student has to pass the theoretical component (evaluated by combined scores of 2 tests ,a final exam) with a minimum score of 70% in order to pass the course.**
If the student fails the clinical component of the course, all parts of the course must be repeated.

INSTRUCTOR'S RESPONSIBILITIES:
In accordance with the University laws and procedures, the instructor's role is understood as a mentor, a creator of atmosphere conducive to learning, and a manager of various learning activities. The instructor's role includes guiding students in the proper direction by offering sound guidance during class time, office hours, and at additional appointments as agreed on by both parties.

ASSESSMENT:
You are expected to read the assigned material and prepare the assignments as indicated on your class schedule prior to class. You are expected to be ready to participate in class discussions and activities. Class and online participation will affect your grade. Online assignments will include online forums, individual and group projects. All online activities will have clear instructions and grading rubrics posted on Moodle. There are 2 tests, a Final exam and an OSCE in this course

REQUIREMENTS IN CLINICAL AREAS: All pertinent forms can be found on Moodle.

1. Each student is required to direct a **teaching session** to clients and their parents during the Out Patient Department experience.

2. Prepare a **written report** and submit at the end of the Emergency Room, OPD Pediatric Clinical Experiences, Children Cancer Center in Lebanon (out) and Community Field Trip.

3. Prepare **3 nursing care plans** and submit it by the end of the clinical experience. (1 6N, 1 PICU/SDU, 1 in CCCL In).

4. Each student during the **playroom experience** is expected to plan a project for the hospitalized children.

5. Participate in **collaborative online discussions and online forum**

COURSE CONTENT:

CONTENT OUTLINES

Part I Health Promotion for the Childrearing Family

Introduction to Child Health Nursing
Child Health Assessment
Play
Growth and Development: Special needs and problems of children at different ages.-**On Line.**
A. The Infant
B. The Toddler
C. The Preschool - Age Child
D. The School-Age Child
E. The Adolescent.

Part II Health Support for Ill Children and their Families

The Nurse and the Ill Child
The High Risk Neonate, Concepts in Critical Care
Pediatrics, Palliative Care and Ethical
Considerations.-**On Line**
The Child with Infectious Disorders - AIDS.
The Child in Pain

Part III Restoration and Maintenance of Health of Children and Families with Physiologic Disorders

The Child with Cancer **.On Line**
The Child with Respiratory Disorders.
The Child with Hematopoietic Disorders.
The Child with a Long Term or Fatal Illness.
The Child with Cardiovascular Disorders.
The Child with Disorder of the eyes
The Child with Neurological Disorders
The Child with Endocrine Disorders
The Child with Immune Disorders. **On Line**
The Child with Traumatic Injury.
The Child with Renal Disorders.

The Child with Musculoskeletal Disorders.
The Child with Gastrointestinal Disorders.
The Child with Disorder of the ears
The Child with Reproductive Disorders.

Student Code of Conduct:
Students are expected to abide by the Nurses' code of ethics. Whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all their actions during clinical practice. Upholding ethical nursing practice incorporates: respecting clients dignity and freedom of choice; acting to promote the good of the clients; treating clients fairly and equally; telling the truth and admitting error in due time; maintaining confidentiality; and more important, doing no harm to patients by sustaining safe nursing practice. Other actions that require disciplinary actions to be taken are:

g) Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
h) Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
i) Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Students with Special Needs

'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination Policy
AUB encourages a diverse student body and workforce, and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints

regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non- Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

MKH/jz – January 2019

American University of Beirut
Hariri School of Nursing
NURS 307 Practicum

Summer 2019

Course Description
NURS307 Practicum (0 credits) is a clinical course designed to practice nursing skills and build on experience gained in first and second year of nursing BSN program. It is offered in the summer of junior year and the clinical rotations are scheduled in a variety of medical surgical in-patient units, both pediatric and adult, also certain specialized units at AUB-MC. The practicum extends over 2 weeks, 5-days/week rotation (a total of 84 hours); it focuses on application of theory to practice and **ensures successful transition of students to the senior year.**
Utilizing the nursing process as a framework, students will integrate knowledge, skills, and attitudes gained from previous courses to plan and implement care provided to their respective patients.

Student Learning Outcomes
Upon successful completion of this course, the student will be able to achieve the following cognitive and psychomotor student learning outcomes:

1. Utilize the **nursing process as a framework** for clinical practice in providing patient cantered care to patients within the hospital setting.

2. Demonstrate supervised **clinical skills** in taking care of patients within the hospital setting.
3. Demonstrate **provision of safe care** in administering medications and nursing interventions to patients within the hospital setting.
4. Provide **health teaching** to patients and their families based on learning needs assessment within the hospital setting.
5. Document nursing care in compliance with hospital standards ensuring patient centered care is maintained.
6. Enhance clinical skills acquired in pre requisite courses through **application of theoretical knowledge.**

Upon successful completion of this course, the student will be able to achieve the following **affective** student learning outcomes:

1. Utilize **proper communication techniques** when interacting with patients and their families, health care team members, fellow classmates and faculty.
2. Demonstrate professional accountability in accomplishing student learning outcomes and by submitting course-required documents on time.
3. Utilize **ethical** principles in selecting appropriate interventions of care to patients within the hospital setting.

Teaching Learning Process

Students will be assigned to a faculty clinical instructor who will coordinate and facilitate students learning clinical experience. Students are expected to **report directly to their faculty instructors of any issues encountered during their clinical practice.**

Identified preceptors on units as Registered Nurses (RN's) will be guiding students on day to day clinical activities and will involve students in their daily responsibilities as RN's according to the level of course objectives. Opportunities of in-depth learning will be provided by faculty clinical instructors for selected clinical work and are supplemented with pre and post clinical conferences. Faculty and students may suggest and choose further assignments and observational experiences to enhance their practice in order to provide for structured feedback and evaluation.

Each student will keep a log sheet of set clinical objectives and will also complete clinical competency checklist by the end of practicum course, which, in turn, will be compiled in respective student files. Individualized coaching, daily feedback, and formal evaluations are provided from both faculty clinical instructors and RN's to maximize professional student development. An **Objective Structured Clinical Evaluation (OSCE)** will be done during the last day of the practicum, which will be graded as **Pass** or **Fail.**

Prerequisite Courses

NURS 300	Nursing Care of Adults I
NURS 302	Nursing Care of Adults II
NURS 304	Nursing care of The Expectant Family
NURS 306	Nursing Care of Children

Course Placement

Summer, Junior level

Faculty Teaching Personnel

Mrs. Talin Gulgulian
Mrs. Tamar Avedissian
Mrs. Silva Dakessian
Mrs. Danielle Damianos
Mrs. Hera Tashjian
Mrs. Hanadi Masalkhi

Teaching Facility/Settings

American University Beirut Medical Center

- **a.** Pediatric Medical-Surgical Unit - **6N**
- **b.** Pediatric Intensive Care Unit – **PICU/SDU**
- **c.** Children's Cancer Institute **CCI** Inpatient Unit
- **d.** Adult medical Surgical Units – **10N/S, 9N, 9S, 8N, 7N, 5S**
- **e.** Neuro-Medicine Unit – **4N**

Teaching Strategies

A variety of teaching strategies will be utilized including clinical instruction, demonstration, and return demonstration (in the clinical area), discussion, and pre and post clinical conferences. Students with identified areas of improvement will be referred to the School's Simulation Lab for practice. All remedial work by students will be communicated to the respective faculty clinical instructor.

Students will be the assigned to one area of practice throughout the course based on the preference of students, yet under faculty guidance, and precepted by assigned RN in the designated area of practice. The emphasis is on practical experience for which the student has already acquired the necessary theoretical knowledge and basic skills.

Required Textbooks

Pillittari, A. (2010). Maternal and child health nursing: Care of the childbearing and childrearing family (6th ed.). Philadelphia: Lippincott Williams & Wilkins
Smeltzer, Z., Bare, B., Hinkle, J., & Cheever, K. (2010). *Brunner and* Suddarth's textbook of medical surgical nursing (12th ed.). Philadelphia: LWW.
Taylor, C., Lillis, C., LeMone, P., & Lynn, P. (2011). *Fundamentals of* nursing. The art and science of nursing care (7th ed). Philadelphia: Wolters Kluer/LWW.
Weber, J. (2008). Nurses' handbook of health assessment (5th ed.). Philadelphia: LWW.
Weber, J., & Kelly, J. (2010). *Health assessment in nursing* (4th ed.). Philadelphia: LWW.
N.B. Textbooks are available upon request.

Practicum Course Policies

1. **Attendance** is expected to all clinical areas based on clinical rotation schedule.

2. Any tardiness of **more than 5 minutes** to the assigned clinical area, the student will receive the first-time oral warning. For any repeated incidents of tardiness as stated above **will make –up with an extra complete 8 hours of clinical day**.
3. In case of absence **for a valid reason**, the student is required to notify the faculty instructor assigned to whom he/she is responsible for prior to the appointed clinical rotation time.
4. A **make-up** for missed clinical days is a **must.**
5. Any student who **reports sick** has to be cleared up by the University Health Services in order for him/her to resume his/her practicum.
6. All students should adhere to the **uniform policy** of the School of Nursing and that of AUB Medical Center.
7. Each student will complete a**n activity log sheet** once per week (total **of 2 log sheets** per practicum course).
8. Each student will complete the **clinical competency checklist** at the end of the practicum course.
9. Each student will have an opportunity to receive a written practicum evaluation at the end of the first week and at the end of the practicum course.
10. Students are expected to **PASS** the OSCE at the end of the practicum course, also need to **PASS** the clinical summative evaluation in order to **PASS t**he course.
11. **The passing grade of the course is PASS/FAIL.**
12. Students are expected to abide by the AUB's policy on **student code of Conduct.**

Student Code of Conduct

Students are expected to abide by AUB's Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

- **a.** Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
- **b.** Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
- **c.** Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University.

For more information, visit:

http://pnp.aub.edu.lb/general/conductcode/index.html

Students with Special Needs

"If you have documented special needs and anticipate difficulties with the content or format of the course due to a physical or learning disability, please contact me and/or your academic advisor, as well as the Counseling Center in the Office of Student Affairs (Ext. 3196), as soon as possible to discuss options for accommodations. Those seeking accommodations must submit the Special Needs Support Request Form along with the required documentation."

Non-Discrimination Policy

AUB encourages a diverse student body and workforce and is committed to the principle of equal opportunity in education and employment. In the administration of its educational, admissions, and employment policies, and other university programs and activities, AUB does not discriminate on the basis of race, color, religion, age, national or ethnic identity, gender or gender identity, marital status, disability, genetic predisposition or carrier status, alienage or citizenship status, political affiliation, or any legally protected characteristic, except as required by Lebanese law. In addition, in compliance with Title IX of the US Education Amendments of 1972, which prohibits sex discrimination in education and interprets sex discrimination as including sexual harassment and sexual violence, the University maintains a Title IX coordinator in the Office of the Provost and may appoint deputy Title IX coordinators as needed. Inquiries and complaints regarding sex discrimination, sexual harassment, and sexual violence may be directed to the Title IX coordinator, College Hall, 5th Floor, Beirut, Lebanon, or by email at integrityofficer@aub.edu.lb. The Office of the Provost maintains a resource page on Non-Discrimination, Harassment, and Title IX at www.aub.edu.lb/titleix. AUB will provide reasonable accommodation consistent with the law to members of the AUB community with a disability. What constitutes a reasonable accommodation depends on the circumstances and, thus, will be addressed by AUB on a case-by-case basis.

TG, 2019

AMERICAN UNIVERSITY OF BEIRUT
HARIRI SCHOOL OF NURSING
NURS 400 Introduction to Critical Care Nursing
Course Syllabus

Course Description

Semester	2020
Course Number and Title	NURS 400 Introduction to Critical Care Nursing
Credit Load	4 credits: 2 theory and 2 clinical
Course Format	Blended; Seminar Based
Course Timing	**Lectures**: Wednesday 9 to 11 am **PrepLab**: Day Duty: Wednesday 1 to 2 pm or Evening Duty: Wednesday 2 to 3pm **Clinical**: Day Duty: Thursday 7am to 3pm or Evening Duty: Thursday 3 to 10pm **SimLab**: As Specified in Course Schedule
Course Coordination	**Angela Massouh, PhD, MScN, CNS** Assistant Professor Cardiology Clinical Nurse Specialist American University of Beirut Extension: 5959 *Mobile*: 03796199 [For Emergencies Only] *Email*: am50@aub.edu.lb *Office Hours*: By appointment

NURS 400 is a 4-credit *blended and seminar-based course* that introduces concepts and issues related to the diagnosis and management of clients with critical illness. The course builds upon knowledge gained in previous courses, namely Nursing Care of Adults and Older Adults. The content is organized around the nursing process framework and the bio-psychosocial dimensions of human beings. Areas of emphasis include advanced assessment in critical illness; ethical and psychosocial issues related to critical illness; management of critically ill adults with cardiovascular, respiratory, neurologic, metabolic and renal problems, as well as emergency nursing care. This year we opted to add seminars on the management of critically ill COVID-19 positive patients and other evidence-based topics in critical care.

NURS 400 has two components; the theory and the clinical, each is equivalent to 2 credits. The purpose of the clinical component is to provide the student with opportunity to apply concepts learned in the theory component to clinical situations utilizing the nursing process as the framework to meet the bio-psycho-social needs of clients in critical illness. Students rotate in critical care areas such as the Coronary Care, Medical and Surgical Intensive Care, Neurology Intensive Care, and Emergency Care Units.

Emphasis in this course is placed on achieving the following instructional objectives:

1. Acquisition of physical assessment and monitoring skills applied to critically ill adults.
2. Development of nursing diagnoses and related client outcomes.
3. Identification of nursing interventions to manage problems common to the critically ill.
4. Setting priorities for implementation of care.
5. Evaluation of the effectiveness of nursing care.
6. Analysis of the impact of critical illness on the client and family.

Prerequisites

This course has prerequisites. Students cannot take NURS 400 before successfully completing **NURS 302** Nursing Care of Adults and Older Adults II and **NURS 307** Clinical Practicum.

Textbook

Sole, M. L., Klein, D.G., & Moseley, M.J. (2008). *Introduction to Critical Care Nursing* (7th ed.) St. Louis: Elsevier Saunders.

Teaching Personnel

Theory

1. Dr. Angela Massouh, PhD, MScN, CNS
2. Mrs. Hera Tashjian, MScN, CCNS

Seminars

1. Dr. Angela Massouh, PhD, MScN, CNS
2. Mrs. Hera Tashjian, MScN, CCNS
3. Mrs. Silva Dakessian, MPH, BSN, RN
4. Mrs. Dayana ElChaar, MS, LD

Clinical

1. Dr. Angela Massouh, PhD, MScN, CNS
2. Mrs. Hera Tashjian, MScN, CCNS
3. Mrs. Silva Dakessian, MPH, BSN, RN
4. Mrs. Rachelle Bajjani Fayyad, MScN, BSN, PhD Student

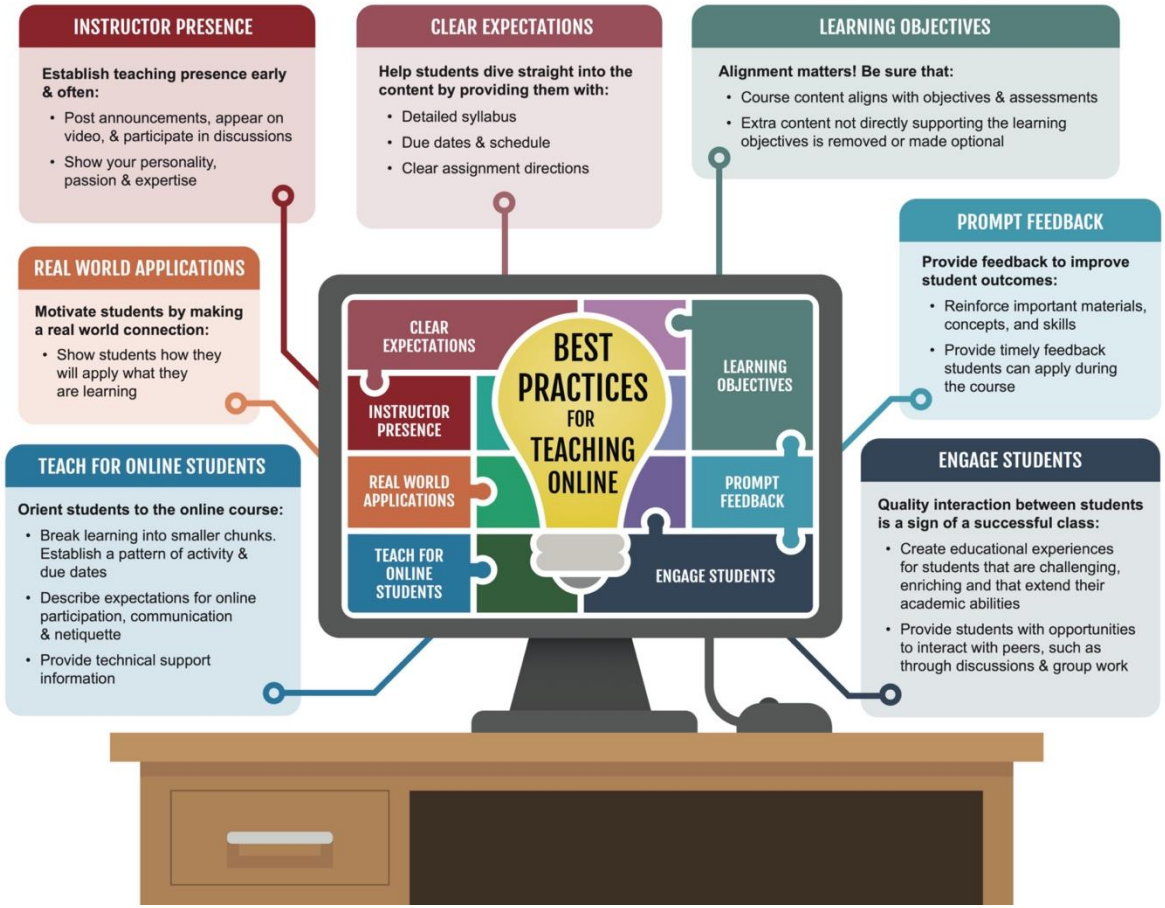
5. Mrs. Zeinab Jammoul, MPH, BSN, RN
6. Mrs. Mireille Chehade, BSN, RN, MScN Student
7. Mr. Hratch Moskofian, BSN, RN, MScN Student
8. Mr. Mohammad Ali Bdeir, BSN, RN, MScN Student

Teaching Facilities

1. Face to Face and Zoom Lectures
2. Moodle Discussions and Online Activities
3. Mandatory Seminars and Workshops
4. Adult Critical Care Areas at the American University of Beirut Medical Center
5. Skills laboratory for Clinical Simulation and Independent Student Practice

Teaching-Learning Methods

1. Lectures and Discussion: Critical Thinking
2. Evidence Based Practice Seminars
3. Case Study Discussions
4. Reflective Practice
5. Simulation Exercises
6. Care Plans
7. Clinical Instructions
8. Just-in-Time Teaching (JiTT): this is a teaching and learning strategy designed to promote the use of class time for more active learning. It relies on a feedback loop between web-based learning materials and the classroom.



Learning Objectives

Upon completion of the course, the student will be able to:

1. Describe the impact of the critical care environment on critically ill patients and their family.
2. Relate human responses to critical illness to the underlying pathophysiology.
3. Analyze legal and ethical dilemmas and contemporary issues related to critical illness.

4. Demonstrate initiative and self-direction in acquiring knowledge and seeking learning opportunities.
5. Utilize knowledge from the humanities and sciences, nursing theory and research findings in planning the care of critically ill adults.
6. Demonstrate beginning competence in hemodynamic and cardiac monitoring.
7. Demonstrate beginning competence in respiratory therapy.
8. Analyze and interpret physical and psychosocial assessment findings relevant to critically ill adults and their families.
9. Demonstrate safe nursing care and evidence-based interventions relevant to critically ill adults and their families.
10. Attend to the psychosocial and learning needs of critically ill adults and their families utilizing effective communication techniques.
11. Demonstrate professional behavior in relation to clients and members of the health team in terms of applying the ethical principles pertaining to the nursing profession.

Learning Assessment

Your course grade will be divided as follows:

Topic	**Grade**
Participation/ Moodle Discussions/ Seminars	5%
Exam I	30%
Exam II	25%
2 Care Plans	20%
1 OSCE	10%
Reflection Writing and Analysis [Dakessian]	10%
Weekly Clinical Review	**Pass or Fail**
Clinical Evaluation	**Pass or Fail**
Final Grade	**/100**

Your grade will be posted in letter grade format according to the below scale [as per AUB]:

Course Grade /100	**Letter Grade**	**Course Grade /100**	**Letter Grade**
93-100	A+	69-71	C+
87-92	A	66-68	C
83-86	A-	63-65	C-
79-82	B+	61-62	D+
75-78	B	60	D
72-74	B-	<60	F

Course Policies

1. All course requirements **must be** completed by student before grades are submitted for credit.
2. Students who miss over two clinical days (in case of a clinical absence, a medical report from AUBMC UHS **only** to justify the absence is a **must**) will be asked to drop the course. Online attendance will be ensured.
3. A student who misses an exam (based on a sick report from AUBMC UHS **ONLY**) *may* request a make-up examination. **The final decision for such requests will be taken by the course coordinator.**
4. **Students will pass the course if they meet ALL the below**:
    i. they get an average grade greater than 70 on the course exams AND
    ii. they get a course average of 70 and above AND
    iii. they get "**P**" on the clinical evaluation AND
    iv. they get a "**P**" on the OSCE
5. No makeups will be done for a student who fails to meet the course requirements.
6. All students should adhere to the uniform policy of the School of Nursing during clinical.
7. Any student who is late or absent from a clinical assignment has to make up the experience.
8. **A student who is absent from clinical due to illness is expected to inform the instructor by 7 am on the day of clinical assignment.**
9. Late submission of assignments results in a deduction of 5 points per day from the grade.
10. Students are expected to abide by AUB's policy on student code of conduct as stipulated in this website: http://pnp.aub.edu.lb/general/conductcode/index.html

Student Conduct

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism. **Plagiarism is not tolerated and consequences following AUB policies found in the student code of conduct found on Moodle.**

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

A. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

B. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
C. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct can range from warning to suspension, to expulsion from the University.
Additionally, students are expected to be honest in all their actions during clinical practice and shall follow the Nurses Code of Ethics. Upholding ethical nursing practice incorporates respecting client's dignity and freedom of choice; acting to promote the good of the clients; treating clients fairly and equally; telling the truth and admitting error in due time; maintaining confidentiality; and more important, doing no harm to patients by sustaining safe nursing practice.

Students with Special Needs

If you have documented special needs and anticipate difficulties with the content or format of the course due to a physical or learning disability, please contact me and/or your academic advisor, as well as the Counseling Center in the Office of Student Affairs (Ext. 3196), as soon as possible to discuss options for accommodations. Those seeking accommodations must submit the Special Needs Support Request Form along with the required documentation.

Students with Learning Disabilities

AUB strives to make learning experiences as accessible as possible. If you anticipate or experience academic barriers due to a disability (including mental health, chronic or temporary medical conditions), please inform me immediately so that we can privately discuss options. In order to help establish reasonable accommodations and facilitate a smooth accommodations process, you are encouraged to contact the Accessible Education Office: accessibility@aub.edu.lb; Ext 3246; West Hall, 314.

Non-Discrimination Policy Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix.
To report an incident, contact the University's Title IX Coordinator at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via EthicsPoint at www.aub.ethicspoint.com

COVID-19 Code of Conduct

During the deadly pandemic of COVID-19, it is important to keep in mind that **we are all responsible for our own health and those of others**. Hence, the following precautionary measures need to be observed **at all times, whether at school or in the community.**

1. Stay at home if you have symptoms such as fever, cough, body aches, etc…

   a. Call youth clinic at 01-350 000 x 3000 for advice before visiting the clinic.
2. Keep a social distance of at least 2 meters at all times and everywhere.
3. Avoid crowdedness anywhere.
4. Wear mask:
   a. when you go around the school, campus, or community.
   b. if you are in a classroom when students are less than 2 meters apart.
5. When you touch doorknobs, benches, lockers, stair railings, clean your hand with sanitizers or wash them with soap and water immediately after.
6. Avoid touching your eye, nose, and mouth.
7. **The lobby, student lounge, lockers, and NSS room will be closed until further notice.**
8. Follow the simulation lab/ classroom instructions posted on the door.
   a. In classrooms:
      - Clean your desks and chairs with sanitizers before and after using.
      - Clean your hands with sanitizers or washing with soap and water for 20 seconds before and after you leave the class.
      - Do not share papers, pens and pencils.
      - Ventilate the room when possible.
      - Cough and sneeze using your elbow.
   b. For office visit:
      - If you can meet virtually, do it.
      - Make sure you keep a distance of 2 meters.
      - Wear masks.
      - Ask to open the window.
      - Do not go inside the office if more than two individuals are there.

Do it for yourself and for others.

Clinical Component

In this rotation the student is expected to achieve the following as per the *clinical evaluation* criteria:

General Learning Outcomes

1. Assesses the client's physiologic, psychosocial, and learning needs.
2. Analyzes assessment findings in relation to client condition and identify changes in client condition.
3. Demonstrates safe nursing care to critically ill adults based on scientific principles and recent evidence.
4. Demonstrates safe administration of drugs and parenteral therapy.

5. Identify the components of the emergency carriage and the dosages of medications used during a code.
6. Communicate therapeutically with patients and their families.
7. Implement isolation/precaution techniques as applies to the client.

Coronary Care Unit

1. Provide comprehensive care to a load of cardiac patients (namely Acute Coronary Syndrome, Post CABG surgery, Arrhythmias, Heart Failure, Shocks, and status post Cardiac Arrest), including cardiac assessment and intervention.
2. Analyze cardiac rhythm strips for rate, rhythm, P-R interval and wave patterns and identify major dysrhythmias and artifacts.
3. Demonstrate knowledge and safe administration of cardiac drugs.
4. Get oriented to the management of the cardioverter/defibrillator.
5. Assist in the care of clients undergoing cardiac interventions (angioplasty, stents, and cardiac pacemakers).

Intensive Care Unit

1. Provide comprehensive care to a load of critically ill patients (namely Post Surgery, Multiple Trauma, and Medical cases including: Shocks, Cardiopulmonary Arrests, etc…) including advanced assessment and intervention.
2. Identify and maintain settings of mechanical ventilators.
3. Assist in management of patients on hemodynamic monitoring.
4. Assist in the care of clients undergoing critical care interventions (intubation, arterial and central line/ Swan Ganz insertion and monitoring, and hemodialysis).

Neuro Intensive Care Unit

1. Provide care of patient post brain tumor resection.
2. Assist in the care of patient with intracranial pressure monitoring.
3. Provide care of patient with aneurysmal Subarachnoid Hemorrhage post coiling/clipping.
4. Provide care of patient with seizures.
5. Provide care of patient with subdural bleeds, ischemic and hemorrhagic stroke.
6. Provide care of patient with traumatic brain injury (moderate and severe).

Respiratory Care Unit

1. Provide comprehensive care to a load of pulmonary patients (namely Acute Respiratory Failure, Mechanical Ventilation, Noninvasive Positive Pressure Ventilation), including pulmonary assessment and intervention.
2. Get oriented to the management of mechanical ventilators.
3. Analyze arterial blood gases and intervene accordingly.

Emergency Room

1. Assist in the triage and initial assessment of patients in the emergency room.
2. Assist in providing basic and advanced cardiac life support when available.
3. Provide emergency care to a load of patients.

Class Schedule

Date	Time	Topic/Class/Discussion	Mode of Delivery	Speaker
Sept 9	9 to 10am	Course Orientation: Course Expectations, and Schedule	Zoom Groups 1 and 2	Dr. Angela Massouh
	10 to 11am	**Seminar: The Critical Care Experience + Ethics in Critical Care**	Zoom Group 1	Dr. Angela Massouh
	11am to 12pm		Zoom Group 2	Dr. Angela Massouh
	12 to 1pm	**Seminar: Post Intensive Care Unit Syndrome**	Zoom Group 1	Mrs. Hera Tashjian
	2 to 3pm		Zoom Group 2	Mrs. Hera Tashjian
	Independent Review: Review of Basic Electrophysiology		**PreRecorded Lecture**	Dr. Angela Massouh
10	9am to 12pm	**Dysrhythmia Interpretation and Management:** Common Lecture	Zoom Groups 1 and 2	Dr. Angela Massouh
	1 to 2pm	Dysrhythmia Interpretation **Breakout Sessions**:	Zoom Group 1	Dr. Angela Massouh
	2 to 3pm	Practice Exercises and Q&A	Zoom Group 2	Dr. Angela Massouh
	1 to 2pm	**Seminar: Pain and Sedation in Critical Care**	Zoom Group 2	Mrs. Hera Tashjian
	2 to 3pm		Zoom Group 1	Mrs. Hera Tashjian
	Post Lecture Independent Practice: Dysrhythmia Interpretation		Moodle	Students
11	2 to 3pm	Dysrhythmia Interpretation **Moodle Independent Drop Quiz**	Moodle	Students
16	**Independent Review:** Hemodynamics Concepts		**PreRecorded Lecture**	Dr. Angela Massouh
	9am to 11am	**Hemodynamics Monitoring:** Common Lecture	Zoom Groups 1 and 2	Dr. Angela Massouh
	12 to 1pm	**Hemodynamics Monitoring: Breakout Sessions**:	Zoom Group 1	Dr. Angela Massouh
	1 to 2pm	Practice Exercises and **Post Lecture Drop Quiz**	Zoom Group 2	Dr. Angela Massouh
	Independent Practice: Case Studies on Hemodynamics Monitoring		Moodle	Students
17	**Independent Review:** Review of Respiratory Anatomy and Physiology		**PreRecorded Lecture**	Dr. Angela Massouh
	9 to 10am	**Ventilatory Assistance:** Common Lecture	Zoom Groups 1 and 2	Dr. Angela Massouh
	10 am to 11am	**Ventilatory Assistance Breakout Sessions**:	Zoom Group 1	Dr. Angela Massouh
	11am to 12pm	Practice Exercises and Q&A	Zoom Group 2	Dr. Angela Massouh
	1 to 2pm	**Seminar: Palliative and End of Life in Critical Care**	Zoom Group 1	Mrs. Silva Dakessian
	2 to 3pm		Zoom Group 2	Mrs. Silva Dakessian
22	**Independent Review: EBP Focal Point: Mechanical Ventilation**		Moodle	Students
	11pm	Moodle Test Your Knowledge: Ventilatory Assistance	Moodle	Students

Date	Time	Topic/Class/Discussion	Mode of Delivery	Speaker
23	9 to 10:30am	**Care of Patients with Acute Coronary Syndrome:** Common Lecture	Zoom Groups 1 and 2	Dr. Angela Massouh
	10:30 to 11am	ACS **Breakout Sessions**:	Zoom Group 1	Dr. Angela Massouh
	11 to 11:30am	Practice Exercises and Q&A	Zoom Group 2	Dr. Angela Massouh

AMERICAN UNIVERSITY OF BEIRUT
RAFIC HARIRI SCHOOL OF NURSING
PSYCHIATRIC AND MENTAL HEALTH NURSING
COURSE SYLLABUS

Spring 2018-2019

NURS 402 Psychiatric and Mental Health Nursing, Theory & Practicum (5 cr.)

Placement: Fall and Spring Semesters of Senior Year (BSN IV)

I. Faculty

Ghada Najjar Assaf, PhD, RN, Clinical Assistant Professor,
Course Coordinator
(Extension: 5973; e-mail: gn29@aub.edu.lb)

Laila Farhood, PhD, RN, C.S., Professor, Course Advisor
(Extension: 5975; e-mail: lf00@aub.edu.lb)

Hanadi Massalkhi, RN, MSN, Clinical Instructor,
(Extension: 5725; e-mail: hm24@aub.edu.lb)

Myrna Saadeh, RN, MSN, Clinical Instructor (ms119@aub.edu.lb)

II. Philosophy, Description and Areas of Emphasis

This course covers the concepts of mental health and psychiatric disorders & emphasizes the role of the nurse in a psychiatric/mental healthcare setting, using both classroom and clinical instruction. Students will analyze and apply principles of communication in the nurse-patient therapeutic relationship in clinical & role-play situations.

The course is designed to help students look at approaches to understand people. The practice of psychiatric nursing is grounded in certain philosophical assumption about human nature, society and values where the psychiatric nurse can select, from among the many possible choices, an approach that is best suited for the situation or setting. The holistic philosophy of clients as bio-psycho-social entities is stressed and encouraged. People are thought of as complex organisms having inseparable physical, mental, emotional, social, and cultural dimensions. Physical and mental factors are interrelated and change in one may result in a change in another. Psychiatric nursing care transcends the bounds of mental hospitals to include general health care settings and may be directed toward clients whose immediate problems are primarily physical. The humanistic interactionist approach views human beings in a framework of values and concepts whereby they have purpose and control over their own lives. Behavior is viewed within its social context. Interventions include those aspects related to the social dimensions as well as the individual client centered work.

To acknowledge the interaction of psychology, biology, and socio-cultural context, all behavior is perceived as having meaning. Nurses must learn to incorporate the meaning of the client's

experiences in their intervention. Nurses need to develop skills in observing, interpreting, and responding to the clients' experiences in the hope of arriving at common ground of authentic communication. However, nurses need to take into account the social and cultural environment of each client (holistic assessment) and the interaction patterns in that person's social world.
In addition to helping clients have purpose and control over their own lives, psychiatric nursing must be involved in setting social goals and advancing health holistically. The course focuses on applying psychiatric nursing principles and assessment to specific clinical disorders, based on a continuum of adaptive-maladaptive coping responses, the six-step nursing process, and the diagnoses of the DSM-5.

Emphasis is also placed on the quality of coping abilities of individuals, families, and the community in varying degrees of stress and crisis. The needs and problems of individuals and their families are considered in the context of the groups in which they live, work and play, and the environments (including the community) which may enhance or retard the development of human and health care needs. Consideration is given to understanding the influences of increasingly complex system, and sub-system of the community.

The course also focuses on the dynamics of human behavior; the use of self in promoting health of individuals, groups and families. The student will have opportunities to discuss and validate attitudes toward self, personal growth and self-realization.

Importance is placed on professional relationships over time with individuals, groups and families at varying points on the health / illness continuum. Opportunities are provided for students to work collaboratively and cooperatively with multi-disciplinary and comprehensive health teams, in both general and mental hospitals, identify health needs, and implement relevant nursing interventions.

III. Theory Class and Content

Theory and class are not to be separated from seminars, clinical experiences and review of appropriate literature. Students are to identify inter relationships and make continuous application with these.

Content: for detailed units refer to course content section.

IV. Course Requirements

1. Prompt attendance at all course sessions.

2. Pass successfully midterm, pharmacology, and final exams.

3. Participate in experimental, clinically and non-clinically oriented seminars where process and content of interactions is analyzed, synthesized, and integrated.

4. Presentations and paper.

5. Reports.

V. Teaching Methods

Major learning experiences are achieved through the use of selected clinical experiences (at general and mental hospitals), group discussions, group process, lectures, experimental seminars, analysis of process recording, reports, individual conferences, use of video tape and A.V. materials, and utilization of resource persons.

VI. Theory Objectives

Upon successful completion of the course, students will be able to:

1. Demonstrate knowledge of comprehensive health care planning, and planned change.

2. Comprehend system patterns in dealing with health problems from literature, resources, research findings and emergent data.

3. Describe the processes of psychiatric history taking, mental status examination, neurological, physiological and psychosocial assessment.

4. Formulate a creative and comprehensive plan of psychiatric mental health clients based on the nursing process.

5. Discuss implication of the medical-biologic, psychoanalytic behavioral and social interpersonal frameworks in the care of psychiatric clients.

6. Discuss knowledge of major concepts and principles of communication theory in relation to mental health.

7. Comprehend patterns of coping within a specific milieu.

8. Describe the effects of stress and anxiety of the psycho-biologic and social functioning of clients.

9. Develop culturally aware intervention strategies with clients.

10. Synthesize theory, personal/professional experiences, and feelings into a model of conduct that holds reasonable expectations for self and others.

11. Discuss the ethical frameworks used in psychiatric nursing practice.

VII. Practicum Objectives

Upon successful completion of the course, students will be able to:

1. Apply the nursing process in the care of individuals and families requiring psychiatric-mental health care.

2. Evaluate the usefulness of nursing and related theories for guiding practice of psychiatric nursing.

3. Demonstrate knowledge of communication processes, which may be used with various interpersonal and group relations.

4. Make a rational judgment relevant to changing coping patterns of clients.

5. Employ knowledge of group process in working with groups of clients and colleagues.

6. Practice appropriate intervention modes in the care of psychiatric-mental health clients across the life span, in various clinical settings.

7. Apply self-awareness and stress management techniques at a personal level to enhance personal and professional functioning.

8. Summarize published research in psychiatric-mental health nursing for clinical utility and merit.

9. Relate mental health legislation to humanistic psychiatric nursing practice.

10. Formulate a personal stand on the ethics and politics of psychiatric nursing practice.

VIII. Time and Place

The class will be held every Monday from 9 am to 11am at Rafic Hariri School of Nursing, Classroom 2 (103). Seminars will be presented every Tuesday from 1pm to 3 pm for Dar Al Ajaza and Cross Hospital groups and from 11:00am -1:00 pm for AUBMC-Psych In group at Rafic Hariri School of Nursing, Classroom 2 (103).

The clinical experience will be at the: (1) Outpatient Department (OPD), ACC building, 4th floor on Mondays and Wednesdays afternoon and (2) Mental Hospitals: AUBMC-Psychiatry Inpatient, Cross Hospital and Dar Al Ajaza on Tuesdays.

Also, clinical simulation lab exercises will be held on Mondays and Wednesdays from 2pm-4pm.

Refer to clinical rotation schedule

IX. Learning Assessment and Evaluation

Evaluation will include student achievement in relation to:

Course Objectives.
Theory and Seminar Content.
Tests, Examinations.
Clinical Experiences. Simulation Exercises
Individual Conferences.

Students are expected to assume considerable responsibility for their own learning. They should seek assistance and information, be responsible for completing assignment on time. Students will develop a self evaluation report based on course and individual objectives.

The percentages are as follows:

1. Class discussions/participation ---------- 5%
2. Midterm exam ---------- 15%

3. Psychopharmacology exam ---------- 10%
4. Final exam ---------- 20%
5. Student presentation ---------- 10%
6. Simulation Lab / Clinical journal ---------- 5%
7. Interpersonal records ---------- 15%
8. Simulation Exercises ---------- 10%
9. OSCE----------10%
10.

X. Clinical Facilities

1. American University of Beirut Medical Center (in and outpatient department)

2. Cross Hospital

3. Dar Al Ajaza

XI. Teaching Aids

A. Required Texts

1. Boyd, M. A. (2018). Psychiatric nursing: Contemporary practice (6th ed.). Philadelphia: Wolters Kluwer.

2. Nussbaum, A. M. (2013). The pocket guide to the DSM-5 (TM) diagnostic exam (1st ed.). United States of America: American Psychiatry Publishing.

B. Recommended Textbooks

1. American Psychiatric Association (2013). *Diagnostic and statistical manual of mental disorders (DSM-5)* (5th ed.). Washington, DC: American Psychiatric Publishing.

2. Andreason, N., & Black, D. (2006). *Introduction textbook of psychiatry* (4th ed.). Washington DC: American Psychiatry Publishing.

3. Hersen, M., Turner, S., & Beidel, D. (2007). *Adult psychopathology and diagnosis* (5th ed.). New Jersey: John Wiley & Sons.

4. Mackinnon, R., Michels, R., & Buckley, P. (2006). *The psychiatric interview in clinical practice* (2nd ed.). Washington DC: American Psychiatry Publishing.

5. Maddux, J., & Winstead, B. (2008). *Psychopathology: Foundation for a contemporary understanding* (2nd ed.). New York: Routledge, Taylor & Francis Group).

6. Mohr, W. K. (2009). *Psychiatric-mental health nursing: Evidence-based concepts, skills, and practices* (7th ed.). Philadelphia: Lippincott Williams & Wilkins.

7. Semple, D., Smyth, R., Burns, J., Darjee, R., & Mclntosh, A. (2005). *Oxford handbook of psychiatry.* New York: Oxford University Press.

8. Stuart, G. (2013). *Principles and practice of psychiatric nursing (*10th ed.). Philadelphia: Elsevier Publishing.

9. Videbeck, S. L. (2014). *Psychiatric-mental health nursing* (6th ed.). Philadelphia: Lippincott Williams & Wilkins.

10. Wheeler, K. (2008). *Psychotherapy for the advanced practice psychiatric nurse*. New York: Mosby.

XII. Student Code of Conduct

Students are expected to abide by AUB's Policy on Student Code of Conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism.

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

J. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).

K. Forming parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

L. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit:

http://pnp.aub.edu.lb/general/conductcode/index.html

Student Support:

Technical Support
For Moodle support, contact the IT Academic Services at extension: 3589 or e-mail moodle@aub.edu.lb

Special Needs Support
'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health

conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via Ethics Point atwww.aub.ethicspoint.com.

XIII. Course Content Outline (Refer to Course Content Detailed Description)

Part I: Theoretical Basis and Processes for Psychiatric Mental Health Nursing

Unit I - Psychiatric-Mental Health Nursing
Unit II - Cultural/Spiritual/patient Rights/Legal & Ethical Nursing Frameworks
Unit III - Psychiatric-Mental Health Nursing Process
Unit IV - Stress, Crisis, Loss, Grief, and Disaster Management

Part II: Psychopathology

Unit V- Schizophrenia Spectrum and other psychotic Disorders
Unit VI - Neurocognitive Disorders
Unit VII- Bipolar and related disorders / Depressive Disorders
Unit VIII - Anxiety disorders/ Obsessive –compulsive Disorders
Trauma – and Stressor-Related Disorders
Dissociative disorders/ Somatic symptom & related Disorders
Unit IX - Personality Disorders
Unit X - Psychopharmacology
Unit XI- Sexual Disorders
Unit XII- Substance Use Disorders

Part III: Intervention Modes

Unit XIII- General Systems Theory/ Family& Couple Therapy/ Group Therapy
Unit XIV- CBT & Alternative Therapies
Unit XV- Other psychotherapies: Gestalt, TA, Client- centered
Unit XVI- Student Presentation: Ongoing throughout the Semester (refer to the list of seminar topics)

Course Venue: Room 103, HSON

XIV. Theory Schedule

Week	Date	Time	Content	Faculty	Readings
Week 1	21/01/2019	9-9:50am	Introduction to the course	-Dr. Assaf -Mrs. Masalkhi -Ms. Saadeh	
	Unit I	10:00-10:50	-Psychiatric – Mental Health Nursing and Evidence-Based Practice. -Mental Health and Mental Disorders.	Dr. Assaf	Ch. 1& 2
	Unit II	13:00-13:50	- Ethical, Standards& Nursing Frameworks. - Therapeutic nurse-patient relationship	Dr. Assaf	Ch. 6& 9
	22/01/2019 **Unit III (Tues.)**	9-10:50am 12:00-13:50pm	-The psychiatric-Mental health Nursing process (Theory) -The psychiatric –Mental health Nursing process (Class activity)	Dr. Assaf	 Ch. 10
	23/01/2019 **Unit IV (Wed.)**	2:00 pm-3:50 pm	-Stress and Mental Health. -Crisis, Loss, Grief, Response, Bereavement, and disaster Management	Dr. Assaf	Ch. 18, 20
Week 2	28/01/2019 **Unit V (Sim.Ex.1)**	9-10:50 am	Schizophrenia Spectrum and other psychotic disorders	Dr. Assaf	Ch. 22, DSM-5
Week 3	04/02/2019 **Unit VI**	9-10:50am	Neurocognitive disorders	Mrs. Masalkhi	Ch.38& DSM-5
Week 4	11/02/2019 **Unit VII (Sim.Ex.2)**	9-10:50 am	Bipolar and related disorders	Dr. Assaf	Ch.24& DSM-5
Week 5	18/02/2019	9-10:50pm	Depressive disorders	Dr. Assaf	Ch. 23 & DSM-5
Week 6	25/02/2019 **Unit VIII (Sim.Ex.3)**	9-10:50am	Anxiety disorders Obsessive-compulsive & related disorders (Dissociative disorders, & Somatic symptom Disorders)	Dr. Assaf	Ch. 25, 26, 32 & DSM-5
Week 7	04/03/2019	9-10:50am	Trauma and Stressor-Related disorders	Dr. Assaf	Ch. 27 DSM-5
Week 8	**11/03/2019**	9-10:50am	Personality disorders	Mrs. Masalkhi	Ch.28, 29

	Unit IX Sim.Ex.4				DSM-5
Week 8	**11/03/2019**	12-1:50 pm	Midterm Exam	Auditorium	
Week 9	**18/03/2019 Unit X**	9-10:50am	Psychopharmacology	Mrs. Masalkhi	
Week 10			**Annunciation Day**		
Week 11	01/04/2019 **Unit XI**	9-10:50am	Sexual dysfunctions	Ms. Saadeh	Ch. 34 & DSM-5
Week 12	08/04/2019 **Unit XIII Sim.Ex.5**	9-10:50am	General systems theory/Family & couple therapy/ Group therapy/ Milieu	Dr. Assaf	Ch. 7,13,14
Week 12	08/04/2019	12-1:50 pm	Psychopharmacology Exam	Room 2 (103)	
Week 13	15/04/2019 **Unit XIV& XV**	9-10:50am	Other psychotherapies: Gestalt, TA, Client-Oriented & CBT	Dr. Assaf	Ch. 7,12, 13, & 14
Week 14			Easter		
Week 15			Easter		
	02/05/2019-05/05/2019		**READING PERIOD**		
	13/05/2019	**9:00-12:00 noon**	**FINAL EXAM Auditorium**		
	06/05/2019	**8:30 -12:30**	**OSCE (Simulation Lab)**		

Dec.11, 2019

AMERICAN UNIVERSITY OF BEIRUT
HARIRI SCHOOL OF NURSING
NURS 406 NURSING RESEARCH
Fall 2019-2020

Course Coordinator:

Gladys Honein, PhD, RN
Office: Room 411E HSON
Extension: 5977
Office hours: by appointment
Email: gh30@aub.edu.lb

Class Schedule:
Mondays 11:00-11:50 pm **Classroom 103 HSON**
Wednesdays 11-12:50 am **Classroom 103 HSON**

COURSE DESCRIPTION:
NURSING 406 is a 3-credit course given in the first semester of the senior year of the BSN program. This course is **writing intensive** and includes a basic introduction to quantitative and qualitative research methods and research proposal writing as they are used in nursing research and practice. It introduces the students to common research designs and to some of the physiological and behavioral measures relevant to nursing research. The course provides an overview of methods of data collection, principles of measurement, analysis and interpretation of results, as well as evaluation of research reports. In this course students will be introduced to research proposal development and will work individually and in groups on required writing documents.

PREREQUISITES:
English 203, 204 and Nursing 203

TEXTBOOK:
Polit, D.F., & Beck, C. T. (2013). *Essentials of nursing research: Appraising evidence for nursing practice* (9th Ed.). Philadelphia, PA: Lippincott.

LEARNING OUTCOMES:
Upon completion of the course, the student will be able to:
1. Describe the importance of evidence-based nursing practice
2. Recognize the major sections of a research article
3. Identify the purposes of using quantitative and qualitative research designs
4. Design a research proposal in 4 phases:
    a. Develop a research question and a research hypothesis
    b. Apply the steps of conducting a literature review
    c. Adopt theoretical frameworks/conceptual models in research
    d. Select the best approach for conducting a research: quantitative/ qualitative

5. Apply ethical considerations in research practice (e.g. plagiarism, confidentiality, beneficence and maleficence)
6. Select a relevant appraisal tool to critique a peer-reviewed article
7. Disseminate the final research proposal (oral, poster, proposal)

TEACHING METHODS:

- Lectures using power point on theoretical content
- In class group activities (e.g. deduction of major elements of research and appraisal of selected peer reviewed studies)
- In class peer and faculty review
- Organization of public student presentations at the mini-conference (oral and poster)
- Facilitation and mentoring group research proposal preparation in 4 phases

LEARNING ASSESSMENT:

- Midterm Exam 10 %
- Final Exam 10 %
- In class group activities participation 5 %
- Peer review 5 %
- Mini conference presentation 20 %
- Writing assignments in 4 phases 50 %

Midterm and final exam (20%):

Multiple choice questions to evaluate the learning the theoretical content of the course

In class group activities participation (5%):

Active attendance and involvement in the discussion by raising and answering questions related to key concepts discussed and explained during classroom lecture and group work activities

Peer review (5%):

For each draft of the 4 phases of the proposal, each group will be assigned a peer group and to orally critique the submitted work.
Similarly, each group will be required to do a second round of peer review and ranking of an assigned abstract.

Mini conference presentation (20 %)

Each group of students will be required to submit an abstract outlining their proposal. Using an abstract review criteria tool (posted on Moodle), faculty will rank the abstracts and recommend them for oral or poster presentations.
Accordingly, each group of students will be expected to develop and disseminate their proposal content at a mini-conference.
Groups will be evaluated based on poster/oral evaluation criteria tool (posted on Moodle)

Writing assignments in 4 phases (50% of the grade):

The students will be divided into 5 groups. Each group will be required to develop a research proposal divided into four cumulative phases. A number of pages are assigned for each phase, **pages beyond assigned page number will not be read therefore will not be graded!** All assignments will be submitted on Moodle and Turn It In will be used to screen all assignments against plagiarism.

In each phase, groups will integrate relevant theoretical contents covered in class based on the following:

Phase I: Identify research questions and literature review (1-2 pages) 10%
Background and clinical questions are clear and address each of the PICO components

Phase II: Design a quantitative study (3-4 pages) 15%
Choose a quantitative research design and justify the choice of the specific design. Propose the sample, data collection measures including the dependent, independent and control variables, and the data analysis plan

Phase III: Design a qualitative study (3-4 pages) 15%
Choose a qualitative research design and justify the choice of the specific design. Propose the sampling method, data collection approach, data management and the data analysis plan

Phase IV: Cumulative proposal (7-10 pages) 10%
A full proposal will include the above amended three phases in addition to implications, strengths and limitations of the study

COURSE POLICIES:

1. All course requirements must be completed by the students before grades are submitted for credit
2. Students who miss over one fifth of lecture hours will be asked to drop the course
3. No makeup examination will be granted
4. The passing grade for this course is "70"
5. Students are expected to abide by AUB's policy on student code of conduct (p. 3)

STUDENT CONDUCT

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.
In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism. **All work is submitted through Turnitin, I HAVE ZERO TOLERANCE TO PLAGIARISM!**
Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

a. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
   Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).

c. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct range from warning to suspension, to expulsion from the University. For more information, visit: http://pnp.aub.edu.lb/general/conductcode/index.html

NON-DISCRIMINATION – TITLE IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. To report an incident, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via EthicsPoint at www.aub.ethicspoint.com.
'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. AMERICAN UNIVERSITY OF BEIRUT
HARIRI SCHOOL OF NURSING
Nurs 410 Leadership and Management in Nursing

Coordinator: Dr. Lina Younan, Ext. 5981, Email: ly11@aub.edu.lb
Room 522, Office hours by appointment
Co-coordinator: Mrs. Hera Tashjian, Ext.5979, Email: ht17@aub.edu.lb
Room 321, Office hours by appointment

COURSE DESCRIPTION:
NURS 410 Leadership and Management in Nursing is a five credits course given in the **spring semester** of the fourth year of the BSN program to the senior nursing students; three credits theory and two credits practicum.
The course helps students acquire leadership and management knowledge and skills essential for nursing practice. It emphasizes the use of creativity in problem solving and decision-making thus promoting critical thinking, which is essential to the nursing process. It introduces students to the change process and control measures, which contribute to the improvement of nursing practice.
In the practicum part, students are given the opportunity to apply concepts and principles of nursing leadership and management and to explore their role as beginning potential leaders. Moreover, they observe and assist in the practice of different modalities of leadership and managerial skills in a variety of health care settings.
Power point, multimedia and interactive exercises will be used to enhance acquisition of course material. A computer with access to AUB MOODLE is necessary. The school's computer lab is open from 8am to 3pm. All course materials can be found on MOODLE.

TEXTBOOK:
Marquis, B.L. and Huston, C.J. (2017). Leadership roles and management functions in nursing (9th ed.). Philadelphia: Lippincott Williams & Wilkins.

Supplemental readings and other material will be provided accordingly.

LEARNING OUTCOMES & INSTRUCTIONAL STRATEGIES

Learning outcomes	Instructional strategies
Theory	
1. Integrate knowledge from various disciplines such as behavioral sciences, basic sciences, and nursing, in planning client care management. 2. Examine evidence-based leadership skills and management functions in planning, organizing, implementing, and controlling client care 3. Discuss the importance of critical thinking in problem solving, decision-making and conflict resolution during the management of nursing situations. 4. Evaluate quality of care in selected clinical situations taking into	– Power point presentations – Student-led online discussions. – Reflective response to related-readings on clinical issues – Online exams (Midterm & Final) – Attending related public lectures and short seminars such those of the professional organization's meetings & activities of the Nurses' Chapter, Nurses' Order, and Nursing Service etc...

consideration the impact of current, historical, political, economic, ethical, legal and professional forces on health care.	
Clinical	
5. Utilize concepts from leadership and management theories and the nursing process in the care of clients in various health care settings. 6. Utilize effective organizational and interpersonal communication in managing the care of a group of clients in a variety of health care settings. 7. Apply adult learning principles and theories in implementing staff development sessions and patient teaching. 8. Acquaint yourself with the nurse manager's roles in terms of staffing, budgeting, staff development and staff performance appraisals. 9. Incorporate current research findings related to evaluating the outcomes of health and nursing care, and nursing management and leadership in practice situations. ***10.*** Conform to laws, ethical principles and standards of nursing practice.	– Setting weekly learning objectives – Daily clinical assignments: Students will assume the role and responsibilities of Primary Nurse/Modular Nurse who assesses, diagnoses, plans, implements, and evaluates nursing care of a group of clients. – Daily case discussions with preceptors – Weekly managerial & leadership assignments: Students will assume the role and responsibilities of Nurse Manager/Leader mainly staff scheduling, time management, directing subordinates, staff and client teaching, & auditing and monitoring nursing care. – Group project presentation and term paper. – Weekly self-evaluation. – Weekly formative evaluation – Summative evaluation by preceptors

THEORY COURSE OUTLINE

I. ***New approach to leadership and management***: decision-making, problem solving, critical thinking; introduction to management; developing leadership.

II. ***Foundations for effective leadership and management***: ethical issues; legal and legislative issues; patient, subordinate and professional advocacy.

III. ***Planning:*** strategic planning; planned change; time management; fiscal planning; career development

IV. ***Organizing:*** organizational structure; political and personal power; organizing patient care

V. ***Staffing:*** recruitment, orientation; staff development and team building; scheduling

VI. ***Directing:*** motivating; communicating; delegating; managing conflict; unions and employment laws.

VII. ***Controlling:*** quality improvement, performance appraisal, and discipline

LEARNING ASSESSMENT

Theory

- Moodle discussions & reflective writings **5%**

▪ Feedback report on public lecture or seminar	**5%**
▪ Midterm Exam	**20%**
▪ Final Exam	**25%**
Clinical	
▪ Setting weekly learning objectives	**5%**
▪ Handoff report	**5%**
▪ Staff teaching	**10%**
▪ Auditing or monitoring	**10%**
▪ OSCE Exam	**15%**

COURSE POLICIES

All course requirements must be completed by the student before grades are submitted for credit.

1. **In order to pass the course, students must attain an average grade of 70 in all exams and a pass in the clinical irrespective of assignments grades. Students cannot pass the course if: they get an average grade below 70 on the exams, if they get 'F' on the clinical evaluation, and/or if they get a course average of below 70.**
2. A student who misses an exam may request to take a make-up examination. The final decision for dealing with such requests will be taken by the course coordinator.
3. Students who miss over one fifth of lecture hours will be dropped from the course or one fifth of the clinical hours may be asked to drop the course.
4. Students are expected to abide by AUB's policy on student code of conduct (pages 4-5).
5. All students should adhere to the uniform policy of the School of Nursing during clinical.
6. **Unexcused absence from clinical will result in a deduction from the clinical grade.**
7. A student who is absent from clinical due to illness is expected to inform the instructor by 7 a.m. on the day of clinical. Any student who is late or absent from a clinical assignment has to make up the experience.
8. Late submission of assignments will have a deduction of 5 points for each day of tardiness.
9. Students are expected to abide by AUB's policy on student code of conduct (p. 3) as stipulated in the following website: http://pnp.aub.edu.lb/general/conductcode/index.html

STUDENT CONDUCT

Students are expected to abide by AUB's policy on student code of conduct. In particular, while taking a test or examination, students shall rely on their own mastery of the subject and not attempt to receive help in any way not explicitly approved by the instructor; for example, students shall not try to use notes, study aids, or another's work. Such cheating includes trying to give or obtain information about a test, trying to take someone else's exam, or trying to have someone else take one's own exam.

In addition, whenever students draw on another's work, they must specify what they borrowed, whether facts, opinions, or quotations, and where they borrowed it from. Using another person's documented ideas or expressions in one's writing without acknowledging the source constitutes plagiarism. **Plagiarism is not tolerated and consequences following AUB policies found in the student code of conduct found on Moodle.**

Students are also expected to be honest in all dealings with the University. Certain kinds of dishonesty, though often associated with academic work, are of a different category than cheating or plagiarism. These kinds of dishonesty include (but are not limited to) the following:

A. Misrepresenting personal circumstances to an instructor (for example, in requesting a makeup exam or special due date for an assignment, or in explaining an absence).
B. Forging parts of, or signature on, official documents (including both, university documents and relevant outside documents, such as doctors' notes).
C. Taking credit for work in a team-project when little or no contribution to the work of the team has been made.

Disciplinary actions taken for student misconduct can range from warning to suspension, to expulsion from the University.

STUDENT SUPPORT

Technical Support

For Moodle support, contact the IT Academic Services at extension: 3589 or e-mail moodle@aub.edu.lb

Special Needs Support

'AUB strives to make learning experiences accessible for all. If you anticipate or experience academic barriers due to a disability (such as ADHD, learning difficulties, mental health conditions, chronic or temporary medical conditions), please do not hesitate to inform the Accessible Education Office. In order to ensure that you receive the support you need and to facilitate a smooth accommodations process, you must register with the Accessible Education Office (AEO) as soon as possible: accessibility@aub.edu.lb; +961-1-350000, x3246; West Hall, 314'.

Non-Discrimination – Title IX – AUB

AUB is committed to facilitating a campus free of all forms of discrimination including sex/gender-based harassment prohibited by Title IX. The University's non-discrimination policy applies to, and protects, all students, faculty, and staff. If you think you have experienced discrimination or harassment, including sexual misconduct, we encourage you to tell someone promptly. If you speak to a faculty or staff member about an issue such as harassment, sexual violence, or discrimination, the information will be kept as private as possible, however, faculty and designated staff are required to bring it to the attention of the University's Title IX Coordinator. Faculty can refer you to fully confidential resources, and you can find information and contacts at www.aub.edu.lb/titleix. **To report an incident**, contact the University's Title IX Coordinator Trudi Hodges at 01-350000 ext. 2514, or titleix@aub.edu.lb. An anonymous report may be submitted online via Ethics Point atwww.aub.ethicspoint.com.

Exhibit III-10. Reflective Writing Course Example

Reflective Writing in Nursing

Reflective writing is a qualitative medium where personal experiences and theoretical approaches to clinical practice are acknowledged. Reflection is an exploration and an explanation of events – not just a description of them. It requires students to make **links** between thought and action and theory presented in class and clinical practice. Students are encouraged to reflect on their desires (I wish this to happen to my patient), opinions (I don't think this works), emotions (I felt angry or glad), or disapproval (I do not agree with this approach).

In reflective writing students inform their instructors of information that is not dealt with in other writing assignments such as their attitudes, personal preferences, values, beliefs, and ethics in relation to human problems. It captures the students' unique perspective about living with illness.

Reflective Writing's main objective is to get students to understand their personal experiences through writing which promotes critical thinking. It also helps students develop clear understanding of them; and evaluate their ideas, their practices and what meaning they are making of them.

Gibbs Reflective Cycle

Gibbs' reflective cycle encourages you to think systematically about the phases of an experience or activity, and you should use all the headings to structure your reflection. Gibbs' reflective cycle can be really useful in making you think through all the phases of an experience or activity.

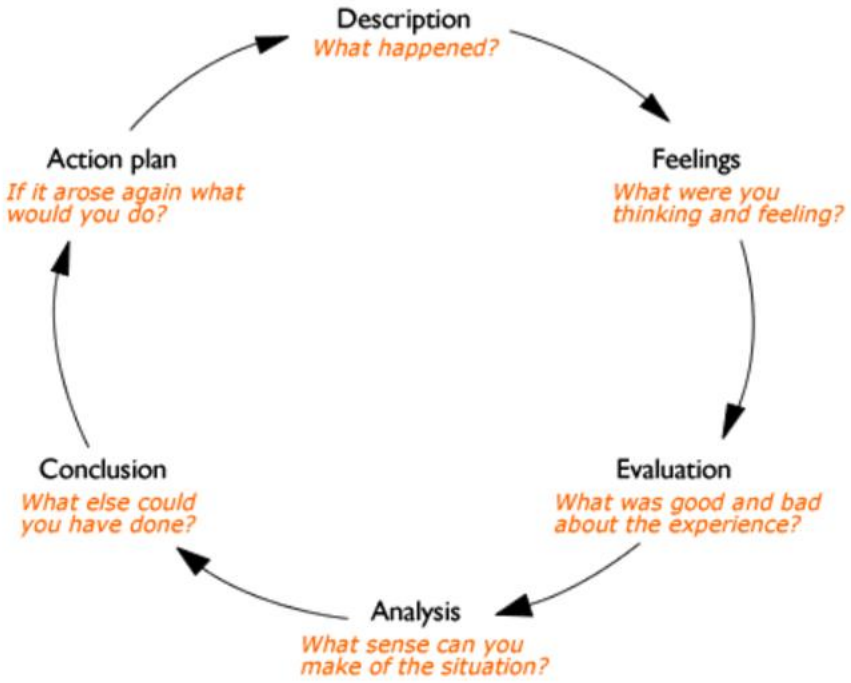

Exhibit III-10. Reflective Writing Course Example

Assignment Details

1. Reflect on an experience you had in Critical Care.
2. Use **Gibbs Reflective Cycle** and all its headings to structure your reflection. Follow the below rubric.

Section	Description	Grade	
Description	Describe the event, incidence, and/or observation	**1**	
Feelings	Describe what you felt or thought when you first observed the event.		
Evaluation	Analyze what went right and what went wrong.	**1**	
Analysis	Describe what sense can you make of the situation.	**1**	
Conclusion	Reflect on what else you could have done.	**1**	
Action Plan	Reflect on what you plan to do if what you had observed is repeated.	**1**	
	Total	**5**	

3. Students are expected to submit 1 reflective writing throughout the semester. Five of the best submissions [after permission of course] will be asked to post their reflective writing on a Moodle forum.
4. Students will post one Moodle discussion in response to someone else's reflective writing. **Deadline for Reflective writing is October 25 at 11pm and for Reflective Analysis is November 29 at 11pm.**

Exhibit III-11. Student Involvement in Community Activities

Below are e-mails and photos showing the participation of HSON students in different community volunteering activities.

From: Mona Osman El Hage
Sent: Thursday, September 28, 2017 at 11:38 AM
To: Tamar Avedissian
Cc: Mary Arevian Bakalian; Gladys Honein
Subject: Re: Invitation

Dear Tamar,
Hope all is well and many thanks for your email.
It will be a great pleasure and honor to collaborate together. The nursing students have been playing an integral role in all CHAMPS Fund activities.
Tuesday October 3 at 1:00 pm would be great. Can you please advise the venue?
Thank you very much for all your support.
Best Regards,
Mona

Cc: Mary Arevian Bakalian; Gladys Honein
Subject: Invitation

Dear Dr. Osman,
Good day!
The Faculty of Nursing 408 (Community Health Nursing course) has the pleasure of inviting you to talk about CHAMPS Fund and its vital role in health promotion, screening, and health education for young athletes.
One suggested date is on Tuesday October 3, 2017 either from 1-2pm or 2-3pm. Our classes fall on Mondays from 9-11am and Tuesdays 1-3pm, if you would like to propose another date.
As in previous years with your consent, the BSN IV nursing students would also be happy to volunteer in the cardiac screening activities the CHAMPS Fund organizes throughout this semester.
Thank you for your support and collaboration.
Regards,

Tamar Avedissian RN, MSN
Clinical Instructor
Hariri School of Nursing
American University of Beirut

Exhibit III-13. Summative Evaluation Forms

American University of Beirut School of Nursing
NURS 400- Nursing Care of the Critically Ill Adult
Clinical Evaluation of Nursing Competence and Personal Development
Summative Evaluation

Student Name: **Semester and Year**: Fall 2020

Application of the Nursing Process		**P**	**F**	**Comments**
ASSESSMENT				
1	**Assesses the client's physiologic, psychosocial, spiritual, and learning needs.**	•		
2	Identifies stressors that impact the client in the critical care environment.			
3	**Analyzes assessment findings in relation to client condition**			
4	**Identifies changes in client condition.**			
NURSING DIAGNOSIS				
5	**Formulates nursing diagnoses based on the client's subjective and objective assessment findings.**			
6	**Relates the nursing diagnoses to functional alterations and underlying pathophysiologic processes.**			
PLANNING				
7	**Prioritizes nursing diagnoses as the situation dictates.**			
8	**Establishes short term outcomes based on client condition.**			
9	**Integrates knowledge of pathophysiology, psychology, pharmacology, nursing theory and research findings in selecting appropriate nursing interventions for the client.**			
10	Demonstrates flexibility in adapting the care plan to changes in condition.			
11	Identifies realistic long-term goals for continuity of care.			
IMPLEMENTATION				
12	**Demonstrates organization in the implementation of planned care.**			
13	**Implements nursing interventions based on the priorities of client problems.**			
14	**Attends to the psychosocial and spiritual needs of client and family.**			
15	**Monitors vital signs and body system parameters accurately.**			
16	**Demonstrates beginning competence in hemodynamic monitoring.**			
17	**Demonstrates beginning competence in respiratory therapy.**			
18	**Identifies correctly major cardiac rhythm disturbances and artifacts.**			
19	Assists in providing basic and advanced cardiac life support.			
20	Assists in triaging emergency clients.			
21	Assists in preparing and transferring clients out of the critical care setting.			
22	**Provides client teaching based on identified leaning needs.**			
23	Responds appropriately to emergency situations.			
EVALUATION				
24	**Evaluates nursing care based on the stated client outcomes.**			
25	**Utilizes specific and measurable criteria in client evaluation.**			
26	Utilizes the evaluation process to initiate modifications in the plan of care.			
SAFETY IN IMPLEMENTING NURSING CARE		**P**	**F**	**Comments**

27	**Provides a safe client care environment.**			
28	**Demonstrates safe nursing care to critically ill adults based on scientific principles and recent evidence.**			
29	**Demonstrates safe administration of drugs and parenteral therapy.**			
30	**Implements measures to prevent complications of immobility, fluid, electrolytes, and nutritional imbalance.**			
31	**Utilizes standard precautions at all times during practice.**			
	CRITICAL THINKING	**P**	**F**	**Comments**
32	Reflects on own practice in terms of theory application and impact on patient.			
33	**Demonstrates sound decision making based on scientific principles in clinical situations.**			
34	**Sets priorities to ensure safe quality care.**			
35	Demonstrates effective problem solving in clinical situations based on scientific rationale.			
	COMMUNICATION	**P**	**F**	**Comments**
36	**Demonstrates therapeutic communication with clients in a way that makes them feel comfortable and secure.**			
37	**Documents nursing interventions and patients' responses accurately.**			
38	**Communicates effectively with members of the health team in terms of reporting and eliciting pertinent information.**			
	PROFESSIONAL ROLE	**P**	**F**	**Comments**
39	**Comes always prepared to the clinical setting.**			
40	**Is prompt in reporting to clinical.**			
41	Demonstrates initiative and self-direction.			
42	**Communicates need for help promptly and appropriately.**			
43	**Adheres to all agency and school policies: dress code, ethical conduct, & Plagiarism.**			
44	**Maintains confidentiality in professional communication.**			
45	Maintains professional demeanor when interacting with clients.			
46	**Assumes responsibility for own actions.**			
47	Collaborates with the health team in planning and evaluating client care.			
48	Acts as client advocate.			
49	Assumes responsibility for continued learning.			
50	**Reports errors in due time.**			

Grading Criteria:

P= Pass Safe and accurate performance each time behavior is observed with occasional supportive/directive cues or with frequent supportive but occasional directive cues.

F= Fail Unsafe performance; lack of skill; requires continuous supportive and directive cues.

Bolded Evaluation Criteria indicate that the outcome is critical for the student to pass the course.

Exhibit III-13. Summative Evaluation Forms

Faculty Comments

1. General performance and professionalism: include number of hours (85) and units (Coronary, Respiratory, Intensive, Neurology Intensive Care Units and Emergency Department)
2. Critical Thinking and Knowledge
3. Preparation
4. Skills and Safety
5. Communication
6. Recommendations
7. Verdict: Can function in critical care areas under minimal, moderate to minimal, moderate, moderate to close, or close supervision.

Clinical Evaluation of Nursing Competence and Personal Development

Summative Evaluation

Student Name: **Semester and Year**: Fall 2020

Application of the Nursing Process **Assessment**		**P**	**F**	**Comments**
1*	Collects appropriate subjective and objective data from the client and family, medical record, staff, and other resources.		•	
2*	Relates assessment finding to the underlying condition.	•		
Nursing Diagnosis		**P**	**F**	**Comments**
3*	Formulates nursing diagnoses based on the client's assessment findings.	•		
4*	Relates the nursing diagnoses to functional alterations and underlying pathophysiologic processes.	•		
Planning		**P**	**F**	**Comments**
5	Prioritizes nursing diagnoses.	•		
6*	Develops measurable outcomes related to the nursing diagnoses.	•		
7*	Integrates knowledge of pathophysiology, psychology, pharmacology, nursing theory and research findings in developing an individualized plan of care to achieve stated outcomes.	•		
8	Collaborates with client/family in identification of outcomes.	•		
9	Utilizes relevant research findings when selecting nursing interventions.	•		
Implementation		**P**	**F**	**Comments**
10	Demonstrates organization in implementing the planned care for 1 or 2 clients**.**	•		
11	Attends to the psychosocial and spiritual needs of client and family.	•		
12*	Demonstrates correct procedure in performing psychomotor skills.	•		
13*	Demonstrates knowledge of medications and IV solutions. States classification, purpose, action, side effect, dose and contraindications.	•		
14*	Administers medications correctly as determined by client condition.	•		
15*	Demonstrates knowledge of rationales for interventions.	•		
16	Provides individualized interventions consistent with client's cultural, developmental, and socioeconomic variations.	•		
17*	Provides client teaching based on identified learning needs.	•		
Evaluation		**P**	**F**	**Comments**
18*	Evaluates client response to medications and treatment**.**	•		
19*	Compares client response to outcome criteria.	•		
20	Revises plan of care based on continuous assessment of the client's health.	•		
21*	Provides a safe client care environment.	•		
22*	Follows aseptic techniques and standard precautions consistently while providing care.	•		
23*	Requests assistance when necessary.	•		

24*	Adheres to safety principles in administering medications and treatments.	•		
25*	Implements measures to prevent complications of immobility, fluid, electrolytes, and nutritional imbalance.	•		
Critical Thinking		**P**	**F**	**Comments**
26*	Analyzes assessment data in relation to the underlying health condition of the client.		•	
27*	Prioritizes nursing care activities in response to patient care needs.	•		
28	Utilizes beginning problem solving skills effectively in adapting to changing situations.	•		
Communication		**P**	**F**	**Comments**
29*	Uses appropriate vocabulary for the client.	•		
30*	**Demonstrates beginning therapeutic communication in interacting with client and family:** a. Identifies nonverbal cues b. **Asks open ended questions** c. **Clarifies client's verbal and non-verbal communication** d. Maintains silence in relevant situations e. Uses reflections to encourage client and family verbalization of feelings f. Demonstrates effective listening	•		
31*	Communicates effectively with members of the health team, faculty and students**.**	•		
32*	Informs instructor and nurse of changes in client status.	•		
33*	Documents interventions and client responses accurately.	•		
Professional Role		**P**	**F**	**Comments**
34*	Arrives at the clinical site on time with the necessary supplies.	•		
35	Notifies the faculty and the clinical site in advance, if absent or late.	•		
36*	Adheres to all agency and school policies (including dress code, ethical conduct, and plagiarism).	•		
37*	Comes always prepared to the clinical setting.		•	
38*	Assumes responsibility for own actions.	•		
39*	Seeks guidance at appropriate time.	•		
40	Identifies own strengths and areas for improvement.	•		
41*	Maintains professional demeanor when interacting with clients.	•		
42*	Maintains confidentiality of all health care information at all times.	•		
43	Seeks out learning opportunities to increase knowledge and skill.	•		
44	Collaborates with the health team in planning and evaluating client care.	•		

*** All asterixed criteria should be met to pass the course.**

Faculty Comments:

---- is a professional student who takes faculty feedback well and demonstrates the willingness to learn and develop.

At the beginning of the clinical practice, ----- was unable to use the *nursing process* properly, whereby she had challenges in collecting all the relevant data from the patient which led to difficulty in understanding and presenting a proper patient report. With guidance and modeling, ----- started to gather the patient data in a

comprehensive way and started to present the cases more appropriately. She also showed progress in providing the rationales for the interventions and stating the appropriate nursing diagnoses. She was always knowledgeable about the *medications* in terms of their classification, usage and side effects and administered them safely. Additionally, she demonstrated a caring approach towards her patients and addressed their *psychological needs* (she noticed her patient was unhappy, she reported this and accordingly the psychiatrist team was consulted). Finally, ----- approached her patients gently and *communicated* with them effectively that helped her establish a good rapport.

However, by the end of week 2 ----- was still unable to present the cases in a systematic way hence, requires further practice. When she is followed up closely, she prepares cases in a comprehensive way but tends to be less *knowledge*able of the details of the cases when she assumes there won't be any case discussions. Accordingly, she is encouraged to show consistency in her preparations. Although she showed knowledge of medications and administered them following the correct policy/procedure, she lacked *dexterity* (e.g., dropped a pill, was about to throw the needle outside the container). Moreover, she is advised to improve her knowledge of *patient assessment* and *analysis* of diagnostic procedures based on the assessment findings. While discussing the steps of patient assessment, she missed some important elements (e.g., for neurological assessment she was able to state the need to check cranial nerves, motor power and coordination, but she was not able to identify the Glasgow coma scale, orientation x 3 and when there is a need to do gag reflex. She knew her patient had breathing problems and low SPO2, but she was not able to identify the need for ABGs). Nevertheless, she did the actual assessment fully and in a systematic way. As mentioned earlier, she approaches patients using the appropriate tone of voice and language and even performs effective patient teachings, yet she is advised to improve her *listening skills* and be more mindful of her patients (e.g., tends to interrupt the patient while he/she is speaking).

Overall, she demonstrated improvement in her clinical skills from week 1 to week 2, but still demonstrated the gaps mentioned above. Surely, she may benefit from reinforcement and close follow up.

Exhibit III-14. Student Contract

This is a learning contract utilized for students having challenges meeting the course/program requirements and standards. In this contract, the instructor and student develop and outline a plan of action, which should facilitate student success, and achievement of course/program goals.

Student's Name:
Student Number:
Course: NURS 304 Clinical
Date: November 23rd, 2020

Current Situation:

--- is a polite nursing student. He shows good safety and dexterity in techniques and nursing skills. However, until November 16, 2020, he was demonstrating inconsistency in providing comprehensive and systematic preparation for the clinical experience. In each area, he showed different performance: sometimes he shows deficiency in basic knowledge required at this level in N304 (example: simple terminology in maternity health during clinical rotations) and systematic thinking (state nursing diagnoses by priority), and other times he shows improvement and better preparation example in Postpartum rotation discussion time. Inconsistency was also seen in his critical thinking process: which is evident in concept maps, requires prompting and direction. Moreover, planning for patient treatment (intervention; management) could be more developed and based on scientific rationales.

Furthermore, shows eagerness to learn or seek new experiences. He is encouraged to be prepared and focused for clinical rotations.

Academic/Evaluation by Faculty Preceptors:

Mr. ---- will be re-evaluated in the following clinical rotations, effective Friday November 23 2020. Assessment criteria will include:

1- Improve preparation for clinical assignments as study guides and case discussion.
2- The ability to prioritize the nursing care plan of activities.
3- Seek more learning opportunities in meeting required course clinical learning outcomes.
4- Improve knowledge and critical thinking abilities in relation to patient care.

In case of failure to improve in ALL of the above criteria, Mr. will fail the Nursing 304 Clinical.

Student Responsibility:

As a student, I understand that by signing the contract I agree that I am responsible for meeting the following obligations: failing to meet any of them will lead to failure in the course:

- □ Abide by the decision of the faculty preceptors stated above.
- □ Get the Syllabus of the course, read carefully, know course requirements, and refer to them for meeting course-learning outcomes.
- □ Ask course coordinator/instructor for clarifications regarding assignments and examinations and take advantage of office hours.
- □ Show up for class/clinical every time, on time, and be prepared for class and clinical every week.
- □ Be respectful of the instructor and classmates.
- □ Complete my assignments and submit them on time.

- □ Avoid plagiarism by using correct citation and referencing.
- □ Utilize the many resources available to me: (office hours, Simulation lab).
- □ Earn my evaluation and grade.

Date/s to Review Progress: _____

Student's Signature: _____ Date: _____

Instructor's Signature: _____ Date: _____

Exhibit III.15. Sample Weekly Anecdotes

NURS 300 Weekly Clinical Evaluation

Student Name ----	**Date**	**Met/ No**	**Instructor Notes**
Professionalism • Punctual; professional appearance/attitude; follows ethical conduct • Responsible for own actions & seeks guidance when needed • Identifies own strengths & areas for improvement • Communicates effectively with RNs, faculty, and students		**Partial**	She is attentive when the faculty is around. She showed some improvement in her performance compared to the beginning of the semester.
Assessment, Case Preparation & Care Planning • Collects appropriate subjective & objective data • Formulates nursing diagnoses based on assessment findings • Demonstrates knowledge of rationales for interventions • Integrates knowledge of pathophysiology, psychology, pharmacology, nursing theory & research findings in care		**No**	Her preparation is often sourced from nonprofessional sites highlighting general features using nonscientific terminology. She needs guidance to have in-depth understanding of the case assignment. She needs support to dig deeper to obtain a comprehensive and critical understanding. Frequently she has partial responses showing incomplete data collection or preparation and analysis.
Implementation & Evaluation • Provides organized care, attends to, and prioritizes patient care needs • Provides a safe client care environment • Documents interventions & patient responses accurately • Evaluates interventions		**Partial**	She provides care with close guidance. However, she is willing to help the staff or classmates in their load. There is a need to improve her scientific reasoning, chain of thoughts to provide safe care.
Critical Thinking • Relates & analyzes assessment findings to the underlying condition • Relates nursing diagnoses to functional alterations & underlying pathophysiologic processes		**No**	She is highly encouraged to manage her time (loses time in daily distant transportation) to have more serious study time. Her knowledge of medications could be improved. Needs assistance in relating events and management. Encouraged to participate in case discussions actively with positive input.

Skills/Procedures • Demonstrates correct procedure in performing skills • Follows aseptic techniques & standard precautions consistently	**Partial**	She needs practice to improve dexterity always maintaining sterile technique.
Medications • Adheres to safety principles in administering medications • Demonstrates knowledge of medications. States classification, indications, actions, side effect, & contraindications	**Partial**	

Student Improvement Plan

--- has been making effort to improve her clinical performance. Nevertheless, she has difficulty in discussing the assigned case accurately chronologically mentioning important events that affect patient care. This is reflected in the collected data (both subjective and objective) from the medical chart and patient/ family that is often incomplete. She needs assistance in understanding the significance of the pathophysiology, specific management, and relevant diagnostic tests, where most of them are marginally prepared and analyzed. Her preparation reflects basic and sometimes lay knowledge. Her physical assessment skills are acceptable. Her knowledge of medications can be improved to ensure safety at the bedside. In general --- is encouraged to be more engaged with the clinical demands such as adequate preparation, thorough follow up of her patients, and prompt nursing interventions.

It is imperative that --- makes further effort to improve her weaknesses to achieve course outcomes.

Plan for Improvement
1. Prepare the assigned case adequately. Read the medical chart thoroughly, pausing on each event, terminology to gain a full understanding of events. Make it a habit to ask *the why and the how* to relate events. Collect objective and subjective data from chart, patient, and health care providers.
2. Refer to book to revise the disease condition, its causes, pathophysiology, common manifestations, and management. Apply this knowledge in clinical practice.
3. Conduct physical assessment thoroughly following the correct steps and landmarks. Connect the findings to the patient's current condition and management.

4. Prepare the medications and understand their mechanism of action, indications and considerations in the care of the patient. Pay attention to their common side effects and implications.
5. Communicates effectively and compassionately with the patients and health care providers.

Agreement

The above-mentioned improvement plan was discussed between the clinical faculty and the student. This document represents a contract for learning improvement, and it is expected that Hiba shows commitment and progress to achieve course outcomes.

Instructor Name and Signature: _____Silva Dakessian Sailian _____

Exhibit III.15. Sample Weekly Anecdotes

Nursing 304 Weekly Anecdote

Student Name ----	**Date**	**Area:** *Postpartum Unit 7N*	
Criteria	**Faculty Preceptor Comments**	**Met/Not Met**	**Plan of Action**
Prioritization of Nursing Diagnoses (assessment, planning, implementation, evaluation)	• The student was prepared for the clinical day. • However presented shallow medication preparation. • Was able to assess patient comprehensively nevertheless was not systematic enough. • Was able to set diagnosis and rationales but still facing challenges in prioritizing diagnosis. • Was able to provide holistic care for patients with good follow up.	*Partially met*	• Needs to prepare medications in a more comprehensive and meticulous way • Enhance diagnosis prioritization by analyzing well scientific rationales and consequences • Be more systematic in assessing the patient and presenting the cases.
Performance of nursing care clinical procedures/skills	• The student was able to perform nursing interventions based on AUBMC policies and procedures • The student had good dexterity while performing nursing interventions • Demonstrated safe performance in calculating dosages and providing medications	*Met*	
Transfer of Knowledge into Practice; Critical Thinking Abilities	• Has good basic knowledge and doing efforts to improve it further • Still needs support and cues in order to be able to relate theory to practice	***Not met***	• Needs to read more and solve clinical case scenarios to further enhance her critical thinking skills.

	and in explaining diagnosis and relating them together based on scientific rationales		
Communication Skills with faculty, clients and health care team	• Has good approach with patients • Good communication skills with patients and colleagues • Was able to provide a comprehensive and systematic teaching session on the unit	*Met*	
Professionalism ▪ *Punctuality* ▪ *Dress Code* ▪ *Abide by program policies and standards*	• The student is professional • Serious • Motivated and has good initiative in providing patient care on the unit.	*Met*

American University of Beirut School of Nursing
NURS 400- Nursing Care of the Critically Ill Adult
Documentation of At-Risk Clinical Performance

Name	----	Course	N400 Critical Care
Class	BSNIV	Date	November 2021

You have been evaluated as *At Risk* in your clinical performance due to:

- weak preparation and missing logical links that jeopardize safety in clinical practice
- lack of in-depth analysis of patient condition and inability to link assessment findings, disease processes, and pathophysiology
- clinical hesitancy and total dependance on clinical faculty
- lack of the ability to integrate knowledge of pathophysiology, pharmacology, nursing theory and research

Specific Areas for improvement

The following outlines the outcomes that **must be met** for successful completion of the clinical course. The student will commit to **ensuring**:

1. In-depth and systematic case preparation and analysis of patient history of present illness and course of hospitalization
2. Integration of pathophysiology, pharmacology, nursing theory and research
3. More comprehensive case presentation with focus on important information and patient management with links to evidence-based practice
4. A stronger sense of initiative and self-direction
5. Better communication and skills

This *At-Risk* plan is to be in effect throughout the *Fall 2002* semester.

WHERE IS YOUR OUTLINE?

Introduction

Cardiovascular Diseases: Cardiovascular disease is a leading cause of morbidity and mortality and is a major concern for the health care system worldwide (Zeidan, Farah, Chahine, Asmar, Hosseini, Salameh, & Pathak, 2016). According to Zeidan et al, ischemic heart disease related deaths in the Middle East is expected to increase at a higher rate as compared to other regions worldwide (Zeidan et al, 2016). In the Middle East and North Africa (MENA) region, ischemic heart disease and hypertension were responsible for over 155,000 deaths in 2001 and is the number one cause of hospital admissions (Deek, Newton, Inglis, Kabbani, Noureddine, Macdonald, & Davidson, 2015). In Lebanon, mortality rates due to CVD account for 45% within non-communicable diseases (Deek et al., 2015). Looking at this globally increasing health need problem, the link between CVD and mental health issues needs to be assessed and managed accordingly.

Mental Health Disorders: Mental health disorders account for 21% of the Global Burden of Diseases, making them the leading cause of disability globally (Vos et al., 2015). A meta-analysis and review of literature between 1980 and 2013 found that the lifetime prevalence of a mental disorder was 29.2%, with 17.6 % of respondents identified as meeting criteria for a mental disorder during the 12 months preceding the assessment (Steel et al., 2014). Furthermore, mood and anxiety disorders are the two most prevalent mental disorders, where depression was found to be the second leading cause of disability globally (Vos et al., 2015). It is further estimated that by 2030, depression will be the number one leading cause of disability worldwide (Mensah & Collins, 2015). Also, the global prevalence of anxiety disorders was found to be 7.3% in a recent meta-regression analysis that covered 44 countries (Baxter, Scott, Vos, &

Whiteford, 2013). These findings reflect that mental health disorders are a common burden worldwide. Additionally, mental-health disorders account for 14.3% of global mortality, and this is not limited to suicide (Walker, McGee & Druss, 2015). The pooled relative risk of mortality attributed by mental disorders was found to be 2.22 for death from all causes (Walker, McGee & Druss, 2015).

The comorbidity of mental health disorders in cardiac patients was found to be very high in several studies. Specifically, depression and anxiety are the two most prevalent mental health disorders in cardiac patients (Allabadi et al., 2019; Konstam, Moser, & De Jong, 2005; Kovacs et al., 2009; Thombs et al., 2006; & Wong, 2017). However, mental health concerns are often overlooked by cardiologists, where the focus is more on medication compliance and healthy habits (diet and exercise). This is despite that cardiac patients who suffer from mental health disorders are shown to have worse outcomes (Mensah & Collins, 2015). Research on the mental health of Lebanese cardiac patients is lacking. However, mental health research on the general population have shown high levels of depression ((Farhood & Dimassi, 2012; Farhood, Dimassi, & Lehtinen, 2006). Therefore, assessing for and managing mental health disorders, especially depression and anxiety, is of paramount importance for this Lebanese cardiac population. The Healthy Minds & Hearts Program will fulfill the needed service of assessing and educating cardiac patients presenting to AUBMC out-patient clinics on mental health issues, referring high risk patients through the cardiologist for psychiatry consultation, or through social worker for outside psychology consultation, if deemed necessary during Psychiatric and Mental Health Advanced Practice Nurse's (PMH APN's) assessment, and eligible patients participating in the supportive CBT therapy program would exhibit n improved mental health status.

Very long introduction

Description of Target Population:

Cardiovascular diseases have various effects on cardiac patients' lives worldwide. These effects stem beyond the need for polypharmacy and diet regulation and extend to mental health and quality of life. Upon investigating the experiences of cardiac patients that joined a cardiac rehabilitation program in a recent qualitative study, the main themes that arose were "trying to stay alive" and "begin again" (Jokar, Yousefi, Yousefy, & Sadeghi, 2017). The subthemes that emerged were related to setting their goals, forming news values and beliefs, and 'keeping hope alive' (Jokar, Yousefi, Yousefy, & Sadeghi, 2017). These findings show that cardiac patients suffer from both, symptoms of their heart disease and the effect of these symptoms on their mental health, goals and hope, and life. In Lebanon, Ischemic Heart Disease account for number one cause of both mortality and premature death (WHO, 2011a), where it is estimated that 45% of non-communicable disease mortality and 63% of all deaths are due to cardiovascular diseases (WHO, 2011b). The cardiac population in Lebanon are shown to tend to be smokers, have a sedentary lifestyle, and unhealthy diet habits (Nasreddine at al., 2010). The mental health of this Lebanese cardiac population is understudied. However, research have shown the need for mental health interventions in adults in the general population due to the high rates of mental disorders Farhood & Dimassi, 2012; Farhood, Dimassi, & Lehtinen, 2006). Also, numerous research studies abroad have shown that adult cardiac patients are at a higher risk for mental health difficulties especially depression and anxiety (Allabadi et al., 2019; Konstam, Moser, & De Jong, 2005; Kovacs et al., 2009; Thombs et al., 2006; & Wong, 2017). This is in addition to the presence of a relationship between depressive symptoms and CVD where patients with baseline depressive symptoms have a strong predictive future of CVD onset after 18 years. (Xiang & An, 2015). Therefore, our target population for the Healthy Heart and Minds Program is adult

Commented [NY1]: Out of context

Lebanese patients (age ≥ 18 years old) presenting to tertiary healthcare facility (AUBMC) outpatient clinics who are diagnosed of a cardiovascular disease.

Commented [NY2]: This is the required

Overview of Population Health Needs:

Various factors contribute to the risk of depression and anxiety in CVD patients, including decreased functional abilities, multiple comorbidities, impaired immune system, and decreased social interactions (Xiang & An, 2015). Mental health factors have a higher accountability for the risk of MI (39%), as compared to smoking (29%), and hypertension (21%) (Berg et al., 2017). Furthermore, patients with mental health issues following an acute cardiovascular event are less likely to comply with lifestyle modification and self-care in order to reduce the risk of later acute events (Berg et al., 2017). A study in the United States assessed for the prevalence of depression in patients post Myocardial Infarction found that 19.8% of those patients suffered from major depression (Thombs et al., 2006). Furthermore, the prevalence of significant depressive symptoms, which was based on a score ≥ 10 on Beck's Depression Inventory (BDI-II), was found to be 31.1% (Thombs et al., 2006). In another study that assessed for anxiety in patients with Coronary Heart Disease also in the US, 36% of the patients met the criteria for at least one current anxiety disorder, and 45.3% suffered from a mental disorder at one point in their lives (Todaro et al., 2007). These studies reflect the high comorbidity of mental illnesses in cardiac patients in the west.

The relationship between CVDs and mental disorders is bi-directional where people with mental disorders are considered at a higher risk for CVDs, and people with CVDs are at a higher risk to develop mental disorders (Mensah & Collins, 2015). Therefore, mental health plays a significant role in the course of cardiac diseases. Several studies have investigated the prevalence of depression and anxiety in cardiac patients (Heart failure, post myocardial infarction, post ICD

insertion, and adult congenital heart disease), and found the comorbidity of these disorders to be very high (Allabadi et al., 2019; Konstam, Moser, & De Jong, 2005; Kovacs et al., 2009; Thombs et al., 2006; & Wong, 2017). Another study by Berg et al., showed that heart failure patients had the worst overall patient reported outcomes, with depression and anxiety rates of up to 40%. The presence of mental health issues in HF patients can possibly stem from psychological aspects or from worsening heart failure which leads to pathophysiological cognitive changes (Berg et al., 2017).

On the other hand, Allabadi et al. investigated the proportion of cardiac patients suffering from depression and anxiety in a cross-sectional study in Palestine (2019). The proportion of patients with depression was found to be an alarming 78.7%, with 53.5% of the sample suffering from severe to very severe depression (Allabadi et al., 2019). Also, 33.9% of the sample reported mild to moderate anxiety and 19.2% reported severe to very severe anxiety (Allabadi et al., 2019). The proportion of anxiety in this study is similar to the ones observed in Iran (28.5%), Pakistan (18%), and US (37%) (Allabadi et al., 2019). Nevertheless, Allabadi et al explained that the rates of depression found in this study were higher than those found in US (15%), Brazil (26.4%), Norway (14%), and Pakistan (14%) which also utilized similar common depression scales not specific for the cardiac population (2019). Research on the comorbidity of mental disorders in Lebanese cardiac patients is lacking and can often be overlooked by clinicians assessing this vulnerable population. However, results found in neighboring Palestine in comparison reflect pressing need for mental health screening and interventions tailored to cardiac patients in Lebanon and the region.

Needs Assessment:

Normative need: The World Health Organization (WHO) defines the state of being mentally healthy as "a state of well-being in which the individual realizes his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community" (WHO, 2004). Adding on, the DSM-5 is the global reference of mental health practitioners that guides their diagnosis of mental health disorders in individuals. It defines mental disorders as a syndrome that is characterized by disturbances in emotion regulation, behavior, and/or cognition that is both clinically significant and reflecting an underlying dysfunction in mental functioning (American Psychiatric Association, 2013). The DSM-5 further provides a diagnostic-criteria for every mental disorder including depressive and anxiety disorders which are highly prevalent among cardiac patients (Allabadi et al., 2019; Konstam, Moser, & De Jong, 2005; Kovacs et al., 2009; Thombs et al., 2006; & Wong, 2017). The diagnostic-criteria of a major depressive disorder includes a depressed mood or loss of interest in activities in addition to four or more of the following symptoms: involuntary weight changes, sleep disturbances, psychomotor agitation or retardation, fatigue, feelings of guilt or worthlessness, decreased concentration ability, and recurrent thoughts of death (American Psychiatric Association, 2013). Similarly, the diagnostic criteria for generalized anxiety disorder is specified in DSM-5 and includes excessive anxiety or worry about different topics that is present more days than absent, and is associated with at least three out of the following six symptoms: restlessness, fatigue, difficulty concentrating, irritability, muscle tension and sleep disturbance (American Psychiatric Association, 2013).

Expressed need: research on the needs of the cardiac population in Lebanon is lacking. A local study in London that aimed to investigate patients' perceptions on their educational needs through asking patients to keep a diary and semi-structured interviews have found that the need

Commented [NY3]: Local is Lebanon

for psychological support was one of the main themes that emerged after analyzing respondent's comments (Goodman, 1997). We would want to investigate the needs of AUBMC's cardiac patients through also asking the patients that present to the outpatient cardiac clinics to keep a diary for two weeks and conducting semi-structured interviews to assess for their needs generally. We would then analyze the answers that we would obtain in order to reflect whether the patients would be interested in our project that is tailored to assess, educate and refer cardiac patients for mental health difficulties.

Relative need: The American University of Beirut Medical Center AUBMC is the biggest medical center in Lebanon with a capacity of over 350 beds, 344 physicians and over 1200 nurses (AUBMC). Furthermore, there were over 360,000 patient visits to the medical center in one year alone (AUBMC). For its 2020 vision, AUBMC has expanded its outpatient services by opening the Halim and Aida Daniel Academic and Clinical Center ACC with an aim to provide a holistic approach to healing (ACC AUB). Therefore, AUBMC recognizes the importance of holistic care in its approach to health, which is the essence of our project that focuses on the mental health of cardiac patients in an aim to improve both patient's cardiac and mental health outcomes. Therefore, given the emphasis this medical center has on holistic care and quality of care, it is suitable to apply this project in their cardiac outpatient clinic.

Perceived need: A study conducted by the World Health Organization WHO assessed for the association between heart disease and emotional disorders using comprehensive structured interviews in 18 countries in the west (Ormel et al., 2007). Mood and anxiety disorders were found to be higher in persons with heart disease in comparison to persons without it, with an odds ratio (95% confidence interval) of 2.1 for mood disorders and 2.2 for anxiety disorders adjusting for sex and age (Ormel et al., 2007). Similar results were found in two community-based studies that

Commented [NY4]: Literature, not in place

Commented [NY5]: Wrong perception of expressed need. Expressed need is assessed by asking healthcare providers if any and how many cardiac patients per day/week/month seek mental health services or care. It could be though a short survey or interview.

Commented [NY6]: This is perceived needs

Commented [NY7]: What are you comparing? Center to center then what is the other center? Community to community? Age group to age group?

assessed for the presence of psychological difficulties in cardiac patients where high levels of emotional difficulties was found to be evident in the immediate and long-term outcomes of cardiac patients (Dixon et al., 2000 & Robertson, Javed, Samani, & Khunti, 2007). These results are indicative of the high comorbidity of mental health disorders in patients suffering from heart diseases across different countries and cultures, which reflects the pressing need to address mental health concerns in cardiac patients. Furthermore, upon assessing for the perceived needs of 260 cardiac patients using supportive care needs survey, almost 23% (every fourth patient) reported a below-average mental health quality and unmet psychological needs (Kohlmann, Kilbert, Ziegler & Schulz, 2013). Another study that also assessed for the need of psychosomatic care using assessment of the demand for additional psychological treatment (ADAPT) questionnaire in patients presenting for cardiac stress test found that 33.9% of the patients demanded psychological counseling (Kunschitz et al., 2017). Research in Lebanon on the perceived needs of mental health in cardiac patients is lacking, however the compelling evidence in the west, including research on patients' perceived needs, reflects the high need for mental health interventions in the cardiac population.

Commented [NY8]: Out of context.
Here you need to specify how are going to assess for perceived needs. Is it survey? Interview with open-ended questions?

3/10

Problem Analysis

Although the commonly understood risk factors for CVD such as smoking, sedentary lifestyle, hypertension, diabetes and dyslipidemia are widely known, psychosocial factors are also noteworthy. Mental health illness in CVD is common and deadly but is often underrecognized. However, more research has emerged lately regarding this issue and has found that not only is depression common in CVD, but it is even more common than the general population (Huffman, Celano, Beach, Motiwala & Januzzi, 2013). 15-20% of CVD patients meet

the criteria for a diagnosis of Major Depressive Disorder (MDD), which is three times higher than the general population (Huffman et al., 2013). Additionally, depression is not momentary but often persists for a long time, often for years after a cardiac event. Systematic quantitative studies have found depression to be a significant and independent risk factor for CVD with a relative risk of 1.6 in depressed individuals as compared to individuals who were never depressed (Myers, Gerber, Benyamini, Goldbourt & Drory 2012). A meta-analysis identified that depressed post-MI patients have a 2.4-fold increased risk of mortality and has also been associated with an increased number of hospital readmissions, reduced self-care methods that includes smoking cessation, physical activity and cardiac rehabilitation (Myers et al., 2013). Depression is a risk factor for cardiac morbidity and mortality which involves both physiological and behavioral factors.

Several risk factors exist that lead to mental health illnesses in cardiac patients. Several studies have found that younger patients especially women, social isolation, comorbidities, and patients with a history of depression are more likely to develop depression due to CVD (Huffman et al., 2013). Also, studies have reported significantly higher mortality rates among younger women with acute MI as compared to men. In a study done by Mallik et al., rates of depression in women that are hospitalized for an MI are 2 times greater than in men which can contribute to the higher mortality rates in this vulnerable group (Mallik et al., 2006). Additionally, women have higher rates of adverse events after an MI as compared with men, including higher rates of being smokers and dyslipidemia. Additionally, a study done by Todaro et al., to assess depressive disorders in patients enrolled in a cardiac rehab center found that women significantly met diagnostic criteria for depressive disorders (42.9%) more than men (18.7%).

Another significant risk factor is social isolation that leads to increased rates of mental health illnesses in CVD patients. In a study of 7000 adults, the lack of community and social support lead to a 2.3 increase in mortality in men and 2.8 increase in women 9 years after an acute cardiac event (McCauley, 1995). According to Arthur, greater levels of loneliness are associated with an increased chance of developing a cardiac issue. Furthermore, for every unit increase in loneliness, there is a 3-fold increase in the odds of developing a cardiac condition (Arthur, 2006). Moreover, social and community support is associated with lower blood pressure, lower heart rate and better cardiovascular outcomes (Williamson, Thomas, Eisenberger & Stanton, 2018). In a study done by Williamson et al., participants were assigned to either a social exclusion or inclusion group, in which they would undergo a social evaluative stressor. The results showed a significant increase in cardiovascular stress, through blood pressure and heart rate readings, in the socially excluded group as compared to the inclusion group (Williamson et al., 2018). Additionally, social isolation was found to be associated with increased risky behaviors such as sedentary lifestyle, reduced sleep quality, unhealthy diets, and smoking which in turn increases cardiovascular risks (Xia & Li, 2017). Furthermore, according to Xia & Li, CVD patients who were not married had a higher 5-year mortality occurrence (50%), as compared with married CVD patients (18%) (Xia & Li, 2017).

Mental health illnesses can have different effects on different cardiovascular diagnoses. Patients with heart failure with a worse New York Heart Association (NYHA) classing have been linked to increased rates of mental health illnesses. In a study done by Volz et al., about predictors of hospital readmissions of heart failure patients, it was found that patients with severe anxiety had a 3-fold risk of readmissions as compared to patients with mild to no anxiety (Volz, Schmid, Zwahlen, Kohls, Saner & Barth, 2011). However, this may be due to the possibility that

highly anxious heart failure patients are more likely to report more symptoms (therefore, going to the emergency department) than less anxious patients. Nonetheless, anxiety and depression remain strong predictors of mortality and morbidity in heart failure patients, independent of the disease severity itself (Volz et al., 2011).

We need to consider other countries' findings since Lebanon does not have any ~~evidence-based~~ research on this particular subject. In general, research on mental health issues in Middle Eastern CVD patients is limited. Similarities in risk factors do exist between Western and Middle Eastern countries. According to Donnelly et al., Turkish patients with CVD were assessed for depression and it was found that 93% of women suffer from mild to moderate depression as compared to 41% in men (Donnelly et al., 2015). Additionally, in Iran, women undergoing CABG scored higher in depression scales as compared to men before and after the surgery and symptoms persisted longer in female patient (Donnelly et al., 2015). However, the prevalence of depression and anxiety in CVD Middle Eastern patients is often affected by different ethnic, cultural and racial features as compared to Western counties which might lead to treatments and interventions that are successful outside to not be effective in the Middle East. Therefore, culturally and racially appropriate interventions and services need to be created that cater to the Middle Eastern population. The American Heart Association (AHA)~~,~~ has recommended the use of depression screening tools for all cardiac patients. However, they are still rarely used by heath care professionals and therefore, mental health illness can go unidentified (Huffman et al., 2013).

Commented [NY9]: Meaning what?

8/10

Hypothesis:

After assessing the normative, relative, expressive and perceived needs, our Healthy Minds and Hearts program will be aimed at AUBMC outpatient cardiac patients who are at risk

for decreased mental health status. The program will provide services that focus on counselling, comprehensive mental-health assessment, and education about mental health in cardiac patients. Also, if the patient is found to be suffering from mental health difficulties as per the Psychiatric and Mental Health Advanced Practice Nurse's (PMH APN's) Assessment and the Arabic BDI-II (Appendix A) and Arabic GAD-7 (Appendix B) questionnaires, they will be referred through the cardiologist to a psychiatrist for further pharmacotherapy treatment, with subsequent follow up through the program. It is expected that by the completion of the program for each batch of participants, cardiac patients presenting for follow-up cardiology appointments would be assessed and educated on depression, anxiety and mental-health disorders, referred through the cardiologist for psychiatry consultation or through social worker for outside psychology follow-up if deemed necessary by the PMH APN's assessment, and the eligible cardiac patients who participate in the supportive CBT therapy will demonstrate improved mental health status after completion of the 12 sessions as per the PMH APN's re-assessment and enhanced results of the Arabic BDI-II and GAD-7.

Where is your hypothesis of etiology? Because of sedentary life, unhealthy life style such as eating unhealthy meals, smoking, and … people will develop HTN, hyperglycemia, hyperlipidemia leading to CAD and associated depression. If the persons with CAD and associated depression complete a program of … then their knowledge, behaviors and self-care management will … leading to outcomes…

2/3

Goal and Objectives

The goal of the Healthy Minds and Hearts program is to improve mental health status of adult cardiac patients as shown by the re-assessment of these patients' mental health by the

Psychiatric and Mental Health Advanced Practice Nurse (PMH APN), and as reflected by improvement in the scores of the validated depression and anxiety scales, Arabic BDI-II and Arabic GAD-7. In order to achieve this goal, specific objectives must be set in place. Our long-term objective will entail that 90% of the cardiac patients that ~~present~~ follow up with their cardiologist in the outpatient clinic will agree to participate and complete the first three activities of the program: counseling, assessment for mental health problems, with a focus on anxiety and depression, and education on mental health by the PMH APN. Our intermediate objectives include 80% of cardiac patients with high scores on the BDI-II and the GAD-7, reflecting clinically significant severity of anxiety and depression symptomatology will be followed up on a weekly basis by the PMH APN for 3 months. Additionally, patients who follow up with the PMH APN for 3 months will show improvement in their Arabic BDI-II and GAD-7 scores, reflecting improvement in their overall mental health status. The average of number of sessions attended by the 60 patients eligible and consenting for the supportive CBT therapy program shall be at least 9 out of 12 sessions. Furthermore, all patients who show to be high risk as per the questionnaire's scores coupled with the PMH APN's judgement before, during and after the therapy program will be referred to a psychiatrist through the cardiologist for possible pharmacological treatment alongside attending the supportive CBT therapy program lead by PMH APN.

Commented [NY10]: This is not long term

Commented [NY11]: How many sessions would you expect them to attend so the intervention is considered effective?

Commented [NY12]: Very long sentence

4/5

Interventions:

Specific interventions will be implemented in the program to achieve the aforementioned objectives and goal~~,~~ that is to improve the mental health status of the high-risk population of cardiac patients at AUBMC cardiac outpatient clinics. The program includes five activities

governed by a multidisciplinary team and lead by a Psychiatric and Mental Health Advanced Practice Nurse (PMH APN). The interventions of the program are as follows: counseling for mental health awareness, assessment of mental health status with focus on depression and anxiety using the Arabic BDI-II and GAD-7 questionnaires, education on mental health, supportive CBT therapy and referral to a psychiatrist or psychologist when necessary.

CBT The essence of this program is to achieve holistic care for the cardiac patients, whereby these patients as previously discussed, are at a high risk for suffering from mental health difficulties, which in turn affects different life aspects including their self-care, cardiac outcomes, and quality of life. In psychiatry, the cognitive-behavioral therapy (CBT) model has proven efficacy in improving the mental-health status of individuals suffering from difficulties with regards to their psychological well-being, especially since the 'cognitive revolution' in 1970s where it has been the dominant therapy model since over 25 years in the US and UK (Westbrook & Kennerley, 2011). This model is based on two components, the behavioral component, which is founded on the Learning theory, and the cognitive component introduced by Beck, which then formed the cognitive behavioral therapy model (Westbrook & Kennerley, 2011). Below is a depiction of the CBT model:

CBT conceptualizes that situations that occur in one's environment elicit emotions and physiologic symptoms through thoughts that are triggered by these situations, and this affects one's behaviors. This model further hypothesizes that dysfunctional thoughts are at the core of mental health difficulties, where these thoughts would lead to negative emotions, physiologic symptoms and inappropriate behaviors. Also, all of these components interplay within each other. This CBT model will be used in our program, as it serves improving mental health in cardiac patients greatly. It provides an organized approach for the program as whole, where it

Commented [NY13]: You don't start sentence with abbreviation

encourages the use of evidence-based assessment scales, psychoeducation, structured therapy sessions, and evaluation. Furthermore, the CBT model is evidence-based to elicit the necessary emotional and behavioral changes which are the goal of therapy.

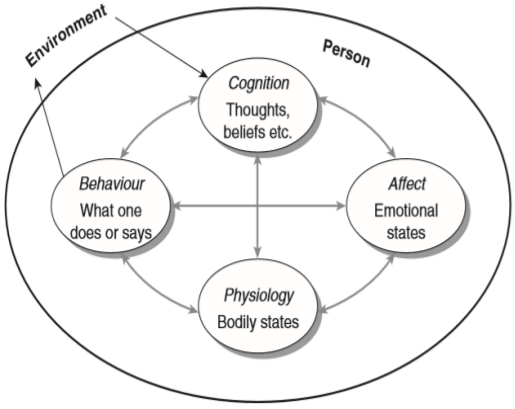

Figure 1. Interacting Systems (Westbrook & Kennerley, 2011).

Healthy Minds & Hearts (HMH) is an APN-lead mental health program to be implemented at outpatient cardiac clinics that aims to target all cardiac patients presenting to these clinics. The multidisciplinary team responsible for successfully implementing the program will consist of cardiologists, part-time psychiatrist, part-time social worker, clerk, registered nurse and two Psychiatric and Mental Health Advanced Practice Nurses (PMH APNs). The PMH APNs are the most suitable healthcare professionals to lead this program given the complex interplay between the physiological and psychiatric-mental-health aspect of cardiac diseases. Furthermore, the leadership and collaboration skills exhibited by APNs are of a necessity in this program to coordinate care between the registered nurse, cardiologists, psychiatrist and social worker.

This program aims to be established at the outpatient cardiac clinics at AUBMC. The process starts with the clerk responsible for greeting the patients presenting to the cardiac clinics with a lovely smile and marking their arrival on the EPIC system. The patient would then be asked to kindly wait on the couches.

The registered nurse that performs the pre-visit assessment will then thoroughly introduce the HMH program for eligible patients and obtain consent and contact information from patients who agree to participate. The exclusion criteria includes patients below 18 years of age, patients coming for first time assessment of cardiac health status, and patients who are already receiving psychotherapy. Patients who are already receiving psychotherapy are not deemed eligible for the program to give a chance to those who are not receiving mental health services, and to be able to accurately evaluate the program's effectiveness.

Given the cultural stigma associated with mental health in Lebanon (Doumit, Farhoud, & Hamady, 2018), the first step of the process is to provide counseling for consenting cardiac patients by the Psychiatric Mental-Health Advanced Practice Nurse (PMH APN). Counseling is defined as the usage of a helping interactive process where the focus is on the problems, feelings and needs of the patient with an aim to encourage coping and problem solving (Medical Dictionary, 2012). Therefore, the PMH APN would counsel the consenting cardiac patients prior to mental health assessment in order to help manage their stress, decrease their ambivalence, and improve their ability to receive and understand information for later education activity.

The BDI–II is a 21-item inventory that assesses the severity of depressive symptomatology. Each item is rated on a 0–3 scale with summary scores ranging between 0 and 63. The BDI–II has been found to demonstrate high internal consistency (α = .93 among college students, α = .92 among outpatients; Beck et al., 1996). Adequate validity (e.g., content, factorial) has been demonstrated, and diagnostic discrimination has been established.

Commented [NY14]: Why different font?
This needs to be paraphrased; it is plagiarized

Assessment of those patients by the PMH APN will then follow. The PMH-APN will perform a comprehensive mental-health assessment and utilize the DSM-5 criteria to formulate a diagnosis. The DSM-5 is the global reference for practitioners to establish a psychiatric diagnosis. The PMH APN will also utilize two scales: The Arabic version of Beck's Depression Inventory-II (Arabic BDI-II) and the Arabic version of Generalized Anxiety Disorder 7 Item Scale (Arabic GAD-7). The BDI-II is a 21-item scale which evaluates depressive symptomatology severity, where each item is rated on 4-point scale (0-3), with total score range between 0 and 63 (Dozois, Dobson, & Ahnberg, 1998). Also, BDI-II demonstrates a high internal consistency among outpatients ($\alpha = .92$), and adequate content and factorial validity and diagnostic discrimination (Dozois, Dobson, & Ahnberg, 1998). The GAD-7 is a 7-item scale which assesses for severity of anxiety symptoms in primary care settings (Beard& Björgvinsson, 2014). GAD-7 has demonstrated good sensitivity and specificity using a cut-point of ≥10 and has been found to be reliable and valid in both psychiatric and general population (Beard& Björgvinsson, 2014). Each item is rated on a 4 point scale (0-3), with total score range between 0 and 21. Both of these scales are validated for the assessment of depression and anxiety respectively in an arabic (Naja, Al-Kubaisi, Chehab, Al-Dahshan, Abuhashem, & Bougmiza, 2019 & Sawaya, Atoui, Hamadeh, Zeinoun, & Nahas, 2016) and have been used in research on depression and anxiety in cardiac patients (Ormel et al., 2007 & Reickman et al., 2016). The choice of these two scales in specific is given that anxiety and depression are the two most comorbid mental illnesses in chronic diseases in general, and in cardiac diseases in specific (Allabadi et al., 2019; Konstam, Moser, & De Jong, 2005; Kovacs et al., 2009; Thombs et al., 2006; & Wong, 2017). Furthermore, the CBT model encourages the use of scales in order to

obtain a baseline level of symptom severity and monitor improvement after interventions (Westbrook & Kennerley, 2011).

Three possible findings would be yielded out of the assessment: 1- patient who is mentally healthy and does not necessitate a mental health intervention. 2- patient who is mildly to moderately depressed (BDI-II score:14- 18) and/or mildly to moderately anxious (GAD-7 score: 5- 14). 3- patient who is severely depressed (BDI-II score ≥ 19), severely anxious (GAD-7 score ≥ 15), and/or patients who have other mental illnesses as diagnosed by the PMH-APN clinical assessment.

The next activity in the program is education. All patients will be educated by the APN about mental health following the assessment. The components of education are based on a nursing study where educative interventions were assessed and deemed effective (Scott, Setter-Kline & Britton, 2004). These components include: "activity and dietary recommendations, medications, and importance of adherence to the treatment/care plan" (Scott, Setter-Kline & Britton, 2004, p. 250). Additional components that would be integrated into the education activity include the signs and symptoms of depression and anxiety, and the importance of being aware of one's emotions and mental well-being. The signs and symptoms of depression and anxiety that the patients will be educated on will be based on the DSM-5, which provides a thorough explanation of depression and anxiety. Thus, the APN is the perfect candidate to deliver this education activity given that it would include components related to heart disease (activity and diet, medications and compliance) and related to mental health (depression and anxiety), and the APN has the medical and mental health background for both.

The PMH APN will then report to the patient's cardiologist the findings of the mental-health assessment, including results of the scales, initial diagnosis, and recommendations of the

APN. In the case of the first possible finding: patients who are mentally healthy, as per the assessment and clinical judgment of the APN, will be re-assessed by the APN during their next visit to the cardiologist if it has been more than 3 months since their last appointment. In case of the second possible finding: patients will be referred to join the 12-weeks program lead by the APN. Following the 12-weeks program, these patients will be re-assessed. If the mental health status of these patients is deemed by the APN below optimal, the APN will report these results to the cardiologists to make referral for a psychiatrist. In case of the third possible findings: the APN will recommend to the cardiologist to refer these patients to a psychiatrist for further follow-up and pharmacotherapy treatment. The psychiatrist will then decide if psychotherapy is necessary in conjunction with pharmacotherapy.

Another informed-consent form would be obtained by the APN from the patients who are found to be eligible for the 12-week supportive therapy program who agree to participate and commit. Individual sessions will be scheduled on a weekly basis between the second PMH-APN recruited in the program and the eligible participants. A total of 30 patients can be seen every three months, given that the second APN would be able to see 6 patients per day, 5 days a week. If more patients were found to be eligible upon the assessment and diagnosis of the first APN, they would be put on a waiting list and be informed about this waiting list, or referred to outside resources by the social worker. The clerk will be responsible for scheduling the weekly sessions of the patients and following up on confirming their attendance. The 12-week supportive therapy program would be based on CBT manuals for depression and anxiety (Munoz & Miranda, 2000 & Lenz, 2018), as follows:

What is the below table? It should have a title with a number and referred to in the text

Weeks 1-4	How Thoughts Affect Feelings and physical symptoms	**Session 1:** Introduction about the patient- What is depression and anxiety- What is depression and anxiety like for the patient- THOUGHTS affect mood and symptoms. **Session 2:** What are thoughts?- What is depressed and non-depressed thinking like- Mistakes in thinking- Introduction to the FEAR model- Learning to spot kinds of thinking? **Session 3:** Ways to increase healthy thinking- Decreasing thoughts that make us feel bad- Talking Back to Your Thoughts: The ABCD Method. **Session 4:** educate and model strategies for challenging negative thoughts
Weeks 5-8	Working with Daily Activities- Continue practicing challenging negative thoughts	**Session 5:** Review symptoms of depression and anxiety, have the patient had change in symptoms since they started treatment?- Graph Arabic-BDI and Arabic-GAD scale scores- Increase pleasurable activities- possible obstacles to working with pleasurable activities. **Session 6:** an adequate level of pleasurable activities improves mood- how can patient use thoughts to help plan and enjoy activities- anticipating possible problems and discussing solutions- strategic problem-solving **Session 7:** Creating plan to overcome depression: setting reasonable goals- develop a plan- Time Management- Create an "A" item every week- Make time for pleasurable activities- Do what works for each patient **Session 8:** Depression and the healthy management of reality: the objective and subjective world. No one controls either of these two worlds completely- ways to feel more control- pleasant activities to make more parts of one's time more satisfying.
Weeks 9- 12	How Contacts with People Affects Mood	**Session 9:** review change in depression and anxiety symptoms since beginning of treatment. How depression affects our relationships- importance of social support- meeting people and improving negative relationships- keeping support system healthy **Session 10:** thoughts, expectations, behaviors and feelings when alone, with others, and about what one is doing with their life- Learning to be assertive- Practice in therapy **Session 11:** continue previous session- building trusting relationships- feelings about ending treatment **Session 12:** relationships mold one's life- practicing assertiveness- how to recognize if one is depressed again- ending treatment. Reassess for anxiety and depression symptoms, & refill Arabic BDI-II & Arabic GAD-7

As previously mentioned, the clerk will be responsible to schedule and remind the patients of the appointment schedule through phone calls the previous day, and SMS on same

day. Upon fulfillment of this program, the 60 participants will be re-assessed by the second APN during the 12th session for anxiety and depression with re-filling the Arabic BDI-II and Arabic GAD-7 scales.

This section lacks logic sequencing of the paragraphs; you jump from one idea to the other then move to the former.

8/10

Evaluation:

Proper evaluation of this program is of paramount importance especially that it is the first mental -health program tailored to cardiac patients in Lebanon. This is also very important given that a previous study that examined the effect of a mental health intervention in Lebanon, psychosocial support program at school, found no effect and even some deleterious treatment effects (Karam et al., 2008). Therefore, it is of high importance to monitor the change in the mental health status of the participants before, during, and after the completion of the program.

The evaluation of the program will be divided into two parts: first, is the evaluation of the counseling, assessment and education activities, and second is the evaluation of the supportive CBT therapy component.

Output evaluation of the counseling, screening and education activities of the program would be reflected by the percentage of the cardiac patients who consent and complete these activities. It is expected that around 90% of cardiac patients presenting for follow-up with their cardiologists would consent and complete counseling, assessment and education. Furthermore, for output evaluation of the supportive CBT therapy, the percentage of eligible cardiac patients (as per eligibility criteria previously specified in interventions section) who agree to take part in therapy will be calculated. Another factor that will be used is the average number of sessions

attended by these patients out of the 12 sessions. It is expected that 80% of the eligible cardiac patients will agree to participate in the supportive CBT therapy on a weekly basis with the PMH-CNS. Also, an average of at least 9 sessions/12 sessions will be attended by the 60 participants.

After the fulfillment of each of the first three activities in the program, counseling, assessment, and education, the participants will be asked to fill a general evaluation form (Appendix C) for their feedback about each of the sessions. Furthermore, three focus groups will be conducted with participants who completed these first three activities (counseling, assessment, and education) only of the program, in order to assess their opinion on the importance of screening and educative mental health sessions and their feedback on the provided sessions. The number of the focus groups is based on a recent study that found that 80% of themes would be elicited within two to three focus groups (Guest, Namey, & McKenna, 2017). Random selection of cardiac patients will be done three months into the program, followed by obtaining informed consent forms from them to participate in the focus groups. These focus groups would be facilitated by the part-time social worker and recorded following the participants agreement. Transcription and analysis would follow. Each focus group will take approximately one hour. The clerk would communicate with consenting participants to agree on a date and time adequate for them. The focus groups will be conducted in a private closed room at AUBMC. The focus groups would consist of open-ended questions with adequate probing questions that focus on cardiac patient's view on the importance of mental health and their experiences in the counseling, assessment and education sessions (Appendix E). Data will be kept in the social worker's password-protected laptop which would be kept secured.

Commented [NY15]: This is confusing! Is it evaluation form or focus group?

For the outcome evaluation of the effectiveness of the supportive CBT therapy of the program, a combined, quantitative and qualitative, approach will be used. Initially, all the cardiac

patients participating of HMH program would complete the Arabic BDI-II and the Arabic GAD-7 scales during the assessment. The cardiac patients participating in supportive CBT therapy will be asked to fill these scales again during session #5, session #9, and after the end of the 12th session. If the mental health status of these patients was found to be deteriorating or still highly negatively affecting their functioning, and if deemed necessary by the PMH-APN through the scale scores and continued clinical evaluation of the patients during the sessions, these patients will be referred through the cardiologist to the psychiatrist for conjunct pharmacotherapy treatment. The scale scores that would be obtained during the 5th and 9th session would give insight on the progress of the program, and if any changes are necessary which would be discussed between the multidisciplinary team. The scores of the Arabic BDI-II and Arabic GAD-7 of the 60 cardiac patients completing the supportive CBT therapy will be compared between the assessment session and the 12th session, and data will be analyzed using SPSS for significance. Significant positive changes in the scores of these scales would reflect a positive outcome and an improvement in the mental health status of the cardiac patients, reflecting a fulfillment of this program's goals.

The qualitative approach to elicit patient's feedback on the effectiveness of the supportive CBT therapy encompasses ten to fifteen semi-structured interviews with the participating patients until data saturation is reached. Informed consent will be secured from cardiac patients who attended at least 9 out of the 12 sessions and agree to participate in the interviews. The interviews will be conducted in the week after the12th therapy session by the social worker, at a time and place adequate for consenting patients as organized by the clerk. These interviews will be conducted in Arabic language at a closed private room at AUBMC, and recorded following the patient's approval. The semi-structured interviews will include open-ended questions with

Commented [NY16]: Start new paragraph. You have long paragraphs and sentences

proper probing questions that reflect the patients experiences during the supportive CBT therapy and their feedback on its effectiveness (Appendix F).

So, you are going to do focus groups, individual interviews and quantitative? It is too much. What about process evaluation, performance measurement?

9/10

Organizational Communication:

Communication is needed at every step and at all levels during the Healthy Minds and Hearts Program. It allows every individual in the process to understand their roles and develop efficient workflows which will result in positive organizational outcomes. Organizational communication is divided into 5 different levels; 1. Interpersonal, 2. Group level, 3. Organizational level, 4. Inter-organizational level, and 5. Mass communication (Kettner, Moroney & Martin, 2013). Although interpersonal and group level types of communication are the lowest levels, they are often the major forms used in organizational communication. Within interpersonal and group level communication, there is both vertical and horizontal communication, which will be mostly used within this program. The organizational levels include the Psychiatric and Mental Health Advanced Practice Nurse (PMH APN) at the top level who will oversee the progress of the program and facilitate all activities and communication. The second level of the model will include the different health care professionals who will be working on the program as well, including the Social Worker, Cardiologist, Psychiatrist, and Registered Nurse. The third and final level of the model will include the secretaries and support staff involved in greeting the patients for the appointments and assisting them with their other needs. Vertical communication will include both downward and upward communication which allows for effective communication between the PMH APN and the different disciplines

Commented [NY17]: Not the right reference

Commented [NY18]: Group is not lowest level; it is middle level

involved. Downward vertical communication flows from the coordinator (the PMH APN), to the staff involved, and includes dissemination of new policies or updates, feedback, and announcements. Upwards vertical communication flows from the staff involved to the coordinator, and includes suggestions, questions, data collected, and reports. Downward communication is more commonly used and is most effective when the coordinators communicate directly with the intended staff (Kettner, Moroney & Martin, 2013). Horizontal communication is also an important workflow that should be used within the program as well which allows ~~for~~ communication to flow easily between the second level of the organizational model. This type of communication provides the Social Worker, Cardiologist, Psychiatrist, and Registered Nurse with the ability to discuss, share relevant information and notes in relation to the patients. Vertical and horizontal communication can take on two types, formal and informal communication. Formal communication will include weekly meetings, mail, emails, and conferences. Informal communication will include phone calls, casual discussions including personal messages. Informal communication would provide ongoing, dynamic, and spontaneous information to be communicated. Both types would be needed for information to be presented wholly and communication to be effective among the healthcare professionals. Organizational communication methods are needed in order to enhance the coordination and flow of the Healthy Minds and Hearts Program which will result in a more effective program for the patients.

You did not refer to the below figure which is figure 2 NOT 1.

You missed others media of communication such as face-to-face, electronic, telephone and others.

في هذه الكراسة إحدى و عشرون مجموعة من العبارات , الرجاء أن تقرأ كل مجموعة على حدة , و ستجد أن كل أربع منها تتناول موضوعاً معيناً اختر عبارة واحدة ترى أنها تصف حالتك و مشاعرك خلال هذا الأسبوع , ثم ضع دائرة حول رقم العبارة التي تختارها (0 أو 1 أو 2 أو 3) .

تأكد من قراءة عبارات كل مجموعة قراءة جيدة قبل أن تختار واحدة منها , و تأكد أنك أجبت على كل مجموعة .

الأخصائية النفسية :

.....

أولاً :

0 – لا أشعر بحزن .

1– أشعر بحزن .

2– أشعر بحزن طوال الوقت , و لا أستطيع أن أتخلص منه .

3–إنني حزين بدرجة لا أستطيع تحملها .

ثانياً :

0–لست متشائماً بالنسبة للمستقبل .

1–أشعر بتشاؤم بالنسبة للمستقبل .

2–أشعر بأنه ليس هناك شيء يشدني للمستقبل .

3–أشعر أن المستقبل لا أمل فيه و أن الأمور لن تتحسن .

ثالثاً :

0 – لا أشعر أني فاشل .

1– أشعر أني فشلت أكثر من المعتاد .

2–عندما أنظر إلى ما مضى من سنوات عمري فأنا لا أرى سوى الفشل الذريع .

3–أشعر بأني شخص فاشل تماماً .

رابعاً :

0– أستمتع بدرجة كافية بجوانب الحياة كما اعتدت من قبل .

1- لا أستمتع بجوانب الحياة على النحو الذي تعودت عليه .
2- لم أعد أحصل على استمتاع حقيقي من أي شيء في الحياة .
3- لا أستمتع إطلاقاً بأي شيء في الحياة .

خامساً :

0- لا اشعر بالذنب .
1- أشعر بأني قد أكون مذنباً .
2- أشعر شعوراً عميقاً بالذنب في أغلب الأوقات .
3-أشعر بالذنب بصفة دائمة .

سادساً :

0 – لا أشعر أني أتلقى عقاباً .
1- أشعر بأني قد أتعرض للعقاب .
2- أتوقع أن أعاقب .
3- أشعر بأني أتلقى عقاباً .

سابعاً :

0- لا أشعر بعدم الرضا عن نفسي .
1-أنا غير راضي عن نفسي .
2-أنا ممتعض من نفسي .
3-أكره نفسي .

ثامناً:

0 – لا أشعر بأني أسوأ من الآخرين .
1- أنقد نفسي بسبب ضعفي و أخطائي .
2-ألوم نفسي معظم الوقت على أخطائي.
3-ألوم نفسي على كل شيء سيء حدث .

تاسعاً :

0- أشعر بضيق من الحياة .
1- ليس لي رغبة الحياة .
2- أصبحت أكره الحياة .
3- أتمنى الموت إذا وجدت فرصة لذلك .

عاشراً :

0- لا أبكي أكثر من المعتاد .
1- أبكي الآن أكثر من ذي قبل .
2- أبكي طوال الوقت .

3– لقد كنت قادراً على البكاء فيما مضى و لكني الآن لا أستطيع البكاء حتى لو كانت لي رغبة في ذلك .

حادي عشر :

0 – لست متوتراً أكثر من ذي قبل .

1– أتضايق أو أتوتر بسرعة أكثر من ذي قبل .

2– أشعر بالتوتر كل الوقت .

3–لا أتوتر أبداً من الأشياء التي كانت توترني فيما مضى .

ثاني عشر :

0–لم أفقد الاهتمام بالناس الآخرين .

1–أني أقل اهتماماً بالآخرين مما أعتدت أن أكون .

2–لقد فقدت معظم اهتمامي بالناس الآخرين .

3–لقد فقدت كل اهتمامي بالناس الآخرين.

ثالث عشر :

تدته تقريباً .improving0 – اتخذ قرارات على نفس المست

1– لقد توقفت عن اتخاذ القرارات بصورة أكبر مما مضى .

2–أجد صعوبة أكبر في اتخاذ القرارات عما كنت أقوم به .

3–لم أعد أستطيع اتخاذ القرارات على الإطلاق .

رابع عشر:

0– لا اشعر أني أبدو في حالة أسوأ عما اعتدت أن أكون .

1– يقلقني أني أبدو أكبر سناً و أقل حيوية .

2– أشعر بأن هناك تغيرات مستديمة في مظهري تجعلني أبدو أقل حيوية.

3– أعتقد أني أبدو قميئاً .

خامس عشر :

0– أستطيع أن أقوم بعملي كما تعودت .

1– أحتاج لجهد كبير لكي أبدأ في عمل شيء ما .

2– أن علي أن أضغط على نفسي بشدة لعمل أي شيء .

3– لا أستطيع أن أقوم بعمل أي شيء على الإطلاق

سادس عشر:

0– أستطيع أن أنام كالمعتاد.

1– لا أنام كالمعتاد .

2– أستيقظ قبل موعدي بساعة أو بساعتين و أجد صعوبة في النوم مرة أخرى .

3–أستيقظ قبل بضعة ساعات من موعدي المعتاد و لا أستطيع العودة للنوم مرة أخرى .

سابع عشر :

0- لا أشعر بتعب أكثر من المعتاد .
1- أتعب بسرعة عن المعتاد .
2- أتعب من القيام بأي جهد في عمل أي شيء .
3- أني متعب لدرجة أني لا أستطيع أن أقوم بأي عمل .

ثامن عشر :

0 – أن شهيتي للطعام ليست أقل من المعتاد .
1- أن شهيتي للطعام ليست جيدة كالمعتاد .
2-أن شهيتي للطعام أسوأ كثيراً الآن .
3-ليس لدي شهية على الإطلاق في الوقت الحاضر.

تاسع عشر:

0- لم ينقص وزني في الآونة الأخيرة .
1- فقدت أكثر من كيلو جرامين من وزني .
2- فقدت أربعة كيلو جرامات من وزني .
3- فقدت ستة كيلو جرامات من وزني .

عشرون :

0- لست منشغلاً عن صحتي أكثر من ذي قبل .
1- أني مشغول ببعض المشكلات البدنية مثل الأوجاع و اضطرابات المعدة و الإمساك .
2- أني مشغول جداً ببعض المشكلات اليومية و من الصعب أن أفكر في شيء آخر .
3- أني مشغول جداً حول مشكلاتي البدنية لدرجة أن لا أستطيع أن أفكر في شيء آخر.

واحد و عشرون :

0- لم ألاحظ أي تغيرات حديثة في اهتمامي بالجنس .
1- أنني أقل اهتماماً بالجنس عن المعتاد .
2- لقد قل الآن اهتمامي بالجنس كثيراً .
3-لقد فقدت اهتمامي بالجنس كثيراً .

Appendix C:

Evaluation Form

for *participants* in HMH's Counseling, Assessment & Education Sessions

Date: _____

Section: _____

Moderator: _____

Instructions: Please indicate your level of agreement with the statements listed below in #1-11.

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
1. The objectives of the session were clearly defined					
2. Participation and interaction were encouraged					
3. The topics covered were relevant to me					
4. The content was easy to understand and follow					
5. This experience will be benefit me in my daily life					
6. The moderator was knowledgeable about the topics					
7. The moderator was well prepared, and the session was smooth					
8. Your expectations of this session was met					
9. The time allotted for the session was sufficient					
10. The meeting room and facilities were adequate and comfortable					
11. The overall organization of the session was good					

Further comments:

Thank you for Your Feedback!

Appendix E: Interview Protocol For Focus Group:

1. Tell me more about the effect of your cardiac disease on your mental health status
2. How is the current healthcare system addressing the mental health needs/concerns?

3. Tell me a little bit about your general experience as participants in the HMH Program: counseling, assessment and education activities?
4. In simple sentences, how can you describe your interaction with the PMH-APN?
5. In your perspective, how was this experience helpful (or not) in improving your awareness regarding your mental health?
6. Are there any changes that you recommend to improve these activites?
7. In the future, how can the hospital support you in improving your health and better support your mental health needs?

Appendix F: Protocol for Semi-structured Interviews:

1. Tell me more about the effect of your cardiac disease on your mental health status.
2. How was the hospital previously addressing these mental health needs/concerns prior to HMH program?
3. Tell me ~~a little bit~~ about your general experience as a participant in the Supportive CBT therapy~~?~~.
4. How can you describe your collaboration with the PMH-APN during the therapy sessions? Please give examples.
5. In your perspective, how was this experience helpful (or not) in improving your capacity to deal with your mental health problems (anxiety/depression)?
6. Are there any changes that you recommend to improve the therapy sessions?
7. In the future, how can the hospital support you in improving your health and better support your mental health needs?

Appendix G:

A line item budgeting system will be used to display all revenues and expenses, including the direct and indirect costs, of the Healthy Minds and Hearts Program. The program costs will be displayed for a duration of three months, to represent the total amount of time that the program will run for with the daily sessions. In regard to the funding, the psychiatric CNS will instill the funding from AUBMC, specifically in the cardiac outpatient clinic, where the program will take place. The cardiac outpatient clinic is the ideal place for the program due to the onsite Cardiologists and the Registered Nurses specialized in cardiology. Additionally, it is convenient for the patients since they are already coming in for their appointment with the Cardiologist, which saves them the cost of transport as well as appointment cost.

The direct costs of the program will involve the salaries of the health care professionals, support staff, equipment and supplies. Health care professionals include the Psychiatric CNS, Cardiologist, Part time Psychiatrist, Part time Social Worker, and Registered Nurses. The salaries of all staff mentioned are estimated according to AUBMC. Equipment includes data scope for vital signs, weight and height scale to measure BMI, computers for the EPIC system, and printers to print prescriptions and tests as needed. Supplies include thermometer probes that are single use, gloves, prescription notes, printer paper, and pens.

The indirect costs of the program will involve the rental of the clinic rooms, monthly WIFI costs for the clinic, phone services, housekeeping services and cleaning supplies, electricity, drinking and cleaning water, and other miscellaneous costs that come along during the program services.

Direct Costs	**Cost/month (LBP)**	**Cost per 3 months (LBP)**
Psychiatric CNS #1	3,000,000 LL	9,000,000 LL

Psychiatric CNS #2	3,000,000 LL	9,000,000 LL
Registered Nurse	1, 800,000 LL	5,400,000 LL
Part time Social Worker	800,000 LL	2,400,000 LL
Cardiologist	5,000,000 LL	15,000,000 LL
Part time Psychiatrist	2,000,000 LL	6,000,000 LL
Clerk	800,000 LL	2,400,000 LL
Support personnel	800,000 LL	2,400,000 LL
Equipment (Data Scope, weight and height scale, printer, computers)		20,000,000 LL
Supplies (thermometer probes, gloves, prescriptions notes, pens, water cooler)	2,000,000 LL	6,000,000 LL
Total Direct Costs		77,600,000 LL
Indirect Costs	**Cost/month (LBP)**	**Cost per 3 months (LBP)**
Clinic cost	4,000,000 LL	12,000,000 LL
Wi-Fi, AUBHealth, phone calls	6,000,00 LL	18,000,000 LL
Housekeeping Services	1,000,000 LL	3,000,000 LL
Miscellaneous Costs	100,000 LL	300,000 LL
Total Indirect Costs	11,100,00 LL	33,300,000 LL
Total Direct and Indirect Costs		**110,900,000 LL**

Maximum 20 pages without references and budget plan [75%]

Critical element/content	Grade point	Description of performance		grade
Introductory paragraph	2/**2**	Specific and accurate summary of the health need or problem, target population, and program hypothesis		1.5
	1/2	General description		
	0	Unrelated description		
Description of target population	4-5/5	Specific and accurate description		4
	2-3/5	General description		
	0-1/5	Faintly or unrelated description		
Overview of population health needs	5/**5**	Complete description of health needs including contributing factors derived from literature review and analysis from secondary data		4
	4/5	Partial description of health needs including contributing factors derived from literature review and analysis from secondary data		
	3/5	Inadequate description of health needs including contributing factors derived from literature review and analysis from secondary data		
	2/5	Superficial description of health needs		
Needs Assessment approach/s	9-10/**10**	All 4 types of needs assessment are addressed accurately		3
	6-8/10	3 types of needs assessment are addressed accurately or all types addressed imprecisely		
	4-5/10	2 types of needs assessment are addressed accurately		
	0-3	Needs assessment is addressed imprecisely		
Problem Analysis	8-10/**10**	Accurate identification of factors/behaviors related to population health need or health care delivery problem that will be the <u>focus</u> for a program of intervention and rationale for their selection		8
	5-7/10	General identification of factors/behaviors related to population health need or health care delivery problem that will be the <u>focus</u> for a program of intervention and rationale for their selection		
	2-4/10	Imprecise identification of factors/behaviors related to population health need or health care delivery problem that will be the <u>focus</u> for a program of intervention <u>without</u> rationale for their selection		
	0-1/10	Factors/behaviors unrelated to population health need or health care delivery problem		
Formulation of program hypothesis	3/**3**	Accurate formulation of hypothesis including hypothesis of etiology, consequence, condition, intervention, consequence, and outcome		2
	2/3	Formulation of hypothesis including hypothesis of precondition, condition, intervention, and outcome		
	0-1/3	Imprecise formulation of hypothesis.		
Clearly defined goals and <u>measurable</u> <u>objectives</u>	5/**5**	Specific goal statement; Objectives written using action verbs that yield measurement of the achievement of the objectives and satisfy the following:	Specific; Measurable; Attainable; Realistic; Timely	4
	4/5	Specific goal statement; Objectives satisfy SMART mostly		

	3/5	General goal statement; Objectives satisfy SMART partially	
	2/5	General goal statement; Objectives satisfy SMART in a few instances	
Description of intervention strategies	9-10/**10**	Specific and thorough description of intervention strategies including underlying theory of change, evidence of effectiveness and cultural acceptability to target population/health care delivery system	8.5
	6-8/10	General description of intervention strategies appropriate to the HC/service problem	
	4-5/10	Partial description of intervention strategies appropriate to the HC/service problem	
	0-3	Unrelated or partially related description of intervention strategies appropriate to the healthcare/service problem	
Evaluation plan	8-10/**10**	Specific and thorough description of the evaluation plan measuring program implementation and attainment of objectives, including identification of process and outcome indicators for each objective, evaluation design, procedure for collection of data, plan for analysis of data, and timeline for program implementation and completion of evaluation.	8
	5-7/10	General description of the evaluation plan including most elements described above.	
	2-4/10	Partial description of the evaluation plan including some elements described above.	
	0-1/10	Unrelated or partially related description of the evaluation plan including few of the elements described above.	
Budget Plan including narrative justification [attach as Appendix]	5/**5**	Accurate formulation of a budget plan consistent with all the functions and services addressed in the intervention strategies and implementation plan	4
	4/5	General formulation of a budget plan consistent with the most of the functions and services addressed in the intervention strategies and implementation plan	
	3/5	Partial formulation of the budget plan consistent with some of the functions and services addressed in the intervention strategies and implementation plan	
	1-2/5	Inconsistent budget plan in relation to the planned functions and services	
Organizational communication	5/**5**	Selection of appropriate organizational communication forms pertinent to the various stages of the proposed program/service.	3.5
	4/5	Selection of appropriate organizational communication forms pertinent to most of the various stages of the proposed program/service.	
	3/5	Selection of appropriate organizational communication forms pertinent to some of the various stages of the proposed program/service.	
	1-2/5	Selection of organizational communication forms pertinent to few of the various stages of the proposed program/service.	

Paper organization	5/**5**	Clarity of presentation, logical organization of ideas, grammar, spelling, and use of scholarly format consistent with *APA Publication Manual, 6th edition*	3.5
	4/5	Mostly consistent with APA	
	3/5	Partially consistent with APA	
	1-2/5	Inconsistent with APA	

Grade = 60/75

Comprehensive Case Study

Health History

Student Name: Alison Haidar	**Patient Gender**: Female	**Medical Record Number**: 01883285	**Date of Birth**: 01/07/1986
	Occupation: Unemployed	**Education:** High School	**Marital Status:** Married
Chief Complaint	Presenting for Visual disturbances (blurry vision and pain on eye movement) in the left eye of 2 months duration.		
History of Present Illness	**Symptom Analysis**: • February 2021: the patient reported experiencing an acute onset of blurry vision in her left eye associated with mild pain on eye movement, but no scleral redness, excessive tearing, or effusion. • Two weeks later the patient sought an ophthalmologist when there was no improvement in symptoms. He told her she required left eye laser surgery (patient unable to specify type and there are no reports) which she underwent in mid-February. • By the 3rd week of February her left eye vision worsened to the point that she could only see shadows, and the pain on left eye movement had become severe with minimal alleviation by Panadol. She also reported new left eye scleral redness, left eyelid swelling, and photophobia. • On February 20th, she sought another ophthalmologist who ordered several lab and imaging tests (check below). This physician diagnosed her with **Tuberculous Uveitis** and recommended that she see an Infectious diseases (ID) specialist at AUBMC before starting treatment. -CBCD, SGPT/SGOT, Urine analysis all within normal limits -PPD induration:10 mm -Chest X ray: Findings: there are no focal areas of consolidation, no suspicious pulmonary opacities or lesions, heart size within limits, no pleural effusion, no evidence of pneumothorax. -ESR: 5mm/h -CRP: 4 mg/l -VDRL: Negative -ACE: 35 U/l -ANA: 1/50 -Anti-ds DNA: 50 RU/ml -HLA-B51: negative		

	• April 6th 2021: the patient accompanied by her husband presented for the first time to AUBMC OPD for a visit with the ID specialist. She was still complaining from blurry vision in left eye that was now beginning to spread to the right eye. However, this right eye blurriness was minimal and intermittent in nature. She also complained from severe left eye pain on eye movement and photophobia. The patient denies unexplained weight loss, night sweats, fever, coughing for longer than 3 weeks, hemoptysis, chest pain or shortness of breath. But she reports fatigue and loss of appetite. she also reported that she was born and lived for 14 years in Saudi Arabia and has taken all vaccinations while living there including possibly a BCG (it is a requirement to get it there). She denies any contact with Tuberculous patients or travel to other countries. When the patient's husband left the room, she reported a history of domestic violence starting since she got married at the age of 17. Over the years, she has received several blows to the head and face. • To note, the patient has a history of allergic conjunctivitis and myopia and has been wearing eyeglasses for almost 20 years. She also underwent a laser surgery on left eye 4-5 years ago for unknown reasons, other than it was ordered by her ophthalmologist. The laser surgery had no complications, and she reported stopping wearing eyeglasses after that.	
Past Medical History	**Allergy(ies)**	**No known food or drug allergies**
	Substances	**Smoking**: current daily smoker, one Argileh a day for the past 10 years (no cigarettes smoking).
		Drugs: Panadol PRN for pain
		Alcohol Intake: none
		Blood Transfusion: none
	Preventive Measures	**Adult Immunizations:** none but reported that as a child she took all the required vaccines (could not present a vaccination record book)
		Checkups: -pre and postnatal visits when pregnant. -ophthalmology checkups only when there is any change in visual acuity.
	Trauma	Domestic violence history since 2003
	Illnesses	**Childhood:** myopia 0.5D on left eye 1D on right eye and allergic conjunctivitis (both diagnosed 2001)
		Adult: Gastrointestinal: The patient reported having chronic constipation (almost 10 years). She reported feeling of a “small soft sac” close to her anus and started seeing fresh blood in stool about 2 months ago. The last time she saw blood in stool was a week prior to presentation, around the time she started to exercise and diet (increase water and fiber intake).

Deleted: ,

Deleted: none, but

Deleted: .

Deleted: conjunctivitis (

		Possible COVID infection: One month ago, she reports feeling feverish for two days for which she took Panadol, followed by severe abdominal pain requiring Scopinal for 7 days, followed by dry cough for 7 days as well. No nausea/vomiting or diarrhea. She did not get tested for COVID back then, but reports that none of her contacts/family members had symptoms as she did. To note, the patient did not seek any medical attention for these issues as they were self-limiting.
		Mental Health: 10 years ago, the patient attempted suicide by ingesting large amounts of an unknown medication. She reports it was triggered by the stresses of daily life. The patient was hospitalized for about a week and was seen by a psychiatrist who recommended psychotherapy and prescribed Seroxat which she reported that she is still taking but there was no official diagnosis as per patient other than anxiety. When her husband left the room, the patient reported that the suicide attempt was triggered by domestic violence (started 2003 and ongoing). And that she refused psychotherapy and has never taken the Seroxat, and copes by confiding in her mother. She currently denies any sleep disturbance, suicidal ideations and feeling unsafe at home, and reports that she is nervous about the overall financial situation and its impact on her family more than the abuse which she considered as "normal". To note, the violence has decreased ever since she started having visual disturbances 2 months ago.
	ADLs	• She lives in Akkar (rural setting) • She used to own and run a day care center one year ago but has since closed it and is a stay-at-home mom. • She denies any sleep pattern disturbances (sleeps 7-8 hours per day without sleeping aids) • She does not exercise beyond activities of daily living, as for relaxation she opts for smoking argileh
	Nutrition	The patient mentions she had a high-carbohydrate, high-sugar, low fruits and vegetable diet, but has made some alterations a week prior to presentation in order to lose weight: • Protein/Meat: She eats meat 1-2 times a week, one serving per day. • Milk/Dairy: She does not like to drink milk, but for breakfast and dinner she does eat labneh and cheese • Bread/Cereal: since starting to diet she has stopped eating bread, but still eats one serving of rice every other day

Deleted: stay at home

		• Fruits and Vegetables: side salad portion daily with lunch but doesn't eat much fruit. • Caffeine: one cup of coffee and tea daily • Sugar: has stopped eating sugars • Animal Fats: one cup per week
	Values/Beliefs/Stresses/Coping	The patient says that she cares for her health, but she does not usually do any regular or annual check-ups unless there is a change that disrupts her daily living. She mentioned feeling anxious about her vision but was hopeful it will be fully restored now that she came to AUBMC. She remarked that she is taking Seroxat because she is very stressed especially about raising the children alone since her husband works in Beirut (she sees him every other week only). But when her husband left the room, she denied ever taking Seroxat and said that she said so just to make her husband see that she is stressed and needs help with the children. The patient seems to be resilient given the abuse that she was under as she was joking about the issue.
	Relationships	She is not the breadwinner of the house and is not able to contribute to pay off expenses. Her husband remained with her during most of the OPD visit but didn't say much. She was more reserved in her answers when he was around, but was comfortable enough to joke with him about her previous psychiatric hospitalization. However, she talked about the domestic violence when her husband was not in the room.
	Education	She has a brevet degree
	Economics	She is unemployed

	•	Numbness		Tingling		Change in Coordination		Gait Disturbance
		Change in mood or thought processes				Memory problems -past/recent		

	•	Anxiety		Depression		Others		

Hematopoietic Lymph		Anemia		Blood problems		Bruising		Bleeding Tendency
		Adenopathy		Bone Pain		Other		

Endocrine		Temperature				Disturbed growth and development		
	•	Intolerance of heat or cold				Change in secondary sex characteristics		
		Goiter		Diabetes		Excess fatigue		Hormone imbalance

Physical Examination

1. **General appearance:**

Patient was well groomed with no body odor and had congruent mood and affect. There were no signs of pallor or fatigue, and no obvious deformities. She was fully conscious, oriented to person, place, time, and situation. She had proper articulation with appropriate content of speech and was sitting in an upright position. The patient had full range of motion with absence of involuntary movements.

2. **Anthropometrics and screening:**

- weight 79.5 kg, height 159 cm, BMI 31.45 kg/m²
- Blood pressure: 110/66 mmHg
- Pulse: 67 bpm
- Temperature: 36.3 ◦C
- Respiratory: 20 breaths per minute

3. **Skin:**

Skin is warm to the touch with same color all over her body and no rashes or discoloration. Skin turgor showed no tenting and capillary refill time was less than 3 seconds. No nail clubbing or skin warts, absence of synovial swelling in hand joints, and absence of Raynaud findings.

4. **Head and face:**

Head size is proportionate to body size, no facial asymmetry upon smiling and no tenderness or pain of maxillary and frontal sinuses. No swelling or stiffness of temporomandibular joint. No exudate from the eyes present and no drainage from nose, or ears apparent. Scalp not assessed but patient had no concerns regarding it.

5. **Eyes:**

No visual field deficit in right eye, however there is limited vision in upper field of left eye. There is bilateral impaired visual acuity (more so in left eye than right eye) but this impairment has not yet debilitated her activities of daily living. Pupils bilaterally equal, round, and reactive to light. Photophobia present. Left eyelid mildly swollen, and left eye conjunctiva is slightly reddish. However, right eyelid not swollen and right conjunctiva clear with no redness. Extraocular movements are intact bilaterally, but painful, especially on convergence. No tenderness on palpation of lacrimal apparatus, corneal light reflex revealed normal fixation.

Commented [AngelaM.3]: Divide systems. So speech and position should be separated

Deleted: , and absence of hearing aids

Deleted: speech, and

6. **Ears:**

External ears symmetrical, no pain upon palpation of auricle, no hearing loss present when performing whisper test.

7. **Nose:**

Nostrils are symmetrical, no septal deviation present, and nasal mucosa is moist and pink.

8. **Mouth and throat:**

Pink mucosa in mouth with no irregular patches. tongue is pink with absence of any cracks. No deficits in swallowing and has non-limiting neck range of motion. No distention of Jugular vein, and carotid pulse present and non-bounding. No tracheal deviation or tenderness on thyroid palpation.

9. **Posterior and lateral chest:**

Symmetrical chest expansion visualized, no hyper/hypo resonance on tactile fremitus, and clear air entry upon auscultation. Upon costovertebral palpation and percussion no tenderness was vocalized by patient.

10. **Anterior chest:**

Symmetrical chest expansion visualized, absence of any masses in lymph node regions. Clear air entry, apical pulse, and S1 S2 sounds auscultated.

11. **Upper extremities:**

Skin is warm to touch. No deficits in range of motion or joint pain. Full strength present in bilateral upper extremities (5/5).

12. **Abdomen:**

Abdomen flat and symmetrical, umbilicus intact, no pulsation present. Normal bowel sounds heard upon auscultation. Upon palpation light tenderness in suprapubic area felt by the patient and no masses felt.

13. **Inguinal area:**

Not assessed, but patient mentioned no masses or concerns.

14. **Lower extremities:**

Skin is warm to the touch, no edema or varicose veins in bilateral lower extremities. No deficits in range of motion or joint pain. Full strength present in bilateral lower extremities (5/5).

15. **Neurologic:**

Could not assess cerebellar function (nose to finger) due to impaired vision, brisk deep tendon reflexes. Intact sensation to light and sharp touch. To note, neurologic exam not performed in depth but she reported that she has generalized, intermittent, & self-limiting numbness.

16. **Musculoskeletal:**

Kyphosis and scoliosis absent as well as disequilibrium

17. **Genital and rectal exam:**

patient reported feeling of a "small soft sac" close to her anus and seeing fresh blood in stool about 2 months ago that gradually stopped as she started her diet. But no physical exam was done, patient refused.

Assessment

Commented [AngelaM.4]: This is your best part!

Differential diagnoses in priority order (both medical and nursing) with analysis and rationale for each.

1. Visual disturbance:

According to the symptoms the possible differential diagnosis are Ocular sarcoidosis, trauma to eye, Tuberculosis Uveitis, Syphilis, systemic rheumatic disease (SLE, Behchet's disease)

Factoring in the clinical assessment and lab/ radiologic tests we can rule out the following:

-CBCD & SGPT/SGOT: within normal limits/ PPD: positive/ ACE: within normal limits/ CXR: no bilateral hilar lymphadenopathy ➔ Sarcoidosis ruled out.

-ESR & CRP: within normal limits/ ANA: Negative/ Anti-ds DNA: within normal limits/ HLA-B51: negative ➔ Systemic rheumatic disease (SLE, Behchet disease) ruled out.

-VDRL: Negative ➔ Syphilis ruled out.

-History of domestic abuse with multiple blows to the head and face not known by previous ophthalmologists during their assessment might have changed their diagnosis ➔ trauma to eye cannot be ruled out.

-PPD: positive (she reported taking the BCG vaccine)/ Chest X-ray: findings not indicative of Tuberculosis/ absence of respiratory symptoms ➔ pulmonary TB ruled out but we cannot rule out TB uveitis without doing an ocular biopsy. Moreover, it's highly unlikely that she would have a positive PPD result at this age having taken the BCG as a child.

Through process of elimination the most probable differential diagnosis are:

R/O TB uveitis.

R/O trauma to eye

Commented [AngelaM.5]: Excellent!

2. Dysfunctional family processes/ Anxiety

Related to history of domestic physical abuse and attempted suicide evidenced by patient's report.

3. Constipation

-Patient reported straining while defecating and having hard stool
-Patient reported drinking less than 500ml water daily and decreased fiber intake
-Patient reported not doing any exercises and having a sedentary life style

4. Rectal bleed: R/O Hemorrhoids

-Patient reported feeling "small soft sac" around the anus
-Pain and straining while defecating
-History of constipation
-Fresh blood in stool

Plan

The plan of care is as such:

1- For visual disturbance refer to ophthalmology to R/O trauma to the eye and R/O TB uveitis by biopsy. Start treatment for TB in case TB uveitis is confirmed.
2- Manage constipation with laxatives (prescribed Forlax) and improvement in lifestyle (diet and exercise)
3- follow up with gastroenterologist for proper diagnosis of hemorrhoids. And prescribed Diltiazem in Vaseline base cream to apply on hemorrhoids meanwhile.

Patient educated about:

1- plan of care regarding visual disturbance and what is required from her.
2- managing constipation: add fruits and vegetables to diet, drink more water, do more exercises.
3- Forlax daily regardless of food time.
4- Apply diltiazem to anal area daily.
5- In case of new physical abuse she was educated about support groups and organizations that may help.
6- For her anxiety, she was educated that Seroxat may help but such medication should be taken for a period not less than 4-6 weeks before they are effective and she feels its full benefit.

Course: N507 Essentials of Nursing Administration & Management

Instructor: *Dr. Lina Younan*

Spring semester 2019

Topic: SWOT analysis

Presented by: …

Mar.10, 2019

Instructor feedback on assignment:

Thank you for your submission. Below are my comments:

Strengths: are correctly stated but should include more items (3/5 points)

Weaknesses: are correctly stated but should include more items (2/5 points)

Opportunities: are incorrectly stated (0/5 points), all your stated opportunities relates to internal strategies. Usually opportunities refer to favorable external factors that could give an organization a competitive advantage.

Threats: are incorrectly stated (0/5 points), threats are external factors and not internal. all your stated threats are internal weaknesses. Threats refer to external factors that have the potential to harm an organization.

Strategic Objectives (3/5points): are linked to your SWOT content, which is good, but need to be stated differently. Example:
Goal: to have a well-staffed unit
Objective: to increase the number of patients assigned to each nurse (3 patients during day shift, and 4 patients during night shift).

Please correct and re-submit your assignment.
You may check this link to know more about SWOT analysis:
https://www.examples.com/business/hospital-swot-analysis.html

Unit: Saint Jude.

Strengths:

- Excellent quality service
- Patient's education and teaching
- Support

Weaknesses:

- Wasted time (long process of discharge and/or admission; late attending doctor's round)
- Overload & understaffing (high acuities/high number of patients)

Opportunities

For excellent quality service: Regular follow up on the staff (psychological check-up(especially for nurses working on critical floors), their opinions or ideas about anything related to the floor that might improve the work and the service provided for the patients); floor: (well-staffed floor with an acceptable working load); equipment: regular checking of the equipment, how well they function and how fast they help the nurses during their work, and changing any equipment that need to be changed or replaced by a better ones).

Accountability: To improve the areas that need improving, and this will be done by documenting the errors, be aware of it and know how to deal with and the RN caused by.

Patient education and teaching: Continuous education of the staff members, evidence based practices, well trained preceptors for a perfect example to the students, educational sessions and mandatory exams. The RN will be well educated about most of the cases and will be ready to

answer all of the patient's questions and provide a full explanation and teaching of the case and the medications he/she will be maintained on.

Support: Emotional support should always be available. Spending more time with the patients calming and relaxing them. Spiritual support must be provided especially for patients during their palliative care phase. For the financial support, we need to improve it as much as possible since our center is based on donations (Saint Jude), increasing donation's events and facilitating the donation process (by telephone, online, etc) so it will be easy and available for all.

Wasted time: A lot of delays will happen because of the late attending's late round, which leads to the delay in the discharge and admission process. A meeting should be done with the attending doctors so they could be aware of the real harm of the situation because a lot of chemotherapy treatment also will be delayed because of them and the bad/late management.

Overload: The floor should be well staffed, especially because we are a critical unit, dealing with critical and very ill patients who needs extra care. Under staffing will lead to overload of work, and since we have patients with high acuities, understaffing will not lead to less quality of care provided, but it will affect the urgency of the RN doing everything in a rush so he/she could manage their time, which lead to increase the risk of errors. So in order to prevent the errors, well staffing is a must.

Threats

External threats: Saint Jude acceptance of high number of patients and new cases more than the unit could handle regarding the staff and bed numbers and the financial status. This, if happens, will lead to an overload of work, increase risk of errors and increase in the need of new RNs. A full study of the center, funds, bed numbers and RN number should be done so the number of patients does not exceed the center's limit.

Internal threats: the nurses turn over, which is directly related to the external threat. The overload of work, high acuities, and late management (regarding discharges and admissions) will all lead to nurse's resignation, resulting in an understaffed unit and stressful environment decreasing the excellence of care provided.

Strategic objectives

Goal 1: Well-staffed unit.

Measured by the number of patients assigned to each nurse (3 patients during day shift, and 4 patients during night shift). Done by bringing more staff to the floor, and adjusting the assignment (patient distribution) accordingly. And this goal should be achieved by the end of 2019.

Goal 2: Organized management.

Measured by the early discharge of the patients following by an early admission of the pre-planned ones. Done by and early attending doctor's round, in which everything will be discussed early with less time consumption. This goal should be achieved by the end of July 2019.

Student: M. K.

Nursing 507 Assignment: SWOT Analysis

Instructor feedback on assignment

Dear Maral,
Thank you for your submission. Below are my comments:

Strengths: are correctly stated (5/5 points)
Weaknesses: are correctly stated (5/5 points)
Opportunities: are correctly stated (5/5 points).
Threats: are correctly stated (5/5 points).

Strategic Objectives (3/5points): your objectives are very broad, they can be considered as goals. Your first objective is linked to your SWOT content but the second one is not, the vaccination program was not mentioned in your weaknesses.

You may check this link to know more about SWOT analysis:
https://www.examples.com/business/hospital-swot-analysis.html

SWOT Analysis of the Primary Health Care Department

Ministry of Public Health – Lebanon

Strengths:

New central headquarters in a prime geographic location

Provision of curative and preventive healthcare services such as early detection of NCDs

Provision of essential drugs, vaccines, medical consumable materials and some equipment to the network of primary health care centers

Partnership with 228 Primary Health Care Centers from all governorates in Lebanon

Providing health care services to a large number of Syrian refugees and to the general Lebanese population

Providing Accreditation, in partnership with Accreditation Canada International (ACI), to primary health care centers, at no monitory cost to the centers themselves

Providing the primary health care centers with a readiness assessment survey (Mock Survey) prior to the Actual Accreditation Survey

Providing Basic and Advanced Accreditation training, along with on-the-job training, to the primary health care centers

Contextualizing the Accreditation Canada International Standards to meet the context of Lebanon, along with periodic revising and updating

Inter-operability platform with the HIS (Phoenix) system, along with monthly reporting of the primary health care centers, allows the MOPH to collect data from the networks of these centers, thus obtaining a timely national data

Weaknesses:

Shortage of competent and productive personnel

Large number of tenured (permanent) but unproductive employees, whose performance is not properly evaluated

Lack of motivation or reward criteria, along with job insecurity, for the contractual employees

Financial dependence on international aid to provide medications and hire contractual employees

Inappropriate employment mechanisms

Unavailability of adequate number of employees distributed over the 8 governorates, which results in poor supervision of the chain of the Primary Health Care Network centers

Lack of statistical analysis of the large amount of generated national data

Lack of specific and professional training programs

Lack of sufficient and competent staff within some of the primary health care centers that might jeopardize the accuracy of the national data

Deteriorated and poorly maintained offices in the governorates, featuring inappropriate work environment and equipment

Opportunities:

Initiating the EPHRP (Emergency Primary Healthcare Restoration Project) program, funded by the World Bank, to provide preventive and curative free packages to the financially disadvantaged Lebanese populations

Organizing national campaigns with local NGOs

Partnering with several international NGOs, to provide mental health services within several primary health care centers

Training National Surveyors, in partnership with ACI, to take part in the Accreditation process

Partnering with international NGOs in provisioning vaccines and medications to the network of 228 primary health care centers

Partnering with additional international and local NGOs

Partnering with academic institutions to employ the gathered national data in research

Threats:

New governance, which threatens the continuation of funds, programs and contractual employees

Political interventions, which upsurge staff turnover rate

Previous negative public perception of the government health care services, which impacts the trust of the Lebanese Population

Contractual short employments, which increase the staff turnover rate

High influx of Syrian refugees, which imposes a threat to safeguard the population from communicable diseases and effective vaccination

Objectives:

By 2020, strengthen the information and data-gathering statistical systems, to provide accurate and timely data, in partnership with academic institutions and NGOs

By 2021, strengthen the efficacy and efficiency of the vaccination program, by improving the data-gathering and screening processes

NURS 522: Principles and Practice of Advanced community and Public Health Nursing

Reflective Practice Diary

Name of Student: xxx

Location: OBS OPD

Date: From 26/2/2021

Total number of Hours: 2

5/5: Excellent analysis xxx. I had a few comments related to relational continuity, which is the third element of continuity of care, that you hinted on in the discussion.

Instructions:

1. Each two weeks, you will select a competency that you will be your focus.

2. For each competency:

- **a.** Define the role of the advanced public and community health.
- **b.** Describe the current practices of advanced public and community health nurse applied in the clinic.
  - **i.** The reflections may include:
    1. Presence of a written policy to define that role.
    2. How the onsite experience provides an opportunity to observe these competencies, in whole or in part?
    3. Activities observed
    4. How these activities are documented?

3. Reflect on measures to improve the fulfillment of these competencies by answering the following questions:

a. What evidence-based strategies could be used to improve the performance?
b. Comment briefly on how you suggest to implement those evidence-based proposed strategies.

Please post your reflective practice diary every two weeks starting from January 28th till April 22nd , 2021. Please use one

document for all the submissions. Kindly, add your references at the end of the document.	
Competency 1:continuity of care-management/informational continuity of care skills	**Definition of the role of the advanced public and community health nurse** **Continuity of care skill can be divided into informational continuity and management continuity.** **Informational continuity is defined as the use of information on past events and personal circumstances to make current care appropriate for each patient. Complete documentation of the patient's information and interventions help in the patient's continuity of care.** **Management continuity is defined as consistent and coherent approach to the management of a health condition/ patient flow. The nurse is responsible of the management of the clinic workflow, appointments of the patient and follow ups.**
The continuity of care skill at the OBS outpatient department at AUBMC is completed through both informational and management continuity of care. **Informational continuity of care:** **Health information records are maintained on an electronic system named "AUB Health". All encounters, assessments, diagnosis, plan, lab results, prescriptions and education are documented on AUB Health.** **Moreover, the clinic provides patients with the opportunity to access their health record through a phone application "myChart" that is linked to "AUB Health". Through this application, patients are able to take appointments, check their test results, and reminded about any health-related issues (ex: Pap Smear due, flu vaccine on yearly basis...).** **In addition to the phone application, Telehealth option is also available. The patients are offered the option to**	**The evidence suggests that improving continuity of care brings benefits both in terms of clinical outcomes and cost effectiveness. Healthcare providers and patients sense its importance (Sudhakar-Krishnan & Rudolf, 2007).** **Even though the continuity of care (informational and management) that is applied at the OPD department at AUBMC is up to the standards, we can have some minor improvements that enhance the fulfillment of this competency. I will be focusing on three main domains that revolve around patient education, information confidentiality and patient/resident assignment.** **For the first domain around patient education, it is mandatory to have patients aware of the importance of continuity of care. First, patients should ask for appointments preferably with the same health providers that are following their case. This builds trust and safety between the 2 parties (Alazari, et al., 2007). Second, the patient should be aware of his case and knowledgeable of his plan of care. This is essential for cases when a patient visits a new medical center that does not have access to his medical history. The patient should be able to provide the new health care providers with as**

Commented [GH2]: Excellent and this is what referred to as relational continuity but when it is a team work, the relation can be with the team rather than individual and this has caveats too

contact the nurses through calling or sending a message to the clinic if they have any inquiry or questions. **All encounters are documented on AUB Health.** **A policy on TeleHealth nursing practice is set to clarify the role and responsibilities of the nurses in the clinic. The policy defines the role of the nurse as follows: "The Registered Nurse (RN) at AUBMC Specialty Clinics shall help the physician in handling telehealth encounters (telephone calls and My AUBHealth messages) related to nursing advice, health needs and concerns, communication of test result(s), plan of care and coordination, and medication refill."** **Management continuity of care:** **The outpatient department is mainly led by OB/GYN residents and nurses. To ensure continuity of care, the nurse assigns each patient to a resident. Note that the assignment does not always result in having the same resident following up with the same patients. In some cases, multiple residents might be involved during multiple encounters with the same patient. The nurse will follow up with the patient during all antenatal visits. As soon as a patient arrives, the nurse checks them in on the system and starts tracking them. The tracking system is color coded to distinguish the status of the patients. The codes represent the following status:** **checked in** **waiting, assessment by the nurses** **assessment by the resident** **checked out.** **They can track the wait time and the flow of the patients.**	**much info as possible about his medical history.** **For the second domain around information confidentiality. The privacy of patients and the security of their information is the most imperative barrier to entry when considering the adoption of electronic health records in the healthcare industry (Kruse et al., 2017). I realized that any health care provider can access the medical history of any patient in AUBMC with no restrictions. This breaks the confidentiality rights of the patients especially that this info can be accessed without any provided reason. I would suggest an update to the AUB Health system that restricts health care providers from accessing all patients' medical records. It should only be allowed to the direct care providers. It should also be possible for any other health care provider to access this info on demand in case of an emergency. The person accessing this info will need to provide a valid reason that is audited periodically.** **For the last domain, the current patient/resident assignment for re-visiting patients does not consider previous assignments. When taking a new appointment, nurses should try their best to assign appointments to patients with the same resident and nurses following their case. Even though this is never going to be perfect especially in a teaching hospital like AUBMC, the staff should do their best effort to allocate patients to the same team. An enhancement can be done to the appointments section of AUB Health system that providers a patient with a preferred appointment slots where the team following their case is on duty. The AUB health system will then have to be linked to the staff's monthly schedule.**

Commented [GH3]: That is my point, having a relation with team may be disruptive as compared to individual members of the team

Commented [GH4]: Are you sure, isn't only those caring for the patient?

In order to decrease the wait time, nurses do the assessment 1 day before the appointment via phone. This process is called “pre-charting”. They call the patient, assess their condition, and take history. All this info is documented on AUB Health.	

Commented [GH1]: There is also the after visit summary which is an important to close the loop for the episode of care

We can see here that the Sample is 189 female, of which they are describing the presence of urine irritability, their race, and if they have a history of hypertension. So we start by interpreting the presence of uterine irritability, 85.2% said that they did not experienced it, and 14.8% did, we noticed that percent and valid percent are the same because we don't have missing data. As for the race, 50.8% out of the 189 women were white, 13.8% were Black, and 35.4% were of other race, and we also note that percent and valid percent have the same value because we don't have any missing data. As for the history of HTN, 93.7% out of the 189 women stated that they did not have previously a history of HTN, 6.3% did, noting as well percent and valid percent are the same. write-up needs to be improved, use a journal article as a guide on how to report descriptive statistics of sample characteristics

The sample analyzed is 189 women, with 0 missing data for all 3 categories. For the mother's age, Mean 23.24, Median 23, they are very close, and it shows in the graph above that it is symmetrical from the bell shaped curve, SD: 5.29, variance: 28, 25% of the women's age were less than 19, and 75% were less than 26, which means 25% of the women age more than 26.
As for the weight of the mother at last mens, Mean 129, median 121, not very close, the graph is left skewed, SD: 30.57, variance: 935, 25% of the women's weight was less than 110, and 75% of the women 's weight was less than 140.
As for the height of the mother, mean 163.39, median 163.25, they are very close, the graph shows bell shaped curve, 25% of their height was less than 159.42 cm, 75% less than 167.57cm.

write-up needs to be improved, use a journal article as a guide on how to report descriptive statistics of sample characteristics

Tables are copied from SPSS, you needed to create your own tables (also use a journal article as a guide) -1

Exercise 2:

Type 2 error, we failed to reject the hypothesis while it is false. In this case, the PCR result is negative while in fact it is positive. ok

Exercise 3:

a) The parameter is: mu = Mean oxygenation saturation

b) It is claimed that the mean oxygenation saturation for patients admitted with ICU after contracting COVID 19 is 80.
H0: Mu=80, H1 Mu≠80. -0.5

c) 0.057 > α (0.05), so we fail to reject the hypothesis. We have non-significant results. We conclude that Mean oxygenation saturation for patients admitted to ICU after contracting COVID 19 is different than 80. No, the opposite since we failed to reject H0 -0.25

d) We are 95% confident that the mean oxygenation saturation for patients admitted to ICU after contracting COVID 29 is between 71 and 81.

Patient Advocacy in Intensive Care Units: A Concept Analysis

American University of Beirut

NURS 500: Theoretical, Conceptual and Ethical Framework

Dr. Nour Alayan

December 15, 2021

Abstract

The act of advocacy is integrated into our daily lives subconsciously and is as simple as helping neighbors cross the street. One key point to implement advocacy is the presence of a vulnerable person to advocate for. Nurses are important advocates for their patients especially the critically-ill ones. Advocating for preserving the rights of the unconscious promotes safety. Although present in the vast literature, the concept of patient advocacy remains equivocal and missing in clinical settings. Consequently, the purpose of this paper is to analyze patient advocacy, specifically in Intensive Care Units. The analysis will ~~abide by~~follow Walker and Avant's (2011) method of concept analysis. The paper will include concept selection, definition and literature review. Moreover, the analysis will include model and contrary cases as an attempt to clarify the concept. Antecedents will be grouped into two parts: in relation to the patient and to the registered nurse. Consequences will be classified into negative or positive influences on the patient and the registered nurse. The notion of patient advocacy should be integrated in early educational curricula with emphasis on actually playing the role in order to be grasped. When implemented successfully, patient advocacy's outcome is highly beneficial to the nurse, patient, organization and to the community as well. Further research should include the benefits on the healthcare sector nationally for emphasizing advocacy's implementation.

Keywords: patient advocacy, nurse, critically ill, health promotion.

Introduction

Headlines surfed the roof when ~~nurses~~ nursing made its way as the most trusted profession since 1999, according to a Gallup poll that was published in the American Nurse (2016). A fiduciary relationship must therefore exist between the nurse and the patient for the nursing profession to be accredited with the highest degree of goodness. In a healthcare environment, preserving this relationship would enable the client to become transparent with the nurses and consequently inaugurate better health outcomes (Olshansky, 2011).

A nurse-patient trust relationship is established through various ethical principles that the nurse should entail. The American Nurses Association (ANA) developed the Code of Ethics and revised it multiple times in an attempt for the nurses to endure the ethical dilemmas faced in the workplace towards promoting safe and effective practices which will ultimately surpass the benchmark of care. Investigating the Code of Ethics reveals principles such as autonomy, beneficence and many other stipulations (American Nurses Association [ANA], 2015). One of the provisions entails advocacy to be at the heart of nursing's practice in order to protect the patient's rights and grant the patient the voice of accountability (Epstein & Turner, 2015). Ensuring justice through patient advocacy originated from Nightingale's period and became one of the nurses' most significant role in paving the way for better patient, nurse and community-centered outcomes (Davoodvand et al., 2016).

Patient advocacy is an integral part of the nursing profession however it is not always fully accomplished. The complexity of the role provides an ambiguous definition of what and how nurses should advocate for. Therefore, the purpose of this paper is to tackle the concept of patient advocacy, as clarification of the question 'What is advocacy and how is it accomplished?'

will provide a stepping stool for role definition and pave the way up the ethical ladder. This paper will include a simplified concept analysis using a simplified version of Walker and Avant. It will include the definition, context of use and literature review of patient advocacy in Intensive Care Areas (ICUs). Furthermore, determining the attributes, identifying model and contrary cases as well as the antecedents and consequences of the concept chosen will also be addressed. Finally, implications for the nursing field will be mentioned at the end (Walker & Avant, 2011).

Commented [NA1]: Excellent intro that establishes the concept significance and purpose of your paper

Concept Selection and Context of Use

The application of patient advocacy in the nursing domain is extensive as nurses can support the patients in any setting: in-patient, out-patient, during the discharge process, in invasive procedures, etc. Nonetheless, the practice of advocacy has been missing nowadays in clinical settings especially in critical care areas (Mortell et al., 2017). Critically-ill patients are unable to exercise their rights and concerns; they are not autonomous and require a supporter to be present especially during challenging and life threatening situations (Ditto et al., 2001). Consequently, the selection of patient advocacy will be limited to the ICU setting.

Commented [NA2]: This is a strong statement. Having multiple citations would better support your argument.

Commented [NA3]: I suggest: For this paper, the analysis of patient advocacy will be limited to the context of ICU settings.

The practice has also been blocked due to organizational barriers such as lack of support from leaders, community barriers which include the notion of nurses as servants as well as medical dominance and favorism (Mortell et al., 2017). Advocacy is also not fully implemented since there is a lack of nurses who use it in their residencies and pass it on to the following mentee nurses as identified by Mortell and his colleagues (2017). Clear role and job preparation was similarly limited among nurses which created an advocacy role strain (Mathews, 2012). This has been linked to the 'practice-theory gap' since the nurses have not been educated about it during their college years (Mortell et al., 2017). It is also noted that having a higher education

and work experience are considered as requirements for implementing patient advocacy in the ICU (Luz et al., 2019). In light of these barriers, the use of advocacy will be applied among fresh graduate registered nurses (RNs).

Commented [NA4]: Unclear why you have this statement here

Hence, a proper definition of patient advocacy is in dire need for the nurses and the public in order to raise awareness of its crucial outcomes and to ~~be~~ encourage its implementation~~ed~~ in clinical settings.

Definition, Characteristics and Literature Review

A literature review of the concept of patient advocacy was conducted through several databases including Google Scholar, PubMed, Medline and Cumulative Index to Nursing and Allied Health Literature (CINAHL). The search was narrowed down to English full-texts and was implemented after identifying the keywords of interest: patient advocacy, nurse, nursing, critical care, intensive care unit and concept analysis. The review will address the definition of patient advocacy and its characteristics in an attempt to transcribe all the data into a user-friendly one and remove all vague terminologies in order to use advocacy clearly in the work ethics.

Commented [NA5]: Excellent paragraph!

Looking at a patient's day, the time spent with the nurse exceeds the time spent with any other provider. This prolonged direct contact with the nurse provides a framework for knowing the patient more and understanding the roots of every dilemma that the patient faces. This is why the nurses are considered as the first and important advocates for the patients (Zomorodi & Foley, 2009). Patient advocacy is a huge umbrella with several general terminologies that describe the settings of advocacy. In nursing, advocating for a patient is the work of guidance in the healthcare system as it is entailed to protecting the privileges and promoting the patient's

independence (Kalaitzidis & Jewell, 2015). The nurse's role is also described as a speaker on behalf of the vulnerable population. Because of the vulnerability classification, the degree of the patient's involvement in their plan is greatly shaped. For example, the educated patient would be more engaged in the management than the illiterate. Since some patients are not being recognized, a patient-representative model was created to identify and attend to the patients' needs (Kalaitzidis & Jewell, 2015). Nevertheless, the need for advocacy is not always related to the medical aspects solely, as there are administrative factors that also necessitate the need to articulate the patient's concerns (Abbasinia et al., 2020).

According to Abbasinia and his coworkers (2020), patient advocacy includes apprising, mediating, valuing, safeguarding and promoting social justice. Going in depth in apprising, they considered it as promoting education for the patient at different stages of the hospitalization process. However, Birks et al. (2016) argued that providing education is incorporated directly in the nurse's job description as the role of the Advanced Practice Nurse (APN) is a researcher and educator. The advocacy part, however, of education might rely on whether or not the education would stand in the way of the best practices that are needed to be done. Mediating on the other hand provides a basis for patient advocacy. Being a patient's liaison in the system is highly needed, but unfortunately not being done on regular basis. Several barriers including the presence of hierarchical factors do not permit the nurses to advocate; ~~however~~however, the nurses become risk takers when they recognize the need of urgent care (Josse-Eklund et al., 2014; Lindahl & Sandman, 1998). The nurse's critical thinking is substantial and dictates stepping out of the comfort zone for the patient's sake (Josse-Eklund et al., 2014). Critical thinking is not only placed on scientific literature but is also argued on the grounds of moral ethics as to protect the rights of the patient (Lindahl & Sandman, 1998). Thereby, the ANA

developed the Code of Ethics in an attempt to standardize the concepts that ought to be found in every nurse for the sake of the profession and the patient. Linking advocacy to moral autonomy is substantial for critical care nurses since they must critically analyze and act upon situations of confusion which include the clarification of new treatment sets which may not be applicable to some critically ill patients (Lindahl & Sandman, 1998; Mortell et al., 2017). Critical care RNs are required to knockback the medical dominance and hierarchy by questioning the treatment sets and their application. Moreover, promoting social justice is a significant role that requires the nurse to go beyond the minimum care. In the healthcare system, defying the discriminations is needed to equalize the care among the population and promote satisfaction (Abbasinia et al., 2020). Being culturally competent is a part of the RN's conduct to respect the diverse values and beliefs of the patients and advocate for them even if they collide with the values of the treatment personnel (Landahl & Sandman, 1998). Since the patients in the ICU cannot express their concerns and beliefs, the RN must work with and understand the wishes of the family members present. This conception goes well with Abbasinia and his colleagues' (2020) valuing as it is naturally needed as part of advocacy since without acknowledging and respecting the diverse beliefs and values, patient negligence will arise and promote inevitable negative outcomes (Davoodvand et al., 2016). Another attribute mentioned by Abbasinia et al. (2020) is safeguarding and protecting the patients against misconduct. This falls under the justice-promotion aspect as it is a form of promoting righteousness. Practicing non-maleficence by advocacy is interconnected with the ethical decision making process and RNs must be aware that safeguarding the patients would require a full analysis of the risks that are accompanied with moving outside the box. Assuming the role of advocacy requires the use of problem-solving

techniques and taking into consideration the ethical aspects to protect both the patient and the RN (Norrie, 1997).

The defining attributes of patient advocacy are therefore aligned with being an autonomous RN with ethical spheres of practice who protects the vulnerable patients' and promotes their well-beings.

Commented [NA6]: The above literature review is excellent. However, the precise defining attributes are not clear in this statement. This looks more like a definition of patient advocacy. You need to specifically list 3 or 4 defining attributes and explain each in light of the literature review.

Identifying Model and Contrary Cases

Walker and Avant (2011) identified a Model Case as a case which includes the use of all the attributes of the concept. Oppositely, a Contrary Case is an example of a scenario which does not entail the attributes of the concept. The models include a hypothetical critical care RN working in an ICU setting.

Model Case:

Jane, an ICU RN with two years of experience, is taking care of Mr. X, a 70 year old with hepatocellular carcinoma that is metastatic to the bones and lungs. After taking care of the patient for some time, Jane and Mr. X developed a trust- based relationship and became aware of all his concerns and wishes. One wish is that if his health declined without the presence of any family member, he would want someone to call the family and ask them to be present before further treatment unless urgently needed.

One morning, with a new medical team present, Mr. X's condition was declining gradually. The end goal was to electively intubate him however it was not severe to be done on the spot. He was alone and was unable to vocalize his concerns. The medical team decided to electively intubate him since they were already present in the room. None of the team members

were aware of Mr. X's concern of wanting a family member present at that time except for Jane. Therefore, she extensively talked with the team and raised Mr. X's concern; she told them to call the family, let them be present and then electively intubate. The team declined at first since they do not want to come back later to the unit and would want to get it over with, but Jane did not let this happen. As a primary RN for the patient, she said no so the team acknowledged Mr. X's wishes and emotions. They called the family and waited for their arrival. Jane advocated for her patient's wishes when he was not able to. Jane critically analyzed the situation and knew time was available for the family member to attend. She also did not let the medical team do what was suitable for them; instead she used a patient centered holistic approach.

Contrary Case:

Samantha, a new RN, is taking care of Joe, a 50 year old patient with Ewing's Sarcoma. Joe is admitted for pain management and is known for taking fentanyl and morphine drips for his excruciating pain. The orders for the narcotics mentioned have been expired and required renewal by the medical team. Samantha did not ask for renewal rather she asked for simple analgesics like paracetamol and tramal tablets. Joe mentioned that these medications do not help him and he usually takes morphine tablets at home. However, Samantha disregarded his concerns. She did not take into consideration the subjective feelings of pain nor did she take into consideration Joe's pain threshold level. Joe became in severe pain which caused a high rate tachycardia along with hypertension and diaphoresis. Samantha did not advocate for Joe's pain and did not reassure him; she did not take into consideration Joe's subjective well-being and she failed to ease his pain. This case shows that Samantha was not working in her ethical patient-centered sphere rather she was dependent on only the physician's orders.

Identifying Antecedents and Consequences

According to Walker & Avant (2011), antecedents and consequences help elucidate the context of patient advocacy. Antecedents are factors that must occur preceding the occurrence of the concept of patient advocacy. Contrarily, consequences are factors that occur after implementing patient advocacy.

Before implementing patient advocacy, several ~~attributes~~ factors must take place. These attributes could be related to the larger social contexts or to the personal ones, which Bu and Jezewski (2007) identified ~~them~~ as macro and micro-social levels respectively. At the micro-social level, one major factor for implementing advocacy is having a vulnerable population. Vulnerable patients cannot express their wishes, benefits and values and require a representative on their behalf (Bu & Jezewski, 2007; Kalaitzidis & Jewell, 2015). Other forms of vulnerability include illiterate patients, underprivileged, having certain medical disabilities and altered level of consciousness such as being in a coma.

The macro-social level, however, includes poverty, racism, and cultural disputes (Bu & Jezeweski, 2007). Patients with higher income are often seen as more educated ~~more~~ and privileged in terms that they can afford more medical treatments and therefore the RNs and physicians would advocate for their quality of care. Other attributes include organizational and administrative features such as having laws and policies in the clinical settings which protect the patient's values; one example is the patient's Bill of Rights (Abbasinia et al., 2020). It must also be noted in order for patient advocacy to take place; the RN himself/herself must have certain

qualities to accomplish it. The features include certain core competencies such as professional knowledge, critical thinking, moral compass, teamwork, empathy and autonomy (Mortell et al., 2017). In the end, the RN is considered the sole patient advocate and without these competencies, the RN would not find the motive to advocate.

Consequences of implementing patient advocacy include several positive outcomes. The patient's rights and needs would be accomplished and they would be content. The quality of life would be improved and empowered. On the other hand, the RN would have professional job satisfaction, increased self-esteem and increased support group (Abbasinia et al., 2020; Bu & Jezeweski, 2007). Also it is worth noting that there are certain times when risks of advocacy outweigh the benefits, negative consequences might arise (Josse-Eklund et al., 2014; Lindahl & Sandman, 1998). These consequences include patient dissatisfaction, risking safety and a decline in the quality of treatment and care. As for the nurses, negative consequences include conflicts with coworkers and the organizations, legal actions pursued by the organization on the RN as well as ethical distress and frustration (Abbasinia et al., 2020; Bu & Jezeweski, 2007).

Summary and Implications

Comprehending the concept of patient advocacy is one step towards implementing better quality of care for the patients. As a nurse's role starts with awareness and prevention, implementing the concept of advocacy must begin in the educational curricula of the nursing students as well as the medical students in order for them to grasp the notion through their residencies. Furthermore, mentors should also use patient advocacy in their workplace and be a role model for others. Certain factors that facilitate the mentors to use advocacy include having a support system from the organization, adequate staffing ratios in order to attend to each client's

needs and a moral compass to work by. Successful implementation of patient advocacy would also encourage the RN to climb the career ladder and become more autonomous and confident.

The concept is abstract and multifaceted; therefore a single definition for patient advocacy is not easily achievable. Advocacy's implications are interconnected between both the patient and RN therefore improving the conditions for advocacy should take into consideration both. Supporting an autonomous RN in protecting the patients' rights, adhering to their concerns and working within the moral sphere would promote the optimal quality of care. The synonyms would include protecting from harm, autonomy and accountability, ethically oriented and being an egalitarian. Nurses must be aware that their actions would directly impact the vulnerable patients' well-beings so they must take into consideration all the positive and negative aspects of said actions.

	Possible Points	**Points Awarded**	**Comments**
Background and purpose clearly described	**10**	10	Excellent
Demonstrates analysis of relevant literature to determine definitions and uses and arrives at core defining attributes	**20**	15	You demonstrate an excellent review of the concept although there is still more reliance on the Abasinia et al. paper. The major weakness is that the attributes are not clearly listed and explained.
Creative and accurate development of model cases	**20**	20	Excellent
Logical and clear development and discussion of antecedents and consequences based on the literature	**15**	15	Excellent. The paper flows very well

Conclusions regarding concept definition, usefulness, application, research	**15**	14	Excellent although you can expand further on application and research
Paper organization, clarity of writing, correct spelling, punctuation, sentence structure, grammar	**10**	9	Well done. Some errors noted. See corrections.
In-text citations and reference list are complete and properly formatted in APA style	**10**	10	Excellent
Total	**100**	93	This is an excellent paper, although the core attributes and concept definition need to be refined. I will be happy to help if you want to submit this for publication. A more extensive review must be done though.

Children's motivation concept analysis

Hariri School of Nursing at the American University of Beirut

NURS. 500 Course: Theories, Concepts, and Frameworks for Advanced Nursing Practice

Given by Dr. Nour Alayan

December 2021

Abstract

Children's motivation~~s are~~ is associated with internal and external factors that lead to the development of specific outcomes ~~for children~~. Many non-communicable health problems affect children, such as smoking, drinking alcohol, lack of physical activity, and poor dietary habits. School nurses are in a position that could enhance children's motivation to change their behavior. This paper aims to clearly understand the concept of children's motivation. This will assist us to distinguish this concept from other concepts and help school nurses to identify the factors that could affect children to change their behavior. The Walker and Avant (2011) method is used to ~~analyzing~~ analyze this concept. Model cases and contrary cases are used to identify the meaning of this concept. The core attributes of children's motivation ~~is~~ are identified as "competence" and "confidence". Children ~~can~~ are motivated to? accomplish any action if they feel that they are confident and competent in doing this act. The antecedents and consequences are identified after accomplishing a clear definition of this concept. The antecedents are classified into internal and external factors. The internal factors on children's motivation are children's past life experience, seeking ~~for~~ challenges, and attempts to improve themselves. However, the external factors are the instructions from school nurses or parents, or teachers. The consequences of children's motivation toward a ~~benefit~~ goal include children's self-satisfaction, parents' satisfaction. Moreover, the children will become more mature. School nurses are ideally situated to assist children's motivation to become healthier.

Key words: **motivation, children, concept, analysis, core attribute, antecedent and consequence.**

Commented [NA1]: Too vague

Background and purpose of study:

A child is defined as a person under the age of 18 years ~~old~~(White, 2020). ~~Children are maturing and~~ many health issues may emerge during ~~this time~~childhood and persist into adulthood (Bonde et al., 2014). Many non-communicable health problems affect children, such as smoking, drinking alcohol, lack of physical activity, and poor dietary habits (de Buhr et al., 2020). Child obesity is one of the health issues that may affect children's health later when they grow up. Over the last 30 years, obesity had become a worldwide epidemic. According to the World Health Organization (WHO), 43 million children suffered from obesity or being overweight specify year or period. Furthermore, the prevalence rate rise~~d~~s from 4.2 percent in 1990 to 6.7 percent in 2010, and many chronic diseases, such as type 2 diabetes and heart disease could be developed in adulthood. As a result, the number of mortalities and morbidities will rise (Pan et al., 2018). Child obesity becomes a result of ignoring that this is a problem and we should be aware of it (Schroeder et al., 2016). Providing educational sessions in schools could be a solution to increase children's motivation in order to become healthier~~.~~ (de Buhr et al., 2020). However, children's motivation can be influenced by both internal and external factors (Pan et al., 2018). Thus, a nurse needs to understand the factors that affect changing children's behavior. The purpose of this paper is to ~~deeply understand~~analyze the concept of children's motivation. This process will clarify the meaning of children's motivation and what are the antecedents and consequences of this concept.

Methodology of the concept Analysis

Walker and Avant~~s~~ (2011) ~~are used to~~ identify ~~the~~ eight steps for concept analysis.~~:~~ First, we should select a concept. Second, we should determine the purpose of the analysis. Third, we should identify all the uses of the concept from literature.~~;~~ Fourth, determine defining attributes. Fifth, identify a model case and contrary cases. Seventh, identify antecedents and consequences. These steps help us to clearly understand the concept. ~~The first step is children's motivation is a concept for analysis that was chosen and other steps will be discussed under the first step.~~

~~**Literature Review**~~

Commented [NA2]: No punctuation in titles. First level heading must be centered according to APA style Margins are narrow. Check APA requirements

Formatted: Centered

Commented [NA3]: Too old

Commented [NA4]: Needs rewording

Commented [NA5]: Nice intro. There's too much focus on obesity which may be misleading to readers. The focus should be shifted to motivation and how it affects behavior without focusing on any specific behavior.

Formatted: Centered

Formatted: Indent: First line: 0.5 cm

A literature review was done to identify all uses of the concept, its defining attributes, antecedents, and consequences. ~~by using the keywords childrens' motivation which was conducted through~~Databases were searched including PsychInfo, Medline, PubMed, ~~and~~ CINAHL, and ~~.~~Google scholar. The search term ~~was~~ used for this topic is children's motivation. Boolean operator "OR" was used to combine motivation, impulses, and incentive terms. However, the Boolean operator "AND" was used to combine two terms.

~~Children's Motivation~~

Formatted: Indent: First line: 0 cm

Children's motivation is identified as ~~when children are willing~~the child's willingness to accomplish a~~ny~~ task~~s~~ (Abendroth & Whited, 2021; Bagci, 2018; Grenner et al., 2021; Steinmayr et al., 2019). While others describe ~~the~~ children's motivation as a level of self-determination when children are confident to select any choice without guidance (Deci et al., 1999). Moreover, the intrinsic motivation of children is revealed to the enjoyment to do the act (Abendroth & Whited, 2021). Self-efficacy is a powerful source of children's motivation towards changing their behavior (Bagci, 2018; Grenner et al., 2021). These concepts are very important because children are seeking challenges to become self-dependent, they can do the tasks without instructions from teachers, parents, or any other healthcare providers. Their performance will be improved when they become confident with the information that they have (Grenner et al., 2021). Moreover, this concept is very important for school nurses who are dealing with children who have a health problem to know what are the factors that affect their motivation towards learning or changing their behaviors.

Poor motivation among children is associated with a lack of support from teachers, school nurses, and parents(Bonde et al., 2014; Demetriou et al., 2019; Murdock et al., 2000; Pavalache-Ilie & Ţîrdia, 2015). Based on this statement, one study showed nurses could play a major role to enhance children to change their behavior by explaining to children the meaning of being overweight children by using the Body Mass Index Curve (BMI)curve. This study showed that nurses have a positive impact on children to lose weight. However, Bagaci (2018) reveals in his study that the family is not a factor that influences children's motivation. Moreover, there

is evidence that revealed that psychological problems could be a factor that affects children's motivation (Pan et al., 2018). There are different methodologies used in most of the articles, most of them are qualitative studies and a large sample was used that enhances the generalizability of studies. In addition, there are different scales used in different articles. One of the studies uses the Behavioural Inhibition/ Behavioural Activation Scales to measure the factors that affect motivation (BIS/BAS)(Pan et al., 2018).

Commented [NA6]: I think this should be your introduction with a few modifications and adding the purpose of the paper.

Commented [NA7]: This may fit more under research implications

The uses of the concept

Based on the literature review, it is evident that the children's motivation concept is used in academic and health settings. In an academic setting when children are interested to learn or doing any activity due to many factors as mentioned in some studies. For example, Murdock et al., (2000) reveal that there is a strong connection between the perceived children's motivation in school and their teacher. Moreover, Cejudo et al. ,(2019) explain that awards and activities are the factors that enhance children's motivation in school. In addition, Steinmayr et al. ,(2019) expressed that hope of success and fear of failure is a positive impact on students' motivation in school. While ~~as~~ the usage of this concept in a health setting is applied when the school nurse can ~~enhance~~ help children to change their behaviors. One of the studies which are done by Bonde et al. (2014) in a school assured that school nurses could play a major role in children's motivation. The technique is used by showing children's position on the BMI curve. This technique enhances children's motivation to change their lifestyle and losing their weight after one year. This evidence revealed that there is an association between the school nurse and children's motivation. Moreover, another study revealed that nurses could encourage children to change their lifestyles and do physical activity to prevent obesity and other diseases (McWhorter et al., 2003).

Commented [NA8]: unclear

Defining Attributes~~:~~

Formatted: Indent: Before: 0 cm, First line: 0 cm

Defining the attributes of the concept could provide special meaning to discriminate the concept from other concepts (Walker& Avant, 2011). Both competence and confidence are the terms used to define children's

motivation. According to the Oxford dictionary, the terms self-determination, self-dependent, and satisfaction reflect the term of confidence and competence.

Competence - is the capability of students to select their social setting to meet their goals and objectives (Code, 2020). Deci et al. (1999) define children's motivation at a level of self-determination when children are confident to select any choice without guidance (Deci et al., 1999).

Confidence is: when children are self-assured that they can do the task. Many authors identify children's motivation when they are willing to accomplish any tasks after they become confident enough to complete the task -(Abendroth & Whited, 2021; Bagci, 2018; Grenner et al., 2021; Steinmayr et al., 2019)

A model case

Lara is a nursing student,student; she is responsible to take care of three patients in an oncology department. She is confident in her skills, and she can give treatment and answer all the questions related to patients' conditions. The instructor has praised her for her competence in handling and answering all the questions that were thrown at her by patients and healthcare workers. She is proud of herself and has become more confident. This encouragement led her to be more motivated to gain more knowledge. She got the highest grade among all students in the second semester.

A model case is an example that contains the most defining attributes of the concept that comes from the literature. In this created example, Lara exhibits the defining characteristics of confidence and competence in their performance while she is providing the care of the patient in the oncology department. Feedback from her instructor encouraged her to work more on herself and initiate her intrinsic motivation to become self-dependent.

A contrary case:

Commented [NA9]: cite all references supporting your argument here

Formatted: Indent: First line: 0 cm

Carla is 16 years old and pregnant. She joins the health nursing program for the first time. She is starting to become confident after starting to learn healthy habits during pregnancy and gaining parenting skills for her infant.

A contrary case is named when the term of the concept is not identified as a focus case that is defined in the attribute section of this paper (Walker & Avant, 2011). The confidence term that is used in the contrary case has a different meaning than how it is previously defined in the model case. In the contrary case, the term "confidence" is revealed when the client starts to be more confident.

Antecedents and consequences~~:~~

Code (2020) reveals that several internal and external factors could affect children's motivation (Code, 2020). The internal factors on children's motivation are children's past life experience, seek for challenges, and attempt to improve themselves. Moreover, refusing to fail is a significant predictor of children's motivation (Steinmayr et al., 2019). However, the extrinsic factor is any external stimuli that influence children's motivation. There is evidence showing that school nurses are associated with children's motivation towards changing their behavior (Bonde et al., 2014).

~~In consequence of these antecedents, p~~Parents 'satisfaction could be a ~~result~~ consequence of children's motivation towards a good thing. Moreover, it could motivate children to accommodate to a healthy lifestyle. The last consequence is self-satisfaction that could enhance the personalities of children.

Conclusion

Concept analyses allow us to clarify the meaning and the initiating hypothesis that led to this concept. Defining the core attribute of the concept and selecting two cases could provide a clear understanding of the concept. In-Depth analysis could help us to identify the antecedences and consequences of children's

Formatted: Indent: First line: 0 cm

Commented [NA10]: elaborate more

Commented [NA11]: how? So is this an antecedent?

Commented [NA12]: What do you refer to?

motivation. School nurses are the ones that can support children to motivate them to change their behaviors and become healthier.

	Possible Points	**Points Awarded**	**Comments**
Background and purpose clearly described	**10**	8	Introduction is interesting but may be misleading. Check comments above.
Demonstrates analysis of relevant literature to determine definitions and uses and arrives at core defining attributes	**20**	15	There is a clear effort into the analysis although the citations are not evident within the core attributes section. This is a must to show that the attributes you chose are indispensable characteristics of the concept and show over and over in the literature.
Creative and accurate development of model cases	**20**	20	Well done
Logical and clear development and discussion of antecedents and consequences based on the literature	**15**	12	Antecedents and consequences must be supported by more citations. More elaboration is needed.
Conclusions regarding concept definition, usefulness, application, research	**15**	10	Definition reads well with some elaboration on usefulness. A more in-depth elaboration on implications is needed.
Paper organization, clarity of writing, correct spelling, punctuation, sentence structure, grammar	**10**	7	The paper flows well and is well organized. However, many sentences are unclear making the paper difficult to read. Many grammatical and structure errors were noted. Consulting the writing centre is recommended.
In-text citations and reference list are complete and properly formatted in APA style	**10**	9	Well done. Headings and margins must be edited to follow APA style.
Total	**100**	81

AMERICAN UNIVERSITY OF BEIRUT FACULTY OF MEDICINE

HARIRI SCHOOL OF NURSING

MINUTES OF GRADUATE STUDIES COMMITTEE MEETING

October 28, 2013

Time and Place: The meeting came to order at 2:00 pm, Hariri School of Nursing conference room 605, 6th floor.

Presiding: Dr. S. Noureddine

Members Present: Drs. M. Clinton, N. Dumit, L. Farhood, L. Younan, Mrs. M. Arevian.

Members Absent: Dr. H. Huijer (excused) & Ms Nelly Korkelian (graduate student representative, excused).

Order of Business:

1. Approval of and update on Minutes of October 2, 2013:

The minutes of October 2, 2013 were approved as circulated.

- On the issue of recruitment visits to hospitals and directors of nursing, Drs. Clinton and Younan went to BMG Hospital and talked to Mr. Abbas Hamieh quality Assurance coordinator and suggested to send students for their residency. As it is a small hospital with 40 beds only, they do not have many nurses to send for masters; may be one nurse per year.

- Dr. Younan called the Levant Hospital and talked to the nursing director; all nurses working there have TS in Nursing and so they cannot join the Masters program before completing a BSN degree.

- Dr. Noureddine told the members that AUB is planning to do an Open House on Graduate Studies in November 28, 2013 at 1 pm and it will lasts at least 2-3 hours. This information needs to be relayed to the directors of nursing contacted for recruitment.

2. Discussion of Proposed Students' Projects:

- **Rawan Raad** wants to do a project about redesigning the nursing staff development program at Bahman Hospital. Readers are Dr. Dumit and Dr. Clinton. Dr. Clinton pointed out that in case data collection is needed, like for a needs assessment then IRB approval is required. The committee approved the project..

- **Solange Shweifaty:** Setting up a headache clinic at AUBMC. Readers: Dr. Darwish and Dr. Noureddine. The members suggested changing the title to: Clinical Guidelines for a headache clinic. It was approved with the recommendation that it be concentrated on the clinical aspects not the administrative aspects of the clinic.

- **Serpouhi Toriguian**: A Disciplinary Outreach Program for Older Adult Discharged from AUBMC. Readers: Dr. Noureddine and Mrs. Arevian.The members suggested to change Program to Model and that the students mentions in the prospectus that she chose this, because of her experience during her residency in Geriatric Care. Data collection like asking physicians about the need for such a service would entail IRB application; otherwise the project can be based on the literature. The project was approved.

- **Amali Saab**: Development of an Early Mobility Protocol for Critically Ill patients The project was approved.

- **Fatima Dirani:** Knowledge Assessment of Pregnant Women of the Effects of Smoking (Active and Passive) on their Health and that of their Fetus. Fatima changed her proposal from community to maternity. Dr. Clinton reported that at least 2 similar studies are being done at AUBMC so the committee recommended that if she wants to pursue this topic, she has to do the study in villages or change the topic.

3. Proposal to replace EDU 317 by EDU 318 in the Minor in Education

Dr. Noureddine shared with the committee members the AUB catalogue description of EDU 317 and E$DU 318 and a detailed course syllabus for EDU 318. The committee approved replacing EDU 317 with EDU 318 for the minor in education since the former deals mostly with psychological and aptitude testing whereas the latter is geared towards developing tests to assess learning in the context of education. The change will be included in the catalogue 2014-2015.

4. Names of the Four tracks to appear on Student Degrees in English and Arabic

Based on the recommendation of the Graduate Council, the members deliberated how to include the tracks on the MSN certificate. It was decided to have Masters of Science in Nursing on top then under it in brackets the name of the track.
On the certificate what will appear is: Master of Science in Nursing; in Arabic ماجستير في علوم التمريض . The members tracks will be put as follows:

- Administration Track فرع الإدارة
- Adult Care Track فرع العناية بالراشدين
- Psychiatry Mental Health Track فرع الصحة العقلية والنفسية
- Community Track فرع صحة المجتمع

Once the revised MSN curriculum takes effect then the adult care track will be changed into adult care gerontology فرع العناية بالراشدين والمُسِنين

5. <u>Revised MSN Curriculum:</u>

The team resumed discussion of the revised MSN curriculum.

- The administration MSN curriculum proposed by the administration team was approved. MNGT 338, MNGT 350L and PSPA 370 are considered equivalent and so will appear as such in the new curriculum. The members suggested that PSPA 370 is better because it is given every year whereas the other 2 courses are not offered every year. NURS 507 was reduced to 2 credits. HMPD 348 is not included in the new curriculum; yet students will take a 1 credit budgeting course offered by Dr. Younan. A 3 credit informatics course was added. The new proposed curriculum track is 36 credits, including 3 credits of elective. However, with adding the statistics course it will amount to 38 credits.

- Dr. Noureddine presented next the revised adult care curriculum in which the 1 credit informatics course and NURS 527 to be taken by students in all tracks are added. The 4 credits course advanced practice in adult care to cover gerontology and health promotion and the clinical hours needed for certification was added. NURS 509 was reduced to 2 credits. With this a total of 38 to 41 credits would result (depending on whether students will do project or thesis), even without any electives and not including the statistics course. A number of strategies were entertained to reduce the number of credits, such as offering NURS 509 only to those students doing a minor in education or incorporating its content in N501 and adult care courses or reducing it to 1 credit. The education content was deemed essential for clinical track students. Another proposition was to incorporate the 1 credit informatics content in NURS 527.

- The committee went back to discussing the core courses, especially NURS 500 and 501, in light of the graduate retreat recommendation to reduce the number of credits for these courses. The consequence of increasing the number of credits,

especially if the total number will not be the same for all tracks, was discussed. For instance the psychiatry track, with the addition of NURS 527 and the 1 credit informatics course would be 44 credits. Increasing the number of credits may reduce enrollment in the MSN program. After extensive deliberations, Dr. Clinton suggested 3 options for NURS 500 and 501:

1- Reduce N500 to a 1 credit course and keep 501 as a 3 credits course.
2- Combine NURS 500 and 501 into one 3 credits to be given alternatively by Drs. Clinton and Farhood.
3- Keep N500 a 2 credit course and reduce N501 to 2 credits.

- No agreement was made and the group decided to resume discussion in the next meeting. The issue of adding the statistics course is still to be finalized. Dr. Noureddine proposed that this 2 credit course ought to include one session about multiple linear regression, since students come across such analyses in their readings of research articles.

6. Miscellaneous:

- The MSN exit, satisfaction and alumni surveys had a very low response rate last year so the findings are not very useful in planning strategies for improvement. Also only one student had qualitative comments.
- Dr. Noureddine relayed Dr. Suha Fares Proposal to name her course: Biostatistics for Health Care instead of Biostatistics for Nurses so that it can attract students from other disciplines.

7. Adjournment: The meeting was adjourned at 4:15 pm.

Elhame Rustom
Recorder

AMERICAN UNIVERSITY OF BEIRUT FACULTY OF MEDICINE

HARIRI SCHOOL OF NURSING

MINUTES OF GRADUATE STUDIES COMMITTEE MEETING

September 28, 2015

Time and Place: The Meeting came to order at 2:00 pm, Room 605, 6th floor, School of Nursing

Presiding: Dr. S. Noureddine

Members Present: Drs. M. Clinton, H. Darwish, N. Dumit, S. Fares, L. Farhood, G. Honein and Mrs. M. Arevian

Members Absent: Dr. H. Huijer (Excused)

Order of Business:

The chair welcomed Dr. G. Honein as a new member of the Graduate Studies Committee.

1. **Approval of and Update on Minutes:**

   The minutes of May 18, 2015 were approved as circulated. The MSN proposal was officially approved by the Board of Graduate Studies; a letter was sent by Dr. Ibrahim Osman September 17, 2015.
   Project of Hasmig Tchaparian was approved on May 20, 2015
   Project of Abdel Wahab El Firkh was approved on August 5, 2015

2. **Approval of Projects**

   The Committee reviewed a number of projects and acted on them as follows:

   Mohammad Abbas: A Patient Center Approach to Inter-Shift Hands offs. 1st reader: Dr. Lina Younan; 2nd reader Dr. Nuhad Dumit . The Committee expressed concern regarding the feasibility of doing the literature review, developing the video, getting the needed approvals and pilot testing it then getting feedback of the nurses iin a reasonable amount of time. The recommendation was to have the literature review, development of the video and a proposal for pilot testing and its implementation as the requirement for the project. If Mohamad could do more than this in the time allotted (2 semesters usually for a project), then fine.

   Rachel Sabbagh: Management of Borderline Personality Disorder Patients. An

Educational Package for Pediatric Nurses. 1st reader: Dr. L. Farhood; 2nd Reader: Pending. The Committee approved the project.

Aida Zaiter: Skin Care Management during Radiation therapy for breast cancer patients. A hospital Protocol. 1st reader Dr. S. Noureddine; 2nd reader Dr. Fadi Geara pending his approval. The Committee approved the project.

Farah Salhab: Towards a Discharge Planning Policy for Adult Oncology Patients at AUB MC. 1st reader: Dr. M. Clinton; 2nd reader: Dr. Arafat Tfayli. The project was approved.

Murielle Madi: Challenges Novice Nurses face in the First year of Practice: A Thematic Analysis of Focus Group Data. 1st reader: Dr. M. Clinton; 2nd reader: Dr. D. Madi pending her approval. The project was approved. Reader assignments was discussed with concerns expressed for assigning readers with no experience. The group agreed that doctorally prepared faculty members may be assigned as project readers initially as second readers mentored by senior faculty till they develop enough expertise to serve as first readers.

3. Dates for the Comprehensive Exam AY 2015-2016:

For Fall Semester the date of the comprehensive exam was decided on Friday December 11, 2015, 9 am -1 pm
For the Spring Semester the Comprehensive exam was scheduled on May 16, 2016

4. MSN Student Surveys:

The group went over the results of the MSN student exit and satisfaction surveys. The results are congruent with previous years and no major findings were noted. This year again the response rate is 21%, which would bias any reported results. The group debated whether students' clearance ought to be withheld till they complete the exit survey, yet this may not be ethical. The low response rate to online surveys is a problem across AUB.

5. Academic Evaluation

Name	Track	Sem. GPA	Cum. GPA	Comments
Mohammad Abbas	Administration		85.7	Finished his residency at AUBMC Summer 2015
Hana'a Abdul Salam	Administration		88.6	Finished her residency at AUBMC. Completed the SHARP certificate this past summer. Working on her project proposal

Joyce Abi Kharma	Adult Care		89.5	Doing her residency at the University of Maryland - USA
Marwa Ahmad	Community & public Health		83.4	Still taking courses
Lina Ahmadieh	Administration		91.6	Completing her course work and next summer will do residency in AUBMC
Abdel Wahab Al Firkh	Adult Care		88.1	Working on his project. Completed his residency at AUBMC.
Shadi Al Halabi	Administration		89.8	Doing his course work
Mariam Al Sabae	Administration		88.1	Doing her course work
Alaa Awwad	Adult Care		86.4	Doing her course work
Rayan Cheikh	Administration		89.2	Doing her course work and registered for the comprehensive exam
Fatima Chreif	Administration		86.1	Doing her course work and registered for the comprehensive exam
Ingrid Corbani	Adult Care		88.1	Completing her project
Aya El Khatib	Adult Care		90.2	She is back as regular student
Rajaa Fadel	Administration		88.4	Took leave of Absence for one year
Moh'd Hussein Haidar	Adult care		85.3	Doing his residency at the University of Maryland, USA this Fall
Nada Haidar	Administration		87.1	Doing her residency in AUBMC and the Order of Nurses in Lebanon
Grace Hakim	Adult care		88.11	Completed the SHARP certificate program & now taking adult care courses
Lynda Hashem	Administration		90.6	Doing her course work
Yara Hazouri	Administration	95	94	Doing her course work
Bachir Itani	Adult Care		87.6	Working on his project
Nour Jabbour	Psychiatric mental health		84.7	Doing her residency at the Ministry of Public Health
Reem Kassem Youssef	Adult Care		N/A	Withdrew from the MSN program Fall 2014-15
Ali Krayani	Adult care		89.3	Doing his residency at AUBMC
Murielle Madi	Administration		91.5	Finished her residency at Johns Hopkins University.

				Project just approved.
Rony Merhi	Administration	89	92.1	Doing his course work
Najla Moufarrej	Adult Care		84.1	Doing her residency at AUBMC with Rebecca Al Asmar
Dina Mouzayyen	Psychiatric mental health	91	85.3	Doing her residency at the Ministry of Public Health and the World Health Organization
Rachelle Sabbagh	Psychiatric mental health	92	88.5	Doing her residency at Johns Hopkins University
Hana Sahyouni	Community & public Health		89.7	Finished her residency in the Summer at the Ministry of Public Health
Farah Salhab	Administration		89	Did her residency at Johns Hopkins University. Project just approved
Mariam Shatila	Community & public Health and Adult care		86.1	Doing her residency at the Ministry of Public Health
Roula Shehadeh	Administration		87.5	Will do her Comprehensive exam in the Fall
Mona Shorba	Administration		88.2	Will do her Comprehensive exam in the Fall
Wafaa Skaf	Administration		85.1	Doing course work
Siham Sleiman	Community & public Health		84	Did not succeed in comprehensive exam – She will repeat it this Fall. Communicated with the University of Michigan for her residency in January. She is planning to focus on gerontology
Eva Tabarani	Administration		90.8	Did her residency in Johns Hopkins University.
Hazmig Tchaparian	Administration		89.1	Working on her project
Hayat Zaatar	Administration	91	87.2	Doing her residency at AUBMC
Aida Zaiter	Adult Care		89.9	Finishing her residency at AUBMC. Project just approved
Hind Abdel Massih	Adult Care		82.4	Will send her a letter to remove her off probation
May Dassouki	Administration		76.3	She is coming back to nursing after taking

				courses at FHS. Will be placed on probation.
Ahmad Ghaddar	Administration	90	89.3	Doing course work
Sara Abu Rihan	Administration		85	Reported to her advisor her intention to transfer to MPH due to the availability of 100% Scholarship
Victoria Semaan	Adult Care		90.1	Will send her a letter to put her off probation
Hanadi Saad	Community & Public Health		87.4	Doing her coursework
Reem Salem	Adult Care		90.1	Doing course work
Victoria Semaan	Adult Care		90.1	Will send her a letter off probation
Linda Mardirian	Administration		85	Accepted on probation. Will evaluate her status end of Fall semester
Joelle Massouh	Adult Care		96	Doing course work
Mariam Assaf	Community & Public Health		79	Doing course work
Joelle Bassila	Administration		92	Doing course work
Aya El Khatib	Adult Care		90.2	Resumed her studies after taking time off last year.
Ahmad Hassan Shatila	Administration			Communicated by email his plan to resume his studies but did not register for classes
Ammar Zahreddine	Psychiatric Mental Health & Community and public health		90	Working at AUBMC and MARSA. Dr. Noureddine sent him emails to enquire about his progress on his thesis proposal but he did not reply. An extension of his academic status was approved till May 2014.

6. <u>PhD proposal:</u>

Dr. Noureddine asked the group if they had comments or suggestions related to the PhD proposal. The members present had no comments on the content or format of the proposal. Dr. Clinton requested written endorsement of the proposal by the Faculty of Health Sciences and the Faculty of Medicine before casting a vote about the proposal. In light of this, the voting was deferred to the next Graduate Division meeting.

7. Election of a Student Representative on the Graduate Studies Committee:

The group agreed to hold elections for a student representative on the Graduate Studies Committee during the Town meeting that the MSN convener shall call for.

8. Others:

a. Dr. Farhood expressed concern over the kinds of projects that students are doing and the lack of interest in thesis. Possible ways to encourage students to do thesis and research projects were entertained. A major barrier noted was the eagerness of students to graduate quickly from the MSDN program.

b. Dr. Dumit noted that the current cohort of students in the Nursing Administration track is taking NURS 525 as a 3 credits course whereas the at the time of their admission the course was worth 2 credits. In order to avoid having students take an extra credit, Dr. Dumit requested that students be allowed still to graduate with 36 credits only, by allowing them to register for 2 credits of coursework instead of 3. The group approved the recommendation. The Registrar will be informed accordingly.

9. Adjournment: The meeting adjourned at 5.55 pm

Self-Assessment

My research, teaching and service are still streamlined with the nursing ad health workforce issues, including nursing work environment, management and administration, leadership and continuing education.

Research:

I initiated a regional study addressing "Perspectives of Registered Nurses on **Refugee Healthcare** in Lebanon and Jordan: A multi-site cross-sectional study (PROfILE)". Funded by the Global Health Institute [GHI] at AUB ($20,230).

Two articles published related to this project:

1. Dhaini, S.R., **Dumit, N.** ***(Corresponding author),*** Honein-Abouhaidar, G., Al Zaru, I.M., Gharaibeh, M., Reynolds, N.R., Davidson, P.M., Nabulsi, D, (2019). Perspectives of Registered Nurses on refugee healthcare in Lebanon and Jordan (PROfILE): A multi-site cross-sectional study protocol. *J Adv Nurs*. 2019;00:1–9. DOI: 10.1111/jan.14217

2. Dumit, N.Y. & Honein-AbouHaidar, G. (2019). The impact of the Syrian refugee crisis on nurses and the healthcare system in Lebanon: A qualitative exploratory study. *Journal of Nursing Scholarship, 00*, 289-298. doi:10.1111/jnu.12479 https://authorservices.wiley.com/api/pdf/fullArticle/16417509

Other publications related to previous research projects include:

3. Alameddine, M., Kharroubi, S.A., **Dumit**, **N.Y.** ***(Corresponding author)***, Kassas, S., Diab-El-Harake, M., & Richa, N. (2019). What made Lebanese emigrant nurses leave and what would bring them back? A cross-sectional survey. *IJNS*, online: https://doi.org/10.1016/j.ijnurstu.2019.103497

4. Dhaini, S.R., Ausserhofer, D., El Bajjani, M., **Dumit, N.,** Abu-Saad Huijer, H., Simon, S. A longitudinal study on implicit rationing of nursing care among Lebanese patients – Study protocol. (2019). *J Adv Nurs.* 2019;75:1592–1599. DOI: 10.1111/jan.14012

5. Dhaini, S., Simon, M., Ausserhofer, D., El Bejjani, M; Abed Al Ahad, M., **Dumit, N**; Huijer, H. (2019). A longitudinal study on implicit rationing of nursing care among Lebanese patients–study protocol. *Journal of Advanced Nursing, 75*, 1592–1599. DOI: 10.1111/jan.14012

6. Noureddine, S., **Dumit, N. Y**., Maatouk, H. (2019). Patients' knowledge and attitudes about Myocardial Infarction. *Nursing*

knowledge and attitudes about Myocardial Infarction. *Nursing & Health Sciences;* 1-8. https://doi. org/10.1111/nhs.12642 ePub August 14, 2019

In addition to 2 oral presentations in international conferences:

Fares, S., **Dumit, N.Y.,** & Richa, N. (2019). Continuing Nursing Education of Registered Nurses and Nurse Managers: Perceptions, Priorities and Barriers, presented at the ICN 2019 congress in Singapore, June 30, 2019.

Dumit, N.Y., Daouk-Oyry, L., & Bou Ali, L. (2019). Nurses' Absenteeism and Job Demands, Job Attitudes, and Personal Characteristics, presented at the ICN 2019 congress in Singapore, June 28, 2019.

Teaching:

In spring 2019, I taught:

1. NURS 525, Leadership Theories and Behaviors for Nurse Managers, graduate course 3 credits. AND

2. NURS 606, Qualitative Research, PhD course, 2 credits.

Personal Statement

In fall 2019, I taught NURS 527, Systems Approach to the Development and Evaluation of Health Care Services, graduate course, 3 credits.

I served as the Chair of the thesis committee for Ms. Yara Hazouri titled "Quality of Nursing Work Life among Lebanese Nurses", a national study, School of Nursing, AUB, 2019.

Administration:

I served as the Undergraduate Division Convener, thus, have to overlook the teachings of 15 faculty members for 197 students, though the division encompasses 13 faculty members.

Service:

I am still serving on several School and AUB committees including: GSC and Advisory of HSON, Senate and Core Curriculum at AUB, as well as chairperson of the Senate Steering Committee. Moreover, I served on an Adhoc committee for the search of the AUBMC Medical Center Director.

I am a reviewer for over 8 refereed journals, abstract reviewer for 2 international conferences [ICN & WIN], and appraiser for McMaster Online Rating of Evidence (MORE).

I am still a Member of the Scientific Steering Committee for the ICN Code of Ethics.

I served as moderator to the ICN Policy Cafe on ethics in the ICN congress in Singapore 2019

Still serving as a member of administrative committee of the School

I am the co-chair of the Steering Committee of Salim Hoss Bioethics

I resumed my in-kind position as CME co-director

Other scholarly activities:

1. Invited as a speaker at a symposium titled "**Nursing Profession and the UN Global compacts for Migration and on Refugees**". The symposium was organized by International Centre on Nurse Migration, CGFNS International that took place at the ICN 2019 congress in Singapore June 29, 2019.

2. Invited to an "Invitational, multi-stakeholder, international colloquium" titled, "NURSING. POWER. ADVOCACY. Helping Nurses Deliver: Conversations on nurses, nursing and power" co-hosted by the International Council of Nurses (ICN) and the Canadian Nurses Association (CNA) in Vancouver, Canada, June 1-2, 2019.

3. Invited to the 'First Saudi Forum: Eitizaz' [Pride] to speak on "My Journey as a Nurse Leader" among 5 regional leaders in nursing and honored by the KSA minister of health, Riyadh, KSA March 17, 2019.

1. **November 2019:** Reviewer of the WHO/EMRO UHC curriculum guide for undergraduate level students in the health professions.

2. **April 2017-2019:**Technical Coordinator for the Mohammed Al Mana' College of Health Sciences (KSA) academic and administrative consultation agreement with AUB Regional External Programs

Next Year Plan	My next year plan is the following: **Research:** 1. Write manuscripts emanating from the PROFILE study 2. Collaborate on a project led by Columbia University named: REfugees Act and Communicate for Health (REACH): Using Technology to Increase Health Literacy and Health Care Access for Refugees in Turkey and Lebanon; IRB recommended revisions are underway. 3. Continue as CO-PI on the "The Lebanese Nurses' Health Study". **Teaching:** Continue teaching same graduate courses but change format to blended espcially the MSN courses. Supervise MSN theses as chairperson or member; already I am serving as chairperson on one and 2 are being prepared. **Service and Others:** Continue the same administrative responsibilities, service to HSON, AUB and the profession, and other scholarly activities.

Comments

Chair/Convener Comments

Research Comments	Dr. Dumit continues her research on nursing workforce issues and refugee health in relation to nursing and the health care system. She had 2 publications in 2019 in addition to 6 publications that were in progress or as ePub (all 6 were published early in 2020). One 2019 publication was about the impact of Syrian refugee crisis on nurses and the health care system where she is first author, and the other was the protocol of a study on rationing nursing care where she is corresponding author. Both publications are in Q1 journals in nursing. She did not submit a new grant this year due to the current situation but is continuing her PROFILE study for which she got funding January of 2019. She presented the results of her absenteeism study and continuing education study at the conference of the International Council of Nurses (ICN) in Singapore as oral presentations.

Service Comments	Dr. Dumit continues to be the convener of the undergraduate division and coordinator of the Nursing Administration and Management track in the MSN program. She continues to serve on the Advisory, Administrative and Graduate Studies Committees, in addition to representing HSON on the University senate. She was chair of the Senate Steering Committee this past year and member of the Core Curriculum Committee. She was appointed by the AUB Research and External Programs as technical coordinator for the Al Manaa college of Health Science project, Saudi Arabia. In addition, she served on the search committee for the hospital director for AUBMC, as co-director of Continuing Medical Education at AUBMC, and co-chair of the Steering Committee of the Salim El Hoss Bioethics and Professionalism program. In 2019 in terms of professional service, Dr. Dumit was elected as member of the Steering Committee of the ICN code of ethics. She was invited to present her journey as a leader in Saudi Arabia at the Ministry of Health. She was also invited by ICN to a symposium and by the Canadian Nurses Association where she gave more than one presentation related to ethics in nursing and the impact of refugees on the health system. She continues to serve as reviewer for many peer reviewed journals, in addition to reviewing abstracts for the WIN and ICN conferences. She also serves as appraiser for the McMaster Online Rating of Evidence (MORE). The WHO/EMRO office invited Dr. Dumit to review the curriculum guide for undergraduate students in the health professions.
Teaching Comments	In Spring of 2019, Dr. Dumit taught N520 (ICE score 4.83) and N606 for the first time for doctoral students (ICE score 4.86). In the Fall semester, she taught N527 (ICE score 4.71) and N525 (ICE score 4.66). She also gave a workshop on conducting qualitative interviews in the fall semester to faculty and students. She was chair of one MSN thesis committee for a student who defended successfully last Fall. She started with supervision of 3 MSN theses and 3 projects.
	Dr. Dumit continues to be an asset to the Hariri School

Overall Comments	Dr. Dumit continues to be an asset to the Hariri School of Nursing. Her commitment and talent as a scholar and educator, and extensive service are commendable. She met all agreements of last year. Although manuscripts from her own studies (where she is primary investigator) are slowly coming through, she had quite a few in the pipeline in 2019. She demonstrates independence, coherence and high quality scholarship, and is recognized in the region for her work on workforce issues, thus collaborating on interdisciplinary multi-country projects. Her research has application for nursing education and administration. In teaching, she continues to excel as evidenced by her ICE scores, and serve as a resource and mentor to junior faculty. She was involved in the planning of the conversion of the MSN in Nursing Administration and Management into a blended curriculum. She involved more faculty in her courses this year. She continues to advise and problem solve academic and curricular issues with undergraduate students, in addition to advising her graduate students in the MSN in Nursing Administration and Management. In terms of service, Dr. Dumit continues to demonstrate excellence as a citizen of the school, AUB and the nursing profession. As agreed last year, she reduced her administrative load by appointing coordinators in the undergraduate division whom she is mentoring to coordinate courses and clinical rotations, especially in light of the unusual events that marked the Fall semester of 2019. Her interdisciplinary service at AUB and AUBMC and international service to the profession through the International Council of Nurses attest to her leadership in nursing. Agreements for last year include the following: 1. Submit manuscripts from the PROFILE study and the continuing education needs studies 2. Initiate a project with Columbia University related to refugee health 3. Participate in the revision of the proposal of the Lebanese Nurses Health study in which she is co-PI 4. Seek funding for studies as needed (e.g. follow up study following training of nurses and nurse managers). 5. Continue teaching assignment as is, with conversion of her administration courses to the blended format 6. Continue supervising MSN students' theses and

projects
7. Start mentoring PhD students
8. Prepare for applying for promotion and tenure in summer 2021

Faculty Member Comments

Comments	I value the comments made by Dr. Noureddine and commit to meeting the goals for 2020 to my best abilites.

1 credit lecture = 1 contact hour
1 credit sim lab = 2 contact hours
1 credit clinical = 3 contact hours

Faculty Assignments 2018-2019

*** 2 credit clinical X 1.5 = 3 + 1 credit simulation = 4 credit workload**

Clinical workload: 1 credit clinical is multiplied by 1.5
e.g. 2 credit clinical = 2 X 1.5 = 3 hours workload *
This is applicable to sophomore and junior classes

IPEC load is 0.5 for faculty who only correct case reports; 1 credit for facilitators; 1.5 credits for facilitators who designed case studies; and 2 credits for c
and 2 credits for coordinators of the course

Academic tenure track faculty 12 credits; Clinical Faculty 15-16 credits; Clinical Instructors 18-20 credits

RESEARCH SUPERVISION

Alessi, L. The Role of Quality Assurance Strategies in the Evaluation of New Zealand Nursing Services
Thesis submitted as part of the requirements for the Master of Public Policy Degree, Victoria University of Wellington
Completed: February 1989

Anderson, D. Charge Nurses and Phenomenology
Registered Candidate for the Degree of Master of Education (Leadership), Queensland University of Technology
Completed: July 1994

Anderson, D. The Health Behaviours of Australian Menopausal Women.
Registered Phd candidate, University of Queensland
Completed, November, 1999

Butler-Henderson, K. Mobile Dementia Respite Care Team: Initial evaluation from the carer's perspective.
Registered candidate for the Degree of Master of Public Health.
Curtin University of Technology.
Completed, December, 2001.

Brierley, J. A phenomenological study of the experience of distress in cancer patients in Adelaide.
Registered candidate for the Degree of Bachelor of Nursing (Honours) University of South Australia
Completed, December 1998.

Diabat, K. Grounded theory study of the smoking behaviours of Jordanian psychiatric mental health nurses.
Student enrolled for the Degree of Doctor of Philosophy (Nursing)
University of Calgary

Effendi, K. Magnitude and Management of Diabetes Mellitus in Brunei Darussalam
Thesis submitted as part of the requirements for the Master of Public Health

Degree, Curtin University of Technology
Completed: November 2002

Hirayama, F. Urinary Incontinence in Women with Chronic Obstructive Pulmonary Disease
Thesis submitted as part of the requirements for the Master of Public Health Degree, Curtin University of Technology
Completed: November 2003

Henderson, A. Consumer Conceptions of Recovery from Mental Illness
Registered Phd Candidate, University of Western Australia
Completed: October 2007

Hendricks, J. Relations of Power and Discourse: The Development of Contemporary Mental Health Nursing Practice in Queensland.
Registered Candidate for the Degree of Master of Nursing. Queensland University of Technology
Completed, August 1998.

Jonathon, E. Screening for Cervical Cancer and Indonesian Women Living in Perth
Thesis submitted as part of the requirements for the Master of Public Health Degree, Curtin University of Technology
Completed: July 2002

Kerrison, A. Feeding Behaviours in Young Children and Their Implications for the Training of Nursery Nurses
Dissertation for Diploma in Methods of Social Research, Polytechnic of Newcastle upon Tyne
Completed: July 1983

McDowell, J, Social Support, Burden and Psychiatric Symptomatology in Caregivers.
Registered candidate for the Degree of Bachelor of Nursing (Honours)
Queensland University of Technology
Completed: October 1995

McMahon, E.J. An Investigation of Selected Educational Aspects in the Preparation of Comprehensive Nurses for Hospital Services
Registered Candidate for the Degree of Master of Health Personnel Education, University of New South Wales
Completed: April 1989

Milde, K. A Hermeneutic Enquiry Exploring the Meaning of Nursing Care.
Registered candidate for the Degree of Bachelor of Nursing (Honours) University of South Australia
Completed, December 1998.

Moyle, W. The Lived Experience of Being Discharged From Hospital
Registered candidate for the Degree of Master of Applied Science by Research & Thesis, Queensland University of Technology
Completed, September 1992

Moyle, W. On Being Nurtured While Depressed.
Registered PhD candidate, Queensland University of Technology
Completed, October, 1997.

Reed, J. Nurses' Perceptions of Problems of Mobility in Elderly Hospital Patients
Registered Candidate for C.N.A.A. Degree of Doctor of Philosophy
Completed: May 1989

Sit, J. The Impact of Social Support on Stroke Rehabilitation Outcome in Hong Kong
Registered PhD candidate, Hong Kong Polytechnic University
Completed, September, 2000

Springer, A. Pharmaceutical discursives and the subjectivities of physicians, nurses and Multiple Sclerosis patients: A Foucauldian dipositive analysis.
Registered PhD candidate, University of Calgary
Completed: June 2009

Stephenson, M. A Review and Selective Test of Methods of Measuring Anxiety Levels on Admission to General Hospitals
Dissertation for Diploma in Methods of Social Research, Polytechnic of Newcastle upon Tyne
Completed: July 1983

Tandon, R. Spatial Analysis of General Practice Services After Hours in Metropolitan Perth
Thesis submitted as part of the requirements for the Master of Public Health Degree, Curtin University of Technology
Completed, November 2000.

Wollin, J. Assessing Disability: Validity and Reliability of the MS Disability Profile.
Registered PhD candidate, Queensland University of Technology
Completed, June, 1998.

Wollin, J. A Comparison of the Expectations of Residents with Multiple Sclerosis and Registered Nurses
Registered candidate for the Degree of Master of Applied Science by Research and Thesis, Queensland University of Technology
Completed, March 1994

Pearson, P. Professional and Lay Perceptions of the Health Visitor
Registered Candidate for C.N.A.A. Degree of Doctor of Philosophy
Completed, June 1988

Irving, K. An Investigation of the Use of Restraint on Elderly Patients in Acute Hospitals.
Registered Phd candidate, Curtin University of Technology.
Completed, January 2002.

Long, P.G. The Nursing Management of Persons with Self-Injurious Behaviour in an Acute Mental Health Service: A Grounded Theory Study.
Registered PhD candidate, Curtin University of Technology

Tsang, A. The Impact of Organisational Change on the Leadership Behaviours of Nurse Executives in Hong Kong
Registered PhD candidate, Queensland University of Technology
Completed, July 2002.

FUNDED RESEARCH

Challenges in creating a world-class nurse workforce in Hamad Medical Corporation Research Committee. $10,000 (2010-11). Hamad Medical Corporation Research Committee.

Exploring the problem of scarcity of nurses in underserved areas of the Middle East: Factors, reasons, incentives for recruitment and retention.
El-Jardali, F., Murray, S.F., Al-Rub, Raeda Abu, Dumit, N.Y., Al-Surimi, K., Clinton, M. Jamal, D., Jaafar, M. Alliance for Health Policy Systems Research.
$60,000 (2009-2011)

Creating an Interprofessional Learning Environment through Communities of Practice
Jointly with Calgary Health Region, University of Alberta, Southern Alberta Institute of Technology, Bow Valley College, Mount Royal College
Health Canada – Interprofessional Education for Collaborative Patient Centred Care Program
$1,295,519 (2004-7)

Elder Abuse Prevention Program.
Jointly with Horner, B.
Department of Community Development - Family and Children's Services
$14,769 (2001)

Literature Review - Mental Health Nursing Education and the Health Labour Force.
Jointly with: Cholowski, K. and Hazelton, M.
National Review of Nursing Education, Higher Education Innovation Programme, DETYA - $34,000

Investigation of Workforce Retention in the Western Australian Aged Care Industry
Jointly with Barbara Horner.
United Church Homes, Western Australia - $10,000

Evaluation of the Mobile Dementia Respite Team Service
Alzheimer Association of Western Australia - $17,500

Grant to establish the T.G. Smith Dementia Services Research and Development Unit in the Freemasons' Centre for Research into Aged Care Services.
Jointly with R. Marquis, D. Boldy and B. Horner
Fremasons of Western Australia - $400,000.

Evaluation of the Western Australian after-hours Primary Medical Care Trial
Jointly with I. Rouse. L. Adams. D. Boldy, R.Donovan. A. Mylvaganam
Health Department of Western Australia - $232,000 (2000)

Evaluation of a Renewal of Registration Course Conducted in the Aged Care Sector. Jointly with B. Horner. Nursing Resources Australia Pty Ltd - $10,000 (2000)

Randomised controlled trial to improve the outcomes of clients with dual diagnosis: Preliminary study.
Jointly with A. Bartu
Division of Health Sciences, Curtin University of Technology - $10,000 (2000)

Pilot Stroke patients and their carers in Perth, Western Australia
The Olive Anstey Nursing Fund Incorporated - $3000 (2000)

Mental health nursing workforce scoping study.
Jointly with Michael Hazelton
Commonwealth Department of Health, Mental Health Branch and the Australian and New Zealand College of Mental Health Nursing - $50,000.

Development, implementation and evaluation of a shared care model for the continuing treatment of heamatology cancer patients.
Jointly with A. Thomas. B. O'Connell, H. Myers, G. Russell, M. Surveyor, D. Joske
General Practice Innovation Fund, Western Australian Department of Health and Aged Care - $70,000.

Pilot study to evaluate an outpatient and community rehabilitation service.
Jointly with Ru Kitson and Millie Compare
Thebarton Community Trust Incorporated - $20,102.

A prospective longitudinal study of factors influencing the quality of life for cancer patients in an ambulatory setting.
Jointly with Patsy Yates, Beverley Mirilo, Dr Ken Sellick and Margaret Hargraves.
Queensland Cancer Fund - $25,152 (1998)

Promoting healthy grieving in organ donor families.
Jointly with Dr Ken Walsh, Professor Alan Pearson and Dr Nicholas Procter
South Australian Research Grants Committee - $19,400 (1998)

Project to define the role of nurse practitioners and to advise on their possible accreditation.
Jointly with Professor Julianne Cheek, Professor Sandra Dunn, Professor Alan Pearson and Dr Helen McCutcheon
Nurses Board of South Australia - $27,000 (1998)

Feasibility study to establish a respite care service.
Thebarton Community Trust Incorporated - $25,000 (1997)

Development of standards for the use of restraint and the administration of medications by nurses.
Jointly with Professor P. Darbyshire, Ms T. Gibson, Ms M. Heartfield, Ms J. Spry

Nurses' Board of South Australia - $50,000 (1997)

Development of a scale to assess cancer patient self-efficacy in managing symptoms and side effects.
Jointly with Ms J. Campbell, Ms P. Yates and Professor K. Sellick
Queensland Nursing Council - $12,749 (1997)

Social support for caregivers of stroke victims: Identification of foci for nursing interventions.
Jointly with Ms W.H.J. Sit, Dr. K.S. T. Wong, Dr. S.W.L. Li, Ms Y.M. Fong Hong Kong Polytechnic University Central Funding - HK$103,000 (1997)

Impact of ambulatory rehabilitation programs on the physical, psychosocial and economic well-being of cancer patients and their families.
Jointly with Professor Ken Sellick, B. Mirolo, Patsy Yates.
ARC Collaborative Research Grant Proposal - $143,406 (1997-1998)

A professional development program for rural nurses: Improving supportive communication in terminal care.
Jointly with Patsy Yates, Professor Gail Hart, Katie Evans.
Queensland Nursing Council - $13,083 (1996-1997)

Development of a scale to assess the self-efficacy of cancer patients.
Jointly with Jane Campbell and Patsy Yates.
Glaxo Wellcome Australia Limited Project Grants - $5000.

Development and evaluation of a professional development program to improve the practice of mental health nursing in rural and remote communities.
Jointly with Professor Gail Hart and Derek Weir.
RHSET Grant - $60,060 (1996-1997)

Needs of cancer patients and predictors of quality of life over a twelve month period.
Jointly with Professor Ken Sellick and Patsy Yates.
ARC Collaborative Research Grant Proposal - $1,999.08 (1995)

Mental health nursing interventions: Evaluation of a collaborative education program for people with schizophrenia and senior undergraduate students of nursing.
Jointly with Sioban Nelson, Helen Edwards, Professor Gail Hart and Jennie Barr
Commonwealth Health & Human Services Research & Development Grants - $89,426 1995-1998)

Strategies to promote graduate transition and lifelong learning for nurses.
Jointly with Professor Gail Hart, Robyn Nash, Diane Collins, Deanne Gaskill, Marilyn Harris, Dr Barbara Tooth and Patsy Yates
National Teaching Development Grant, Committee for the Advancement of University Teaching, DEET - $34,323 (1995)

A professional development program for enhancing supportive communication in palliative care
Jointly with Professor Gail Hart, and Patsy Yates
Commonwealth Department of Human Services and Health - $43,300 (1995 - 1996)

Comparison of personal care values of residents with MS and staff in a residential care facility
Jointly with Judy Wollin, School of Nursing, QUT
National Multiple Sclerosis Society of Australia - $10,000 (1993 -1994)

Stress experienced by nurses caring for patients with dementia
Jointly with Helen Edwards, Derek Weir and Associate Professor Tian Oei
Nurses Registration Board of Queensland - $25,000 (1993)

Community adaptation in schizophrenia: Identifying foci for mental health nursing interventions.
Jointly with Helen Edwards, Associate Professor Tian Oei and Derek Weir
Centre for Mental Health Nursing Research - $361,333 (1992 - 1996)

Accelerated Professional Development: Reflective practice and peer consultation in mental health nursing.
Jointly with Associate Professor Gail Hart, Helen Edwards, Associate Professor Tian Oei and Derek Weir
Centre for Mental Health Nursing Research - $262,663 (1992 - 1996)

Proposal to establish a Centre for Mental Health Nursing Research School of Nursing, QUT
QUT Research Initiatives Scheme - $750,000 (1992)

Home Help Review
Jointly with Dr Alan Hauquitz, Bond University
Queensland Department of Health - $100,000 ($25,000 to QUT) (1991)

Review of Domiciliary Nursing Services
Jointly with Dr Alan Hauquitz, Bond University
Queensland Department of Health - $100,000 ($25,000 to QUT) (1991)

Review of Community Options Projects in Queensland jointly with Dr Alan Hauquitz, Bond University. Queensland Department of Health - $100,000 ($25,000 to QUT) (1991)
A Delphi Survey of clinical nursing research priorities in New Zealand
Internal Research Committee, Victoria University of Wellington - $5,000

Evaluation of child health services in South Auckland
Medical Research Council of New Zealand $25,000
(April 1987 - March 1988)

Psychiatric Nursing Development Project jointly with J Crawshaw $221,000
Department of Health Workforce Development Fund, New Zealand
(January 1987 - December 1990)

Problems of un-met need in the management of urinary incontinence by community nursing services, Molnlyke Hospital Products
Jointly with Miss B Smith, Senior Nurse, Research, East
Surrey Health Authority and Mrs J Willmer, Senior Nurse, Research, Croydon Health Authority - 30,000 pounds

Cost-effectiveness in the nursing management of elderly people incontinent of urine at night
Nicholas Laboratories
Jointly with B Smith, Senior Nurse, Research, East Surrey Health Authority - 16,000 pounds

Training implications of transferring mentally handicapped people from hospital to community care
Nuffield Provincial Hospital Trust
Jointly with Dr B Salter, Department of Education Studies, University of Surrey -30,000 pounds

Training Psychiatric Nurses: A Sociological Study of the Problem of Integrating Theory and Practice
PhD Thesis, University of East Anglia
DHSS Nursing Research Fellowship - 30,000 pounds
(1981 - 1982)

FUNDED ACTIVITIES

State of Qatar. Competitive tender to deliver undergraduate and graduate nurse education programs by establishing a branch campus of the University of Calgary in Doha.
Value of the contract confidential under the terms of the Agreement signed with the State of Qatar. December 2006 – June 2016.

Alberta Advanced Education ACCESS Grant. Expansion of places in the Bachelor of Nursing Accelerated Track Program at The University of Calgary. $4.1 million. January 2007 – December 2011.

Australian and New Zealand College of Mental Health Nurses, (Honorarium) Commissioned to prepare the final draft of a proposal to establish an Institute of Mental Health Nursing in New South Wales, November, 1998.

Innovative Teaching and Learning Grant. Enhancing student learning through collaborative education for clinical education, University of South Australia. $9000. August, 1998.

Establishment grant, University of South Australia.
$42,000, March, 1998.

National Teaching Development Grant (Individual). Collaborative Education for Senior Undergraduate Students of Nursing and People with Disabilities, Committee on University Teaching and Staff Development. $20,117.05, 1998-1999.

Hospital Authority, Development and examination of a course in psychiatric rehabilitation, Hospital Authority of Hong Kong
HK$100,000, February, 1998.

Ministry of Education, Solomon Islands, Consulting and Technical Assistance to the School of Nursing and Health Studies, Solomon Islands College of Higher Education $199,019, August-December, 1997.

Senior Lectureship in Mental Health Nursing Research, $90,000, The Wolston Park Hospital

Complex, 1995-1997.

Senior Research Fellowship, $180,000, The Princess Alexandra Hospital, Brisbane, 1996-1997.

Senior Lectureship in Critical Care Nursing, $90,000, The Royal Brisbane Hospital, Brisbane, 1995-1997.

Senior Lectureship in Palliative Care, $90,000, The Royal Brisbane Hospital, Brisbane, 1995-1997.

Department of Employment, Education & Training, $193,628, Commissioned to develop a Graduate Diploma in Mental Health Nursing at Queensland University of Technology, 1995.

Australian and New Zealand College of Mental Health Nurses, (Honorarium) Commissioned to respond to Professor Gavin Andrew's report on the Measurement of Consumer Outcomes in Mental Health: A Report to the National Mental Health Information Strategy Committee, September 1994.

Griffith University Gold Coast, $10,000 External Examiner of the University's Bachelor of Nursing program for the academic year 1993-1994.

Lectureship in Oncology Nursing/Palliative Care $80,000 Roy McKenzie Foundation, The National Cancer Society of New Zealand Inc., and the Wellington Division of the Cancer Society 1987-1990.

Efficiency and Quality of Nursing Services, $5,000 Mary Potter Hospice, Wellington 1989

Review of Nursing Information Systems $10,000 Wellington Hospital Board 1988.

Development of Research Initiatives in Mental Health $2,000 Medical Research Council of New Zealand 1988.

Post-Doctoral Fellowship $63,000 New Zealand University Grants Committee (with L Fulcher) 1987-1988.

Consultation Exercise on the Review of Psychiatric Hospitals and Hospitals for Mentally Handicapped $1000 New Zealand Department of Health 1987.

Lectureship in Primary Health Care $55,000 New Zealand Alcoholic Liquor Advisory Council 1987

RESEARCH FUNDING ASSESSMENT

Alzheimers Association Research Grants

Australian Research Council Large Grants Scheme

Health, Housing and Community Services Research and Development Grants, Department of Human Services and Health, Commonwealth of Australia

National Health and Medical Research Council, Commonwealth of Australia

Public Health Research and Development Committee Research Grants, National Health and Medical Research Council, Commonwealth of Australia

Women in Business and Industry Grants, Department of Business, Industry and Regional Development, Queensland, Nurses Registration Board of New South Wales, Sydney, New South Wales

HIGHER DEGREE EXAMINER

2012-13
University of Newcastle, Newcastle, New South Wales, Australia. Ms. Sudkhanoung Plangpongpan (Doctor of Philosophy) *The Family Caregivers' Lived Experience in a Crisis During Their Care for Relatives with a Mental Illness.*

2009-10
University of Newcastle, Newcastle, New South Wales, Australia. Mr. Charles Harmon (Doctor of Philosophy) *The process of response of mental health nurses who have experienced physical assaults by their patients; A grounded theory study conducted in mental health inpatient settings.*

2008-9
Curtin University of Technology, Perth, Western Australia. Mr. Graeme Lee Dedman (Doctor of Business Administation) *The dimensions of efficiency and effectiveness of clinical directors in Western Australia's public teaching hospitals.*

Dublin City University, Dublin, Republic of Ireland. Mr. M. Philbin (Doctor of Philosophy) *Identity commitment in the context of psychosis: A grounded theory study.*

University of Sydney, New South Wales, Australia. Ms. R.C. Rossiter (Doctor of Philosophy) *Exploring the experience of dialectical behaviour therapists: Challenging therapeutic pessimism related to borderline personality disorder.*

University of Adelaide, Adelaide, South Australia. Ms Eileen Petrie (Doctor of Philosophy) *Action research in preventing workforce burnout in rural remote community mental health nursing.*

2000-2007
Chinese University of Hong Kong
University of Adelaide, South Australia
University of Auckland, New Zealand
Curtin University of Technology, Australia
Deakin University, Victoria, Australia
Edith Cowan University, Western Australia
Griffith University, Queensland
La Trobe University, Victoria, Australia
Macquarie University, Victoria, Australia
Queensland University of Technology, Queensland

University of Melbourne, Victoria, Australia
University of Newcastle, New South Wales
University of New South Wales, New South Wales
University of Sydney, Australia
Victoria University of Wellington, New Zealand

VISITING SCHOLAR

American University of Beirut (Academic Year 2008-9)

University of Adelaide (current)

Hong Kong Polytechnic University (February, 1998)

University of Tasmania, Launceston, Tasmania (July, 1996)

Bowling Green University, Ohio, USA (February, 1996)

PACE University, New York, USA (January, 1996)

St Joseph's College, Conneticut, USA (January, 1996)

HONOURS AND FELLOWSHIPS

Professor Emeritus, Queensland University of Technology

Fellow, Australian Institute of Management

Fellow of the Royal College of Nursing (Australia)

Fellow of the Australian College of Mental Health Nurses (Formerly the Australian and New Zealand College of Mental Health Nurses)

APPOINTMENTS

Member	Mental Health and Addictions Task Force, Calgary Health Region and Norlien Foundation
Member	Mental Health Research Partnerships Committee, Alberta Mental Health Board
Member	Mental Health Task Force, Hotchkiss Brain Institute, University of Calgary
Member	Reference Group for the Development of National Practice Standards for the Mental Health Workforce, National Education and Training Initiative, National Mental Health Strategy
Member	Education and Training For General Practitioners Task Group of the Committee for Incentives for Mental Health
Member	Reference Committee for the National Review of Nursing Education established by the Commonwealth Ministers for Education and Health
Member	Mental Health Integrated Projects National Reference Group

Honorary	Network for Psychiatric Nursing Research, United Kingdom Member
Chairperson	Committee of Presidents of Nursing & Midwifery Colleges (1999-2002)
President	Australian & New Zealand College of Mental Health Nursing (1999-2002)
Member	Mental Health Council of Australia (1999-2002)
Consultant	International Council of Nurses, Geneva
Editor	Australian & New Zealand Journal of Mental Health Nursing (1 January, 1992 - 31 December, 1998)
Editorial Board	International Journal of Mental Health Nursing, formerly the Australian & New Zealand Journal of Mental Health Nursing
Editorial Board	Journal of Psychosocial Nursing and Mental Health Services
Editorial Board	Journal of Mental Health
Editorial Board	Journal of Ethics in Mental Health
Review Panel	Contemporary Nurse
Review Panel	Infection Control & Hospital Epidemiology
Reviewer	Journal of Adolescent Health
Reviewer	Journal of Physical Activity & Health
Reviewer	Infection Control & Hospital Epidemiology
Reviewer	International Nursing Review

PERSONAL AND CONFIDENTIAL

Laila F. Farhood, Ph.D., M.S.N,C.S
Graduate Program Convener
Rafic Hariri School of Nursing
American University of Beirut
Riad El Solh 1107-2020
Beirut-Lebanon

December 20, 2017.

Dear Dr. Farhood,

Re-Appointment to the Hariri School of Nursing

I am writing in accordance with AUB Policy on the re-appointment of full-professors to request a further and final appointment to the Rafic Hariri School of Nursing for a for a period of two years.

Enclosed as required by the Re-Appointment Schedule is my updated Curriculum Vitae and a personal statement about my academic contributions to nursing and the University. My personal statement addresses the areas of research, teaching, and service.

I have written to my referees to ask for permission to submit their names to the University. Their names will be submitted as soon as confirmation is received

Sincerely,

Michael Clinton

cc: Dr. Huda Abu-Saad Huijer RN, PhD, FEANS, FAAN, Director, Hariri School of Nursing, American University of Beirut

Application for Re-Appointment to the Rafic Hariri School of Nursing – Michael Clinton

Personal Statement

Michael Clinton – Professor of Nursing

I am pleased to submit this personal statement in support of my application for re-appointment to the Rafic Hariri School of Nursing for a fixed term period of two years. I joined the Rafic Hariri School of Nursing as a Pro Bono Visiting Professor for the 2008-9 Academic Year and will complete ten years of service at the end of the current academic year. My contributions to the discipline of nursing and the University are described below and include statements about what I should like to contribute if reappointed. It should be noted that I am seconded half-time from the Rafic Hariri School of Nursing to the Faculty of Medicine to fulfil the responsibilities of Vice-Chair of the Social and Behavioural Sciences Institutional Review Board. This year I complete eight years of service to the Institutional Review Board.

Research:

My Curriculum Vitae shows that my field of research is mental health and that I had developed a track record in funded research before leaving Australia to take up decanal responsibilities in Canada. Since joining AUB, I have reoriented my research activities to fit in with my teaching and service responsibilities. My primary research focus is now the quality of the nursing workforce. I concentrate on two research emphases:

1. Psychometric analysis of measures used in nursing workforce research, including measures of occupational fatigue and the scope of nursing practice.
2. Preparation of nursing students for the nursing workforce with a strong emphasis on humanistic nursing care.

My psychometric studies go beyond factor analysis and internal consistency to focus on applications of unidimensional and multidimensional item response theory. My studies of the transition of Bachelor of Science in Nursing students to practice focus on the effect of curriculum structures, periods of clinical experience and healthcare systemic factors on the capacity of students to develop nursing competencies and their intentions to leave.

I bring a strong methodological focus to my research from my studies in continental philosophy and the ethics of mental health. Since joining AUB, I have published regularly as can be seen from my PhD. However, I have not pursued research funding for two reasons: lack of time to oversee externally funded research projects in the detail required due to my Institutional Review Board responsibilities; my preference to leave internal research funds for the support of less experienced scholars who need research funds to achieve promotion. My activities with the Institutional Review Board have encouraged my interest in empirical ethics and I have begun a research project that will compare perceptions of organizational research climates among university-based investigators in Lebanon, Canada, and Australia. Data collection in Lebanon is almost complete. Data will continue to be collected in Canada until December 31, 2018. Data collection in Australia will start in February, 2019.

If re-appointed, and subject to the responsibilities allocated to me, including the possibility of further involvement with the Institutional Review Board, I intend to undertake further psychometric studies as opportunities arise, including secondary analysis of data collected under my supervision

by graduate students. I will be writing more papers based on the data collected for the transition to nursing practice project, which I am leading with contributions from colleagues at the Lebanese American University, Makassed University of Beirut, and the University of Balamand. The study I am conducting on organizational research climates with my former PhD student Dr. Rusla Anne Springer at the University of Saskatchewan will lead to publications in 2018 and 2019. Other opportunities for publication will arise from my interest in the need for improved research protections for Syrian refugees. As well as engaging in research and scholarly activities, I will continue to mentor less experienced faculty.

My work with the American University of Beirut Institutional Review Board is another indirect contribution to research. I assist investigators with the ethical component of their applications for external funding and respond promptly when investigators need early ethical approval to meet the requirements of external funding agencies.

Teaching:

Before joining AUB, I developed in-depth expertise in curriculum development and teaching. My experience includes developing baccalaureate degree programs in nursing and health sciences in England and Bachelor of Nursing and Master of Science in nursing programs in Australia. I have supervised PhD students to completion in England, Canada and Australia and am able to make a substantial high-level contribution to teaching in the PhD in Nursing Science that will start at AUB in fall 2018.

Table 1. Summary of Instructor and Course Evaluations – 5 Years to 2016-17

	2012-13		2013-14		2014-15		2015-16		2016-17	
Course	MC	AUB	MC	AUB	MC	AUB	MC	AUB	MC	AUB
NURS 500	4.5	NA	4.5	NA	4.8	4.2	4.4	4.2	4.9	4.2
NURS 507	4.8	NA	4.4	NA						
NURS 525			4.4	NA	4.7	4.2	4.8	4.2	4.7	4.3

Notes: NURS 500: Theories, Concepts and Frameworks for Advanced, Nursing Practice; NURS 507: Nursing Administration and Management; NURS 525: Leadership Theories and Applications for Nurse Manages. The following are excluded from the table because they are not subject to OIRA Instructor and Course Evaluation: NURS 508: Advanced Practice in Nursing Education (Practicum); NURS 598: Project: NURS 599: Thesis.

Since coming to AUB, I have developed graduate courses in business communication in healthcare settings, interpersonal communication, transformational leadership, and interdisciplinary bases for nursing research and scholarship. My courses are well received by students and Table 1 shows that my Instruction and Course Evaluation results are consistently high. The following comments from students show that I engage students in learning and model attitudes that will help them succeed in nursing and life.

Dr. Clinton is friendly and gracious. He treated us as colleagues! He stimulated critical thinking and brought examples from practice that caused us to reflect on nursing's body of knowledge.

New horizons for thought were opened through discussion. The interaction in class was priceless. It intrigued my interest in the subject and offered help in understanding the theory more.

Dr. Clinton is an outstanding professor, approachable, interesting, well-informed and always well prepared.

Dr. Clinton is one of the reasons I joined the administration track, Excellent classes and interaction between fellow students. He listened and valued what we said and respected every student.

Ironically, my major contribution to facilitating student learning is not classroom instruction but supervision of Master of Science in Nursing projects and theses. Since almost all graduate students in nursing work full-time, completion of a capstone project on time is a daunting challenge for students and faculty. Supervision of each project requires dedicated time because graduate nursing students need a lot of help with selecting a topic, designing a study, obtaining Institutional Review Board approval and, especially, writing up a project report to lodge in the University Library by the cut-off date. Helping students with writing and editing their final reports requires many hours of work every semester. Since joining the American University of Beirut, I have supervised 24 projects and two theses. Nursing students are reluctant to write theses because they are eager to get finished as they approach the end of the Master of Science in Nursing Program. Some students are deterred because they have taken elective courses and cannot afford to pay for the additional three credits required for a thesis.

My success in teaching AUB students comes from my well-developed teaching philosophy and my excellent rapport with students. I consider myself an outsider in Lebanon and am open to learning from students about their work experiences and career aspirations. I do everything possible to help students resolve academic issues promptly. Students receive an email response to their queries immediately if I am in the office; otherwise I respond to students' questions and concerns within 12 hours. I have an open-door policy and students frequently drop in to talk about their studies and thoughts for theses and projects.

During my academic preparation, I studied critical social theory, emancipatory education, and empowerment. Later as a PhD student in sociology, I studied the hidden curriculum and its impact on the ability of nursing graduates to apply their academic knowledge. Later still, as a senior administrator in the National Health Service, I learned to apply action learning and psychodynamic strategies to the leadership, education, and development of the health workforce. I draw on all these experiences to facilitate student learning outcomes. I consider myself a master teacher and believe my success with students is due to my ability to understand their learning needs and devise strategies to help them achieve as closely as possible to their full potential.

I have continued to develop as a teacher since coming to AUB and was among the first faculty members to attend the workshops in blended learning offered by the Academic Core Process and Systems Team. In January 2018 I will attend additional workshops to learn about new online tools that can support student learning.

If re-appointed, I would like to continue teaching graduate courses in interdisciplinary theories to support nursing research and scholarship and leadership. I intend to focus the leadership course on ethical leadership to counter the paucity of ethical leadership witnessed in the United States, parts of Europe, and in non-democratic countries in Africa and the Eastern Mediterranean region. I will engage students in thinking about how to use ethical leadership theories in healthcare settings in an age of impoverished international and national leadership. The course will involve students in exploring ethical leadership theories and testing out their practical implications in everyday nursing work settings. My course in interdisciplinary theories will continue to rely on a case study approach in which students examine concepts, theories and theoretical frameworks to reflect on the care of a patient in their care. In addition, I will contribute to the PhD program by participating in teaching students about theoretical frameworks for research, qualitative research designs, and research ethics.

Service:

Current contributions to nursing include examination of PhD theses and manuscript review for international journals. I am regularly approached by universities in Australia to examine theses on mental health nursing, mental health policy, and mental health consumers. Since joining the American University of Beirut, I have examined PhD theses for candidates at the University of Central Queensland and the University of Newcastle, New South Wales. Before leaving Australia for Canada, I examined almost all PhD theses written on mental health nursing topics by nurses in Australia. I am a member of the editorial boards for the International Journal of Mental Health Ethics, and the International Journal of Evidence-Based Health Care. I frequently review articles for both journals and write occasional editorials for the Journal of Evidenced-Based Health Care. Other journals I review for include the Journal of Nursing Measurement and Collegian: The Australian Journal of Nursing Practice, Scholarship & Research. On average, I review one manuscript per month for an international refereed journal.

My principal service to the University is in my role as Vice-Chair of the Institutional Review Board. In this capacity, I contribute efficiency in reviewing applications for Institutional Review Board Approval. Typically, I review more than 150 applications from AUB faculty a year and additional applications for course required research. The Social and Preventive Medicine course offered by the Faculty of Health Sciences alone requires rapid review of up to 20 proposals per year, all of which must be reviewed within a tight timeframe if students are to graduate. Almost all the applications received from AUB investigators and on behalf of students, require modifications to secure approval. The correspondence required is voluminous. The Institutional Review Board considers between 15 and 20 applications a year in convened meetings. As Vice-Chair I am a reviewer for or a custodian for all studies considered by the Board. My role includes undertaking preliminary reviews of proposals, contacting investigators before board meetings to resolve queries, chairing meetings and pulling together the diverse comments of board members, interpreting the applicability of United States Federal Regulations, writing informally to investigators the day after meetings to let them know the status of their applications, editing draft approval, modification and deferral letters, and signing off on letters to investigators.

Additionally, I meet with investigators and students to help them prepare applications for Institutional Review Board approval. I guide investigators in such matters as recruiting and consenting research subjects/participants, safeguards for vulnerable subjects such as Syrian refugees, children employed illegally, street children, workers in the sex industry, helpers employed in households, users of illicit substances, men who have sex with men, victims and survivors of abuse in the home. The meetings almost always result in a shorter time between submission of an application and Institutional Review Board approval.

I completed a three-year term as elected Rafic Hariri School of Nursing representative to the University Senate in summer, 2017. As a Senator, I served as a Due Process Monitor for academic appointments, contributed to two working parties preparing documentation for Middle States Commission of Higher Education re-accreditation (Group II and Group VII), and was a member of the Senate Taskforce on Academic Grades. After each meeting, I wrote a detailed report on Senate discussions and decisions for immediate distribution to members of the Rafic Hariri School of Nursing. When writing my reports, I took care not to mention or comment on confidential or sensitive matters.

Service to the Rafic Hariri School of Nursing include membership of the Advisory Committee (seven years), former membership of the Research Committee (three years), Chair of the Graduate Studies

Committee (2017-18 Academic Year only) course convenorship of undergraduate courses (not current), convenorship of graduate courses (current).

My future contributions to service depend on whether my secondment to the Institutional Review Board is to continue and the duties to which I am assigned in the Rafic Hariri School of Nursing. I am willing to accept any leadership role assigned to me should the Rafic Hariri School of Nursing become an independent faculty.

Referees:

I have contacted my referees and will submit their names and contact details when they have confirmed that they are available to support of my application for re-appointment.

CURRICULUM VITAE

Angela Richard Massouh
Assistant Professor and Cardiology Clinical Nurse Specialist
Undergraduate Division | Hariri School of Nursing

Biography

I received my undergraduate nursing degree from the American University of Beirut [AUB] in 2004 and my graduate degree in Adult Care Nursing with a focus on Cardiology in 2008. After working for 5 years as a Registered Nurse in the Coronary Care Unit at AUB Medical Center [AUBMC], I later joined the Hariri School of Nursing [HSON] in 2009 as a Clinical Instructor. In 2011, I stared a joint appointment as the Cardiology Clinical Nurse Specialist at AUBMC where I co-led its Heart Failure Multidisciplinary Disease Management Program and the newly established Heart and Lung Transplant service. In 2020, I was appointed as the Nurse Leader for Research, Education, and Innovation at AUBMC.

In 2017, I finished my doctorate degree in Biobehavioral Nursing from the University of Colorado, Denver and as such was promoted to Assistant Professor. My research focus is on Chronic Disease Management and Self-Care. My dissertation research, which later won the 2017 Distinguished PhD Dissertation Award, examined Determinants of Self-Care in a Sample of Lebanese Patients with Heart Failure.

My clinical area of expertise is in Heart Failure and my research focus is driven by a keen interest in narrowing the gap between research, theory, and clinical practice in symptom science. My research is expected to provide new perspectives in understanding lived experiences and self-care in patients living with chronic illnesses in Lebanon and the region.

I. Educational Background

2013 through 2017 **PhD in Nursing**

University: University of Colorado Denver Anschutz Medical Campus, College of Nursing; Colorado, USA.
Dissertation Research: Determinants of Self-Care in a Sample of Lebanese Patients with Heart Failure.
Received the 2017 Distinguished Dissertation Award.

2005 through 2008 **Master of Science in Nursing**

University: American University of Beirut, Hariri School of Nursing.
Track: Adult Care Track with a subspecialty in Cardiology/ Heart Failure.
Graduating Project: Setting Up a Heart Failure Clinic in Lebanon, Practice and Recommendations.

2001 through 2004 **Bachelor of Science in Nursing**

University: American University of Beirut, Hariri School of Nursing.
Honors: Consistent placement on Dean's Honors List.
Received the 2004 Penrose Award.

Certificate Programs

July through August 2013 **Post-Graduate Degree in Health Research:** Scholars in HeAlth Research Program (SHARP)

This is a summer certificate program that expands the breadth and depth of research skills of postgraduate trainees, and provides the essentials quantitative skills in Epidemiology, Biostatistics, Research Ethics, Library Science-Informatics, with hands-on application modules in analysis and reporting of large datasets.

September through October 2007 **Clinical Residency** in Cardiovascular Care at Johns Hopkins University, Baltimore, USA.

This was a 6-week intensive training as part of the MSN program at AUB. Clinical residencies are planned with advisors at Johns Hopkins and with an aim to be shadow an Advanced Practice Nurse. Clinical rotations are done with Clinical Nurse Specialists, Case Managers, and Nurse Practitioners.

II. Employment History

Academic Roles

2017 and ongoing **Assistant Professor |** Adult and Critical Care

American University of Beirut
School of Nursing

2011 through 2017 **Clinical Instructor |** Adult and Critical Care

American University of Beirut
School of Nursing

2009 through 2011 **Assistant Clinical Instructor |** Adult and Critical Care

American University of Beirut
School of Nursing

2007 through 2008 **Clinical Preceptor |** Adult and Critical Care
American University of Beirut
School of Nursing

Administrative Roles

2020 and ongoing **Clinical Nurse Leader for Research, Education, and Innovation**
American University of Beirut Medical Center
Nursing Services Department

Clinical Roles

2011 and ongoing **Clinical Nurse Specialist |** Cardiology and Heart Failure
American University of Beirut Medical Center
Cardiology Department

2004 through 2009 **Registered Nurse |** Coronary Care Unit
American University of Beirut Medical
Nursing Services

III. Awards and Honors

2021 **Fellow** of the **Heart Failure Association** of the European Society of Cardiology.

2019 Recipient of the **2019 Best Moderated Poster Award** at the Euro Heart Care Conference by the Association of Cardiovascular Nursing and Allied Professions, Milan.

2017 Recipient of the **2017 Distinguished PhD Dissertation Award** at the University of Colorado, Denver.

2013 Recipient of the **Continuing Medical Education Award** in recognition of outstanding commitment and support as an activity director.

2004 Recipient of the **Penrose Award** of School of Nursing Faculty of Medicine, AUB that is given on basis of scholarship, character, contribution to university life, and for the outstanding graduate of the faculty.

2001 through 2004 Placed on the **Dean's Honor List** every semester at the American University of Beirut.

IV. Research and/or Creative Work Outputs

A. Published Books, Book Chapters, and Edited Volumes

B. Refereed Journal Publications

F. Creative Works

G. Patents

H. Policy Briefs, Technical Reports, Professional Practice Reports, Magazines, etc.

2016 **Heart Failure in the Middle East and North Africa Region: A Roadmap for Policy Action** published by the Health Policy Partnership in collaboration with Novartis.

I. Presentations

February 2021 Massouh, A. **Cardiotoxicity: Putting the Heart into Long Term Cancer Care.** 9th Annual Beirut Breast Cancer Conference. Beirut, Lebanon.

September 2020 Massouh, A. **Heart Failure Care in Lebanon**. *Keynote Speech* at the Order of Nurses Heart Failure National Capacity Building Certificate Program. Le Royale, Dbayeh; Lebanon.

September 2019 Massouh, A. **The Heart Failure Program at the National and Nursing Professional Levels.** *Invited Oral Presentation*. Clemenceau Medical Center; Lebanon.

September 2019 Massouh, A. **Palliative Care in Patients Living with Heart Failure.** *Invited Oral Presentation* at the Palliative Care Conference. American University of Beirut; Lebanon.

June 2019 Massouh, A. **Heart Failure Guidance: What Nurses Should Know**. *Invited Oral Presentation* at the Novartis Heart Failure Clinic Workshop. Metropolitan Habtour; Lebanon.

June 2019 Massouh, A. **Role of Nurses in Heart Failure Care.** *Invited Oral Presentation* at the Roche Heart Failure Workshop for Primary Care Physicians. Hilton Habtour; Beirut, Lebanon. June 2019.

December 2018 Massouh, A. **Heart Failure Guideline Update: What Nurses Should Know?** *Invited Oral Presentation* at the 13th International Congress of the Lebanese Society of Cardiology and the 4th Middle East Heart Failure Meeting. Hilton Habtour; Lebanon.

December 2018 Massouh, A. **Heart Failure Symptom Science: The Lebanese Experience**. *Invited Oral Presentation* at the 13th International Congress of the Lebanese Society of Cardiology and the 4th Middle East Heart Failure Meeting. Hilton Habtour; Lebanon.

September 2018 Massouh, A. **Role of the Nurse in Heart Failure Care**. *Invited Oral Presentation* at the Novartis Cardiometabolic Summit. Hilton Habtour; Beirut, Lebanon.

August 2018 Massouh, A. **Heart Failure Symptom Management**. *Invited Oral Presentation* at the Novartis Workshop for Heart Failure Clinic Nurses. Smallville Hotel; Beirut, Lebanon.

May 2018 Massouh, A. **Determinants of Self-Care in a Sample of Lebanese Patients with Heart Failure**. *Invited Oral Presentation* at the 2nd International Nursing Conference at the Order of Nurses in Lebanon, Habtour Hotel; Lebanon.

May 2018 Massouh, A. **Heart Failure Symptom Science and Self-Care**. *Invited Symposium Lead and Oral Presentation* at the Novartis Heart Failure Symposium. Khartoum; Sudan.

May 2018 Massouh, A. **Chronic Heart Failure Outpatient Clinic Symptom Management**. *Invited Symposium Lead and Oral Presentation* at the Novartis Heart Failure Symposium. Khartoum; Sudan.

April 2018 Massouh, A. **Depression in Patients with Heart Failure**. *Invited Oral Presentation* at the 2018 Middle East Medical Assembly. American University of Beirut Medical Center; Lebanon.

December 2017 Massouh, A. **Heart Failure Self-Care Education and Symptom Management**. *Invited Oral Presentation* at the Novartis Road for Excellence in Nursing. Hilton Habtour; Lebanon.

August 2017 Massouh, A. **Hemodynamics Monitoring**. *Invited Oral Presentation* in the Critical Care Conference. Ragheb Harb Hospital; Lebanon.

August 2017 Massouh, A. **Ethics in Critical Care**. *Invited Oral Presentation.* Critical Care Conference. Ragheb Harb Hospital; Lebanon.

July 2017 Massouh, A. **Determinants of Self-Care in a Sample of Lebanese Patients with Heart Failure: A Lebanese Study.** *Invited Oral Presentation.* American University of Beirut Medical Center Grand Rounds; Lebanon.

July 2017 Massouh, A. **Educating Asthmatic Patients**. *Invited Oral Presentation* at the Back to Lebanon: The International Medical Forum. Regency Palace Hotel; Lebanon.

March 2017 Massouh, A. **Heart Failure Self-Care Education and Symptom Management**. *Invited Oral Presentation* at the Heart Failure Iraqi Physician Training Seminar hosted by Novartis. Metropolitan; Beirut, Lebanon.

January 2017 Massouh, A. **Heart Failure Self-Care Education and Symptom Management**. *Invited Oral Presentation* at the Heart Failure Physician Training Seminar. Tripoli; Lebanon.

February 2017 Massouh, A. **Heart Failure Self-Care Education and Symptom Management**. *Invited Oral Presentation* at the Heart Failure Physician Training Seminar. Marjeyoun; Lebanon.

April 2016 Massouh, A. **Heart Failure Self-Care Education: Non-pharmacological Management.** *Invited Oral Presentation* at the Heart Failure Nurse Training Seminar. Beirut; Lebanon.

October 2015 Massouh, A. **Psychosomatic Heart Disease**. *Invited Oral Presentation* at the Médecine, Psychothérapie et Transmission Culturelle. Beirut; Lebanon.

August 2015 Massouh, A. **Heart Failure Discharge Planning and Follow-up.** *Invited Oral Presentation* at the Iraqi Heart Failure Updates Conference. American University of Beirut Continuing Medical Education Office; Lebanon.

November 2014 Massouh, A. **Heart Failure in Lebanon: Current and Future Projects and Status Quo.** *Oral Presentation* at the Heart Failure National Conference. Order of Physicians; Lebanon.

November 2014 Massouh, A. **Symptom Management and Self-care in Heart Failure**. *Oral Presentation* at the Heart Failure National Conference. Order of Physicians; Lebanon.

September 2014 Massouh, A. **Follow up and Education of Patients with Heart Failure**. *Oral Presentation* at the Heart Failure Medical Training Course for Iraqi Physicians. American University of Beirut Continuing Medical Education Office; Lebanon.

June 2013 Massouh, A. **Heart Failure Disease Management Programs in Lebanon**. *Oral Presentation* at the Hariri School of Nursing Honor Society Meeting. American University of Beirut; Lebanon.

May 2013 Massouh, A. **Train the Trainers in Heart Failure Care**. *Invited Oral Presentation* at the Heart Failure Capacity Building Training. Order of Nurses; Lebanon.

May 2013 Massouh, A. **Adult Mild Therapeutic Hypothermia**. *Invited Oral Presentation* at the Middle Eastern Medical Association. American University of Beirut Continuing Medical Education Office; Lebanon.

May 2013 Massouh, A. **Updates in Clinical Cardiology**. *Invited Oral Presentation* at the Middle Eastern Medical Association. American University of Beirut Continuing Medical Education Office; Lebanon..

October 2012 Massouh, A. **Education and Counseling**. *Invited Oral Presentation* at the Hemoglobin Disorders Thalassemia and Sickle Cell Disease conference. Presentation at the Middle Eastern Medical Association. American University of Beirut Continuing Medical Education Office; Lebanon.

October 2012. Massouh, A. **Managing Adherence**. *Invited Oral Presentation* at the Hemoglobin Disorders Thalassemia and Sickle Cell Disease conference. Presentation at the Middle Eastern medical Association. American

University of Beirut Continuing Medical Education Office; Beirut, Lebanon.

May 2012 Massouh, A. **Heart Failure in Lebanon**. *Invited Oral Presentation* at the First Middle Eastern Heart Failure National Conference of the Lebanese Society of Cardiology. Bristol; Lebanon.

May 2012 Massouh, A. **Role of the Heart Failure Advanced Practice Nurse**. *Invited Oral Presentation* during the First Middle Eastern Heart Failure National Conference of the Lebanese Society of Cardiology. Bristol; Lebanon.

V. Grants

A. Grants Awarded

June 2020 **Appraisal, Burnout, and Coping in Dyads Living with Chronic Illness: The ABCs of Informal Caregiving.**

Research Category: Interdisciplinary, Clinical/Translational Research.
Funding: Application submitted to the Doha International Family Institute at Qatar Foundation; $44,467
Research Team: Dr. Angela Massouh (PI) and Drs. Nour Alayan [HSON] and Samar Noureddine [HSON].

2020 through 2021 **REflective Simulation-Based e-Training on Motivational Interviewing for Interprofessional Teams [RESeT-MI].**

Research Category: Nursing Education.
Funding: Application submitted to the Scholarship of Teaching and Learning (SOTL) Grants program at the American University of Beirut; $7,000.
Research Team: Dr. Angela Massouh (PI) and Dr. Nour Alayan [HSON].

2018 through 2020 **Dyad Engagement in Heart Failure Self-Care.**

Research Category: Interdisciplinary, Clinical/Translational Research.
Funding: University Research Board at the American University of Beirut; $25,000 over 2 years.
Research Team: Dr. Angela Massouh (PI) and Drs. Hadi Skouri [FM/ AUBMC], Souha Fares [HSON], Hala Darwish [HSON], Paula Meek [University of Colorado], and Dr. Huda Huijer [HSON].

2016 through 2017 **Determinants of Self-Care in a sample of Lebanese Patients with Heart Failure.**

Research Category: Interdisciplinary, Clinical/Translational Research.
Funding: University Research Board at the American University of Beirut; $6,500 over 1 year.
Research Team: Dr. Angela Massouh (PI), Drs. Huda Huijer [HSON], and Paula Meek [University of Colorado].

B. Grants Submitted and Currently Under Review

November 2020 **DETECT (DiagnosE TrEat Care): A Pilot Hypertension Management Program in Lebanon**

Research Category: Interdisciplinary, Clinical/Translational Research.
Funding: Application submitted to the World Health Organization, EMRO.
Research Team: HSON: Drs. Gladys Honein (PI), Houry Puzanian (Co-PI), Angela Massouh (Co-PI), Souha Fares (Co-PI), Samar Noureddine (Co-PI), Nuhad Dumit (Co-PI), and Huda Huijer (Co-PI). FM: Drs. Maya Romani (Co-PI) and Ali Abu Alfa (Co-PI), FHS: Dr. Marco Bardus (Co-PI).

September 2020 **A Longitudinal Randomized Control Trial of Smartphone-Assisted Heart Rate Variability Biofeedback for Smoking Cessation**

Research Category: Interdisciplinary, Clinical/Translational Research.
Funding: Application submitted to Fondacion Mapfre; 30,000 Euros.
Research Team: HSON: Dr. Nour Alayan (PI), Angela Massouh (Co-PI), and Samar Noureddine (Co-PI). FM: Drs. Maya Romani (Co-PI) and Dr. Martine Bejjani (CO-PI); and FHS: Dr. Marco Bardus (Co-PI).

February 2020 **Public Awareness of Indoor aiR Pollution and Health Threats-Beirut (PAIR-Beirut).**

Research Category: Interdisciplinary, Clinical/Translational Research.
Funding: Application submitted to the National Council for Scientific Research CNRS 2019-2020 Cycle.
Research Team: Dr. Angela Massouh (PI) and Drs. Najat Saliba [FAS], Samar Noureddine [HSON], and Hazem Assi [FM].

C. Grants Submitted and Not Awarded [Optional]

October 2019 Nurse-sensi**T**ive events in patients and the **A**ssociation with **I**ndividua**L** nu**R**se staffing levels in a **L**e**B**anese hospital: An International Multicenter Retrospective Longitudinal Observational Study **(TAILR.LB)**

Research Category: Health Systems
Funding: Application submitted to the University Research Board at the American University of Beirut; 2019-2020 Cycle.
Research Team: Drs. Suzanne Dhaini [PI, HSON]; Michael Simon [University of Basil]; Maria Unbeck [Karolinska University Hospital, Sweden]; Stephanie Bachnick [University of Basil]; **Angela Massouh** [HSON]; Martine El Bajjani [AUB, CRI].

VI. Teaching

A. Courses Taught

NURS 501 **Foundations of Advanced Practice Nursing**
Graduate Course; Existing but revised to a Blended Format
2 credits
2019 and Ongoing

NURS 503 **Advanced Health Assessment; Theory and Practicum**
Graduate Course; Existing
3 credits
2019 and Ongoing

NURS 400 **Introduction to Critical Care Nursing; Theory and Practicum**
Senior Undergraduate Course; Existing but majorly revised
4 credits
2010 and Ongoing

IPEC 300 **Interprofessional Education and Collaboration**
Senior Undergraduate Course; Existing but majorly revised
1 credit
2017 and Ongoing

NURS 302 **Nursing Care of Adults and Older Adults; Theory and Practicum**
Undergraduate Course; Existing but majorly revised
5 credits
2017 through 2019

NURS 210 **Introduction to Pathophysiology**
Undergraduate Course; Existing but majorly revised
2 credits
2011 through 2018

NURS 410 **Leadership and Management; Theory and Practicum**
Senior Undergraduate Course; Existing but majorly revised
5 credits
2010 through 2016

NURS 411 **Intensive Practicum**
Senior Undergraduate Course; Existing but majorly revised
3 credits
2010 through 2016

NURS 300 **Nursing Care of Adults and Older Adults; Practicum**
Undergraduate Course; Existing
3 credits
2009 through 2012

NURS 202 **Health Assessment; Practicum and Guest lecturer**
Undergraduate Course; Existing
2 credits
2010 and ongoing

B. Student Supervision and Advising

Academic Advising

Over the past 10 years, I have advised more than 45 *undergraduate* students and developed online files for all my students. My academic files are accessible to students and they are kept informed of their academic progress at all times.

As rules and regulations at AUB are in constant progress, advising is a huge responsibility and requires efforts. As an academic advisor, I constantly read the catalogue; update my information; understand the rules that govern transfer/probation; get familiar with the curriculum and General Education requirements; follow up on my advisees' grades; and set up regular meetings with weak students.

C. Service as Member on Thesis or Dissertation Committees

Fall 2020 and Ongoing — Project Title: **Asking Questions Can Help: Development and Preliminary Evaluation of a Question Prompt List and a Palliative Care Trigger List for Chronically Ill Patients**

Student: *Rim Itani*
School: American University of Beirut; School of Nursing
Program: Master of Science in Nursing, Adult Care Track
Role: Project First Reader

Fall 2020 and Ongoing — Thesis Title: **Frailty Interventions in Patients with Heart Failure: A Systematic Review**

Student: *Sally Atweh*
School: American University of Beirut; School of Nursing
Program: Master of Science in Nursing, Adult Care Track
Role: Thesis Chair

Spring 2020 and Ongoing — Thesis Title: **Association of Thirst and Fluid and Salt Intake in a Sample of Lebanese Patients Living with Heart Failure**

Student: *Kamar Younes*
School: American University of Beirut; School of Nursing
Program: Master of Science in Nursing, Adult Care Track
Role: Thesis Committee Member

Fall 2020 — Thesis Title: **Outcomes and Quality of Life of TAVR versus TAVI Patients.**

Student: *Dounia Iskandarani*
School: American University of Beirut; School of Nursing
Program: Master of Science in Nursing, Adult Care Track
Role: Thesis Committee Member

Fall 2020 — Thesis Title: **Lived Experiences of Dyads Living with Ventricular Assist Devices**

Student: *Mireille Chehade*
School: American University of Beirut; School of Nursing
Program: Master of Science in Nursing, Adult Care Track
Role: Thesis Committee Member

Spring 2019 — Thesis Title: **Psychometric Testing of the European Heart Failure Self-Care Behavioral Scale**

Student: *Nay Ezzeddine*
School: American University of Beirut; School of Nursing
Program: Master of Science in Nursing, Community Track

Role: Thesis Committee Member

Spring 2013 Thesis Title: **Advanced Home Care Department at a Tertiary Medical Center**

Student: *Maya Salloum*
School: Universite Saint Joseph; Faculty of Business
Program: Master of Business Administration
Role: Thesis Committee External Member

Spring 2010 Thesis Title: **Feasibility Study for a Heart Failure Clinic at a Tertiary Medical Center**

Student: *Lara Neaimeh*
School: Universite Saint Joseph; Faculty of Business
Program: Master of Business Administration
Role: Thesis Committee External Member

D. Student Advising Activities Summary

Academic Advising Over the past 10 years, I have advised more than 45 *undergraduate* students and developed online files for all my students. My academic files are accessible to students and they are kept informed of their academic progress at all times.

Mentorship Program I have also helped develop a new Mentorship program: **AMIN** [*AUB Mentors in Nursing*] at HSON that was modeled after the Office of International Programs Mentorship Program. This program was a success and continues to attract many undergraduate students at HSON.

Undergraduate Research Volunteering Program

Student: *Hiba Fadlallah*
School: American University of Beirut; School of Nursing
Program: Bachelors of Science in Nursing
Project Title: Dyad Engagement in Heart Failure Self-Care

Student: *Raneem Mahmoud*
School: American University of Beirut; School of Nursing
Program: Bachelors of Science in Nursing
Project Title: Appraisal, Burnout, and Coping in Dyads Living with Chronic Illness: The ABCs of Informal Caregiving.

Student: *Grace Haginazarian*

School: American University of Beirut; School of Nursing
Program: Bachelors of Science in Nursing
Project Title: Appraisal, Burnout, and Coping in Dyads Living with Chronic Illness: The ABCs of Informal Caregiving.

Student: *Nour Ezzeddine*
School: American University of Beirut; School of Nursing
Program: Bachelors of Arts in Psychology
Project Title: RESeT-MI

Student: *Mohammad Ramadan*
School: American University of Beirut; School of Nursing
Program: Bachelors of Science in Nursing
Project Title: RESeT-MI

E. Educational Innovations and Academic Contributions

Academic Policies for the Undergraduate Program

As part of the undergraduate convener team and coordinator of the undergraduate Adult Care division, I have developed policies that govern undergraduate education at HSON namely:

1. Incident/Exposure Reporting and Management
2. Incident Reporting Forms
3. Unsafe Behavior Policy
4. Documentation of At-Risk Performance
5. SimLab Competency Independent Practice Log

Objective Structured Clinical Exams

I introduced Objective Structured Clinical Exams to all my clinical courses. This is a form of performance-based testing used to measure students' clinical competence. I use high fidelity mannequins and standardized patients. The linear sequence of the multiple station and skill challenges bears remarkable similarity to that real environment.

Clinical Reflection

I introduced reflective writing to y courses. This is a qualitative medium where personal experiences and theoretical approaches to clinical practice are acknowledged. Reflective Writing's main objective is to get students to understand their personal experiences through writing which promotes critical thinking. This assignment has helped students develop clear understanding of them; and evaluate their ideas, their practices and what meaning they are making of them.
I have created a rubric using the Gibbs' reflective cycle.

Clinical Hero I added the concept of *Clinical Hero* and used it to stimulate students into better performance. This required the students to report on any achievement they have done (that goes beyond their day to day duties as nurses). This report included: a letter of intent from the student detailing the event, a letter of recommendation from the preceptor, colleague, RNs, or patient/family.

Clinical Review and Care Planning I created a *Clinical Review and Care Planning assignment* designed to provide students with the opportunity to perform an in-depth review of a phenomenon that may be encountered in a critical care setting. This has further helped identify major weaknesses in some students.

VII. Service

A. University/ Faculty/Department Service

University Service

2020 *Faculty Presenter,* Faculty Members Supporting Faculty Members Webinars on **Tools and strategies to engage students in online learning** at the Center for Teaching and Learning; American University of Beirut.

2019 and Ongoing *HSON Coordinator*, **Undergraduate Research Volunteer Program** at the Provost Office; American University of Beirut.

G. Technical reports

Development of a generic protocol on evaluation of patients and stakeholders' values and preferences, with focus on COVID 19 patients. Joanne Khabsa, Gladys Honein-AbouHaidar, Elie A. Akl. World Health Organization, June 2021 (Refereed)

The scope of the planned work focuses on development of a WHO generic research protocol for evaluation of patient's values and preferences. The generic protocol would serve as a template by different WHO teams/units and be easily adapted to facilitate in the future generation of primary data on people's values and preferences.

Health effects of travel policies on the COVID-19 pandemic: rapid mixed-methods systematic review and policy mapping. Lama Bou-Karroum, Joanne Khabsa, Mathilda Jabbour, Nadine Hilal, Zeinab Haidar, Pamela Abi Khalil, Rima Abdul Khalek, Jana Assaf, Gladys Honein-AbouHaidar, Clara Abou Samra, Layal Hneini, Charbel El Bcheraoui, Fadi El-Jardali, Elie A. Akl. Robert Koch Institute, January 2021 (Refereed)

The main objective of this report is to conduct a rapid mixed-methods systematic review of the health effects of travel policies related to the COVID-19 epidemic and review the evidence on contextual factors relevant to these policies. An additional objective was to conduct a mapping of the travel restriction policies adopted by 31 countries.

Report on the qualitative study of contextual factors that influence chest imaging in patients with COVID-19. Honein-AbouHaidar G.*, Rizkalla C, del Rosario Perez, M., Akl E. World Health Organization, November 2020. (Refereed)

The purpose of this report is to use a qualitative approach to explore the valuation of stakeholders, including providers and patients, on chest imaging policy for monitoring resolution or development of COVID-19 sequelae (pulmonary, cardiac) following recovery from an acute episode, the preference of the chest imaging modality, equity, perceived acceptability and feasibility of this policy in addition to practical issues acting as facilitators and barriers. The results of this report are meant to complement the updated guideline prepared by the Radiation and Health Unit, which were presented together during the Guideline Development Group (DGD) virtual meeting on November 25, 2020.

Towards a Family-Practice Based Primary Care in Eastern Mediterranean Region: Roles and Functions of Nursing and Midwifery Workforce. Honein-AbouHaidar G.*, Avedissian T., Arevian M. Dyer E. World Health Organization, July, 2017

The overall aim is to gather evidence based on actual practices to evaluate and scale up the primary care workforce in support of implementing family practice in Eastern Mediterranean Region. In this report, the main focus is describing the nurses and midwives' roles as part of an inter-disciplinary team and the factors that influence these roles.

Cardiovascular Disease. In: Bierman AS (ed). Project for an Ontario Women's Health Evidence-Base Report: Volume 1. Bierman AS, Jaakkimainen RL, Abramson B, Kapral MK, Azad N, Hall R, Lindsay P, **Honein G,** Degani N. Toronto; December, 2009 (refereed)
In the first section, we report on the health and functional status of Ontario women and men with cardiovascular diseases (CVD) including self-rated health, health transitions, activity limitations and disability, health behaviours and CVD risk factors. In the subsequent three sections, we examine the leading causes of

CVD-related morbidity and mortality - heart failure (HF), ischemic heart disease (IHD) and cerebrovascular disease (including stroke and transient ischemic attack). We report on indicators that assess the types of physicians providing care, medication management in the acute setting and for secondary prevention, diagnostic testing and clinical interventions. In addition, we report on patient outcomes including health service use (emergency department visits and hospital readmissions) and mortality.

(Principal Knowledge User), Honein-AbouHaidar (collaborator). *Exploring Youth Sexual Health Needs in Middle Eastern and North African Communities (YSMENA Study): A Planning and Knowledge Exchange Initiative to Develop a Research Network to Address Barriers in HIV Prevention.* Canadian Institutes of Health Research (CIHR), HIV/AIDS Planning and Dissemination Grant. Global Health Institute. $18,500

2012-2014 Nancy N. Baxter (PI), Gladys Honein-AbouHaidar (post-doctoral fellow). Canadian Cancer Society Research Institute & Cancer Care Ontario. ($130,000 CAD).

B. Grants Submitted and Currently under Review

2021 Consortium multidisciplinary team of researchers from the American University of Beirut (AUB), the Lebanese University, University of Saint Joseph, CNRS-LAEC, and MSF/Epicentre, in collaboration with researchers at different academic and research institutes in France (INSERM; Université de Paris; Santé Publique France). A Household and a Pilot Environmental Survey of the Impact of the August 4 Beirut Blast and Concurrent Crises on the Environment and Health and Wellbeing of Affected Communities Lebanon Country Office of the World Health Organization (WHO-Lebanon). Budget: $1,000,000

2021 Melhem N, Estaquier J, Nuwayhid I, Habib R, Honein-AbouHaidar G, Yazbik-Dumit N. Understanding and Mitigating Impact of the August 4 Beirut Blast and Concurrent Crises on the Community Spread of COVID-19. National Research Agency, National Council for Scientific Research of Lebanon (CNRS-L. Budget: 100,000 Euros

2021 Nuhad Dumit HSON-AUB (PI), Gladys Honein-AbouHaidar HSON-AUB (co-PI), Frontline Agents for Community Health Care (FACe): Empowering trained nurses and young women community agents in Karantina, Canada Fund for Local Initiatives (CFLI). Budget: 49,450 CAD

2021 Nuhad Dumit HSON-AUB (PI), Gladys Honein-AbouHaidar HSON-AUB (co-PI), Wassim Hajj (Co-I), Najat Saliba N (Co-I), Lina Daouk Oryr (Co-I), Fida Kanaan (Co-I). Nurses and women champions of low-carbon recovery: adapt,
adopt, and act (AAA) a nurse-managed initiative. Canada's International Development Research Centre (IDRC). Budget: $ 745,597

C. Grants submitted- not Awarded

2021 Nuhad Dumit HSON-AUB (PI), Gladys Honein-AbouHaidar HSON-AUB (co-PI), Randa Hamadeh MOPH (Co-I), Michel Matar –Karantina Government Hospital (Co-I), Khalil Ashkar Lebanese University (Co-I), Huda Huijer FHS Balamand (Co-I)**.** Scalable Community Responsive PHC Model (SCORE). European Commission: Support to Civil Society to improve governance and accountability. Budget Euro

2020 Houry Puzantian, HSON-AUB (PI), Gladys Honein-AbouHaidar, HSON-AUB (co-PI), Karen Saliba, Karantina MOPH (Co-I), Randa Hamadeh, MOPH (Co-I), Ali Abu Alfa, FM-AUB (Co-I), Maya Romani, FM-AUB (Co-I), Marco Bardus, FHS-AUB (Co-I), Huda Huijer, FHS-Balamand (Co-I), Nuhad Dumit, HSON-AUB (Co-I), Samar Noureddine, HSON-AUB (Co-I), Angela Massouh, HSON-AUB (Co-I). DETECT (**D**iagnos**E** **T**r**E**a**t** **C**are): A pilot hypertension management program in Lebanon. WHO-RTSL partnership on LINKS: Hypertension Proposal. Budget $ 181,546

2020 Suzanne Dhaini, HSON-AUB (PI), Gladys Honein-AbouHaidar, HSON-AUB (Co-PI), Martine El-Bejjani, FM-AUB (Co-I), Hala Kerbage, Universite St. Joseph (Co-I). NuRsEs' Self-PErceived COVID-19 Burden in Lebanese HospiTals: A mixed method study (RESPECT). The National Council for Scientific Research – Lebanon (CNRS-L). LBP: 26,700,000.

2018 Gladys Honein-AbouHaidar, HSON-AUB (PI), Caroline El Rayes, (Co-I)). Meaningful Use of the Primary Health Care Information System in Lebanon: An Implementation Research. Canada's International Development Research Centre (IDRC). Budget: CAD 556,859

2018 Gladys Honein-AbouHaidar, HSON-AUB (PI), Tamara Lotfi AUB (Co-I, Suzanne R. Dhaini HSON-AUB (Co-I), Ahmad Firas Khalid, McMaster University (Co-I), Wissam Haj-Ali, University of Toronto (Co-I). Strengthening the primary health care workforce in Jordan, Lebanon and UAE: A systematic learning mechanism towards improved health-related sustainable development goals. World Health Organization- ALLIANCE for health policy and systems research. Budget: $ 188,265

VI- TEACHING

A. Courses taught

2019-present

N 604: Measurement course
Guest-class session
PhD level course
Teaching hours per semester: 2 hours
Student evaluation is not applicable

2017-present

N 502: Advanced Nursing Research
Guest- class sessions
Master level course
Teaching hours per semester: 5 hours
Student evaluation is not applicable

2015- present

N 522: Principles and practice of advanced community and public health nursing
Master level course
Course coordinator (Since 2017)
Teaching hours per semester: 28 hours
Average of 5 students per term
Student course evaluation is appended

2015- till present

N 523: Advanced Community Assessment and Interventions
Master level course
Course coordinator- Fall 2018- Present
Teaching hours per semester: 30 hours
Average of 5 students per term
Student course evaluation is appended.

2015-present

N 408: Community/public health nursing
Course coordinator: 2019-Present
Undergraduate-senior level course
Teaching hours per semester: Theory 48; clinical 44
Student course evaluation is appended

2019-2020

N 527: Systems approach to the development and evaluation of health care services
Guest-class session
Master level course
Teaching hours per semester: 15 hours
Student evaluation is not applicable

2017- 2020

N 406: Nursing Research
Undergraduate level course
Course coordinator
Teaching hours per semester: 40 hours
Student course evaluation is appended

2017- 2019 IPEC : Inter professional Education and Collaboration
300 Class- moderator
Moderation hours per semester: 10
Student evaluation is not applicable

B. Student supervision and advising

B2. PhD students

2021- present Title: Influenza Vaccine Hesitancy and its Associated Factors among the Lebanese Public Transportation Drivers: A Cross Sectional Study
Date of graduation: expected June 2023
PhD level student
Student name: Mahmoud Salam

2021- Present Title: Primary Prevention for Cardiovascular Diseases among Primary Health Care Nurses in Lebanon: Attitudes and Practices
Date of graduation: expected June 24
PhD level student
Student name: Mariam Assaf

B3. Master's Students

2021- Present Title: A Protocol for a Nurse-led Self-Care Diabetes Program in Federal Medical Center Abeokuta Ogun State, Nigeria Based on Lessons Learned from a Systematic Review of Literature.
Date of graduation: Fall 2021
Master level student
Student name: Abina Mosunmola Aminat

2021- Present Title: The ten steps of breast feeding in primary health care
Date of graduation: Fall 2021
Master level student
Student name: Patricia Halby

2020- Present Title: From under the rubble : A descriptive study on the emergency response done by Medecins sans frontier post the Beirut port blast, August 4th 2020
Date of graduation: Fall 2021
Master level student
Student name: Nada Kazoun

2020- Present Title: Self-care for patients with diabetes mellitus: A pilot project in Karantina primary health care center.
Date of graduation: Fall 2021
Master level student
Student name: Nanor Bedweyan

2020- Present	Title: Home Care for Elderly and Homebound: A pilot project in Karantina Area. Date of graduation: Fall 2021 Master level student Student name: Celine Shaar
2020- 2021	Title: Factors influencing implementation of the accreditation process in primary health care centers in Lebanon Date of graduation: January 18, 2021 Student name: Miray Harake
2018- 2020	Identifying additional measures for the psychosocial aspect of fatigue in multiple sclerosis- A project proposal for the Multiple Sclerosis Center at the American University of Beirut Date of graduation: January 13, 2020 Student name: Nada Issa
2017-2019	Exploring the determinants of prenatal education utilization among expectant women in Lebanon: a qualitative study Date of graduation: May 7, 2019 Student name: Cynthia Rizkalla
2017- 2019	Validation of the heart failure index 9-item European Heart Failure Scale Arabic version Date of graduation: April 24, 2019 Nay Ezzeddine
2018-2018	Developing and Disseminating a New Approach for Cancer Screening in Primary Health Care Centers in Lebanon: A Panel Management Approach Date of graduation: December 6, 2018 Student name: Mariam Assaf
2016-2017	Proposal for Establishing a Nurse-Led International Normalized Ratio Outpatient Clinic at The American University of Beirut Medical Center Date of graduation: August 23, 2017 Student: Ahmad El Ghaddar
2016-2017	The role of an advanced practice nurse in coaching pediatric congenital heart disease patients transitioning into young adulthood: a systematic review of the literature. Date of graduation: April 27, 2017 Student: Lynda Hashem
2016-2017	A protocol for a Nurse-Led Patient Navigator for Newly Referred Patients for Colorectal Cancer Investigation in Oncology Clinic Based on a Systematic Integrative Review of Literature Date of graduation: April 5, 2017 Student: Wafaa Skaff
2016-2017	Applying Healthcare Failure Mode Effect Analysis to Improve the Process of Chemotherapy Administration at AUBMC- Outpatient Infusion Center Date of graduation: March 24, 2017 Student: Mariam El Sebae

2015-2016	Quality Improvement of Interdepartmental patient handoff involving adult patients on high alert medication Date of graduation: April 19, 2016 Student: Hayat Zaatar

B5. Service as Member on Thesis or Dissertation Committees

2021- Present	Title: Palliative care trigger list: A Delphi survey study Date of graduation: Fall 2021 Student name: Rim Itani
2020- Present	Title: The relationship between nurses' work environment, resilience, and nurse and patient outcomes in primary health care centers serving Syrian refugees: A secondary data analysis Date of graduation: Spring 2021 Student name: Maral Vassilian
2019-2021	People Who Use and/or Inject Drugs Undergoing Detoxification or Opioid Substitution Therapy in Lebanon: Nutrition Assessment and Dietary Habits. Maastricht University Date of graduation: 2021 PhD level student- Project Student name: Nadine Mahboub
2015-2018	Perceptions and Experiences of Community Workers and Syrian Refugees towards Community Kitchens in Lebanon: A Qualitative Study Date of graduation: January 2018 Student name: Nadiya Ibrahim

B6. Student Advising Activities Summary

Fall 2021-2022	I provide advising services to students at the Master and PhD levels including assisting students identify the courses they require to complete their program, when to enroll in these courses, monitor their academic standing, provide remedies for academic challenges, and supervise their theses and projects. Total number of students: 17 students PhD students: 4 Master students: 13

C. Educational Innovations and Academic Contributions

Development of a mentoring program for researchers interested in conducting qualitative research

Since I joined AUB, I developed a workshop to train novice researchers on how to conduct qualitative research. This workshop is an annual activity held as part of the Clinical Research Institute at AUB and the

Institute for Population Health- Weill Cornell Medicine in Qatar. I also offered it as part of the Global Health Institute and the Nursing Advancement Program at AUB.

Introduction to qualitative research E-workshop. *Institute for Population Health*. Weill Cornell Medicine-Qatar- July 2020 & March 2021

Introduction to qualitative research E-workshop. *Clinical Research Institute*. American University of Beirut. January 2021, March 2020, January 2020, January 2019, January 2018, January 2016

Introduction to qualitative research workshop. Center For Research And Education In The Ecology Of War (CREEW) *Global Health Institute*. American University of Beirut. February 2020

Introduction to qualitative research. *Nursing Advancement Program*, Clinical Research Unit, April 13, 2017

Introduction to qualitative research. *Research Education Unit.* American University of Beirut, November 19, 2015

As part of the AUB Regional External Program (REP), I also offered workshops focusing on community health care services

Self-care non-communicable diseases symposium-team-based. *International Family Medicine* Conference-Dubai February 2020

Self-care non-communicable diseases workshop. *Regional Educational Program- Dubai*. October 2019

Patient-education workshop. *Regional Educational Program- Dubai*. March 2019

Fiscal management and self-care. *Clinical Leadership course*. United Arab Emirates, March 7, 2017

The transformative role of the community health nurse. *Primary Healthcare Nursing Conference: The Way Forward. Dubai* December 2016

Accreditation

In 2021, I sat on the self-study working group responsible for assessing standard IV of the Commission on Collegiate Nursing Education (CCNE) Accreditation. The purpose of this working group was to examine whether the HSON program is effective in fulfilling its mission and goals as evidenced by achieving expected program outcomes. Program outcomes include student outcomes, faculty outcomes, and other outcomes identified by the program. Data on program effectiveness are used to foster ongoing program improvement.

In 2017, I represented HSON on the self-study working group V as part of the Middle States Commission on Higher Education (MSCHE) Accreditation. The purpose of this working group was to demonstrate how AUB educational assessment activities meet the criteria of Standard V and satisfy the requirements of affiliation to (MSCHE).

VII. Service

A. University/ Faculty/Department Service

HSON

2021- Present	Research Committee Chairperson
2019 – 2020	Graduate Studies Committee Member
2015 – 2019	HSON newsletter Chairperson
2015 – Present	Faculty Graduate Division Member

AUB

2020 – Present	Expert Committee on COVID-19 Member
2017 – Present	Accreditation, Working Group V: Educational Effectiveness Assessment Representative
2016 – Present	Title IX HSON Representative
2018 - Present	Senate Committee: University Publications Committee Member
2018 - Present	Refugee Health Program: Global Health Institute Co-Director

B. Clinical Service

In July, 2021 I am leading a chronic disease management clinic at the primary health care center- Karantina

C. Professional Service

Scientific committee

2019 – 2020	Order of Nurses in Lebanon Member of the Scientific Committee

Reviewer

2020- Present

Clinical Epidemiology
Reviewer

2019 - Present

Health Research Policy and Systems
Reviewer

2018 - Present

Journal of Nursing Scholarship
Reviewer

2015 - Present

Cancer Causes and Control
Reviewer

2015 - Present

ClinicoEconomics and Outcomes Research
Reviewer

2015 - Present

European Journal of Cancer Care
Reviewer

2015 - Present

PLOS One
Reviewer

2015 - Present

Women's Health Issues
Reviewer

2015 - Present

British Medical Journal
Reviewer

2015 - Present

Reviewer

PROFESSIONAL AFFILIATION

2003 – Present **College of Nurses of Ontario**
Registration Number: 03- 0138 2 (non practicing)

2002 – Present **Order of Nurses of Lebanon**
Registration Number: 14671

D. Public and Community Service

2016 - Present	SAID NGO- Our mission is founded on the values of care, empathy, respect and dedication without discrimination in class status, and religion. We aim for all eligible Lebanese males and females to be up-to-date with CRC screening.
	Vice- President & Head of the research committee & advisory board member
2020- Present	Khaddit Beirut- As a grassroots initiative, Khaddit Beirut applies an agile, evidence-based, inclusive, and holistic approach driven by local needs, accountable to people, and focused on sustainable solutions in the areas of community health, education, environmental health, and local business
	Community Health Initiative Steering Committee Member

CURRICULUM VITAE

Hala J Darwish
Mobile: 734-373-8582
Email: hala1darwish@gmail.com

A. PROFESSIONAL EXPERIENCE

1. Educational Qualifications

Ph.D. (2007)	University of Michigan in Ann Arbor Medical-Surgical Nursing Department Bio-Behavioral Program- Neuroscience concentration ***Dissertation Title:*** Characterizing patterns of damage to recognition, temporal order memory, and spatial learning following mild traumatic brain injury.
MSN (2007)	University of Michigan in Ann Arbor Medical-Surgical Nursing Acute Care Nurse Practitioner Program ***Clinical Nursing Training Focus:*** Neurology, Neurosurgery, Neurorehabilitation, Outpatient Cognitive Rehabilitation, Neuropsychological Assessment.
Teaching Diploma (2000)	American University of Beirut Special Education ***Practicum:*** Schools where special needs children are integrated into the mainstream classrooms
BSN (1997)	American University of Beirut, School of Nursing

2. Post-Graduate Fellowships and clinical training

Post-doctorate (2007-2009)	University of Illinois at Chicago ***Research Focus:*** Epigenetic modification, post-traumatic brain injury and the role of vitamin D in cognitive aging
September 6-18, 2010	Partners Multiple Sclerosis Center of the Brigham and Women's Hospital Harvard Medical School in Boston Formal Invitation from Dr. Samia Khoury (Co-Director of the Partners Multiple Sclerosis Center) to visit the MS center. The purpose of the visit was to learn about the current MS clinical care, database management, and the setup of the outpatient infusion unit To receive training before taking on the Managing Director responsibilities of, at the time, the newly established MS center at American University of Beirut Medical Center (AUBMC)

June and October 2018	Mayo Clinic Rochester- Minnesota and Spaulding Rehabilitation Hospital (Harvard Medical School Hospital) Formal Invitations to visit the Mayo Clinic in Rochester, Minnesota, and Spaulding Hospital In Boston. The purpose of the visit was to learn about the brain rehabilitation program at both hospitals before establishing a cognitive rehabilitation program at AUBMC

3. Work and Professional Experience

Aug 30 2021-present	Associate Professor-Tenure Track University of Michigan- Ann Arbor
Aug 30-2021- 2022	Associate Professor (unpaid Leave of Absence) American University of Beirut (AUB) Hariri School of Nursing
2016 - Aug 30 2021	Associate Professor American University of Beirut (AUB) Hariri School of Nursing
2016- Present	Academic Associate American University of Beirut, Department of Anatomy, Cell Biology and Physiological Sciences (Basic Neuroscience division), Faculty of Medicine
2019- Present	Clinical Associate, Department of Psychiatry, Cognitive Rehabilitation

Key achievements and Impact in Role:

Pursued a career path in translational research that encompasses both basic neuroscience and clinical research design and methods targeting cognitive performance and rehabilitation with a focus on the factors that lead to its impairment and enhancement.

Research in Clinical Cognitive Neuroscience

- Examined the role of Vitamin D in cognitive performance in adults and older adults, and in Multiple Sclerosis patients. Low serum 25-hydroxyvitamin D was associated with low memory performance in adults and older adults. Vitamin D supplementation for 3 months led to an improvement in spatial memory performance in Multiple Sclerosis patients. The longitudinal effect of Vitamin D3 replacement on cognitive performance and MRI markers in Multiple Sclerosis patients; a single-blind randomized clinical trial is being examined. These findings added more evidence to the role vitamin D plays in cognitive performance in adults and multiple sclerosis patients. This is leading to a change in clinical practice and emphasizing the importance of monitoring vitamin D levels and replacement which will halt the cognitive impairment and disease progression, and bolster cognitive performance.
- Validated neuropsychological assessment tools in Arabic and established the normative values of well-known cognitive assessment battery. Developed the first Verbal Memory Test in Arabic (VMAT) collaboratively. This adds validity to the research on cognitive performance in Arabic speaking populations and will support the development of more targeted and accurate interventions.
- Collaborated on projects that examined the epidemiology of dementia and traumatic brain in the Lebanese population, and related clinical management practices. These studies will lead to an improvement of the clinical care of dementia and traumatic brain injury patients along with their caregivers, and the establishment of evidence-based clinical management protocols.
- Initiated intervention research targeting cognitive fatigue in Multiple Sclerosis. Using an innovative technique, virtual reality is being used to examine the effect of nature walks compared to urban walks on cognitive fatigue.

Research in Basic Neuroscience

- Investigated the effect of traumatic brain injury on the cognitive functions of learning and memory. Using a rat and mouse model we discovered that even mild to moderate brain injury could lead to persistent cognitive deficits for as long as 35 days post-injury, the injury impaired synaptic function and these deficits benefited from pharmacological and behavioral interventions, such as simvastatin, environmental enrichment, and exercise.
- Explored, collaboratively, the role of microglia activation post-traumatic brain injury and its' protective and damaging role, and associated learning and memory deficits.
- Investigated agents that could improve learning and memory. The effect of vitamin D on neurogenesis is also being explored as an additional protective and restorative function of vitamin D.
- Established a small animal behavioral laboratory housed in the animal facility at the faculty of medicine at AUB.

2009-2016	Assistant Professor American University of Beirut Hariri School of Nursing
2008-2009	Adjunct Lecturer De Paul University- Chicago
2007-2009	Teaching Assistant University of Illinois at Chicago
2005-2007	Research Assistant University of Michigan in Ann Arbor Molecular and Behavioral Neuroscience Institute [Dr(s). Huda Akil/Stanley Watson/Elaine Hebda Bauer, mentors]
2005-2007	Adjunct lecturer Eastern Michigan University
2003-2005	Research Assistant University of Michigan in Ann Arbor Bio-Psychology Department (Dr. Seema Bhatnagar)
2000-2003	Research Assistant University of Michigan in Ann Arbor School of Nursing (Dr. Karen Stein)
2000-2003	Registered Nurse (Emergency Department) University of Michigan Health System
1997-2000	Registered Nurse (Emergency Room) American University of Beirut Medical Center

4. Professional Qualifications

2018 Present	Cognitive Rehabilitation Training *American Academy of Rehabilitation Medicine*
2015 Present:	Multiple Sclerosis Certified Specialist *The Consortium of Multiple Sclerosis Centers*
2013 Present:	Multiple Sclerosis Certified Nurse *International Organization of Multiple Sclerosis Nurses*

2000 2013 Registered Nurse License in the State of Michigan (License 4704226574)
Michigan Board of Nursing- Department of Licensing and Regulatory Affairs

1997- Present Lebanese Registered Nurse License
Ministry of Health and Labor and Order of Nurses in Lebanon (#08886)

B. ADMINISTRATIVE EXPERIENCE

2011-2021 Managing Director Abou Haidar Neuroscience Institute- American University of Beirut Medical Center (AUBMC)

2011-2021 Managing Director, Nehme and Therese Tohme Multiple Sclerosis Center and Ahmad and Jamila Bizri Neuroscience Outpatient Center- American University of Beirut Medical Center (AUBMC)

Key Achievements and Impact in Roles:
Opening of the AUBMC Nehme and Therese Tohmeh Multiple Sclerosis Center (MSC) in 2011 and Ahmad and Jamila Bizri Neuroscience Outpatient Center (NOC) in 2013

- The Nehme and Therese Tohme Multiple Sclerosis Center is the first center of excellence in clinical and research in the Middle East and North Africa dedicated to providing patients and their families with compassionate, comprehensive, innovative, and technologically advanced care of the highest quality.
- In my role as managing director of the Neuroscience Institute and the MS center, I am involved in the strategic planning of the neuroscience institute and managing the MS center's staff and supervising daily operations, as well as coordinating the neuroscience outpatient center patient care and training of nurses in the area of multiple sclerosis and outpatient neuroscience nursing. In coordination with the medical center's human resources, I am responsible for staffing the center, interviewing, and selecting the staff, nurses, and auxiliaries. The nurse manager of the unit reports to me concerning staff performance and development plans. I also finalize staff performance appraisals and promotion/career ladder criteria. In this role, I also serve as a resource to the nurses and patients to eliminate barriers to operative work performance. I have contributed to the growth and development of the role of professional nurses in ambulatory care and outpatient services at AUBMC and Lebanon.
- I have consulted and collaborated with the AUB evidence-based health management unit to develop performance improvement projects for both the MSC and NOC to improve the patients' flow, experience, and make it more efficient.
- I collaborated on a number of clinical research projects conducted on the unit. I was involved in the development of databases and registries, of importance is the AUBMC Multiple Sclerosis Interdisciplinary Research (AMIR), a clinical MS registry and bio-bank of more than 1000 patients followed annually since 2011. In addition to the interdisciplinary nature of care, patients receive at the MS center, the research is interdisciplinary as well. I have been involved as a co-investigator or primary investigator along with some physicians and other healthcare providers in most of the research projects conducted on the unit.
http://www.aubmc.org/clinical/ms/Pages/index.aspx
- Contributed since 2011 to the Abou Haidar Neuroscience Institute-AHNI (main constituents are: Neurology and Psychiatry Department, Neurosurgery and Basic Neuroscience divisions) to strategic planning, academic activities and produced and edited the AHNI newsletter. http://www.aubmc.org/patientcare/coes/ahni/Pages/ahni.aspx.

- Played a leading role in launching an outpatient cognitive rehabilitation, the first comprehensive cognitive rehabilitation program that serves patients with cognitive impairment at AUBMC, Lebanon, and the region. In this role, I am leading a multidisciplinary team of specialists to provide this unique evidence-based service.

Professional membership

2019	Present	Member of the International MS Cognition Society
2018	Present	Fellow of the American Academy of Nursing
2018	Present	Member of the American Congress of Rehabilitation Medicine
2013	Present	Member of the International Organization of MS nurses
2010	2015	President of the AUB Alumni Nurses Chapter
2010	2012	Member of the European Brain and Behavior Society
2004	Present	Member of the Order of Nurses in Lebanon
2003	Present	Member of the Society for Neuroscience
2002	2010	Member of the Midwest Nursing Research Society
2000	2013	Member of the Michigan Nurses Association
1997	Present	Member of the AUB Alumni Nurses Chapter

C. AWARD AND HONORS

2018	Fellow of the American Academy of Nurses
2017	Awarded the International Organization of Multiple Sclerosis Research Award. This research award recognizes the work done by a nursing professional who specializes in Multiple Sclerosis, which adds to the body of knowledge about Multiple Sclerosis Nursing
2014 – Present	Member of the Nursing Honor Society, Chi- Iota Chapter, Sigma Theta Tau International, American University of Beirut
2002 - Present	Member of the Nursing Honor Society - Sigma Theta Tau International - Rho Chapter- University of Michigan- Ann Arbor

D. RESEARCH

1. Grants and Research Projects

Projects I lead as Principle Investigator or Co-Principle Investigator:
Role: Designing the research study and overall scientific supervision of experimentation, data collection, analysis, and dissemination

Ongoing Research Projects

Projects funded in 2020

MENACTRIMS- (Extramural) 2020-2022
Title: Longitudinal effect of Vitamin D3 replacement on cognitive performance and MRI markers in Multiple Sclerosis patients: A Single-Blind Multisite Randomized Clinical Trial (Approved for 3 years)

Role: PI
Amount: $ 20,000 (2 years)
Projects funded in 2019

MS National Society (Extramural) 2019-2022
Title: Interacting with Nature using virtual reality: A pilot intervention to restore cognitive fatigue in patients with Multiple Sclerosis (MS)
Role: PI
Amount: 50,000 USD (2 years)

Projects funded in 2018

AUB University Research Board (Intramural) 2018-2020
Title: Patient and Caregiver Dyad Engagement in Heart Failure Self-Care
Role: Co-PI
PI: Angela Massouh
Amount: $ 12,400 (2 years)

AUB Collaborative Research Stimulus (Intramural) 2018-2020
Title: Interacting with Nature using virtual reality: A pilot intervention to restore cognitive fatigue in patients with Multiple Sclerosis (MS)
Role: PI
Co-Lead: Mariette Awad (Electrical and Computer Engineering Department)
Amount: 34,000 USD CRS (2 years)

Projects funded in 2017

Lebanese National Council of Research (Extramural) 2018-2021
Title: Environmental Enrichment and Exercise affects memory and epigenetic events post severe traumatic brain injury
Role: PI
Amount: $ 39,333 (3 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) 2018-2021
Title: Longitudinal effect of Vitamin D3 replacement on cognitive performance and MRI markers in Multiple Sclerosis patients: A Single-Blind Randomized Clinical Trial (Approved for 3 years)
Role: PI
Amount: $ 32,000/First year

AUB Faculty of Medicine Medical Practice Plan- (Intramural) June 2017-May 2019
Title: Young versus Old: A Potential Role for Vitamin D Supplementation in Modulating Adult Neurogenesis and Hippocampal-Related Functions
PI: Wassim Abou Kheir (Anatomy, cell biology and physiology Department)
Role: Co-PI
Amount: $ 20,000 (2 years)
Collaborative Projects where I serve as Co-Investigator

Role: Contribute my expertise in clinical cognitive neuroscience and testing, and basic behavioral neuroscience experimentation

Projects funded in 2020

Medical Practice Plan (Intramural) 2020-2023
Title: Development and validation of a multidisciplinary protocol to assess driving abilities in cognitively impaired patients, using in-clinic tests on-road driving and a driving simulator
PI: Dr. Marc Barakat (Department of Psychiatry)
Role: Co-Investigator
Amount: 32,000 (1st year)

Research projects I serve on as a consultant (percent contribution 1%), the primary responsibility is overseeing the cognitive testing, data collection, or behavioral testing)

AUBMC-Multiple Sclerosis Centre Funds – Intramural (10 years) Oct 2012- Sept 2022
Title: American University of Beirut Medical Center Multiple Sclerosis Interdisciplinary Research (AMIR): A Comprehensive Multiple Sclerosis Database.
Principle Investigator: Samia Khoury (Neurology Department, Faculty of Medicine)

AUBMC Multiple Sclerosis research Funds-Intramural (10 years) Oct 2012- Sept 2022
Title: Immunological pattern during Multiple Sclerosis relapses and response to treatment
Principle Investigator: Samia Khoury

AUBMC Multiple Sclerosis research Funds-Intramural (10 years) Oct 2012- Sept 2022
Title: Cerebrospinal fluid, urinary and plasma biomarker in multiple sclerosis
Principle Investigator: Samia Khoury (Neurology Department, Faculty of Medicine)

Novartis-Extramural (10 years) Oct 2012- Sept 2022
Title: Correlation of Retinal Optical Coherence Tomography Findings with Cognitive Function in Patients with Multiple Sclerosis
Principal Investigator: Samia Khoury (Neurology Department, Faculty of Medicine)

Completed Research Projects

Office of Naval Research- US Department of Defense (Extramural) June 2017-Dec 2020
Title: Microglial activation and neural stem cells cross-talk post Traumatic Brain Injury
PI: Samia Khoury (Neurology Department)
Role: Co-PI
Amount: $ 383,278 (3 years)

Lebanese National Council of Research (Extramural) 2018-2020
Title: Modulation of metabolic stress-induced neuro-inflammation by oral anti-diabetic drugs: A proposed role for activation of autophagy".
PI: Ahmad el Yazbi (Pharmacology Department, Faculty of Medicine)
Role: Co-Investigator
Amount: $ 32,000 (2 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) Feb 2017-Jan 2019
Title: Dual Neurotherapeutic Effects of Docosahexaenoic Acid (DHA) and Arachidonic Acid (AA) with Neonatal Neural Stem Cell transplantation Post Traumatic Brain Injury
PI: Firas Kobeissy (Biochemistry Department, Faculty of Medicine)
Amount: $ 40,000 (2 years)
Role: Consultant

Farouk Jabre Interfaculty Award (Intramural-Related to MPP above) June2017-May 2018
Title: A novel neurotherapeutic approach for neural stem cell delivery using injectable GelMA hydrogel for brain tissue repair post-traumatic brain injury (TBI)
Amount: $ 10,000 USD (1 year)
Role: Consultant

Two related projects:
AUB- University Research Board (Intramural) Amount: $ 7,800 USD (2 years) June 2017-May 2019
Lebanese National Council of Research (Extramural) Amount: $ 8,000 (2 years) April 2016-Mar 2018

Title: Dementia in Lebanon: a follow-up study and Building the cohort of older adults in Lebanon: Establishing the baseline in Beqaa
PI: Monique Shaaya (Epidemiology Department, Faculty of Health Sciences)
Role: Co-Investigator

AUB Faculty of Medicine Medical Practice Plan- (Intramural) June 2016-May 2019
Title: Assessment of Traumatic Brain Injury in Lebanon: A Retrospective Cohort Study Role: Co-PI
PI: Hani Tamim (Clinical Research Institute, Faculty of Medicine)
Role: Co-Investigator
Amount: $ 32,000 (2 years)

Novartis and MENACTRIMS (Extramural) June 2015-May 2018
Title: Brief International cognitive assessment for MS (BICAMS)- Arabic
Role: PI
Amount: Novartis $ 18,000 USD and MENACTRIMS $ 25,000 (3 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) 2018-2019
Title: Characterization of post-traumatic seizures and cognition and emotional behavioral disturbances in a clinically-relevant model of closed head injury in adolescent rats
Role: Co-PI
PI: Makram Obeid (Pediatrics Department)
Amount: 10,000 USD (2 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) June 2016- May 2017
Title: Environmental enrichment affects spontaneous object recognition, temporal order memory, and epigenetic events post mild traumatic brain
Role: PI
Amount: $ 10,000 (2 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) June 2016- May 2017
Title: Dementia in Lebanon: a follow-up study
PI: Ramzi Hajjar (Geriatric Department, Faculty of Medicine)
Role: Co-Investigator
Amount: $ 20,000 (2 years)

Farouk Jabre Award (Intramural) April 2015- March 2017
Title: "Developing Sensitive and Specific Biosensor for Traumatic Brain Injury Biomarkers"
PI: Firas Kobeissy (Biochemistry Department, Faculty of Medicine)
Role: Co-Investigator
Amount: $ 20,000 (2 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) Feb 2014- Feb 2015
Title: The EBV Seropositivity, Vitamin D Level and Smoking Rate among Multiple Sclerosis patients compared to Healthy Individuals in Lebanon
Role: PI
Amount: $ 32,000 (2 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) Feb 2012- Feb 2013
Title: Inflammatory pattern, vitamin D level and cognitive performance in adults and older adults
Role: PI
Amount: $ 13,650 (1 year)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) Feb 2012- Jan 2014
Title Effect of Vitamin D replacement on immune function and cognition in MS patients
Principle Investigator: Samia Khoury (Neurology Department, Faculty of Medicine)
Role: Co-Investigator
Amount: $ 40, 000 (2 years)

Lebanese Center of National Research (Extramural) April 2012- March 2014
Title: The Effect of Aspirin and Clopidogrel on Bleeding, platelet aggregation and neuronal damage after moderate brain injury
Principle Investigator: Samir Atweh (Neurology Department, Faculty of Medicine)
Role: Co-Investigator
Amount: $ 12,000 (2 years)

Lebanese Center of National Research (Extramural) April 2012- March 2014
Title Effect of Vitamin D replacement on immune function and cognition in MS patients
Principle Investigator: Samia Khoury
Role: **Co-Investigator**
Amount: $ 12,000 (2 years)

AUB Faculty of Medicine Medical Practice Plan- (Intramural) May 2011- May 2012
Title: Cognitive function and vitamin D in adults and older adults in Lebanon
Role: PI
Amount: $ 20,000 (1 year)

University Research Board- American University of Beirut Feb 2010 – Sept 2010

Title: Effect of Vitamin D supplementation on cognitive function and inflammatory processes in older adults.
Role: PI
Amount: $ 7,000 (1 year)

Completed Projects Non AUB

T32 NR007075-14 NIH/NINR 08/27/07 - 12/22/08
Postdoctoral fellowship
Univ. of Illinois at Chicago, College of Nursing, Bio-Behavioral Program.
Program Director: Dr. Laurie Quinn.

5P30 NR009014 NIH/NINR 08/01/08 - 08/01/09
Effect of Vitamin D Supplementation on Cognitive Function and Inflammatory Responses in Aged Animals
Center for Reducing Risks in Vulnerable Populations
University of Illinois at Chicago/ College of Nursing
Role:PI

1F31NR009741 NIH/NINR 09/1/06- 08/26/07
Recognition Memory after Mild Traumatic Brain Injury
Role: PI-Doctorate student

T32 NR007074 NIH/NINR 10/1/02 - 8/31/06
University of Michigan, School of Nursing,
Center for Enhancement and Restoration of Cognitive Function. Program Director: Dr. Barbara Therrien

Oral Presentations

Basic Neuroscience Research

Darwish, H. Improving Cognitive Function after Traumatic Brain Injury (TBI): The Use of Environmental Enrichment and Exercise- October 2017-Invited. **Psychology Colloquium** at AUB-Lebanon**.**

Darwish, H. Behavioral Assessment Techniques of Small Animals. Nov 23-2017-Invited. **International Brain Research Organization (IBRO) Middle East and North Africa (MENA) advanced School -** Irbid, Jordan.

Clinical Neuroscience Research

Darwish, H. Cognitive Rehabilitation in Multiple Sclerosis- Invited.
and Chair of the symposium on Cognition in MS at the MENACTRIMS 5th Annual Pre-Congress activity Dubai. December 5th, 2019.

Darwish, H. Traumatic Brain Injury Patient Characteristics and Outcomes in Lebanon:
A Multicenter Retrospective Cohort Study. **IBRO MENA/AUB conference (October, 2019) on Trauma, Stress and Neurodegeneration Molecular, Cellular & Behavioral Perspectives. Organizer**

of the conference, Chair of session, and presenter.

Darwish, H. Protecting Cognitive Function in Multiple Sclerosis: The role of vitamin D. 14-16 March, 2019-Invited. **Abu-Dhabi Annual International Conference on Vitamin D Deficiency and Human Health**- UAE

Darwish, H. Cognitive Sequelae of Traumatic Brain Injury. 26-29 July 2018- Invited. **Traumatic Brain Injury (TBI) Translational approach, Novel directions & Challenges Symposium proposal 14th Annual meeting of the Japan Neuroscience Society (JNS)** - Japan

Darwish H. The Impact of Cognitive Rehabilitation on the Brain's functioning. Invited. May 9, 2018, **Psychological Assessment Center.** - AUB. Lebanon.

Darwish, H. Exploring the Role of Cognitive Reserve in Dementia among Lebanese Older Adults**. April 19-22, 2018. Oral presentation. Middle East Medical Assembly (MEMA)-** Beirut, Lebanon

Darwish. H., Farran, N., Zeinoun, P., Yamout, B., Khoury, S. Modified Brief International Cognitive Assessment for Multiple Sclerosis (mBICAMS): Towards validating the first Arabic version. November. 2017. **Second meeting on Neuropsychology - Lebanon memory group for clinical research,** at Le Gabriel Hotel, Beirut Lebanon
Darwish, H. Cognitive performance and physical activity before and early after MS diagnosis- October 2017. **MS weekly conference**-AUB, Lebanon.

Darwish, H. Protecting cognitive function in older adults: Vitamin D and Beyond. October 2016. **Hariri School of Nursing International conference to commemorate 110 years of nursing at AUB. Conference title: Development of Evidence Based-Nursing in an Interdisciplinary Era: Achievements and Prospects**- AUB- Lebanon.

Darwish, H., Haddad, R., Osman, S., Ghassan, S., Yamout, B., Khoury, S. "Effect of vitamin D replacement on cognition in multiple sclerosis (MS) patients. October 2015. **Congress of the European Committee for Treatment and Research in Multiple Sclerosis** in Barcelona, Spain.

Darwish, H. Vitamin D, Cognition and the Risk for Dementia. April 2014-Invited. **Faculty of Health Science Monthly Research Seminar**-AUB, Lebanon.

Darwish, H. Vitamin D and cognitive performance among older adults in Lebanon. May 2013-Invited. **Middle East Medical Association Conference Symposium: Care of Older Adults with Cognitive Impairment**. –AUB, Lebanon.

Darwish, H. Review of Depression and Multiple Sclerosis. June 2012**. MS weekly seminar**- AUB, Lebanon.
Darwish, H. Memory in Women, the role of Estrogen. May 2012-Invited. **Middle East Medical Association conference in Beirut**, AUB. Lebanon.

Darwish, H. Learning and memory and cognitive function in Multiple Sclerosis, October 2012.
MS weekly seminar- AUB, Lebanon.

Darwish, H., Habre, M., Zeinoun, P., Khoury, B. Cognitive function and Vitamin D in adults and older adults in Lebanon: A pilot study. May 2011. **Lebanese Order of Nurses conference,** Habtour Hotel, Beirut, Lebanon

Darwish, H. Cognitive impairment follows mild traumatic brain injury. May 2009. **AUB Alumni Nurse's Chapter, Annual Nursing Research Day,** AUB, Lebanon.

Poster presentations at conferences

Ayoubi, N., Baalbaki, M., **Darwish, H.**, Haddad. R., Yamout, B., Khoury, D. (Poster presentation) Correlation between Retinal Optical Coherence Tomography Measures and Cognitive/Physical Disability in Patients with Early Multiple Sclerosis: a prospective study. D. TEACHING

1. Classroom Teaching

Interprofessional Courses

Interfaculty Graduate Neuroscience Program
IDTH 230- Brain and Cognition (Second-year medical students)
2 lectures on Implicit and Explicit Memory
Spring 2019-2020
Spring 2018-2019
Spring 2016-2017
Spring 2015-2016

InterProfessional Education Course (IPEC) 300
Spring 2017-2018
Fall 2017-2018
Fall 2016-2017

PSYC237- Introduction to Cognitive Science ()
Spring 2018-2019 **2 lectures: 6 hours**
Spring 2017-2018 **2 lectures: 4 hours**

Graduate Courses

Nursing 608 (Doctorate)- Nursing Scholarship and Grant Writing
Summer 2019-2020 (Coordinator)

Nursing 609 (Doctorate)- Research Seminar
Fall 2020-2021 (Coordinator)
Spring 2019-2020 (Coordinator)

Nursing 604 (Doctorate)- Doctorate course, Measurement in Health Research
Spring 2020-2021 (Coordinator)
Spring 2019-2020 (Coordinator)
Spring 2018-2019 (Coordinator)

Nursing 529A-Neurobiology of Learning and Memory: Rethinking Patient Education!
Summer 2012-2013 (Coordinator)
Summer 2011-2012 (Coordinator)
Summer 2010-2011 (Coordinator)

Nursing 504: Advanced Pathophysiology
Fall 2020-2021 (Lecturer)
Fall 2019-2020 (Lecturer)
Fall 2017-2018 (Co-Coordinator)
Fall 2016-2017 (Co-Coordinator)
Fall 2015-2016 (Co-Coordinator)
Fall 2014-2015 (Co-Coordinator)
Fall 2014-2015 (Co-Coordinator)
Fall 2013-2014 (Co-Coordinator)
Fall 2012-2013 (Co-Coordinator)

Nursing 502: Advanced Nursing Research
Spring 2019-2020 (Coordinator)
Spring 2018-2019 (Coordinator)
Spring 2017-2018 (Coordinator)
Spring 2016-2017 (Coordinator)
Spring 2015-2016 (Coordinator)
Spring 2014-2015 (Coordinator)
Spring 2013-2014 (Coordinator)
Spring 2012-2013(Coordinator)
Spring 2011-2012 (Coordinator)
Spring 2010-2011 (Co-Coordinator)

Nursing 505A: Advanced Practice in Adult Care I
Fall 2020-2021 (Coordinator)
Fall 2019-2020 (Coordinator)
Fall 2017-2018 (Coordinator)

Nursing 505B: Advanced Practice in Adult Care II
Spring 2020-2021 (Co-Coordinator)

Spring 2019-2020 (Co-Coordinator)
Spring 2018-2019 (Co-Coordinator)- 1 lecture 2 hours on TBI management
Spring 2017-2018 (Co-Coordinator)

Nursing 505: Advanced Practice in Adult Care I
Spring 2016-2017 (Co- Coordinator) and Clinical Supervision
Spring 2015-2016 (Co- Coordinator) and Clinical Supervision
Spring 2014-2015 (Co-Coordinator) and clinical Supervision
Spring 2013-2014 (Co-Coordinator) and clinical supervision.

Nursing 506: Advanced Practice in Adult Care II
Spring 2016-2017
Spring 2015-2016
Spring 2014-2015
Spring 2013-2014

Undergraduate Courses

Nursing 400- Critical Care Nursing Theory and Practicum
Fall 2012-2013 (Coordinator)
Fall 2011-2012 (Coordinator)
Fall 2010-2011 (Coordinator)
Fall 2009-2010 (Co-Coordinator)

Nursing 406- Nursing Research- Writing Intensive
Fall 2015-2016 (Co-Coordinator)
Fall 2013-2014 (Coordinator)
Fall 2012-2013 (Coordinator)
Fall 2011-2012 (Coordinator)
Fall 2010-2011 (Coordinator)

Nursing 406- Nursing Research- Not Writing Intensive
Fall 2014-2015 (Coordinator)

Nursing 302-Nursing Care of Adults Patients II Theory and Practicum
Spring 2010-2011 (Co-Coordinator)
Spring 2009-2010 (Co-Coordinator)
Spring 2008-2009 (Co-Coordinator)

Nursing 203- Biostatistics for Nurses
Spring 2010-2011 (Coordinator)
Spring 2009-2010 (Coordinator)
Spring 2008-2009 (Coordinator)

Nursing 202- Health Assessment
Summer 2009-2010 (Coordinator)
Summer 2008-2009 (Co-Coordinator)

Guest Lectures:

Nursing 503-Neurologic Assessment of the Adult Patient (3 hours lecture and 2 hours simulation)
Spring 2019-2020
Sprin 2018-2019
Spring 2017-2018
Spring 2016- 2017
Fall 2015- 2016
Fall 2014-2015
Fall 2013-2014
Fall 2012-2013

Nursing 501 Foundation of advanced practice (1-hour presentation)
Fall 2019-2020
Fall 2017-2018
Fall 2016-2017
Fall 2015-016
Fall 2014-2015
Fall 2013-2014
Fall 2012-2013

Undergraduate Courses

Altered Neurologic Function
N 210 Pathophysiology Course
Summer 2009-2010
Summer 2010-2011

Nutritional Assessment
Assessment of the Older Adult
Spring 2010-2011
Spring 2011-2012

N 202-Health Assessment: Neurological Assessment
Spring 2019-2020
Spring 2018-2019
Spring 2017-2018
Spring 2016-2017
Spring 2015-2016
Spring 2014-2015
Spring 2013-2014
Spring 2012-2013
Spring 2011-2012

Graduate Courses
N 503: Advanced Health Assessment: Neurological Assessment
Fall 2014-2015
Fall 2013-2014
Fall 2012-2013

Fall 2011-2012
Fall 2010-2011

N 504- Advanced Pathophysiology Course: Altered Neurologic Function
Fall 2009-2010
Fall 2010-2011

N 503-Advanced Psychiatric Assessment Course: Neurologic Assessment of the Adult Patient
Spring 2009-2010
Spring 2010-2011

2. List of Master's thesis and projects supervised

Ongoing Doctorate Students Thesis

Rachel Bejjani
Title: TBD
Role: Advisor

Mahmoud Salam
Title: TBD
Role: Advisor

Mark Doumit (Biomedical Sciences with a concentration in neuroscience)
Title: TBD
Role: Advisor

Ongoing Masters Students Projects and Thesis

Hratch Maskofian
Title: A Tailored Delirium Prevention Bundle for Intensive Care Unit (ICU)
Role: Chair of the thesis committee

Completed Master's Students Projects and Thesis:

Joelle Massouh
Title: Association of Social Support with Resilience as Moderated by Depression, Anxiety, and Personality in Multiple Sclerosis Patients
Role: Chair of the thesis committee

Helen Ismail
Title: Distribution of Phosphorylated Neurofilament Heavy, Accumulation of Beta-Amyloid Precursor Protein, and Behavioral Changes Following Mild Repetitive TBI.
Role: Chair of the thesis committee (Basic Neuroscience Division, Faculty of Medicine)

Reem Salem
Title: The assessment and management of dementia-related challenging behavior in the Emergency Department: A proposed evidence-based algorithm for emergency nurses.
Role: First Reader

Youssef Al Masri
Title: Post-Traumatic Stress Syndrome and Traumatic Brain Injury: Comorbid Clinical Outcomes in the Middle East and North Africa (MENA)Region.
Role: Project committee member (Biochemistry Department, Faculty of Medicine)

Zeena Hashem
Title: The cost of helping: the relationship between self-compassion and burnout among healthcare professionals in Lebanon.
Role: Thesis committee member (Psychology Department, Faculty of Arts and Science)

Rita Asdikian
Title: A novel peri-adolescent model of hippocampal Non-Convulsive Status Epilepticus: Evidence of early alterations in synaptic plasticity and cognitive and emotional behaviors.
Role: Thesis committee member (Interfaculty Graduate Program of Neuroscience
Department of Anatomy, Cell Biology, and Physiological Sciences of the Faculty of Medicine)

Abeer Kaafarani
Title: Neurogenesis and Changes in Dnmt1, H3acK9, and Memory Performance in Mice Exposed to Environmental Enrichment and Exercise Post Severe Traumatic Brain Injury
Role: Co-Chair thesis committee (Lebanese University, Faculty of Medicine, Neuroscience Research center)

Grace Hakim
Title: Sex Differences in Outcomes of Adult Patients with Traumatic Brain Injury
Role: Chair of the thesis committee (HSON)

Alaa Awad
Title: NonConvulsive Status Epielpticus Management: Evidence-Based Clinical Pathway for AUBMC
Role: First Reader (HSON)

Ali Karayani
Title: Implementing a Screening protocol for post-stroke depression at AUBMC
Role: First Reader (HSON)

Abdel Wahab El Firikh
Title: Development of an evidence-based clinical pathway for patients with aneurysmal subarachnoid hemorrhage
Role: First Reader (HSON)

Najla Moufarrej
Tile: Chemotherapy and Cognitive Function; an Educational Program for Nurses
Role: First Reader (HSON)

Joyce Abi Kharma
Title: Improving Nutritional Status in Head and Neck Cancer Patients: A Clinical Guideline
Role: Second Reader (HSON)

Solange Shoueifaty
Project Title: Clinical Guideline for a headache clinic at AUBMC
Project defense: September 2014

Role: First Reader (HSON)

Achraf Emara
Project Title: Establishing an acute stroke management program at AUBMC
Project defense: May 2014
Role: First Reader (HSON)

Sameera Hilal
Thesis title: Nursing students' and clinical faculties' perceptions of effective clinical instructors characteristics in Bahrain
Role: Thesis committee member (HSON)

Amaly Saab (2nd Reader)
Project title: Early mobility protocol in critically ill patients
Project defense: May 2014 (HSON)

Rasha Shehadeh
Thesis Title: Knowledge, Attitudes, Beliefs, and Screening Practices of Domestic Violence against Women among Emergency Departments' Health Care Providers in Lebanon
Role: Chair of the thesis committee September 2013 (HSON)

Rania Mosleh
Project title: Quality of life of pediatric oncology patients and their parents in the palliative care
Role: Second Reader September 2013 (HSON)

Madice Merheb
Project Title: Evidence-based clinical pathway for atrial fibrillation
Role: Second Reader May 2013 (HSON)

Sabat Jamous
Project title: Discharge Planning for patients requiring complex nursing needs
Role: Second Reader June 2012 (HSON)

Maha Habre
Title: Evaluation of Mild Traumatic Brain Injury Management in the Emergency Department at AUBMC
Role: First Reader (HSON)

Noyemi Kasbarian
Title: The need for an Asthma Protocol in the Emergency Unit at AUBMC
Role: Second Reader June 2011 (HSON)

Lamia Eid
Title: Assessing The Need For The Creation of a Fast Track Unit at AUBMC Emergency Department
Role: First Reader. August 2010 (HSON)

Hisham Bawadi
Title: An Acute Care Stroke Unit at AUBMC: Proposal and Recommendation
Role: Second reader June 2009 (HSON)

Farah Salha
Title: Outcome of Patients Presenting to the Emergency Department with Chest Pain
Role: Second Reader. May 2009 (HSON)

3. **Number of Students advised each semester**

E. SERVICE

1. AUB and HSON Committees:

Fall and Spring 2020-2021
HSON Graduate Studies Committee (Chair)
HSON- Research Committee (URB representative, Member)
HSON, Promotion and Reappointment Committee, Undergraduate and Graduate (Member)
AUB Senate Committee on Academic Development (Chair)
AUB- University Research Board (HSON representative)
AUB- HSON Senator and Senate Committee on Faculty Affairs

Fall and Spring 2019-2020
HSON Graduate Studies Committee (Chair)
HSON- Research Committee (URB representative, Member)
HSON, Promotion and Reappointment Committee, Undergraduate and Graduate (Member)
AUB Senate Committee on Academic Development (Chair)
AUB- University Research Board (HSON representative)

AUB- HSON Senator and Senate Committee on Faculty Affairs (member)

Fall and Spring 2018-2019
Graduate Studies Committee (Member)
FM Biomedical Conference organizing committee (Member)
AUBMC- Ambulatory Co-Lead for Epic
AUB- FM- Capital Budget committee (Member)
AUB Ad-hoc Committee for Grievance for Tenure and Promotion
AUB Senate Committee on Academic Development (Chair)
HSON, Promotion and Reappointment Committee, Undergraduate and Graduate (Member)

Fall and Spring 2017-2018
Graduate Studies Committee (Member)
FM Biomedical Conference organizing committee (Member)
AUB task force: Teaching effectiveness (Member)
AUBMC- Ambulatory Co-Lead for EPIC
AUB- FM- Capital Budget committee (Member)
AUB- FM MEMA Co-Chair of Scientific Committee (Mental Health Across the lifespan)
AUB Ad-hoc Committee for Grievance for Tenure and Promotion
AUB Ad-hoc Committee for University Laboratory Equipment
AUB Master Card Scholarship Foundation Program (Selection committee member)
Fall and Spring 2016-2017
HSON Research Committee (Member)
FM Biomedical Conference organizing committee (Member)
HSON task force on the creation of a center of nursing research (Chair)
HSON task force revision of by laws (Member)
HSON task force on tenure and promotion (Member)
AUB task force: Strategic Partnership Initiative (Member)
AUB task force: Teaching effectiveness (Member)
AUBMC- Ambulatory Co-Lead for EPIC
AUB- FM- Capital Budget committee (Member)
AUB MasterCard Scholarship Foundation Program (Selection committee member)

Fall and Spring 2015-2016
HSON Research Committee (Member)
HSON Graduate Studies Committee (Member)
FM Biomedical Conference organizing committee

Fall and Spring 2014-2015
HSON Research Committee (Chair)
FM Research Committee (member)
AUB task force on faculty compensation
AUB Faculty of medicine search committee for chair of anatomy, physiology and cell biology department
AUB Faculty of medicine task force for professionalism

Fall and Spring 2013-2014
HSON Research Committee (Chair)
FM Research Committee (member)

Fall 2012-2013
HSON Research Committee (Chair)
HSON Graduate Committee (member)
FM Research Committee (member)

Fall 2011-2012
HSON Research Committee (Chair)
HSON Graduate Committee (member)
FM Research Committee (member)
FM Simulation Taskforce (member and Co-Coordinator)

Spring 2008-2009 and Fall 2009-2010
HSON Undergraduate Academic and Curriculum Committee (member)
HSON Research Committee (member)

Spring 2008-2012
HSON simulation task force (Coordinator)
Spring 2010-2011 and Fall 2011-2012
Served on HSON by laws task force in preparation for faculty status

Fall 2010-2011 and Fall 2011-2012
Worked on the preparation of the CCNE interim Report (Standard IV, program effectiveness, aggregate student performance and faculty accomplishments, aggregate faculty outcomes and formal complaints)

2. Consultation

Spring 2011-2012
Consultation for the European MS Nurses Professional Curriculum Evaluation. Meeting held in Malta to evaluate a pilot online training program for European MS nurses certification.

Spring 2009-2010
Consultation for Jabal Amel Women Association (JAWA) to evaluate the Kfar Hatta Technical School of Nursing (KHTSN), skills lab and nursing computer lab; the evaluation was performed at the request of the JAWA president and council members. The focus of the consultation was to assess the scope and quality of the nursing skills' lab and assess the quality of the computer lab, staffing, leadership, networking and educational software and database.

Fall 2009-2010
Consultation for the Nursing Service at AUBMC to assist Mr. Anthony Shamoun with the preparation of the flow chart to be used by the nurses at the newly opened Neuro-ICU

3. Professional Practice

Workshop for UAE Nurses :
Ministry of Health, Training, and Development Center Sharjah (Training with the AUB (HSON and Regional Educational Program).
Advanced Health Assessment- **Spring 2018-2019 March 2019**

Lectures for Iraqi Nurses and physicians

- Neurological Overview & Multiple Sclerosis
  Two days' workshop for MS Iraqi Nurses and physicians- **Summer 2017**
  Location: MS center AUBMC- Lebanon
  Sponsored by Novartis in coordination with AUB CME office
- Neuropsychiatric issues in MS
  Two days workshop for MS Iraqi physicians- **Fall 2012-2013**
  Sponsored by Algorythm in collaboration with AUB CME office
- Neurological Overview & Multiple Sclerosis
  Two days' workshop for MS Iraqi Nurses- **Fall 2011-2012**
  Location: MS center AUBMC
  Sponsored by Bayer Pharmaceutical and in coordination with AUB CME office
- Traumatic Brain Injury Management
  Audience: Iraqi Emergency Nurses- **Spring 2010-2011**
  In collaboration with AUB CME office
- Pre-Hospital Trauma Assessment & Pre-Hospital Head Injury Management
  Audience: Iraqi Pre-hospital Nurses- **Fall 2010-2011**
  In collaboration with AUB CME office

Lectures for Lebanese Nurses

- MS Nurse Workshop
  Two days' workshop for MS Nurses- **Fall 2012-2013 and Fall 2013-2014**
  Sponsored by Novartis Pharmaceutical and in coordination with Lebanese order of nurses
- Continuing education program/curriculum for the Lebanese neuroscience nurses. Leading a team of 5 neuroscience nurses, we will train 180 nurses. This is part of a capacity building, train the trainer program, project led by the Lebanese order of nurses. **– Spring-Summer 2018**

4. Service to the community

Webinar with AUBMC and Department of Psychiatry on Preserving Psychological Wellbeing and cognitive performance among older adults during the Covid-19 pandemic. (May 2020)- Target Health Care Workers and Caregivers.

Tips for Preserving the cognitive abilities and psychological wellbeing of the older adults in times of social distancing. For AUBMC social media (March 2020) Target: Public.

Video. Covid-19. Challenges of older adults during a pandemic, the role of municipalities, and society. https://www.youtube.com/watch?v=nRuaaW3yuDs&feature=youtu.be (April 2020) Target: Public (1 min at min 14:10)

Video. Covid-19: precautions for older adults long term care facilities health care worker. In collaboration with the Lebanese Order of Nurses (April 2020) Target : Healthcare workers. https://www.facebook.com/orderofnurseslb/videos/590483088213325/

Coordinated MS awareness campaign on AUB campus. Event organized by the AUBMC MS center, the objective is to educate AUB students on various aspects of the disease. The event led by Nursing and medical students. **Spring 2017-2018**, **Summer 2014-2015 and Fall 2012-2013.**

Speaker in the third MS awareness patient education day held in Kesserwan. Event organized by the AUBMC MS center, the objective is to educate MS patients on various aspects of the disease. **Summer 2012-2013.**

Among the coordinator of the MS awareness patient education day that is organized by the AUBMC MS center and the ministry of public health that took place in Bekaa to educate patients and the public about the various aspects of the disease. **Spring 2012-2013.**

Guest in a TV Health Program "Ainak a Sohtak", an episode about Multiple Sclerosis aired on Future TV on **Dec 27, 2011**.

Speaker in the first MS awareness patient education day held in Beirut. Event organized by the AUBMC MS center, the objective is to educate MS patients on various aspects of the disease**. Spring 2011-2012.**

F. PERSONAL

Languages: Fluent in French (French Baccalauréat), English, and Arabic. Completed three levels of Spanish.**Citizenship:** Lebanese/American (US) **Hobbies:** Hiking

CURRICULUM VITAE

NAME Hera Tashjian

ADDRESS Hariri School of Nursing
American University of Beirut
Lebanon
Phone: 961-1350000 ext 5962
Personal phone: 961-3496844

EDUCATION

2002 **Masters in Nursing**; Clinical Nurse Specialist in Adult Acute and Critical Care at Duke University School of Nursing, North Carolina, US.

1995 **BS in Nursing** at American University of Beirut (AUB) School of Nursing, Beirut, Lebanon

SPECIALTY CERTIFICATION

2004 - now: Certified by American Association of Critical Care Nurses (AACN) as Adult Acute and Critical Care Clinical Nurse Specialist (CCNS).

LICENSURE

1. Licensed to practice nursing in Lebanon since 1995.
2. Licensed to practice nursing in North Carolina, US, since 1999.

WORK EXPERIENCE

- **Jan 2017- current:** Clinical Instructor at Hariri School of Nursing at American University of Beirut (AUB).
- **August 2014- Sept 2016:** Chief Nursing Officer at Lebanese American University Medical Center- Rizk Hospital (LAUMC-RH).
- **August 2014- Nov 2016:** Clinical Instructor at Lebanese American University Alice Ramez Chagoury School of Nursing.
- **Sept 2012-August 2014:** Clinical Instructor at Hariri School of Nursing at American University of Beirut (AUB).
- **Oct 2002- Aug 2012:** Critical Care Clinical Nurse Specialist/Advanced Practice Nurse at AUB

Medical Center, Nursing Services.

- **Aug 2010 – Sept 2012:** Academic Associate at AUB Rafik Hariri School of Nursing. Taught the BSN IV Critical Care Course in 2010. Precepting masters students in their residency since 2005.

- **Oct 2009 – Sept 2012:** Adjunct faculty at AUB Rafik Hariri School of Nursing.

- **Feb 2000 - July 2002:** Charge Nurse and Clinical Nurse III in Cardiac Intensive Care Unit (CICU) at Duke Medical Center.

- **Oct 2001- June 2002:** Clinical Nurse Specialist residency at:
    - Duke Medical Center, Durham, North Carolina. Focus on comprehensive care of the cardiovascular patient; research utilization at the bedside; research on heart failure.
    - Duke Medical Center, Durham, North Carolina. Focus on comprehensive care of the critically ill patient.
    - Rex Hospital, Raleigh, North Carolina: Focus on comprehensive care of patient with heart failure (consultations, case management, teaching, follow up).

- **Feb 1999-Feb 2000:** Clinical Nurse II in Heart Center Step-down units at Duke Medical Center.

- **Oct 1995-Oct 1998:** Registered Nurse in Coronary Care Unit (CCU) at AUBMC.

ADDITIONAL INFORMATION/MEMBERSHIPS

- Member of American Association of Critical Care Nurses (AACN), since 2000.

- Member of the scientific committee of the Lebanese Society of Critical Care Medicine since 2011.

- Served as subject matter expert of the national project by Lebanese Ministry of Health, TrAcc project- Transforming Hospital Accreditation System in Lebanon, Sept 2016-ongoing

- Member of the taskforce on Professional Regulation of the Lebanese Order of Nurses, Sept 2016-ongoing.

- Founding member of the Lebanese Order of Nurses' Society for Nurse Managers, August 2016.

- Founder and leader of interdisciplinary committees and projects at LAU Medical Center in the capacity of Chief Nursing Officer, 2014-2016.

- Member of the Faculty and curriculum committee at LAU School of Nursing, 2014-current.

- Chair of the Social Committee at AUB School of Nursing, 2012-2014.

- Leader of multidisciplinary task force on Hospital-Associated Infections (HAIs), 2008-2012. Developed three prevention and care bundles for Ventilator Associated Pneumonia (VAP),

Catheter Associated Urinary Tract Infections (CAUTI), and Central line Associated Blood Stream Infections (CLABSI).

- Member of the AUBMC ICU and CCU Performance Improvement Committees, 2011-2012.
- Team leader of Adult Critical Care Manual, 2003-2012.
- Leader of development and implementation of evidence-based and quality improvement projects in critical care. E.g. oral care protocol, pressure ulcer prevention, enteral feeding protocol, patient education material, etc…
- Leader of accreditation activities in critical care: LMOH preparation and visit, 2004 &2011; JCI preparation and visit, 2007 &2010.
- Leader of development of adult critical care units' annual plan, 2009, 2010, 2011.
- Structured the critical care educational program at AUBMC (2007) that includes: Critical care course, Basic Critical Care Exam (BCCE), Advanced Critical Care Exam (ACCE), Take-home articles, unit-level sessions, code team certification.
- Member, Nursing Executive Council at AUBMC Nursing Services, 2004-2010.
- Force owner (Force of Autonomy and Force of Consultation) in Magnet Recognition process at AUBMC Nursing Services, 2004-2009.
- Chair, Nursing Research Council, 2009-2011.
- Member, HSON Research and Continuing Education Committee, 2009-2011.
- Chair, Nursing Evidence-Based Practice committee, 2005-2008. Led the development of the AUBMC Nursing EBP model, 2008.
- Leader of establishment of Shared Governance Councils, 2005-2006.
- Leader of restructuring of Shared Governance model in 2008.
- Facilitator, Critical Care Clinical Practice Council, 2006-2011.
- Member, Advanced Practice Nurse Council, 2009.
- BLS (Basic Life Support) and ACLS (Advanced Cardiac Life Support) Provider and Instructor certification by American Heart Association (AHA) (latest updated 2011).
- Chief leader of the establishment of International Training Organization (ITO) with American Heart Association at AUBMC, 2005.
- Co-chair, Code Team Committee at AUBMC, 2003-2007.
- Member, AUBMC Ethics Committee, 2004-2008, 2011.

- Has participated in the development of many organizational policies/procedures, e.g. end-of-life care, patient assessment and reassessment, etc…

AWARDS AND HONORS

1. Awarded by Lebanese Order of Nurses for "Exemplary Contributions in Nursing", December 2012.

2. Member of the AUB School of Nursing Honor Society, since 2011.

3. Advisory Board on the Forum for Shared Governance since 2009.

4. Who's Who Among Students in American Universities and Colleges, Duke University 2002.

PRESENTATIONS AND CONFERENCES:

- Local, national, and international speeches and lectures on the following:
    - Various topics in nursing management and leadership
    - Patient assessment
    - Critical care nursing protocols and standards
    - Infection control Bundles of Prevention (Ventilator-Associated Pneumonia, Central Line Associated Blood Stream Infections, and Catheter-Associated Urinary Tract Infections).
    - Hemodynamic monitoring
    - Sepsis and septic shock

  - Pain and sedation management.
  - Weaning patients from mechanical ventilation (spontaneous breathing trials)
  - Implementing evidence-based practice (EBP) in nursing
  - Prevention of deep vein thrombosis
  - Acute Coronary Syndromes
  - 12-lead ECG interpretation
  - End-of-life care
  - Multidisciplinary approach to patient care
  - Shared governance

- Attended workshop Professional Regulation beyond Legislation provided by ICN consultant Fadwa Affara at Lebanese Order of Nurses, Oct 2016.

- Attended three day conference on Development of Evidence-Based Nursing in an Interdisciplinary Era: Achievements and Prospects, AUB, Oct 2016.

- Organizer and speaker at Annual congress of Lebanese Society of Critical Care Medicine (LSCCM), March 2015, 2014 and 2013.

- Attended AACN's National Teaching Institute and Advanced Practice Institute, May 2011.

- Poster presentation at AACN conference. Authors: Ellis, M., Granger, B., Tashjian, H... Title: International study buddies: Partners in research across the continents, May 2010.

- Organized nursing critical care conference in collaboration with Lebanese Society of Critical Care Medicine (LSCCM), Dec 2009, 2010 and 2011.

- Session presented at LSCCM conference. Title: Implementing evidence-based practice in Nursing, Dec 2011.

- Session presented at LSCCM conference. Title: Pathways, protocols, guidelines: which one do I need in my critical care unit?, Dec 2010.

- Session presented at LSCCM conference. Title: VAP- the evidence behind the bundle for prevention, Dec 2009.

- Session presented at a workshop organized by Lebanese Syndicate for Hospitals. Title: Patient Assessment: the experience at AUBMC, Nov 2010.

- Workshop presented to national and regional physicians on Prevention of VAP, February and April 09.

- Grand Round titled: VAP, not on my watch!, June 09.

- Session titled: 12 leads and beyond, given to AUB HSON masters' students annually.

- Workshop presented to all AUBMC nurses in preparation for a new shared governance model, October 2008.

- House-wide sessions titled: Evidence-based Practice: This is how we do it, June 2008, June 2009.
- AUBMC Nursing Critical Care course annually.

HOURY PUZANTIAN, PhD, MSc, MTR, BSN, RN, FAHA
CURRICULUM VITAE
e-mail: hp00@aub.edu.lb; houry@uic.edu

Dr Puzantian's research is directed at understanding mechanisms linking **risk factors to cardiovascular disease** (CVD), with a focus on **arterial stiffness** in various **metabolic conditions** such as **hyperglycemia, hyperinsulinemia, obesity, and chronic kidney disease** (CKD). Her work on the cardiovascular-renal cross-talk may reveal **therapeutic targets** for prevention and treatment of CVD and CKD.

EDUCATION

2013 **Postdoctoral Training**
Master of Science in Translational Research, Focus: **Cardiovascular/Renal**
Institute for Translational Medicine & Therapeutics (ITMAT)
University of Pennsylvania

2011 **Doctor of Philosophy,** Major: **Nursing Science**
University of Pennsylvania

2009 Teaching Certificate, Center for Teaching and Learning
University of Pennsylvania

2001 **Master of Science,** Major: **Pharmacology & Therapeutics**
American University of Beirut (Lebanon)

1996 **Bachelor of Science in Nursing**
American University of Beirut

1993 Baccalaureate II, Focus: Experimental Sciences
Armenian Evangelical College, Beirut

PROFESSIONAL EXPERIENCE

ACADEMIC POSITIONS

Fall 2018-current **Assistant Professor** (Tenure-track)
American University of Beirut (AUB), Hariri School of Nursing

Fall 2018-current **Adjunct Assistant Professor**
University of Illinois at Chicago, College of Nursing

Fall 2013-2018 **Assistant Professor** (Tenure-track)
University of Illinois at Chicago, College of Nursing

Spring 2013 **Lecturer N / Associate Course Director**
University of Pennsylvania, School of Nursing

Fall/Spring 2011-12 **Lecturer N**
University of Pennsylvania, School of Nursing

Summer 2010, 2011 **Lecturer B, Course Coordinator**
University of Pennsylvania, School of Nursing

Summer 2009 **Lecturer B**
University of Pennsylvania, School of Nursing

2007-2011 **Teaching Assistant**
University of Pennsylvania, School of Nursing

2001-2005 **Lecturer** (part-time, on Saturdays)
Lebanese University, School of Nursing
Beirut, Lebanon

Spring 2001 **Clinical Instructor**
University of Balamand, School of Nursing, Beirut

CLINICAL, RESEARCH & ADMINISTRATIVE POSITIONS

2003- 2007 **Clinical Research Unit (CRU) Coordinator**
(CRU Operations Management/Development, Implementation of Trials)
Department of Internal Medicine
American University of Beirut Medical Center

2001-2002 **Research Assistant-Research Unit nurse**
(Clinical Research Unit initiation with medical team)
Department of Internal Medicine
American University of Beirut Medical Center

1996-1998 **Registered Nurse, Coronary Care Unit**
American University of Beirut Medical Center

LANGUAGES

Excellent reading, writing and speaking skills in English, Arabic, Armenian; fair in French.

HONORS AND AWARDS

2017 **Fellow, American Heart Association (FAHA),** Council on Cardiovascular & Stroke Nursing (CVSN)

2013 **Early Career travel award**, CVSN, American Heart Association Scientific Sessions

2010 **Educational Stipend,** Council of Nephrology Nurses and Technicians (CNNT), National Kidney Foundation Spring Clinical Meetings

2010 **The 2010 Teaching Assistant Award**, School of Nursing, University of Pennsylvania-*Graduation Ceremony*

2009 **Inducted member, Sigma Theta Tau International**, Honor Society of Nursing (Xi Chapter)

2007-11 **PhD Scholarship**, School of Nursing, University of Pennsylvania

2007 **Outstanding Service Award** for assisting with the establishment/ development of, and management of the Clinical Research Unit, Department of Internal Medicine
American University of Beirut Medical Center

1996 **The Penrose Award -** American University of Beirut-*Graduation Ceremony*

FUNDED GRANTS

2021-current
University Research Board (URB) and Medical Practice Plan (MPP), AUB
Mediterranean, Low Carbohydrate and Control diet in Obese Patients on Liraglutide: a Randomized Controlled Trial (secondary outcome of visceral adipose tissue (VAT), and other body composition parameters).
Role: Co-I (PI: Chakhtoura M, co-PI: Nasreddine L)
Amount: $10,000 (URB) and $5870 (MPP)

2021 June-current
University Research Board, AUB
Type 1 Diabetes in Emerging Adults in Lebanon: A Mixed Methods Study.
Role: Co-PI (**Dissertation** of PhD student: Amani Bayrakdar, Advisor/PI: Dr Samar Noureddine)
Amount: $10,352

2020 Aug-current (Program awarded for 5 years till May 2025)
NIH D43 Fogarty International Research Training Award (NCD-LIFESPAN):
Expanding Capacity Building in Non-Communicable Diseases: Scholars in HeAlth Research Program (SHARP) at the American University of Beirut. (PI: Ghada El-Hajj Fuleihan)
Role 1: Co-Mentor
Role 2: Instructor (Upcoming Course Module title: **Global Cardiovascular Disease Prevention**" in collaboration with the Lown Cardiovascular Program, Department of Global Health and Population, Harvard T.H. Chan School of Public Health, Boston)
Amount: $241,093 (annual direct costs)

2019-current
Medical Practice Plan, AUB
*The correlation between vascular reactivity as detected by **Pulse Wave Velocity** and increased **vascular specific markers** of inflammation in HIV-Infected Individuals.*
Role: Co-PI (PI: Rizk, N)
Amount: $26,250

2019-current
Farouk Jabre Interfaculty Award, AUB
Mediterranean, Low Carbohydrate and Control diet in Obese Patients on Liraglutide: a Randomized Controlled Trial (primary outcome: CV profile/**Arterial Stiffness**)
Role: Co-I (PI: Chakhtoura M, co-PI: Nasreddine L)
Amount: $30,109

2019-current
Seed grant for Assistant Professors, Hariri School of Nursing, AUB
*The **Macrovascular and Microvascular Profile** of Patients with Diabetes, With and Without Kidney Disease: Role of Oxidative Markers in Early Vascular Aging*
Role: PI
Amount: $5000

Completed Role in Funded Grant
Contribution to methodology for pharmacologic clamping of the pancreas
Nov 2017- Aug 2018
NIH R01 DK-107605-01 (04/01/16-03/31/20)
Treating Inflammation in PCOS to Ameliorate Ovarian Dysfunction
Examining the effects of salsalate administration on the ovarian capacity to secrete androgens, menstrual function, *insulin sensitivity and lipid- and glucose-induced inflammation* in Polycystic Ovary Syndrome.
Role: Co-I (PI: González, F, co-I: Quinn, L at UIC)
Amount: $2,979,779

Completed Grants
Early Career
2014-2017
Campus Research Board Pilot Grant / Office of Vice Chancellor for Research, University of Illinois at Chicago:
*Non-traditional Factors and **Cardiovascular Disease** in Patients with Chronic Kidney Disease (Ancillary to the Chronic Renal Insufficiency Cohort)*

Role: PI [Co-Is, UIC/UPenn: Townsend, R, Piano, M, Lash, J, Quinn, L, Park, C]
Amount: $19,889

Postdoctoral Research – Training Grant
2011-2013
Clinical and Translational Science Award **(CTSA-K12)**-based program, Institute for Translational Medicine & Therapeutics, Perelman School of Medicine– University of Pennsylvania.
*The effect of glucose on **aortic pulse wave velocity** in healthy individuals.*
[Postdoc Mentors at UPenn: Dr Raymond Townsend (co- PI), Dr Karen Teff (co-I)]
Role: Co-PI
Amount: $96,000

Dissertation
2010-2011
National Kidney Foundation, Council of Nephrology Nurses and Technicians
*Differences in **cardiovascular event-free survival** by age in patients with moderate and severe chronic kidney disease.* [Dissertation Chair: Dr Barbara Riegel (PI Sponsor, UPenn)]
Role: PhD Student
Amount: $5000

OTHER FUNDED SCHOLARLY ACTIVITIES

2010 Lynch Fund support / Office of Nursing Research funding - School of Nursing, University of Pennsylvania: travel/poster presentation at the American Heart Association, Chicago, Illinois.

2010 Lynch Fund support - School of Nursing, University of Pennsylvania: for certification course by the NIH Clinical Center: "Principles of Clinical Pharmacology".

2009 Graduate and Professional Student Assembly (GAPSA) / Lynch Fund support / Office of Nursing Research funding - School of Nursing, University of Pennsylvania: travel/poster presentation at the American Heart Association, Orlando, Florida.

2006 Boston Scientific - travel support for oral presentation at the 7th Annual Interdisciplinary Research Conference, School of Nursing and Midwifery, University of Dublin - Trinity College, Dublin, Ireland.

2005 Noureddine, S., Adra, M., Arevian, M., Dumit, N., **Puzantian, H.,** Shehab, D. and Abchee, A. Factors related to delay in seeking health care among persons experiencing symptoms of Acute Coronary Syndromes. *Program and Abstracts book*, Centennial Nursing Conference: Pioneering Achievements and Global Vision, School of Nursing, American University of Beirut, Lebanon, Jun30 - Jul 2.

2005 Noureddine, S., Adra, M., Arevian, M., Dumit, N., **Puzantian, H** and Shehab, D. Factors associated with delay in seeking health care among persons experiencing Acute Coronary Syndromes. *European Journal of Cardiovascular Nursing*, 4(1): 56-57.

2005 Shahine, R., Badr, L., **Puzantian, H**., Kanazi, G. and Abboud, M. A new tool to assess pain in lebanese pediatric oncology patients undergoing invasive procedures: *Program and Abstracts book*, Centennial Nursing Conference: Pioneering Achievements and Global Vision, School of Nursing, American University of Beirut, Lebanon, Jun30 - Jul 2.

2004 Shahine, R., Badr, L., **Puzantian, H**., Kanazi, G. and Abboud, M. The efficacy of a new tool to assess pain in Lebanese pediatric oncology patients undergoing invasive procedures (Doll versus FLACC and Wong-Baker): (poster, second prize winner at the Association of Pediatric Oncology Nurses, Oct 2004, Kansas City, Ohio.)

1999 Dumit, N., Doumit, M., kais, N., Kanaan El Hajj, K.and **Puzantian, H**. A comparison of patient and staff outcomes in functional and modular nursing-a pilot study. *Book of Abstracts*, The First International Nursing Conference in Lebanon, School of Nursing, American University of Beirut, Lebanon, Jun 21-23.

OTHER RESEARCH EXPERIENCE / PERFORMANCE IMPROVEMENT/ GUIDELINES / STANDARD OPERATING PROCEDURES

Appendix I

ORAL PRESENTATIONS

2021 COVID-19 Vaccine: Community Immunity and Mitigation of Dire Outcomes. (**Invited Speaker,** Nursing Grand Round Feb 8 by Sigma Chi Iota Chapter, HSON AUB). Attendees: AUBMC nurses; nursing faculty and students.

2019 Focusing the Spotlight on Cardio-Vascular-Renal Interactions. (**Invited Speaker**, 5th Nursing Kidney Symposium, Lebanon: "Kidney Health for Everyone Everywhere". On the occasion of World Kidney Day organized in collaboration with the **Lebanese Society of Nephrology and Hypertension**, and

the Division of Nephrology and Hypertension at AUBMC - April 6; **CE credits for nurses by the ANCC**).

2018 Chronic Kidney Disease is Associated with Increased dp-uc-MGP, a Marker of Vascular Vitamin K Deficiency. **North American Artery** meetings, Chicago, Illinois - June 16

2018 Cardio-Vascular Outcomes "in Context": A Focus on Arterial Stiffness in Various Metabolic Conditions. (**Invited speaker**, **American University of Armenia.** Conference on "The power of nursing in caring for people who are at risk for or are living with cardiovascular disease" – June 8)

2016 The cardio-renal cross-talk: A focus on arterial stiffness. (**Invited speaker**, Research Studies Session / Council of Advanced Practitioners, Spring Clinical Meetings / **National Kidney Foundation** – April 30)

2016 The role of glucose in arterial stiffness. Faculty Research Presentation, Department of Biobehavioral Health Science, College of Nursing, **University of Illinois at Chicago**, IL, Apr 15.

2015 eGFR and risk of cardiovascular events. (**Invited Speaker**: Risky Business/Prevention & Rehabilitation Track, **American Heart Association**, Scientific Sessions **-** Nov 10)

2015 Cardio-vascular investigations in kidney dysfunction, hyperglycemia, and aging. (**Invited Speaker**: Research Seminar, Hariri School of Nursing, **American University of Beirut**, Lebanon - Jan 9)

2014 Is cardiovascular risk prediction improved by new GFR estimation methodology? Faculty Research Presentation, Department of Biobehavioral Health Science, College of Nursing, **University of Illinois at Chicago**, IL, Oct 24.

2013 Making the transition from graduate student to professor. (**Invited Speaker**: Center for Teaching & Learning, Session for doctoral students at School of Nursing, **University of Pennsylvania**, Philadelphia, PA, Jan 23).

2012 Glucose and Aortic Pulse Wave Velocity: preliminary data. **North American Artery** meetings, Philadelphia, PA, Aug 7.

2011 Differences in cardiovascular event-free survival by age in patients with moderate and severe chronic kidney disease. (**Keynote Speaker**, **National Kidney Foundation**, Council of Nephrology Nurses and Technicians, Las Vegas, NV, April)

2010 A Tale of Urbanization in a Middle Eastern Culture: Cardiovascular Disease in Lebanese Women. [**Invited Speaker**: **International Conference on Women's Health Issues (ICOWHI)**, University of Pennsylvania, PA, April 7.

2009 Pharmacogenetics: An era of personalized care, (Ms Puzantian & Dr Boullata), Biomarkers Special Interest Group. School of Nursing, **University of**

Pennsylvania, Philadelphia, PA, Aug 5.

2007 Clinical Research: An emerging dimension in nursing practice at AUBMC. Session for Nurse Managers and Clinical Nurse Specialists, organized by the Nursing Research Committee at the **American University of Beirut Medical Center**, Beirut, Lebanon, Aug 8.

2007 On the Clinical Research Unit at AUMBC. The 1st Lebanese Research Day organized by the Standing Committee on Research Exchange (SCORE) of the the Lebanese Medical Students' International Committee (LeMSIC), **American University of Beirut**, Beirut, Lebanon, Mar 3.

2006 The need for structured nursing care in clinical trials. The 7th Annual Interdisciplinary Research Conference: Transforming Healthcare through research, education and technology. School of Nursing and Midwifery, **University of Dublin, Trinity College**, Dublin, Ireland, Nov 8.

2006 Research in the Department of Internal Medicine: a focus on the Clinical Research Unit. The First Clinical Research Day, LeMSIC, medical students, residents and registered nurses, **American University of Beirut Medical Center**, Beirut, Lebanon Jun 10.

2005 Introduction to Clinical Research. Residency Journal Club session, **American University of Beirut Medical Center**, Beirut, Lebanon, Nov 9.

2004 Introduction to Clinical Research: Infrastructure and Principles of Conduct. Residency Core Curriculum session for Interns and Residents, **American University of Beirut Medical Center**, Beirut, Lebanon Nov 25.

2000 Prevention of bad cardiac remodeling after myocardial infarction: Angiotensin-Converting Enzyme Inhibitors (ACE-Inhibitors). Coronary Care Unit, registered nurses, **American University of Beirut** Medical Center, Beirut, Lebanon, Apr 26. The Research Seminar and Journal Club Series, graduate students in medicine, School of Medicine, American University of Beirut, Beirut, Lebanon Apr 7.

1999 Resistance to Furosemide.
Staff Development Department, nurse managers and registered nurses, **American University of Beirut** Medical Center, Beirut, Lebanon Jul 28. Coronary Care Unit, registered nurses, American University of Beirut Medical Center, Beirut, Lebanon Mar 17. The Research Seminar and Journal Club Series, graduate students in medicine, School of Medicine, American University of Beirut, Beirut, Lebanon, Feb 26.

INVITED PANELIST

2016 Representative of Nursing Sciences – Mentorship of AUB Alumni; Healthcare and Life Sciences Forum. The Sixth North American Regional Summit, Worldwide Alumni Association of the American University of Beirut. Philadelphia, Oct 8

INVITED MEMBER, SCIENTIFIC PLANNING COMMITTEE

2020 Sep-Dec The **Association of American Medical Colleges** (AAMC) Visiting Student Learning Opportunities (VSLO) Program and **Weill Cornell Medicine-Qatar** (WCM-Q) - webinar series on transformation of healthcare education during COVID-19: **COVID-19 Healthcare Education Series: A Global Perspective.**

GUEST EDITOR

2015-2017 BioMed Research International-Nephrology:
Co-edited special issue on "Insights into living with kidney disease"

MENTORSHIP/ADVISING –
[Junior Faculty in Medicine, Students in PhD, DNP, MSN Programs]
American University of Beirut
2020/12-current **Chair**, Masters Thesis Committee
Ahmed-Rufai Yaheya (adult gerontology track): Polypharmacy in patients with Type II Diabetes in a primary care setting

2020/10-current Member, PhD Dissertation Committee of Amani Bayrakdar
Dissertation Topic: Type 1 Diabetes in Emerging Adults in Lebanon: A Mixed Methods Study. (Advisor: Dr Samar Noureddine)

2020/11-current Member, Masters Thesis Committee (Chair: Dr Angela Massouh)
Salli Atweh (adult gerontology track): Systematic Review on interventions for frail adults with heart failure

2019/11-current Member, Masters Thesis Committee (Chair: Dr Samar Noureddine)
Noura Jannoun (adult gerontology track): Feasibility of Implementing Early Mobilization of Patients in the Intensive Care Unit: Views of Physicians and Nurses.

2018/09-current Mentor on Scientific Writing, Dr Georges Assaf
(Department of Family Medicine)

MSN Academic Advisor - Adult/Gerontology Track
2020-current Adnan Kreik
2020-current Vanessa Al Haddad
2020 Houry Kazarian
2020-current Aya Azzam
2020-current Farah Farroukh

2019-current Ahmed-Rufai Yaheya
2019-current Ahmad Al Jammal
2019-current Steven Frangieh

University of Illinois at Chicago

2018/7-2020/12 Member, PhD Dissertation Committee (Chair: Dr Eileen Collins)
Fatimah AbuDayah **Successfully defended Dec 3, 2020**
(Puzantian moved to Beirut; per protocol, not eligible to continue as Chair)

2017-2018/6 **Chair**, PhD Dissertation (in proposal phase) and Preliminary Exam Committee
Fatimah AbuDayah: successfully passed Preliminary Exam - November 21, 2017. Dissertation Topic: To determine the association of HF biomarkers, quality of life and frailty in patients with HF with preserved ejection fraction, with and without kidney disease.

2015-2018 PhD Academic Advisor-Fatimah AbuDayah
(co-advising with Dr Mariann Piano up to Summer 2017)

2015-17 Member, PhD Dissertation Committee & Preliminary Exam Committee
(Chair: Dr Mariann Piano)
Minkyung Kang: Dissertation Defended - January 30, 2017:
Cardiovascular effects of binge drinking among Korean college students.
Preliminary Exam successfully passed- Dec 2, 2015

2014-16 Member, PhD Dissertation Committee & Preliminary Exam Committee
(Chair: Dr Catherine Ryan)
Jongwon Yoo: Dissertation Defended - March 14, 2016:
Predicting one-year kidney graft failure and death with cardiovascular and immunologic factors.
Preliminary Exam successfully passed- Apr 2014

Faculty Mentor, DNP Project
2018 Alexandra Zago (Faculty Preceptor: Tocarra Dantzler, Transplant ICU at UIH)- Impact of an educational intervention on documentation and nursing knowledge of care of patients readmitted after kidney transplant.

2016-17 Faculty Mentor, DNP Project
*****Sarah Salce (Faculty Preceptor: Dr Catherine Murks, University of Chicago)-Examining the effect of a care kit on first admission or readmission for patients with reduced ejection fraction heart failure.
***** Salce received the ***Dean's Award of Excellence in Practice***

2016-17 Faculty Mentor, DNP Project
Hyunjung Shin (Faculty Preceptor: Dr Kelly Vaez, UIC)-The cardiovascular risk profile for hypertensive patients at a nurse-managed, integrated clinic: Implications for self-management support strategies.

DNP Academic Advisor
2017-2018 Meagan Pollina - Adult/Geriatric-Acute Care

2015-2018 Anna Duchnowska - Adult/Geriatric-Acute Care
2015-2017 James Dumonde - Adult/Geriatric-Acute Care
2014-2017 HyunJung Shin - Adult/Geriatric-Primary Care
2014-2017 Sarah Salce - Adult/Geriatric-Acute Care

SUPERVISING

Graduate Assistant, Mastercard Foundation Scholars Program
Spring 2020-current Ahmed-Rufai Yaheya [MSN Student/**International (Ghana)**, Adult Gerontology Track]
Spring 2019 Mohammad Taha (MSN Student, Adult Gerontology Track)
Graduate Assistant, HSON AUB Scholarship (MSN Students, Adult Gerontology Track)
Fall 2021-current Mohamad Mubarak
Fall 2019-2021 Steven Frangieh
Undergraduate, Research Volunteers
Summer 2021 Saleh Awada
Spring 2021 Roba El-Zibaoui - **Undergrad Research Volunteer Program (URVP)**
Spring 2020 Sary Faraj - URVP

TEACHING

American University of Beirut, Hariri School of Nursing
Fall 2020 NURS 504 Advanced Pathophysiology (Course Coordinator)
NURS 406 Nursing Research (Course Coordinator)

Summer 2020 Guest faculty, N608 Scholarship in Nursing Grant Writing (Scientific Merit, Innovation, the NIH Review Process)

Spring 2020, 2021 N604 Measurement in Health Research (PhD) Co-coordinator
N502 Advanced Nursing Research Co-teaching/Co-coordinator
PHRM 314 Advanced Pharmacology for Nursing (co-teaching)
HUMR248 Anatomy/Physiology (Course Instructor for review sessions)

Fall 2019 NURS504 Advanced Pathophysiology (Blended course; Course Faculty)

Spring 2019 N604 Measurement in Health Research (PhD) Course Development/Co-coordinator
N502 Advanced Nursing Research (co-teaching)
PHRM 314 Advanced Pharmacology for Nursing (co-teaching)
HUMR248 Anatomy/Physiology (Course Instructor for review sessions)

Fall 2018 NURS504 Advanced Pathophysiology (Blended course; Course Faculty)
HUMR244/248 Anatomy/Physiology (Course Instructor for reviews)

University of Illinois at Chicago, College of Nursing

Spring 2018 NURS422 Pharmacology (Course Coordinator & Instructor)

Fall 2017 NURS377 Integrative Practice Experience (Course instructor, 1 of 5 faculty)
NURS422 Pharmacology (Additional course revision for Spring 2018)
NUEL594 The Nature and function of sleep (new online course for various professions; Guest Lecturer, Medications for Sleep Disorders)

Spring 2017 NURS422 Pharmacology (Co-coordinator, course Instructor)
Course Faculty:
NUEL593 PhD Research Practicum-Fatimah AbuDayah
Laboratory technique for ELISA / Measurement of Arterial Stiffness
NUEL596 PhD Independent Study- Fatimah AbuDayah
Self-study in biomarkers relevant to Heart Failure

Fall 2016 NURS531 Advanced Pharmacology (Course Instructor/co-teaching)
NURS204 Professional Nursing 1 (Course development, & Instructor, Introduction to Research & Professional Ethics)
NURS422 Pharmacology (Major course revision for Spring 2017)

Spring 2016 NURS531 Advanced Pharmacology (Course Instructor/co-teaching)
NURS534 Advanced Physiology (Guest Lecturer, Cardiovascular & Renal)

Spring 2015, 2016 NURS535 Advanced Pathophysiology (Guest Lecturer)
NURS422 Pharmacology (Guest Lecturer)

Fall 2014, 2015 NURS531 Advanced Pharmacology (Guest Lecturer/Course Instructor)
NURS421 Pathophysiology (Guest lecturer)

University of Pennsylvania, School of Nursing

Spring 2013 Lecturer N / Associate Course Director
N165 Integrated Pathophysiology, Pharmacology & Therapeutics
Lecturer N
N608 Advanced Pharmacology & Therapeutics for Nursing Practice

Fall/Spring 2011-12 Lecturer N
N242 Basic Concepts of Pharmacology & Therapeutics
N508 Applied Pharmacology in Nursing Practice

Summer 2010 & 2011 Lecturer B, Course Coordinator
N242 Basic Concepts of Pharmacology & Therapeutics

Summer 2009 Lecturer B
N637 Introduction to Research Methods & Design

Fall/Spring 2007-10 Teaching Assistant
N242 Basic Concepts of Pharmacology & Therapeutics
N508 Applied Pharmacology in Nursing Practice
N560 Pediatric Pharmacology for Nurses

Lebanese University, School of Nursing, Beirut, Lebanon

2001- 2005 Lecturer, part-time
Fundamentals of Nursing, Medical-Surgical Nursing,
Nursing Informatics, Psychiatric Nursing

University of Balamand, School of Nursing, Beirut, Lebanon
Spring 2001 Clinical Instructor
Critical Care Nursing (Coronary Care, Emergency Unit, Dialysis)

UNIVERSITY SERVICE

American University of Beirut

Campus

2021-curent University Senate, HSON representative
2020-current Member, Taskforce on Laboratory Equipment
2020, 2021 Faculty Judge, Post-Doctoral/research fellow proposal presentations,
Faculty, Journal Club
Research Personnel Program, Clinical Research Institute
Fall 2019-current Elected HSON Representative, Research Committee,
Faculty of Medicine (Medical Practice Plan funding)
Interviewer, MasterCard Scholarship Foundation (10 interviews), May19

Hariri School of Nursing

2020-current Member, Faculty Workload Taskforce
2020-current Member, Graduate Assessment Committee
2018-current Member, Research Committee (re-elected 2021)
2018-current Member, Graduate Studies Committee (re-elected 2021)
2018-current Member, Graduate Division

University of Illinois at Chicago

Campus

2018 Faculty facilitator, Interprofessional Education Program, April 13
2016 Interviewer, Honors College Admissions (5) – March 7
2015 Faculty Judge, UIC student research forum – April 2
2014 Faculty Judge, UIC student research forum – April 8
2013 Member, Graduate Faculty

College of Nursing

2018 Interviewer, Holistic interviews/admissions-Graduate Entry Program
2017 Application reviewer- Graduate Entry, Master of Nursing (17)
2016-2018 Member, Diversity Faculty and Staff Retention & Recruitment Subcommittee/
Diversity Committee
2016 Interviewer, Holistic interviews/admissions-Graduate Entry Program (8)
2015-16 ***co-Chair***, Faculty Retreat Committee
2015-16 Member, BSN Curriculum Revisions Workgroup
2015-2018 Member, Diversity Committee
2015 Interviewer/Application reviewer - BSN and Graduate Entry Program:
Holistic interviews (84) / Application reviews (10)

Department of Biobehavioral Health Science

2016-2018 ***Chair*****,** Faculty Search Committee
2015 Member, Interim Faculty Search Committee
2014-2016 Member, Appointment, Promotions, & Tenure Committee

University of Pennsylvania

2012 Member, Institutional Review Board (MTR program/ITMAT, Feb-Jul 2012)
2011-current Member, UPenn Alumni
2011 Student Awards Taskforce, SON, Doctoral student representative
2010 Member, Organizing committee- Doctoral Student Spring Colloquium
2008-2010 Research Committee, SON, Doctoral student representative
2009 Doctoral student leader, School of Nursing, UPenn, PhD Program Review
2008-2009 President, Doctoral Student Organization-Nursing
2007-2008 GAPSA (graduate student government), Nursing doctoral student representative
2007-2011 Member, Doctoral Student Organization- Nursing
2007-2011 Member, Armenian Student Association

American University of Beirut

2016-current Member, Public Relations Committee, WAAAUB Nurses' Chapter
2009-2013 Member, AUB Alumni, Philadelphia-Delaware-New Jersey Tristate Chapter
2009 Member, Programs Committee, Philadelphia-Delaware-New Jersey Tristate Chapter Alumni
2001-2007 Member, Professional Development Committee AUB Alumni, Nurses' Chapter
2004-2006 Member, Health Seeking Behavior Research Group, School of Nursing (SON)
2001-2007 Member, Clinical Research Committee, Department of Internal Medicine, AUBMC
2001-2007 Member, Nursing Research Committee, AUBMC
1998-2001 Member, Financial Committee, AUB Alumni, Nurses' Chapter
1997 Member, Publications Committee, NUTRIX (AUBMC Nursing Services Newsletter)
1996-current Member, AUB Alumni, Beirut
1995-1996 President, Nursing Student Society
1993-1996 Member, Nursing Student Society
1993-1994 Class Representative, BSN II, SON

COMMUNITY ACTIVITIES

Beirut, Lebanon

2021 COVID-19 vaccination campaign volunteer-adverse events monitor, AUBMC
2020 Volunteer nurse, Quick Aid wound care clinic, Aug 4th Beirut port explosion neighborhood
2020 Support Coordinator, Disaster Management Unit - Lebanese Red Cross: Aug 4th Beirut Port Explosion sites

Chicago, Illinois

2016 Presenter, Community Stroke Education session (AHA/ASA) at senior home: Flannery Apts: 1507 N Clybourn Ave, Chicago, IL 60610 (May 12)
2015 Presenter, "FAST" Community Stroke Education sessions (AHA/ASA)
Audience: African American seniors in a BP management program.
Chicago Housing Association (CHA) sites-Senior Homes:
Lorraine Hansberry Apts: 5670 W Lake str, Chicago, IL 60644 (May 19)
Minnie Riperton Apts: 4250 S Princeton Ave, Chicago, IL 60609 (May 22)
2014-2018 AHA Volunteer Health Educator– Midwest Affiliate – High blood pressure program-*Check. Change. Control.*

Philadelphia, Pennsylvania

2007-2013 Young Professionals, Armenian General Benevolent Union (AGBU)

Beirut, Lebanon

2006 Refugee relief nurse-volunteer-performing triage, health assessment and drug dispensing for refugees (organized by Green Line & Medicins sans Frontiers)

2005-2007 Board member, Rainbow Nursery, First Armenian Evangelical Church

2002-current Member, Spears Friends Association of former first-responders of sector 101, Lebanese Red Cross

2002 Medical techniques committee, Lebanese Red Cross (sector 101)

1999-2002 Certified Volunteer Ambulance Paramedic in the Lebanese Red Cross (certf. no. 99-2298)

1995-6,1999 Participant in AUB Career Guidance and Recruitment to Nursing

1995 Participant in the National Polio Campaign, Lebanon, April 1995

1991-1992 President of the History Club, Armenian Evangelical College

1989-1991 Member of the History Club, Armenian Evangelical College

1989-1991 Member of the Armenian Club, Armenian Evangelical College

1988-2001 Member of Christian Endeavour Youth Group & Juniors' group

APPENDIX I

RESEARCH WORK EXPERIENCE

University of Pennsylvania, School of Nursing 2011

Clinical Trial

A long term, open label study with *Teduglutide* for subjects with parenteral nutrition dependent short bowel syndrome who completed study CL0600-020 (*Quintiles*-managed study, study coordination support)

American University of Beirut Medical Center 2001-2007

Clinical Studies Last Involved in

i) Investigator-driven studies

Obesity management research team (assisted in the development and submission of an *NIH R01* Proposal)

Coronary angiographic findings and clinical risk factors in Lebanese patients with *Chronic Kidney Disease***,** Division of Cardiology (initiated and prepared the proposal, Investigator)

Assessment of *Anti-apolipoprotein AI* as a risk factor for CAD in a Lebanese population, Division of Cardiology (initiated and prepared the proposal, Co-investigator)

Cross sectional study on the *quality of life* in the Lebanese *Behcet population*, Division of Rheumatology (prepared the proposal as Co-investigator)

Devising and maintaining a *Cardiovascular Database*, Division of Cardiology (Research nurse)

ii) Sponsored studies

A randomized, double-blind, placebo-controlled, multicenter, *Phase II* dose-finding study of *Atacicept* given subcutaneously in subjects with rheumatoid arthritis and inadequate response to TNFα antagonist therapy (Study nurse)

Thallasemia Cardiac Research Network *(TCRN)* & National Heart, Lung and Blood Institute *(NHLBI): Phase II* randomized, double- blind, placebo-controlled trial comparing the effect of *Deferoxamine* with or without oral *Deferiprone* (L1) on cardiac left ventricular function assessed by MRI in adults with transfusion-dependent Beta-Thalassemia (Study nurse)

MSD *Phase IV*: The *HEAAL* Study: A randomized clinical study to evaluate the effect of *Losartan* 50mg and Losartan 150mg in Heart Failure patients with ACEI Intolerance. (Study coordinator)

Completed Clinical Studies

MSD *Phase IV* Study: The A to Z Study (*TIMI 21***)**: A multicenter, randomized, controlled, double-blind trial to investigate the clinical efficacy and tolerability of early treatment with *Simvastatin* 40mg daily for 30 days, followed by Simvastatin

80mg daily thereafter in *Tirofiban*-treated Acute Coronary Syndrome patients who have been randomized to receive Enoxaparin or Unfractionated Heparin in conjunction with Aspirin, and in optimally-treated ST Elevation Acute Coronary Syndrome patients. (Study coordinator)

MSD *Phase III* Study: A randomized, double-blind study to evaluate the safety and efficacy of *Etoricoxib* 60mg and *Diclofenac Sodium* 150mg in patients with Osteoarthritis of the knee or hip. (Study coordinator)

Treatment of Behcet's Uveitis with *Infliximab* (TNF-α antagonist): a pilot study. Division of Rheumatology (Study nurse)

MSD *Phase III*: The *EDGE II* Study: A randomized, double-blind, multicenter, study to evaluate the tolerability and effectiveness of *Etoricoxib* 90mg Q.D. versus *Diclofenac Sodium* 75mg B.I.D. in patients with Rheumatoid Arthritis (Study coordinator)

Sanofi-Synthelabo *Phase IV*: *AMISH* Study: *Aprovel* for the Management of Isolated Systolic Hypertension (Study initiation, study not conducted)

Boston Scientific *Milestone II* Registry: Evaluation of TAXUS Express II stents (Registry coordinator)

Causes of death in patients with End Stage Renal Disease on Hemodialysis at AUBMC, Division of Nephrology (Data entry, analysis, presentation prep)

Comparison of systemic inflammatory parameters between patients undergoing percutaneous coronary intervention with drug-eluting versus bare-metal stent placement, Division of Cardiology (Study coordinator)

Boston Scientific Olympia Liberte' TAXUS coronary stent Registry (Registry coordinator)

MSD Retrospective SMART Study: Evaluation of medical therapy in Coronary Artery Disease

Sanofi-Aventis *Phase III*: The ExTRACT (*TIMI 25*) Trial: A randomized, double-blind, double-dummy, parallel group, multinational, clinical study to evaluate the efficacy and safety of enoxiparin versus unfractionated heparin in patients with acute ST-segment elevation myocardial infarction receiving fibrinolytic therapy (study coordinator)

Clinical Trial Investigator Meetings Attended

2006 Atacicept local Investigators' Meeting, Dec, Beirut, Lebanon
2006 TCRN L1/DFO NIH-funded study training, Oct, New England Research Institutes, Watertown, Massachussets, USA
2006 HEAAL Local Investigators' Meeting, Sep, Beirut, Lebanon
2006 HEAAL Investigators' Meeting, May, Nice, France
2004 AMISH Local Investigators' Meeting, Beirut, Lebanon
2004 HEAAL Investigators' Meeting, Mar, Frankfurt, Germany

2003 EDGE II Local Investigators' Meeting, Jul, Beirut, Lebanon
2003 ExTRACT TIMI 25 Investigators' Meeting, Jun, Paris, France
2003 HEAAL Investigators' Meeting, Feb, Frankfurt, Germany

Nursing Research Projects (other than published)

2002 Knowledge, attitude and practice of nurses concerning organ donation in Lebanon. A research project with the Professional Development Committee of the AUB Alumni Nurses' Chapter.
2001 Nursing Job Satisfaction Survey, Nursing Research Committee, AUBMC: worked on data entry and analysis.

SITE FACILITATOR (on External Quality Assessments)

2007 Clinical Research Unit Coordinator, AUBMC, Research Services evaluated by the Joint Commission for International Health Organizations: facilitated the review process on appropriate research conduct at AUBMC
2004-5 Study coordinator in the Boston Scientific Taxus Milestone II Registry monitored by Quintiles
2004 Member of the administrative team, Department of Internal Medicine, AUBMC, evaluated by the Johns Hopkins University visiting team: coordinated the reviews of the Division of Pulmonary and Critical Care Medicine, and of Departmental Research
2003 Study coordinator on the MSD Phase III Study "EDGE II": the AUBMC site passed an audit by the Merck Research Laboratories (MRL) with "Excellent Review from the Worldwide Quality Assurance Resources,...and high acknowledgement from MRL headquarters..."

PERFORMANCE IMPROVEMENT PROJECTS

(Department of Internal Medicine-AUBMC)

2002-2003 Determination of the utility of Duplex Scan and MRA of renal arteries in diagnosing Renal Artery Stenosis (taking angiography as standard) at AUBMC: Division of Nephrology. Presented in the Radiology Department (Data entry, analysis, preparation of presentation)
2002 Frequency and distribution of ACE Inhibitors and Angiotensin II Blockers used in diabetic patients with proteinuria at AUBMC: Divisions of Nephrology and Cardiology. Presented in Morbidity and Mortality Conference. (Data entry, analysis, preparation of presentation)

STANDARDS/GUIDELINES

2001-2005 Guidelines and policies development for conducting nursing research and RN involvement in research studies at AUBMC. Nursing Research Committee, AUBMC, Beirut, Lebanon.
2003-2004 Development of Standard Operating Procedures for the Clinical Research Unit: Clinical Research Unit Manual. Department of Internal Medicine, AUBMC, Beirut, Lebanon.

CURRICULUM VITAE

Name: Huda Abu-Saad Huijer R.N., PhD, FEANS, FAAN

Current Title and Position:
Professor of Nursing Science
Founding Dean, Hariri School of Nursing
American University of Beirut
huda.huijer@aub.edu.lb

Place of Birth:	Beirut, Lebanon
Marital Status:	Married with two children
Nationality:	Dutch, Lebanese
Languages:	English, French, Arabic, Dutch

Other Positions
Adjunct Professor; Johns Hopkins University School of Nursing, USA

Awards & Honours

- Received the AAAH (Asia-Pacific Action Alliance on Human Resources for Health) Recognition Award 2020 on my work in developing the healthcare workforce.
- Received the Lebanese National Center for Scientific Research (CNRS) Career Excellence Award for 2018 in recognition of contributions to the field of pain management and palliative care nationally and globally.
- Received the AUB Nurses' Alumni Chapter Award in 2018, in recognition of her HSON, national, and international nursing achievements.

- Pioneers Award from the Order of Nurses in Lebanon 2015.
- Excellence award for distinguished faculty member and researcher & excellence award for distinguished academic institution from the Scientific Society of Arab Nursing Faculties for the year 2014.
- Life Time Achievement Award by McMillan Cancer Support Fund and International Journal of Palliative Nursing, London, UK, 2010.
- High Achievement Award by the American University of Beirut Alumni Association, Nurses Chapter, 2010.
- Elected International Fellow to the American Academy of Nursing, 2010.
- Fellow, founding member, served as vice president 2000-2003 of the European Academy of Nursing Science, 2000.

EDUCATION

1967 – 1968	Diploma Laboratory Technology, American University of Beirut, Lebanon
1968 – 1971	BSc Nursing, American University of Beirut, Lebanon
1974 – 1975	MN Pediatrics & Infant Care Nursing, University of Florida, Gainesville
1975 – 1977	PhD Curriculum & Instruction, Nursing Science, University of Florida, Gainesville

PRINCIPAL POSITIONS HELD

1971 – 1972	Staff Nurse, Medicine & Pediatrics, American University of Beirut Medical Center, Beirut, Lebanon
1972 – 1974	Instructor, Dept. of Maternal & Child Nursing, American University of Beirut, School of Nursing, Beirut, Lebanon
1974 – 1977	Graduate Assistant, Research & Teaching, University of Florida, Schools of Nursing & Education, Gainesville, Florida
1977 – 1978	Nurse-Coordinator, University of Florida, School of Medicine, Pediatric Pulmonary Center Gainesville, Florida
1978 – 1985	Assistant Professor, University of California School of Nursing, San Francisco, CA
1983 – 1984	Sabbatical Leave, Cross-cultural Research in Children, Paris, France
1985 – 1986	Associate Professor, University of California San Francisco, School of Nursing, **Tenured**.
1986 – 1990	Associate Professor, University of Limburg, Department of Nursing Science, the Netherlands
1990 – 1999	Professor and Chairperson, Department of Nursing Science, Maastricht University, Maastricht, the Netherlands. **Tenured**.
2000 – 2003	Professor & Director, Centre for Nursing Research, Maastricht University, the Netherlands
1998 – 2003	Visiting Professor, European Institute for Health & Medical Sciences (EIHMS), University of Surrey, UK
1998 – 2003	Honorary Visiting Professor, University of Manchester, UK
2003 – 2006	Honorary Visiting Professor, EIHMS, University of Surrey, UK
2003 – 2010	Honorary Visiting Professor, Faculty of Health Sciences, Nursing Science, University of Maastricht, the Netherlands
2003 – 2018	Professor, Director Hariri School of Nursing, AUB
2007 – now	Adjunct full professor, Johns Hopkins University School of Nursing
2018 – now	Founding Dean, Hariri School of Nursing. **Tenured**
2019 – now	Member of the Board of Trustees, St. Georges University of Beirut (SGUB)

MEMBERSHIPS IN PROFESSIONAL ORGANIZATIONS

1971 – now	Nurses Alumni Chapter, American University of Beirut
1975 – now	Sigma Theta Tau International Nursing Honour Society
1976 – now	Phi Kappa Phi National Teaching Honour Society
1979 – 1986	Association for the Care of Children's Health
1980 – 1985	American Nurses Association
1980 – 1985	California Nurses Association
1980 – 1985	Division of Maternal Child Health Nursing
1980 – 1985	Golden Gate Nurses Association
1981 – 1985	Council of Nursing and Anthropology
1986 – 2003	NU91 Dutch Nurses Association
1986 – now	International Association for the study of Pain (IASP)
1986 – 2003	Dutch Association for the study of Pain
1990 – now	IASP Special Interest Group on Pain in Children-Board & Founding Member
1992 – 1996	North American Nursing Diagnosis Association (NANDA)
1999 – 2010	European Association for Palliative Care, Member Research Network
2000 – now	International Association for the Study of Pain, served as Member of PR & Education Committee, Curriculum Committee, Research Committee, Fellowships, Grants, and Awards Committee, Special Interest Group on Childhood Pain
2003 – now	Lebanese Order of Nurses, Member
2003 – now	Lebanese Society for the Study of pain; Elected Board Member, Chair Scientific Committee and President Elect 2007; President LSSP 2010-2013
2008 – 2015	Lebanese Cancer Society, Elected Board Member

2008 – now	Member of the American Association of Colleges of Nursing (AACN)
2010 – 2013	President, Lebanese Society for the Study of Pain
2011 – now	International Association for the Study of Pain; Member of the Advisory Board. eNewsletter, IASP Insight.
2011 – now	Vice-President, National Committee on Pain Relief and Palliative Care in Lebanon & chair of the research committee

OTHER ADMINISTRATIVE AND PROFESSIONAL POSITIONS HELD

1989	Organiser of the First European Conference on Pain in children, Maastricht, June
1990 – 1999	Chairperson, Erasmus European Working Group on Shared Curricula in Nursing; funded by European Community
1990 – 1993	Board Member, European Nursing Congress 1992, Chairperson Scientific Program Committee
1990 – 1993	Member Committee 'Positiebepaling Verpleegkundige en Verzorgende Beroepen' Ministry of Wellbeing, Health and Culture, Netherlands, appointed by the Minister
1991 – 1995	Member Scientific Program Committee, International Conference on Pain in Children
1992 – 1996	Member of the Board of Governance STOOM (Foundation for research and development in social health care)
1993 – 1997	Member Refresher Courses Committee, VII &VIII World Congress on Pain
1993 – 2003	Member of the Quality of Care Committee of the Dutch Foundation for Scientific Research (NWO)
1993 – 2003	Member of the Scientific Research Committee, Commission on Chronic Illness, Program Pain, Dutch Foundation for Scientific Research (NWO)
1994 – 2003	Member of the Board of Governance, National Centre for Nursing and Care (LCVV)
1994 – 2003	Member of the Scientific Research Committee National Centre for Nursing and Care (LCVV)
1994 – 1996	Member of the advisory committee nursing practice in residential psychiatry, national inspectorate of public health, the Netherlands
1994 – 1996	Member of the advisory committee of Differentiated Practice in home care, the Netherlands
1994 – 1996	Member of the advisory committees, Multidisciplinary Pain Control, Guidelines for Pain in Children, & Guidelines for Pain Management in Nursing, Central Advisory Body for Intercollegiate Testing (CBO), the Netherlands
1994 – 2003	Chair of the selection committee of the Dekkers Nursing Researcher, Netherlands Heart Foundation
1994	Member of the advisory committee on research at the University Hospital, Maastricht
1994	Member of the scientific program committee 1st, 2nd and 3rd European conference on Nursing Diagnosis and Interventions, Amsterdam, Copenhagen, & Brussels
1994 – 1996	Chair of VerVe, the Dutch Society for Nurse Scientists
1995 – 2003	Member of the advisory council Pain Knowledge Centre, Groningen/the Netherlands
1995	Member workgroup of the Dutch Foundation for Scientific Research (NWO)
1995 – 2003	Consultant and reviewer to Netherlands Heart Foundation, Royal Wilhelmina Fonds (KWF), Dutch Foundation for Scientific Research (NWO), Commission on Chronic Illness.
1995 – 1996	Consultant to the Aga Khan Foundation in Kenya, Tanzania, India, & Pakistan
1995 – 2003	Member of the Advisory Council of the Ronald McDonald Kinderfonds (Children Fund)
1996 – 2003	Member of the Advisory Committee, Stress and Pain in Neonates, Groningen
1996 – 2003	Member of the user group, NIGHTINGALE project on Nursing Informatics in Europe. Funded by the European Community
1996	Chair of the scientific program committee, Conference on Research in Nursing and Care, Maastricht
1996 – 2003	Chair of the Board, Institute of Experimental Psychopathology (EPP), Maastricht

1996 – 1997	Member of the scientific program committee, Cochrane Conference on Health Services Research, Amsterdam
1996 – 1997	Member of the scientific program committee, 2nd European Nursing Conference, Empowerment of the Chronically Ill, Amsterdam
1997	Member of the Scientific Program Committee, International Conference on Community Nursing, August, Edinburgh, Great Britain
1997 – 2003	Member of the Landelijk Oncologie Beraad (National Oncology Council), appointed by the Minister of Health
1997	Member of the Site-Visit Committee, Pieter Clement Foundation, AIDS Funds.
1997 – 2001	Member of the Scientific Advisory Committee, Effects of the Resident Assessment Instrument (RAI) on Quality of Life and Quality of Care in Somatic Nursing Homes, NWO/ZOB project, NiVeL, Utrecht
1997 – 2001	Member of the Scientific Advisory Committee, Process and Outcome variables by CVA Patients, NWO/KWAZO, Rotterdam
1997 – 2001	Member of the Scientific Advisory Committee, Rehabilitation and CVA - NWO/KWAZO, Amsterdam
1998 – 2001	Member, Scientific Committee, Leadership and Management Course for Nurses. University of Modena, Italy
1998	Member, International Consensus Group Neonatal Pain, Nice, France
1999	Member, International Consensus Group Procedural Pain in the Neonate, Baden, Austria
1999 – 2002	Member, Steering Committee, European Course on Palliative Care in Children
2000	Member, Invitational Conference, Pain Management in the Cognitively Impaired, Toronto, Canada
2000 – 2010	Member, Research Network, European Association for Palliative Care
2000 – 2003	Member, Advisory Board, Asthma Foundation
2000 – 2003	Board Member, Domicura Home Care Organization, Maastricht
2000 – 2003	Vice-President, European Academy for Nursing Science
2000	Reviewer, Canadian Institute of Health Research CIHR
2002	Member, Scientific Organizing Committee, 2nd Research Forum of the European Association for Palliative Care, Lyons, France
2003	Member, Scientific Organizing Committee, 8th Congress of the European Association for Palliative Care, The Hague, the Netherlands
2003	Member, Scientific Program Committee, 3rd European Nursing Congress, Vulnerable groups in society; a nursing issue. Amsterdam, the Netherlands
2003	Member, Scientific Organizing Committee, 3rd Research Forum of the European Association for Palliative Care, Stressa, Italy

2003 – 2010	Chair, task Force on Paediatric Palliative Care in Europe
2004 – 2006	Reviewer, Dutch Organization for Scientific Research
2005	Reviewer, Canadian Institute of Health Research CIHR
2006	Reviewer, Austrian Science Fund
2006 – now	Public Advisory Board, Lebanese Society of Family Medicine
2006	External Assessor; Personal Chair, School of Nursing and Midwifery, University of Dundee, Scotland, UK
2008	External evaluator, qualifications and merits of 6 applicants to Professorship of Nursing Science position, University of Tampere, Finland
2008 – now	International Scientific Advisory Board, Centre of Excellence in Paediatric Pain Management, Faculty of Medicine, Kuwait University, Kuwait
2009 – now	Member of the World Health Organization (WHO) Expanded Review Panel on Pain Guidelines
2010	Member, Initiative to Improve Cancer Care in the Arab World (ICCAW).
2012	Member Organizing Committee, International Breast Cancer and Nutrition (IBCN) Conference planned to be held at AUB in 2013
2012 – now	Member of the AUBMC Palliative Care Committee

2012 – now Member of the Scientific Committee, 15th World Congress on Pain, Buenos Aires, International Association for the Study of Pain (IASP)
2012 – now Member, IASP Newsletter *Insight* Advisory Board
2012 – now Member of SHARP executive board, FM AUB
2013 – now Member, IASP Developing Countries Working Group
2014 – now Official member of the Lancet/Harvard Global Equity Initiative-Lancet Commission on Global Access to Pain Control and Palliative Care (GAPPCP)
2016 – now Member, UC Davis, Advancing Pain Relief Education: Anchoring Pain Competencies around the World
2015 – now Member of the Scientific Committee, Oxford Global Health Research Congress, St. Hughes College, Oxford.
2015 – now Member of the Advisory Board of the Order of Nurses in Lebanon.
2015 – now Member of the Association of Dean and Directors of Schools of Nursing in Lebanon.
2016 - now Member of the Global Advisory Core Panel on the Future of Nursing (GAPFON) Panel

INTERNATIONAL POSITIONS HELD

1978 – 1985 University of California San Francisco
1983 – 1984 Sabbatical leave, Institut Gustave Roussy, Villejuif, France
1995 – 1996 Consultant to the Aga Khan Foundation in Kenya, Tanzania, India, & Pakistan, conducted a feasibility study, which led to the establishment of the Institute of Advanced Nursing Studies in East Africa
1998 – 2003 Honorary Visiting Professor in Nursing Science, University of Manchester, UK
1998 – 2007 Visiting (Honorary) Professor in Nursing Science and Pain Management, European Institute of Health and Medical Sciences, University of Surrey, Guildford, UK
2003 – 2010 Honorary Visiting Professor, University of Maastricht, the Netherlands
2007 – now Adjunct Professor, Johns Hopkins University School of Nursing

EDITORIAL POSITIONS HELD

1984 – 1990 Member of the Advisory Board, Issues in Comprehensive Pediatric Nursing
1993 – 2003 Member of the Advisory Board, Verpleegkunde (Nursing)
1994 – 2017 Associate editor and later member of Advisory Board, International Journal of Nursing Studies
1995 Reviewer of the Clinical Journal of Pain
1995 – 2003 Member of the Advisory Board, Kwaliteit van Zorg (Quality of Care)
1995 – 2003 Member of the Advisory Board, Dutch Journal for Pain and Pain Relief
1996 – 1999 Topical Editor, European Journal of Pain
1996 – 2003 Member of the Advisory Board, Kind en Ziekenhuis (Child and Hospital)
1997 Reviewer, International Journal of Behavioural Medicine
1998 Reviewer, PWS Pharmacy World & Science
1998 Reviewer, Social Science and Medicine
1998 Reviewer, Clinical Nursing Research
1999 – now Member of the Advisory Board, Journal of Transcultural Nursing
1999 Reviewer, Pain Research and Management.
1999 – 2003 Reviewer, Patient Education and Counselling
2000 – 2003 Member of the Advisory Board, Journal of Palliative Care (Dutch)
2000 Commentary, Lancet (Invited)
2000 Commentary, Archives of Diseases in Childhood (Invited)
2000 – now Member of the Editorial Board, Scandinavian Journal of Caring Science
2002 Reviewer, Pain
2002 Co-Editor, the Suffering Child
2003 Reviewer, Child: Care, Health, & Development
2005 – now Member of the Editorial Board, Supportive and Palliative Cancer Care

2005 – now Reviewer, Journal of Interprofessional Care
2005 – now Member of Editorial Board, Journal of Nursing Scholarship
2005 – now Reviewer Lancet
2005 – now Reviewer European Journal of Pain
2006 – now Member of Editorial Board Japanese Journal of Nursing Science
2008 Reviewer, Journal of Cross-Cultural Gerontology
2008 – now Reviewer, Lebanese Medical Journal
2009 Reviewer Pediatric Pain Newsletter, International Association for the Study of Pain
2011 – now Reviewer, Journal of Palliative Medicine
2011 – now Member of Editorial Board Nursing Children and Young People
2012 – now Reviewer, Health Promotion International.
2012 – now Reviewer, Journal of Pain and Symptom Management
2013 – now Member of the Editorial Board, Annals of Palliative Medicine
2014 – now Member of the Editorial Board, Alexandria Scientific Nursing Journal (ASNJ)
2019 Reviewer, the Lebanese Science Journal

2017 Hassan Abbas Reslan. Effect of Patients' Education on Functional Outcomes for Those Undergoing Total Knee Replacement Surgery, External reviewer, Beirut Arab University, Lebanon, December 2016.

Member of the PhD evaluation committee of at least 40 dissertations
External reviewer for a number of dissertations in Scandinavian countries

EDUCATIONAL RESPONSIBILITIES

University of California San Francisco; School of Nursing
Major responsibilities included redesigning the curriculum for the Pediatric Clinical Specialist program and in developing and co-teaching a number of doctoral-level courses**.**

1978 – 1981 Health Assessment in Nursing, baccalaureate level course
1978 – 1981 Acute care Pediatrics, baccalaureate level course. Redesigned course content
1978 – 1981 Pediatric Teaching Residencies, Provided clinical supervision and guidance
1980 – 1985 Teaching Strategies in Nursing, graduate level course
1980 – 1985 Microteaching, Theories and Evaluation in Teaching, Designed and taught course, Masters level course
1980 – 1985 Critique of Studies in High Risk Maternal and Child Nursing, Developed and taught course. Masters level course
1981 – 1985 Phenomena Common to the Ill and Injured, Designed and taught course, Masters level course
1981 – 1985 Physiological Research Seminar, Doctoral seminar
1982 – 1985 Description: Theory and Practice, Doctoral seminar
1982 – 1985 Measurement: Theory and Practice, Doctoral seminar
1982 – 1985 Developmental Pathophysiology. Developed and taught course. Masters level course.
1982 – 1985 Testing Theory and Practice, Doctoral seminar

University of Maastricht; Nursing Science
Major responsibilities included the development and participation in a number of courses as well as redesigning the curriculum of the part-time Masters of Science in Nursing in Maastricht which was offered under the auspices of Maastricht at two university sites in the Netherlands, the universities of Utrecht and Groningen as well as the Red Cross School of Nursing in Switzerland.
The development of the PhD program and the Centre for Nursing Research and the supervision of a large number of PhD dissertations and junior faculty.

1987 – 1999 Nursing Diagnosis, Coordinator and later member of the course planning committee

1987	Instrumental in developing and redesigning part-time program of study in Nursing Science offered in Maastricht, Utrecht, and Groningen
1989 – 1994	Nursing Interventions, Developed and participated in coordinating course
1990 – 1999	Research on Care, Member of the course planning committee
1986 – 2003	Supervised on the average 10-15 Master's thesis research per year

American University of Beirut; School of Nursing

2003 – 2004	Developed and launched the MSN program
2003 – 2004	Revised and launched RN-BSN program
2003 – now	Involved in ongoing BSN curriculum revisions
2003 – 2005	Developed and co-taught Nursing Theories
2003 – now	Coordinated Nursing Administration Residencies
2005 – 2006	Coordinated Nursing Administration Track
2003 – now	Supervised a large number of Projects and Thesis
2003 – now	Assisted in the development of graduate level courses
2006 – now	Coordinated Accreditation and Reaccreditation of BSN and MSN programs
2014 – now	Chaired task force to develop the PhD in Nursing Science proposal
2016 – 2019	Chair, PhD Steering Committee

International Courses

Developed and taught courses on Pain and Pain Management in the United States, France, UK, the Netherlands, and Lebanon

Developed and taught European course on Pediatric Palliative care, held once a year in a different European country

Co-developed and taught in the intensive European PhD Program in Nursing Science held once a year in a participating European country.

Developed the Master Class on Palliative and End-of-Life Care offered at AUB.

INVITED PAPERS AND SCHOLARLY PRESENTATIONS

1978 – Nov	Huijer Abu-Saad, H. Cystic Fibrosis and the Role of the Nurse, UCSF, School of Nursing
1978 – Nov	Huijer Abu-Saad, H. Nursing Issues: An International Perspective. Sponsored by the American Nursing Foundation, UCSF, School of Nursing
1980 – Sep	Huijer Abu-Saad, H. School-Age Children's Subjective Assessment of Pain, Department of Physiological Nursing Workshop, UCSF
1981 – Feb	Huijer Abu-Saad, H. International Nursing Issues, Nursing Grand Rounds, Stanford University Medical Center
1982 – Mar	Huijer Abu-Saad, H. Pain Assessment in School-Age Children, Advances in Pediatric Nursing, San Francisco
1982 – May	Huijer Abu-Saad, H. Measuring Children's Self-Assessment of Pain, Fifteenth Annual Communicating Nursing Research Conference, The Western Society for Research in Nursing, Denver, Colorado

FUNDED RESEARCH PROJECTS

- *Co-PI* (Principal Investigator: Dr. Ghada El Hajj Fuleihan); Expanding Capacity Building in Non-Communicable Diseases: The Scholars in HeAlth Research Program (SHARP) at the American University in Beirut. D43 Grant renewal funded by NIH 2020-2025 ~$1.3M.
- *Co-PI*: Dyad Engagement in Heart Failure Self-Care. URB funding. June 2018 -July 2019. $24,800.
- *Co-PI*: 'Implicit rationing of nursing care among Lebanese patients (RATIONAL) – A longitudinal study on the variations, trends, predictors, and outcomes of rationed nursing care'. **Suzanne Dhaini, PI**; Michael Simon, Dietmar Ausserhofer, **Nuhad Dumit, Huda Huijer,** Co-PIs. MPP funding. Nov 2017- 2019. $28000.
- *Co-PI*: Self-Care in Lebanese Patients with Heart Failure. URB funding. July 2016 - June 2017. $6500.
- *Principle Investigator:* Nursing and Midwifery Research in the Eastern Mediterranean Region. Supported by WHO EMRO but not funded. 2016-2017. Report submitted to WHO EMRO.
- *Principle Investigator:* Palliative Care in Older Adults in Lebanon. Funded by Lebanese National Council for Scientific Research (CNRS). 2014-2017. $20,000. -
- *Principle Investigator:* Chronic Pain in Lebanon. Funded by Pfizer 2013-2016. $10,000. -
- *Co-PI* (Principal Investigator: Ghada El Hajj Fuleihan); Capacity Building in Chronic Non-Communicable Diseases at the American University of Beirut. A Programmatic Multidisciplinary Curriculum Based Interfaculty Approach (Scholars in Health Research Program SHARP). Funding: NIH/Fogarty 2012-2016. ~$1.2M
- *Principle Investigator:* Quality of Palliative Care in Lebanon, the Perspectives Patients with Cancer. Funded by CNRS, 2009-2011. $30,000. -
- *Principle Investigator:* Quality of Palliative Care in Lebanon, the Perspectives of Children with Cancer.
- *Project Leader:* Palliative Care for Infants, Children, and Young Adults; the Facts. Supported by *Fondazione Maruzza Lefebvre D'Ovidio*, Rome, Italy, 2007-2008. $5,000. -
- *Co-Investigator* with Dr. Imad El-Hajj, Design and Implementation of an Autonomous Multi-Sensory Intervention Device; URB Funding, AUB. 2007. $10,000. -
- *Principle Investigator:* Palliative Care in Lebanon; Needs Assessment for Palliative Care Services for Adults and Children, American University of Beirut, Lebanon, 2005-2008, MPP and URB Funding. $30,000. -
- *Project Leader:* Pain Assessment in the Cognitively Impaired Elderly with Dementia. Funded by Dutch Foundation for Scientific Research (NWO), 2002-2005. Euro 118,000. -
- *Project Leader:* Satisfaction with Palliative Care, Instrument Development. Funded by the Ministry of Health. 2002-2004. Euro 127,000. -
- *Project leader:* Quality of Care Instruments in the Netherlands; State of the Art, Funded by Dutch Foundation for Scientific Research (NWO), 2000-2002. Euro 113,000. -
- *Project Leader:* Pain & Symptom Management in Palliative Care across the Life Span; a State of the Art Study on Nursing Evidence, Funded by Care Research Netherlands (ZON), 2001-2002. Euro 32,000. -
- *Project Leader*: Pain in the Cognitively Impaired; a State of the Art, Funded by Care Research Netherlands (ZON), 2001-2002. Euro 32,000. -
- *Project Leader:* Prevention in the Youth Health Care; a State of the Art. Funded by Care Research Netherlands (ZON), 2001-2002. Euro 32,000. -
- *Project Leader:* Self-Management in Chronic Illness: A State of the Art. Funded by Care Research Netherlands (ZON), 2001-2002. Euro 32,000. -
- *Project Leader:* Palliative care in Children; Needs Assessment, Funded by Care Research Netherlands (ZON), 2000-2001. Euro 40,000. -
- *Project Leader:* Palliative Care at Home, Funded by the Ministry of Health (WVS), 1999-2000. Euro 152,000. -

- *Project Leader:* Stress Prevention in Children, Funded by Care Research Netherlands (ZON), 1999-2003. Euro 348,000. -
- *Co-Investigator:* Transmural Nurse Clinics, in collaboration with NiVEL, 1996-2000.
- *Co-Investigator:* The Work of Home Helps in the Netherlands, in collaboration with NiVEL.1996-2000.
- *Project Leader:* Pain Assessment in Profoundly Mentally Retarded Children, Funded by Dutch Foundation for Scientific Research (NWO), 1998-2003. Euro 99.500.-
- *Project Leader:* Palliative Care: A State of the Art, Pain Knowledge Center, Academic Teaching Hospital, Maastricht, 1998. ~Euro 50,000. -
- *Supervisor:* Decubitus Prevalence in the Netherlands, 1997-2001. Euro 150,000. -
- *Project Leader:* Assessment and Management of Headaches in Children, Funded Dutch Organization for Scientific Research (NWO), 1994-1999. Euro 220,000. -
- *Project Leader:* Pain Assessment in Neonates: A State of the Art. Funded by Dutch Foundation for Scientific Research (NWO), 1995-1996. Euro 50,000. -
- *Project Leader:* Pain in Children/Clinical Decision Making, University Funding, 1991-1995. Euro 150,000. -
- *Co-Investigator:* Transmural Nursing Care in Heart Failure Patients, Funded by Netherlands Heart Foundation, 1994-1998.
- *Project Leader:* Specialized Community Nursing Care in COPD Patients, Funded by Dutch Asthma Fund, 1992-1995. Euro 220,000. -
- *Co-Investigator:* Implementation of Primary Nursing in Nursing Homes, Funded by National Centre for Nursing and Care, 1995-1998. Euro ~50,000. -
- *Project Leader:* Continuity and Discontinuity of Care in the Community, Funded Dutch Foundation for Scientific Research (NWO), 1993-1994. Euro ~ 50,000. -
- *Supervisor:* Care Intensity in Homes for the Mentally Handicapped, Funded by St Anna Foundation, 1994-1997. Euro 75,000. -
- *Supervisor:* Nursing Innovation Project in Residential Psychiatry, Funded by Ministry of Welfare, Health, and Sport (WVS), 1990-1996. Euro 150,000. -
- *Supervisor:* Differentiated Practice and Specialization in Community Nursing, Funded by National Centre for Nursing and Care (LCVV), 1992-1996.
- *Co-Investigator:* Continuing Pain Education in Nursing, Funded by Ministry of Welfare, Health, and Sport (WVS), 1991-1996. Euro 200,000. -
- *Supervisor:* Quality of Sleep in Hospital Settings, Funded by Prevention Funds, 1988-1992. Euro 152,000. -
- *Project Leader:* Specialization in Cardiovascular Nursing, Funded by Netherlands Heart Foundation 1996-1999. Euro 120,000. -
- *Supervisor:* Knowledge Utilization in Nursing and Decubitus Care, University Funding, 1994-1999. University funding.
- *Project Leader:* Care Needs of Families with CVA, Funded by Netherlands Heart Foundation, 1996-1999. Euro 150,000. -
- *Project Leader:* Implementation of Guidelines in Community Nursing, Funded by Dutch Foundation for Scientific Research (NWO), 1996-1999. Euro 50,000. -
- *Supervisor:* Autonomy and CVA Patients, Funded by National Center for Nursing and Care (LCVV) 1994-1997. Euro 164,000. -
- *Co-Investigator*: Pain Registration on Cancer Wards; a Nursing Intervention Study, Funded by Ministry of Welfare, Health, and Sport (WVS), 1993-1996. ~Euro 100,000. -
- *Co-Investigator*: The District Nurse and the Cancer Patient in Pain, Funded by Netherlands Cancer Foundation (KWF), 1993-1996. Euro 200,000. -
- *Chairperson:* Erasmus European Working Group on Shared Curricula in Nursing; 1990-1999. Funded by European Community.

RESEARCH PROPOSALS SUBMITTED BUT NOT FUNDED

- Palliative care in Lebanon; the Perspectives of patients with Cancer. Submitted to NIH in 2008. Application number 1R21 CA 139100-01. $260,252. -

- Quality of paediatric palliative care in Lebanon; the perspectives of children with cancer. Submitted to NIH in 2008. Application number 1 R03 NR011233-01. $135,450. -
- Quality of pediatric palliative care in Lebanon; the perspectives of children with cancer. Submitted to NIH in 2008. Application number R21. $258,752. -
- Chronic Pain in Lebanon and Qatar; a population-based Epidemiological study among adults. Submitted to Qatar Foundation in 2009/10. NPRP number 09-404-3-103. $1,018,480 Lebanon: $348,460.
- Erasmus plus - Capacity building in the field of higher education proposal with AUB-HSON as the applying university. Aims to prepare Scholars in HIgher Nursing Education (SHINE) for the country. Budget: 995,334. - European Union. Erasmus+.

CURRICULUM VITAE
LAILA FARIS FARHOOD
Interim Dean and Professor
Hariri School of Nursing
American University of Beirut

Biography

I am a Professor of Psychiatry Mental Health, School of Nursing & Clinical Associate at the Department of Psychiatry. I am an experienced researcher with an impressive list of publications. My Research agenda focuses on complex issues contributing to the physical and psychological wellbeing of those at-risk stressors. I studied PTSD (Post Traumatic Stress Disorder), depression, coping and social support in Beirut and the South of Lebanon & in vulnerable populations. My present research focuses on promoting psychosocial and mental health care through community-based educational workshops for teachers and parents. I have also been an invited speaker at local and international conferences focusing on the above issues.

I have published my research in international refereed journals and have presented scientific papers in National, regional & international academic conferences.

Due to my research focus on the above issues, I was appointed as mental Health coordinator by the World Health Organizations (WHO) to coordinate mental health activities in Lebanon during and after the Israeli war on summer 2006.The main objective for this Mental Health National Plan was to help the traumatized Lebanese cope with war atrocities. I developed a program for training primary health care personnel (Physicians, nurses, psychologists and social workers) so that in turn they help those under their care. Also, I developed training manuals for their use in both languages' Arabic and English. Additionally, I proposed a national mental health plan for sustainability of such program in Lebanon, which was adopted by WHO, and Lebanese Ministry of Health (MOH) long term. Additionally, as a clinician, I practice psychotherapy, family & couple therapy at the psychiatry Department, AUBMC. My expertise falls under a wide variety of concerns such as Anxiety, Depression and Eating and PTSD in addition to more serious mental health issues.

I am the coordinator of MSN psychiatry-mental Health track (CNS) teaching all its graduate courses in addition to PhD courses and supervision of theses and projects.

I. Educational Background

- PhD, May 1993, Psychiatry Mental Health University of Maryland, Nursing Science.
- MSN, CNS, May 1975, Indiana University Perdue University at Indianapolis, Nursing, Psychiatry Mental Health Nursing, Clinical Specialist-Family and Marital Therapy, Individual therapy.
- Bachelor of Science, June 1971, American University of Beirut, School of Nursing, Nursing

II. Employment History

Academic

- Professor, July 1995-present, Hariri School of Nursing (HSON), American University of Beirut (AUB)
- Clinical Associate/Medical Staff (Psychotherapist: individual, couple and family therapy), July 1999-present, Psychiatry Department, American University of Beirut Medical Center
- Associate Professor, Chairperson, Psychiatry-Mental Health Nursing, July 1986-1995, HSON, AUB
- Mental Health Consultant, Family Medicine, American University of Beirut Medical Centre, 2000-2005
- Assistant Professor, Chairperson, Psychiatry-Mental Health Nursing, July 1978-1986, HSON, AUB
- Instructor, Psychiatry Mental Health Nursing July 1975-June 1978, HSON, AUB
- Assistant Instructor, Feb 1972-June 1973 HSON, AUB
- PS, LOA graduate Studies, Indiana University 1973-1975
- LOA PhD Studies, University of Maryland 1990-1993
- Distinguished Dean Colvard Visiting Professor, University of North Carolina, Charlotte, NC, USA February - August 1998

Administrative

- Interim Dean, September 2019-present, Hariri School of Nursing (HSON)
- Associate Dean for Academic Affairs, September 2018-2019, HSON
- Graduate Program Convener, 2011-2018, HSON
- Graduate Program Coordinator, 2003-2011, HSON

III. Awards/Honors

Distinguished Nursing Research Award by the Scientific Society of Arab Nursing Faculties **(October 2017)**

President Faldo Khuri award for dedication of professional life to AUB, (**September 2017)**

Honoring Ceremony Faculty of Medicine (F.M Dean) (also speaker on behalf of honored faculty), (**December 22, 2011)**

Suad Sabbah Award for distinguished research, AUB Alumni Association, (**April 19, 2007)**

Alumni Award, AUB Nurses Chapter, (**2004)**

Distinguished Service Award, Order of Nurses in Lebanon, (**2003)**

WHO's WHO among Students in American Universities and Colleges, (**1993)**

The National Honor's Deans List, USA (**1993)**

Distinguished Graduate Ph.D. Award, Hariri Foundation, (**November 1993)**

Sigma Theta Tau International (Pi Chapter) - Graduate Student
Outstanding Research Award, University of Maryland, (**May 1993)**

IV. RESEARCH

I. Published Books, Books Chapters

Farhood, L. (2012). External peer reviewer: Chapter on "Mental Disorders in the Arab World" in *"Public Health in the Arab World"*. Published by Cambridge University Press

XI. Conferences Attended

International

AACN's Deans Annual Meeting, Inspiring Fortitude: Ushering in the Future of Academic Nursing, March 21-23, 2021, (Virtual)

20th WPA World Congress of Psychiatry, Psychiatry in a Troubled World, March 10-13, 2020, (Virtual)

ISTSS 36th Annual Meeting Bridging Science and Practice to Reach Underserved Communities: Barriers, Opportunities and Innovations November 4–14, 2020. CME 63.5, (Virtual)

World psychiatric Association WPA congress October 8-12, 2017, Berlin, Germany.

ISTSS (International Society for Traumatic Stress annual meeting) Nov 1-3, 2012 Los Angeles, USA

WPA World Congress of Psychiatry, October 16-21, 2012, Prague, Check republic.

15 World Congress of Psychiatry (WPA), August 18-23, 2011, B.A. Argentina.

Workshop "UN day for Rehabilitation of Victims of Violence and Torture" June 26, 2004.

Southern Piedmont Regional Nursing Workforce Conference. May 28-29, 1998, Charlotte, North Carolina

Real Education Active Learning (REAL) System. Workshop on Distance Education/University on line Programs. UNCC, May 20, 1998, Charlotte, NC.

Attended and participated in the "Adult Health Nursing" consultation visit of Dr. Anne Belcher to the University of North Carolina at Charlotte, April 22-24, 1998, College of Nursing and Health professions re: Nurse Practitioner/Clinical Specialist Programs.

Ordering Complexity in Patient Care Nursing: Workforce Issues. April 7, 1998. Greenville, North Carolina.

XV World Congress of Social Psychiatry, September 1-5, 1995, Rome, Italy

Research Careers and Nursing Science, September 23-24, 1994. Baltimore, Maryland.

14th Annual Midwest Nursing Research Society Conference (MNRS). April 22-24, 1990, Indianapolis, Indiana, U.S.A.

Conference on: "The Phenomena of Psychiatric-Mental Health Nursing Defining a Psychiatric nursing self for the year 2000." , Sponsored by 3rd Annual Meeting of the Council of Directors of Graduate Programs in Psch-M.H. Nursing and co-sponsored by National Institute of Mental Health (NIMH), October 12-15, 1986, Maryland, U.S.A.

7th International Delphic Symposium on Family Therapy, November 18-22, 1982, Cyprus.

8th International Congress of Social Psychiatry, August 12-15, 1981, Zegrib Yugoslavia.

2nd Mediterranean Congress of Social Psychiatry. August 28-30, 1981, Udine, Italy.

10-day Workshop as guest in Anthropos Institute-Social Psychiatric Association, 1981, Athens Greece.

Gestalt Workshop, 1 day, fall 1974, Indianapolis Indiana, USA.

Group Therapy - 2 weeks, fall 1974, Indianapolis Indiana, USA.

Aggression and Intimacy Workshop, 2 days, fall 1974, Indianapolis Indiana, USA.

Bion-approach Group Workshop, 2 days, fall 1974, Indianapolis Indiana, USA.

American Nurses Association (ANA) Conference, June 1974, San Francisco.Tri-State Workshop, Indianapolis Indiana, USA.

National

School Mental and Behavioral Health: ADHD, Learning Disorders, and Comorbidities, February 12, 2016, AUB, Beirut-Lebanon.

Psych- pharmacotherapy, Le Cenacle, December 5, 2015, Lebanese Psychiatric Society (LPS), Beirut-Lebanon.

The Cannabis Debate, workshop organized by the Lebanese psychiatric Association Bait Al-Tabib, July 6, 2013, Beirut-Lebanon.
Gender Medicine & Psychiatry, Workshop organized by the Lebanese psychiatric Association, March 2, 2013, Beirut-Lebanon.

LAU, School of Nursing: Crucial conversations in Nursing (Spirituality, Community Outreach in Education and Practice, IPE), April 20, 2012, Beirut-Lebanon.

Lancet Palestine Health Alliance Conference -3 (LPHA) in collaboration with AUB-FHS-and Birzeit University, March 5-6, 2012, Beirut-Lebanon.

ICD-11 Workshop revision proposal for Mental & Behavioral Disorders, Fall 2011 (2 days) WHO/AUB, Beirut-Lebanon.

Web CT_1 Workshop, April 30, 2004, AUB, Beirut-Lebanon.

Teaching Portfolio workshop, November 8, 2003, AUB, Beirut-Lebanon.

Developing Program & Course Learning Outcomes seminar April 12, 2003, AUB, Beirut-Lebanon.

Arab Forum for Social Sciences and Health Conference: Life Patterns and Health in the Arab World, November 7-9, 2001, Zahle, Lebanon.

Web page workshop. February 22, 2001 (2-6 p.m.), AUB, Beirut-Lebanon.

Online Learning Workshop, July 24-28, 2000, AUB, Beirut, Lebanon (Asymetrix Assistant, Photoshop, Librarian).

Attended one-day workshop on "Teaching Effectiveness", **presented** by Dr. Yezdi Bhada (Georgia State University, USA) held at AUB, June 7, 2000, Beirut, Lebanon.

Workshop on Graduate & Undergraduate Nursing Education by Dr. Patricia Kissell. (Kansas Wesleyan University), AUB School of Nursing, March 20-24, 2000 Beirut, Lebanon.

Conference on Science, Technology & Society, Part I – Post War Reconstruction. American University of Beirut, Nov. 26-28, 1999, Beirut-Lebanon.

Workshops on "Reproductive Health Working Group" (RHWG) organized by FHS-AUB and Regional Reproductive Health Working Group.

Public Health Education: The challenge of being relevant. July 20, 1999. Chtaura Park Hotel, Lebanon.

Reproductive Health issue: Policy Implications for Lebanon. July 19, 1999. Riviera Hotel, Beirut, Lebanon.

7th International Pan-Arab Congress of Psychiatry, November 12-15, 1996 Kaslik, Lebanon.

Arab Forum for Social Sciences and Health, June 27-29, 1996 Broumana, Lebanon.

Curriculum Development Workshop, Spring 1980. AUB, Beirut, Lebanon.

Community Needs and Curriculum Development, 2 weeks workshop, April 1980. AUB, Beirut, Lebanon.

Regional Nursing Conference, 1979 & 1980. Beirut, Lebanon.

Alcoholism, Psychology Department, Spring 1979.AUB, Beirut, Lebanon.

January 17, 2022

Curriculum Vita

Name: **Lina Abi Fakhr Kantar**
Faculty: **Hariri School of Nursing, American university of Beirut**
Home Address: Ras Beirut-Chouran Street, Ezzat Blg, Flat 17, Beirut - Lebanon

Home Telephone: **01-747637** **Cell phone:** **03-684205**
Office: **01-350000 Ext. 5969**
email: **la67@aub.edu.lb**

Educational Background

- **2010: Doctor in Educational Leadership with specialization in Curriculum and Instruction**
  School of Advanced Studies, University of Phoenix, Arizona, USA

- **2001: Master of Nursing Education**
  Kwazulu Natal, Durban – South Africa

- **1980: Bachelor of Science in Nursing**
  American University of Beirut, Lebanon

WORK EXPERIENCE

Academic

2019-Now **Clinical Associate Professor, American University of Beirut (AUB), Hariri School of Nursing**

2016 - 2018 **Clinical Assistant Professor, American University of Beirut (AUB), Hariri School of Nursing**

2012 - 2016 **Assistant Professor, American University of Beirut (AUB), Hariri School of Nursing**

2011 – 2012 **Lecturer, American University of Beirut (AUB), School of Nursing**

2007 – 2011 **Lecturer, University of Sharjah, Sharjah, United Arab Emirates**

1. Classroom instruction with focus on adult health and critical care nursing.
2. Instructor for the Professional Issues course offered to senior nursing students and the Health Education and Health Promotion course offered as a shared course at the College of Health Sciences students.

3. Clinical supervision of the generic and bridging (RN-BSN) nursing students in acute care as well as community settings.
4. Use of problem-based learning approach and active learning strategies in the classroom.

1. **Medication Management :Principles and Practice**": A 3-day-course offered to 35 registered nurses in the United Arab Emirates on February, **2017;** coordinated by REP office/AUB.

2. **Use of rubrics in higher education:** A seminar offered to the faculty at the Rafic Hariri University (RHU) on December 16, 2016; coordinated by REP office.

3. **Assessment Using Rubrics. A** session offered to AUB faculty through the Seminar on Learning and Teaching Excellence conducted by the Center for Teaching and Learning at AUB. April 12, 2016.

4. **Foundations in Oncology Nursing:** Activity director and presenter. A 3-day course offered to Iraqi nurses on the domain of oncology nursing. The activity was offered twice: June and September, 2014.

5. **Clinical judgment among new nursing graduates of the Makassed University.** A seminar designed to disseminate research findings on the perceptions of preceptors at the Makassed Hospital.

6. **Clinical judgment among new nursing graduates of the University of Saint Joseph.** A seminar designed to disseminate research findings on the perceptions of preceptors at the Hopital Hotel Dieu.

7. **Clinical judgment among new nursing graduates of the Hariri School of Nursing.** A seminar designed to disseminate research findings on the perceptions of preceptors at the AUBMC.

7. Doctoral Dissertation

Dissertation Title: Clinical Judgment among New Nursing Graduates: A Multiple-Case Study. July 30, 2010

8. Master's Thesis

Thesis Title: Critical thinking skills development among the diploma nursing students in a case-based curriculum. September, 2001.

9. Research in progress – Grants

- Kantar, L. *Preceptors' Perspectives on their Teaching Practice: Implications for Academia and Service* (Data Analysis).

Teaching

A. Teaching assignment from Fall 2012 to December 2020

1. **Nursing Care of Adults I (**NURS 300, Cr. 5) Theory & clinical; Undergraduate course **–** since Fall 2012.
2. **Nursing Care of Adults II (**NURS 302, Cr. 5) Theory & clinical; Undergraduate course **– Spring 2012.**
3. **Introduction to Nursing Practice** (NURS 201, Cr. 2) Theory and clinical; Undergraduate course offered to nursing students **–** since Spring 2012.
4. **Introduction to Nursing Practice** (NURS 201, Cr. 2) Theory and simulation; Undergraduate course offered to Medical Imaging Science students **–** since Spring 2012.
5. **Role Development in Nursing Education (NURS 509);** Graduate Course – since 2012.
6. **IPEC 300 (Interprofessional course);** course offered to senior nursing students, medical, and Public health students – Fall 2016 and Spring 2018.

7. Summer Nursing Institute

- **Innovation in Nursing Education (NURS 529M);** graduate course – 1 cr. Summer of 2013.

B. Mentoring MSN Graduate Projects at the School of Nursing

Supervision entails projects in partial fulfillment of the requirements of a Master's Degree in Nursing. The projects have an educational focus with a continuing professional development nature, as enclosed below.

2020-2021: First Reader

- **COPD Patient Symptom Management:** A Continuing Education Course for Medical-Surgical Nurses by Ani Artinian.

2014-2015: First Reader

- **Richmond Agitation and Sedation Scale (RASS) Educational Package for Critical Care Nurses** by Rayan Al Dabbah.

2019: Second Reader

- **Educational Project for Nursing Instructors to Identify Mental Health Problems among Students at Bethlehem University** by Bisan Moussa.

- **Developing and Disseminating a Tool for Cancer Screening in Primary Health Care Centers in Lebanon** by Mariam Assaf.

2018: Second Reader

- **Cervical cancer prevention awareness program** by Marwa Ahmad.

- **Educational program for hospital nurses on Diabetes Mellitus** by Hind Abdel Massih.

2016: Second Reader

- **The Role of Advanced Practice Community/Public Health Nurse in Primary Health Care Settings** by Hana Sahyouni.

- **Role of nurses in creating breast cancer awareness among Lebanese women in PHC centers** by Mariam Chatila.

2014-2015: Second Reader

- **Educational Program for Caregivers of Stroke Survivors** by Ingrid Corbani.

- **Thesis entitled Knowledge of Diabetes Mellitus: A Survey of Registered Nurses** by Bachir Itani.

- **Educational Program for Liver Transplant Patients** by Diana Wehbeh.

2013-2014: Second Reader

- **Emergency Oncology Course** by Dana Kassem.

C. Advising

Number of students advised per semester range from 16 to 20; all are undergraduate students.

D. Involvement in AUB Committees on Teaching and Learning

Enclosed is my membership on AUB committees, with the ultimate purpose of each committee.

2019-Now:

- **Chair of the Academic and Curriculum Committee**: deliberations & decisions on academic & curriculum matters for undergraduate program, HSON, AUB.

2018-Now:

- University admission Council – member

2018-2020:

- Coordinator for off-shore HSON consultancy at Regional External Program (REP).

2017-Now:

- Chair of the taskforce on developing a Graduate Diploma in Nursing Education (GDNE). Proposal will be presented to the Board of Graduate Studies at AUB for approval and implementation in academic year 2021-2022.
  I designed three nursing education courses for the MSNE program:
  - *Curriculum Theory and Development* (*NURS 535 – 3 cr.)*
  - *Learning and Instruction in Nursing Education (NURS 536 – 3 cr.)*
  - *Assessment and Evaluation in Nursing Education (NURS 537- 3 cr.)*

2016-2017:

- Member in the strategic planning taskforce for the HSON.

2013-2015:

- **Chair of the Academic and Curriculum Committee**; deliberations & decisions on academic & curriculum matters for undergraduate program, HSON, AUB.

2013 – Now:

- **Member at the Medical Education Council,** Faculty of Medicine; deliberations and decisions pertaining to medical education at AUB.

2013-2018:

- Member at the **Critical Care Education Council,** AUBMC / Critical care; attend to continuing education of nurses in critical care areas.

2012 - 2019:

- Member at the **Advisory Center: Teaching & Learning;** Deliberations on teaching and learning, CTL, AUB.

- Member at the **Faculty Learning Community-thinking in the Discipline;** emphasis on instruction and assessment in higher education to promote higher order thinking.

2011-2018:

- Member and Chair of the **Academic & Curriculum Committee;** deliberations & decisions on academic & curriculum matters for undergraduate program, HSON, AUB.

Service

A. Service to AUB

AY 2018:
- Appointed as the president of the AUB Nurses' Chapter.
- Appointed as coordinator for off-shore HSON consultancy at Regional External Program (REP).

AY 2018:
- Developed a nursing program layout intended for the Al Moosa Group, Elhasa, KSA.

AY 2017:

- Reviewed the fundamentals of nursing course syllabus for the Mohammad Al Mana' College for Health Sciences (MACHS) Khobar, KSA, addressing accreditation readiness and curriculum matters, and providing recommendations for course improvement.
- Developed the syllabus for the "**Oncology Course",** that was offered to 35 registered nurses in the UAE through the REP office/AUB.

AY 2016:

- **OSCE in Nursing**: **Theoretical Perspectives and Application**. This is a seminar offered to the faculty at the HSON for the sake of adopting OSCE in all nursing courses.

- Participating in the ***Essential Skills for Teaching with Simulation: A Faculty Development Workshop*** offered from February 29 to March 4.

AY 2015:

- Acted on the **MEMA** advisory board for nursing, organizing the presentations on oncology nursing.

AY 2014:

- Published in the CTL newsletter in the 2014 issue on ***Assessment Strategies*** used at the Hariri School of Nursing.

- Participated in the ***Teaching Excellence*** workshop conducted from November 17-21 at the HSON to nursing faculty from West Bank, Palestine.

- Spring of 2014 & 2015: Participated in the **clinical teaching** of students from the Faculty of Medicine (Med 1 level) on medication preparation and administration sessions.

AY 2013 to present:

- **Preceptor Education Workshop: Organizer and presenter.** This is a 1-day Workshop designed for preceptors from AUBMC involved in the clinical teaching of the HSON nursing students. A total of five workshops have been conducted to this date.

B. Service to the Profession/Reviewer

2014-Now:

1. Reviewer for the journal of *Nurse Education Today* published by Elsevier
2. Reviewer for the journal of *Nurse Education in Practice* published by Elsevier
3. Reviewer for research proposal grants submitted to the Center for Teaching and Learning (CTL), AUB
4. Reviewer for the "Effective Teaching and Learning in Higher Education Conferences" organized by the Center for Teaching and Learning (CTL) and IT Academic Core Processes & Systems (IT ACPS), AUB.
5. Reviewer for the LAU Simulation-Based Medical Education Conference (March, 2018).

C. Service to the Profession-National

- **2018- 2019:** Worked on the Scientific committee for the 2nd Simulation-Based Medical Education conference, LAU.
- **October 2016**: Appointed as a member for the curriculum review taskforce at the Order of Nurses in Lebanon.
- **2013-2014: P**articipated with nurse educators from different schools of nursing in Lebanon to design a course on Tissue & Organ Donation and Transplantation. The course sets the groundwork for preparing nurses in the country regarding the concept of donation and transplantation in its entirety. Through a decree by the director of Higher Education, the course was agreed upon and mandated for integration in all nursing curricula in Lebanon.

D. Service to the Profession-International

- **Nov. 2016 - :** Appointed as vice president for the "Honor Society of Nursing Chi Iota Sigma Theta Tau International, AUB, Lebanon.

- **Sep. 2014-2016:** Appointed as Counselor for the "Honor Society of Nursing Sigma Theta Tau International: Chi Iota Chapter", AUB, Lebanon.

- **Sep. 2014-Now:** Member of the "Honor Society of Nursing Sigma Theta Tau International: Chi Iota Chapter", AUB, Lebanon

- **Oct. 2011-2013**: Member of the Alliance of Universities for Democracy (AUDEM)

E. Service to the Profession at the United Arab Emirates UAE

- 2011: Member of the UAE Nursing and Midwifery Council, Scientific Committee on Education; serving on the council working body to define, establish, and monitor unified standards and processes across the UAE in the area of education.
- 2011: Member of the UAE Nursing and Midwifery Council Scientific Committee on practice: **taskforce on specialization** aimed at developing strategic directions for the advancement of nursing and midwifery practice through the establishment, recognition, and regulation of specialties in nursing.
- 2008-2011: Member of the UAE Federal Nursing Policy and Practice group, Federal Department of Nursing, MOH.
- 1997-2007: Coordinating the panel on developing and reviewing registration examinations intended for both practical nurses and registered nurses in the Abu Dhabi Emirate.

Professional Development

• Workshops and Training Programs Attended

April, 2021 - **CCNE Workshop on Writing Self-Studies** Webinar Series.

April, 2021 – ***Tenth International Conference on Teaching and Learning*** organized by CTL, AUB

February, 2018 – ***Eighth International Conference on Teaching and Learning*** organized by CTL, AUB

February, 2017 – ***Seventh International Conference on Teaching and Learning*** organized by CTL, AUB

February, 2016 – ***Sixth International Conference on Teaching and Learning*** organized by CTL, AUB

November 10, 2015 – ***Capstone courses in Higher Education*** organized by the CTL, AUB
February 7, 2015 – ***Fifth International Conference on Teaching and Learning*** organized by

CTL, AUB

May, 2015 – ***Symptom Management of Patients Receiving Chemotherapy***, MEMA, AUBMC

May 10, 2013 - ***Developing & Assessing Program Learning Outcomes,*** CTL, AUB

February 6, 2013 – ***Third International Conference on Teaching and Learning*** organized by CTL, AUB

December 2012 - ***Second International Conference on Teaching and Learning***, CTL, AUB

November 2012 – ***On Faculty learning community,*** CTL, AUB

September 2012 – ***Teaching and Reflective Practice***, CTL, AUB

December 9, 2011 – ***Assessment of Program Learning Outcomes***, AUB

- ***Measuring Teaching Effectiveness***, AUB

AWARDS

May, 2019 – Reviewer award by the journal of Nurse Education Today.

January, 2021 - Nominated for the teaching excellence award, AUB.

January, 2015 – Nominated for the teaching excellence award, AUB.

Updated July 2021

CURRICULUM VITAE

Name: Lina Younan Sabbagh

Department: Faculty of Nursing, American University of Beirut

Position: Clinical Associate Professor

Birth Date: June 9, 1965 **Birth Place**: Saida, Maghdoucheh

Home Address: Maghdoucheh, Birket Street, Younan Building, Saida-Lebanon.

Home Telephone: 07-200768 **Mobile Telephone**: 76-700598

Office Telephone: 01-350000 Ext. 5981 **Email**: ly11@aub.edu.lb

EDUCATIONAL BACKGROUND

May 2012 Doctor in Nursing Practice (DNP) at Johns Hopkins University, USA. Capstone project titled: A Systems Approach to Safe Patient Handoff in an Acute Care Setting.

June 2007 Masters in Nursing Administration, at the Hariri School of Nursing, American University of Beirut. Project titled: The Administrative Nursing Process.

June 2000 University Diploma in Operating Room Nursing, at Saint Joseph University of Beirut.

June 1988 Bachelor of Science in Nursing at the American University of Beirut.

WORK EXPERIENCE

Academia

09/2019 – Present Clinical Associate Professor, American University of Beirut, Hariri School of Nursing.

09/2012- 08/2019 Clinical Assistant Professor, American University of Beirut, Hariri School of Nursing.

Administrative

10/2004 – 08/2012 Director of Nursing, Labib Medical Center (LMC), Saida, Lebanon

10/1997 – 09/2004 Nurse Manager, Operating Room, (LMC), Saida, Lebanon

Clinical

02/1997 – 09/1997 Registered Nurse, Heart Intensive Care Unit, European Heart Center, Saida, Lebanon

09/1996 – 01/1997 Registered Nurse, Operating Room, Trad Hospital, Beirut, Lebanon

08/1994– 04/1996 Registered Nurse, Operating Room Karam Hospital, Beirut, Lebanon

05/1990– 05/1991 Staff Nurse, Nuclear Medicine Department Dubai Governmental Hospital, UAE

4. Research Grants Funded & Research in Progress

- Impact of person-centered care on dementia-related aggressive behaviors and quality of life on people with dementia living in nursing homes in Lebanon: a feasibility study PI: Marina Gharibian Adra, Co-investigator: Hala Darwish
  Funded by University research board (URB) for the academic year 2020-2021
  Amount: $9,500

- Promoting a Culture of Community in Nursing Homes in Lebanon through Forging Partnerships: A Constructivist Case Study Approach. Principal investigator: **Marina Adra,** Co-investigators: Zepur Aharonian, Abla Sibai
  Funded by University research board (URB) for the academic year 2018-2019
  Amount: $4,800

- Exploring Resident-Staff Relationships in Nursing Homes in the Lebanon.
  Principal investigator: **Marina Adra**
  Co-investigators: Zepur Aharonian, Abla Sibai
  Funded by the Medical Practice Plan (MPP) for the academic year 2017-2018.
  Amount: $4,300

- Palliative Care in Older Adults in Lebanon
  PI: Dr. H. Huijer. I am a member of the multidisciplinary team, working mainly on:
  " Predictors of Quality of Life of Older Adult Patients in Lebanon"
  Funded by: National Council for Scientific Research
  Amount: 30Million LL.

- Noureddine S., **Adra M**., Arevian M., Dumit NY., Puzantian H., Shehab D., Abchee A., (2006). Delay in Seeking Health Care for Acute Coronary Syndromes. Journal of Transcultural Nursing. vol. 17, no. 4, pp 341-348. Project was supported by 2 grants from the American University of Beirut: Medical Practice Plan. Amount was $8,500.00 and University Research Board. Amount was $5,000.00 on February 2004.

TEACHING

1. Courses Taught

➢ **Undergraduate courses:**

- NURS 406: Nursing Research, Co-coordinator, 2020-2021
- NURS 300: Nursing Care of Adults and Older Adults I, Theory & Practicum, Coordinator, 2016-present.
- NURS 302: Nursing Care of Adults and Older Adults I, Theory & Practicum, Coordinator, 2016-present.
- NURS 300: Nursing Care of Adults I, Theory & Practicum, Coordinator, 2009-2016.
- NURS 302: Nursing Care of Adults II, Theory & Practicum, Coordinator, 2009-2016-present.
- NURS 300: Nursing Care of Adults I, Theory & Practicum, team taught. 1983-1995.
- NURS 302: Nursing Care of Adults II, Theory & Practicum, team taught. 1983-1995
- NURS 210: Pathophysiology, team taught, 1990-2001
- NURS 210: Pathophysiology, Coordinator, Fall 2001-2014.
- NURS 200: Introduction to Nursing Practice, Coordinator, Fall 2002-2004.
- NURS 400: Critical Care Nursing, Theory & Practicum, Coordinator, Fall 1995-2001.
- NURS 400: Critical Care Nursing, Theory & Practicum, Fall 2003-2010.
- NUR 202: Health Assessment, assessment of the older adult, 2014-present

- NURS 210: Pathophysiology, Inflammatory process and Hematologic disorders. Summer 2017-2018.
- NURS 406: Nursing Research, Qualitative methods in nursing research, 2015-2017.
- NURS 311V: Nursing Care of adults, Theory and Practicum for RN-BSN students.

- **Graduate courses: Participated in teaching and delivering the following lectures:**
  - Advanced Practice in Adult Gerontology: Health problems in older adults and management of cognitive impairment in older adults. Fall 2017-20.
  - Advanced Practice in Adult Gerontology: Health problems in older adults, Fall 2018-2020.
  - Advanced Health Assessment: Assessment of Older Adults, 2014-2019

Other Teaching Activities

BLS-ACLS instructor course.

On November 26, 2007 successfully completed the American Heart Association BLS ACLS Instructor Course. Taught BLS & ACLS provider courses in close collaboration with AUBMC staff development program, 2007-2010.

CONSULTANCIES

- Was invited for a three day (February 3-6 2018) on site consultancy visit of the nursing program at Mohammad Al-Mana College of Health Sciences (MACHS), which was part of the consultancy agreement between AUB Regional External Programs and MACHS. The purpose of the trip was to assess on site the nursing curriculum implementation vis-à-vis the policies, by-laws, procedures, processes, and course syllabi that were appraised by the faculty and staff of Hariri School of Nursing, American University of Beirut. Furthermore, during my visit I was consulted and participated in designing and planning the gerontological nursing course of the BSN program.

- Consultant to the Nursing Service Director of Dar Al Ajaza Al Islamiyyah hospital, 2013-present. I am consulted on appointing nurse managers and supervisors and strengthening their leadership skills, mainly in the division of Geriatrics. I also provide the nursing director with resources and multiple choice questions on leadership skills in order to assess the knowledge acquired by the nurse mangers.

SERVICE

1. Professional Practice

- **November 2016**: Presentation to the Faculty at HSON on Objective Structure Clinical Exam (OSCE), AUB.

- **March 2016**: Presentation on "The Essential Skills for Teaching with Simulation", A faculty development workshop offered to Palestinian Nursing Faculty at American University of Beirut.
- **October 2016:** Moderated a session titled "Health Care of Older Adults" at the second international conference of nursing, at the American University of Beirut.
- **March 2013:** Presentation on "Generating a Model of Quality of Life" at the American University of Beirut.
- **April 2011:** Presentation on "Geriatric Considerations in Trauma Management" Advanced Trauma Care workshop to Iraqi nurses, at the American University of Beirut.
- **September 2009:** Professional training workshop in Gerontological Nursing. Workshop presented to 20 registered nurses in Larnaca, Cyprus.

Other Service Activities

2012 4. Reviewed 12 abstracts for the 17th International Conference on Cancer Nursing, Prague

2012	5. Prepared a program composed of 13 sessions, on Healthy Aging for the Armenian Relief Cross in Lebanon
2011	6. Participated radio Van talk shows (Armenian radio) three occasions on the following topics: a)Environmental Health b)Breast cancer awareness c) HIV/AIDS prevention
2011	10. Revising and editing the manual of community health volunteers to the Bedouin Health Community Engagement Project, AUB/FHS Oxford led Research Project,
2011	Prepared proposal for Post-Basic Nursing Certificate Programs
2011	Prepared proposal for post-basic certificate program in School Health Nursing, UAE
2011	3. Prepared proposal for post-basic certificate program in Community Health Nursing.
2009	Awareness Campaigns for the Prevention of H1N1 Infection
2008	Proposal for Vocational Training of Nurses aids for Elderly Home Health Care Services for the Jinishian Memorial Program.
2008	Implemented a one day seminar, with BSN IV students, for the staff of the Azounieh Armenian Sanatorium, on caring for the Institutionalized elderly
2007	Proposal Writing wrote a proposal to the Japanese Embassy in Lebanon for funding equipments for laboratory, a dental unit and x-ray machine for panoramic view of the teeth for the A. Boulghourdjian Socio-medical center of ARCL. (Japanese Embassy granted a sum of $83.0000).
2006	School Health Program for South Lebanon Wrote a Proposal for a comprehensive plan for a pilot School Health Program for South Lebanon in Collaboration with the Ministry of Health and Italian Cooperation. Prepared needs assessment form, conducted needs assessment, and with the BSN IV students taking Community Health Nursing in the spring semester, on March 22, 06, implemented Health Fair for four schools. Submitted a final report to: Italian Cooperation and the Ministry of Public Health. (Project was funded by the Italian Cooperation).

2006

Wrote a Proposal for a comprehensive plan for a pilot School Health Program for South Lebanon in Collaboration with the Ministry of Health and Italian Cooperation. Prepared needs assessment form, conducted needs assessment, and with the BSN IV students taking Community Health Nursing in the spring s

Proposal for Prevention of Substance Abuse: Train the Trainees that I had written last year for Armenian Relief Cross in Lebanon was funded this year by OXFAM, Canada. Program implementation began on February to end in October, 2006. A workshop was organized and implemented in collaboration with Armenian Relief Cross in Lebanon and the UM EL NOUR Organization during March 17_19, 2006 for 35 young men and women to prepare them for substance abuse awareness campaigns. Teaching kit is prepared.

CURRICULUM VITAE

Nour Alayan, PhD, RN

Beirut, Lebanon
Tel.: (+961) 81 685 187
Email: na62@aub.edu.lb

Biography

Dr. Nour Alayan is a health behavior nurse researcher, with a focus on behavior change and the use of complementary and bio-behavioral approaches that support mental health and well-being. She is currently an Assistant Professor at the Hariri School of Nursing of the American University of Beirut (AUB) and provides holistic behavioral health support at the Wellness Center at AUB-Medical Center Family Medicine Department. She completed her PhD in Nursing at Rutgers, the State University of New Jersey (2017), her MS in Nursing at AUB (2008), and her BS in Nursing at AUB (2004). Dr. Alayan's work is based on mind-body science, investigating bio-behavioral treatment interventions, such as heart rate variability biofeedback, and evidence-based therapeutic interventions, such as Motivational Interviewing and Screening, Brief Intervention, and Referral to Treatment (SBIRT).

I. Educational Background

2014 – 2017	**Rutgers University, School of Nursing** PhD in Nursing Science – Health Behavior Focus
2013 – 2014	**Oregon Health and Sciences University, School of Nursing** PhD in Nursing Science, First year *(Transferred to Rutgers for Teaching Fellowship)*
2005 – 2008	**American University of Beirut, Hariri School of Nursing** Master of Science in Nursing *Residency in Advanced Nursing Practice, Johns Hopkins Hospital and the School of Nursing in Baltimore, Maryland*
2001 – 2004	**American University of Beirut, Hariri School of Nursing** Bachelor of Science in Nursing

II. Professional Certificates

Ongoing	**Certificate Program of Advanced Motivational Interviewing** Health Education and Training Institute, Maine, USA (online)
January, 2021	**Stop Smoking Practitioner (England)** National Centre for Smoking Cessation and Training, England

June, 2019	**Emotional Freedom Techniques** Mind Your Power, Holistic Consultancy, Dubai
May, 2019	**Motivational Interviewing** Health Education and Training Institute, Maine, USA (online)
January, 2019	**Hypno-parenting Coach** Mind Your Power, Holistic Consultancy, Dubai
January, 2016	**Certificate in Effective College Instruction** American Council on University Education, USA
March, 2014	**Screening, Brief Intervention, and Treatment for Unhealthy Drinking, Training Program for Workplace Practitioners** National Association of Alcoholism and Drug Abuse Counselors, USA
January, 2013	**Registered Professional Nurse License, NY, USA**
Sept., 2011	**Clinical Hypnotherapy** National Guild of Hypnotists Inc., New Hampshire, USA

III. Employment History

2017 – current	**American University of Beirut** Assistant Professor, Hariri School of Nursing Clinical Associate, Health and Wellness Center, Family Medicine (*Pending*)
2012 – 2017	**American University of Beirut, Hariri School of Nursing** Clinical Instructor *(On leave from 2013-2016 for PhD studies)*
2014 – 2017	**Rutgers University, School of Nursing** Teaching Fellow
2013 – 2014	**Oregon Health and Sciences University, School of Nursing** Nursing Instructor
2010 – 2012	**American University of Beirut, Hariri School of Nursing** Clinical Preceptor (Part-time)
2010 – 2012	**E-Medlinks, Software Solutions for Healthcare, Lebanon** Executive Manager
2010	**American University of Beirut, Faculty of Health Sciences** Research Assistant
2008 – 2010	**The Advisory Group for Healthcare Solutions, Kuwait** Senior Associate, Hospital Operations Planning and Compliance

2005 – 2008	**American University of Beirut, Hariri School of Nursing** Graduate Assistant, Research and Teaching
2004 – 2008	**American University of Beirut, Medical Center** Registered Nurse, Medical-Surgical and Psychiatry Units

IV. Awards/Honors

2018 – 2019	**"Dr. Motivational Interviewing" Award** – recognition presented by graduating class
2016 – 2017	**Rutgers University, Newark Graduate School** Dissertation Fellowship ($20,000)
Oct, 2015	**Lois Wildly Scholarship, International Nurses Society on Addictions** Travel Award
2014 – 2016	**Rutgers University, School of Nursing** Teaching Fellowship ($60,000 / year)
2013 – 2014	**Oregon Health and Sciences University, School of Nursing** Dean's Scholarship and Leily Esteghlalian-Campagna RN Doctoral Award ($20,000)
Jun, 2004	**American University of Beirut, School of Nursing** Najla Morston Award, for Outstanding Achievement

2016, March	Introduction to substance use Screening, Brief Intervention, and Referral to Treatment in Primary Care, Accelerated Undergraduate Nursing Program, Rutgers University, USA
2015, December	Substance use Screening, Brief Intervention, and Referral to Treatment in Psychiatric Nursing Practice, DNP program, Rutgers University, USA

VI. Grants

A. Grants Awarded

2021 – 2023 **A Longitudinal Randomized Control Trial of Smartphone-Assisted Heart Rate Variability Biofeedback for Smoking Cessation**

Intramural Funding: Medical Practice Plan - AUB ($27,800)

Research Team: Dr. Nour Alayan (PI), Dr. Maya Romani (Co-PI), Dr. Angela Massouh (Co-I), Dr. Samar Noureddine (Co-I), and Dr. David Eddie (Co-I)

2020 – 2022 **Appraisal, Burnout, and Coping in Dyads Living with Chronic Illnesses: The ABCs of Informal Caregiving**

Extramural Funding: Qatar National Research Fund for Family Research ($50,000)

Research Team: Dr. Angela Massouh (PI), **Dr. Nour Alayan (Co-PI)**, and Dr. Samar Noureddine (Co-I)

2020 – 2021 **REflective Simulation-Based e-Training on Motivational Interviewing for Interprofessional Teams [REST-MI]**

Intramural Funding: Scholarship of Teaching and Learning (SOTL) Grants program at AUB ($7,000)

Research Team: Dr. Angela Massouh (PI) and **Dr. Nour Alayan (Co-PI)**

2019 – 2021 **Using simulation-based experiential learning to integrate Screening, Brief Intervention, and Referral to Treatment (SBIRT) in the nursing curriculum**

Intramural Funding: Scholarship of Teaching and Learning (SOTL) Grants program at AUB ($3,400)

Research Team: Dr. Nour Alayan (PI), Mrs. Tamar Avedissian (HSON), Dr. Ghada Najjar Assaf (HSON), and Dr. Dina Madi (HSON)

2018 – 2020 **Nurses' and Pediatricians' Attitudes, Perceptions, and Practices of Screening, Brief Intervention, and Referral to Treatment (SBIRT) for Adolescent Substance Use: A Multisite Cross-Study in Primary Care and School Settings**

Funding: AUB – University Research Board (URB) Faculty Research Grant ($12,500)

Research Team: Dr. Nour Alayan (PI), Mrs. Tamar Avedissian (HSON), Dr. Farid Talih (AUB Psychiatry Department), Dr. Randa Hamadeh (Ministry of Public Health, Primary Care Department)

2016 – 2017 **Substance craving changes in university students receiving Heart Rate Variability Biofeedback**

Dissertation Fellowship ($20,000) awarded but not accepted due to work conflict, Rutgers University, New Jersey, USA

B. Grants Submitted and Currently under Review

None

C. Grants Submitted and Not Awarded

2020, May **Assessment of Hospital Response to the Mental Health Needs of Healthcare Workers during the COVID-19 Pandemic in Lebanon** (PI: Dr. Dinah Ayna)

Extramural Funding: National Council for Scientific Research (CNRS), Lebanon – Not awarded

2020, Nov. **A Longitudinal Randomized Control Trial of Smartphone-Assisted Heart Rate Variability Biofeedback for Smoking Cessation** (PI: Dr. Nour Alayan)

Extramural Funding: Fondacion Mapfre (30,000 Euros) – Not awarded

VII. Teaching

A. Courses Taught

Years	*Course Number and Title*	*Level*	*Credits*
2019 – current	NURS 500 – Theories, Concepts, & Frameworks for Advanced Nursing Practice	Graduate	2
2013 – current	NURS 300 – Nursing Care of Adults I	Undergraduate	4
2017 – current	IPEC 300 – Interprofessional Education and Collaboration	Undergraduate	1
2011 – current	NURS 302 – Nursing Care of Adults and Older Adults II	Undergraduate	5
2016	Foundations of Health Education (TA)	Graduate	3
2016	Nursing Care Provider II	Undergraduate	6
2015	Health Assessment	Undergraduate	6
2015	Nursing Care Provider II	Undergraduate	6
2014 – 2016	Curriculum design and development	Graduate	3
2014	Health Assessment (RN-BS)	RN-BSN	2
2014	Nursing Care Provider I	Undergraduate	2
2014	RDTT 321 – Patient Care in Radiation Oncology	Undergraduate	2
2014	RDTT 320 – Basic Patient Care in Radiation Therapy	Undergraduate	2
2013	NURS 410 – Intensive Practicum II	Undergraduate	4
2012 – 2013	NURS 307 – Practicum I	Undergraduate	1
2012	NURS 202 – Health Assessment in Nursing	Undergraduate	2
2012	NURS 201 – Introduction to Nursing Practice	Undergraduate	2

B. Student Supervision and Advising

B1. Master's Students

Academic Year	Names of Students and Research Activities
2020 – 2021	**Nour Kassem (Masters' in Adult Care Nursing – Candidate)** *Thesis Committee Member* Thesis: Factors Affecting Delay in Emergency Department Presentation During Nationwide Lockdown in Lebanon
2020 – 2021	**Ani Artinian (Masters' in Adult Care Nursing – Candidate)** *Second Reader* Project: COPD Patient Symptom Management: A Continuing Education Course for Medical-Surgical Nurses

B2. Undergraduate Student Research

Academic Year	Names of Students and Research Activities
2019 – 2020	**Maribelle Zouein (BSN IV student)** Project: Using simulation-based experiential learning to integrate Screening, Brief Intervention, and Referral to Treatment (SBIRT) in the nursing curriculum *Started orientation to data collection. However, process was stopped due to COVID-19 epidemic*.
2020 – 2021	**Lynn Badran (BSN IV student)** Project: A Longitudinal Randomized Control Trial of Smartphone-Assisted Heart Rate Variability Biofeedback for Smoking Cessation *Mentored on grant writing and IRB process and application* **Samar Mohamad (BSN IV student)** Project: Using simulation-based experiential learning to integrate Screening, Brief Intervention, and Referral to Treatment (SBIRT) in the nursing curriculum *Mentored on data entry and analysis*

B3. Student Advising Activities Summary

I have been highly involved in the academic advising of undergraduate nursing students since 2012. I currently have 18 advisees whom I mentor throughout their nursing curriculum and until graduation. In general, my advising activities include follow up on academic progress, problem-solving of any academic and sometimes personal issues that the students share, guiding towards enhanced independent study and student counseling on any stress-related issues with referrals to the student counseling center when needed.

C. Educational Innovations and Academic Contributions

Date	*Educational Innovations**	*Audience*
Nov. 2019	Substance Use Disorders (Continuing Education)	Psychiatric Registered Nurses, AUBMC
2019 – current	Introduction to Motivational Interviewing for Medicine (Monthly)	Med IV Lifestyle Medicine Rotation, AUB
2019 – current	Motivational Interviewing Simulation (Every Semester)	BSN IV students, HSON, AUB
2019 – current	Introduction to Substance Use Disorders (Every Semester)	BSN IV students, HSON, AUB

*These educational innovations were newly developed based on course learning outcomes

VIII. Service

A. University/ Faculty/Department Service

2021 – current	Member, Accreditation Working Group, Standard III Curriculum and Teaching-Learning Practices, HSON, AUB
2020 – current	Creator and Provider, Stress Management for Nursing Students, HSON, AUB
2020 – current	HSON Representative, AUB Makerspace Cross-Campus Network Project
2019 – current	Class Advisor, HSON, AUB
2019 – current	Advisor, Nursing Student Society, HSON, AUB
2019 – current	Member, HSON Newsletter Team, HSON, AUB
2019 – current	Member, Research Committee, HSON, AUB
2019 – current	HSON Representative, Medical-Surgical Council, Nursing Services, AUB-MC
2017 – current	Member, Student Affairs Committee, HSON, AUB
2016 – current	Member, Undergraduate Curriculum & Undergraduate Student Academic Affairs Committee, HSON, AUB
2012	Member, Admissions and Recruitment Committee, HSON, AUB

B. Clinical Service

Clinical Associate, Wellness Center, Family Medicine Department, AUB-MC (pending)
This appointment has been approved by the HSON Dean Farhoud and Chairperson of Family Medicine Dr. Hamadeh.

I currently provide holistic behavioral health services for health promotion and well-being by combining various techniques including motivational interviewing, health coaching, hypnotherapy, emotional freedom techniques, and biofeedback.

C. Professional Service

C1. Committees and Taskforces

2019 – current	Member, Middle East Global Regional Council, Sigma Theta Tau International (STTI) Honor Society of Nursing
2017 – current	Member, Leadership Succession Committee, STTI Chi Iota Chapter
2014 – 2016	Member, Learning Collaborative for Adolescent SBIRT in Social Work & Nursing Education, NORC, USA
2010	Member, Tertiary Care Needs Assessment Committee, Kuwait Ministry of Health and The Advisory Group, Kuwait
2008	Member, Nursing Research Committee, AUB Medical Center
2008	Nurse Training on 180 degree performance appraisal program, AUB MC
2007 – 2008	Member, 180 Degree Performance Appraisal Taskforce, AUB Medical Center
2007 – 2008	Member, Clinical Practice Council for Medical-Surgical Units, AUB MC
2006 – 2007	Secretary, Standards of Care & Practice Committee, AUB Medical Center
2006 – 2007	Member, Task Force for Reconstruction and Community Service, AUB

C2. Peer Review

2020 – current	Drug and Alcohol Dependence
2015 – current	Japan Journal of Nursing Science
2015 – current	Journal of Addictions Nursing

D. Public and Community Service

2020 – 2021	Volunteer, FirstAid Team Response post Beirut Port explosion, Lebanon

2011 – current	Volunteer, Comunita Cenacolo, Italy-Lebanon (Youth rehabilitation community)
2010 – 2012	Volunteer, United Nations Online Program - Project planning proposal writing and fundraising for international community-based projects.
2006	Volunteer, Program for displaced Lebanese citizens during 2006 war - Organized the nursing volunteer team during the 2006 war in Lebanon.
2003 – 2004	Volunteer, Youths Reformatory - Initiated a volunteer group supporting the Lebanese Reformatory for Youths.

CURRICULUM VITAE

Nuhad Yazbik Dumit
Associate Professor
Hariri School of Nursing
American University of Beirut

Biography

My research focus is nursing workforce issues including migration, retention, work environment, continuing nursing education (CNE), and nurses' health; generated publications and oral presentations in international conferences the majority by invitation. The CNE research project resulted in the National Capacity Building Program for Nurses and regulation of CNE; the survey instrument developed for this research has been used in 5 languages.

I held academic and administrative positions: convener of undergraduate division, coordinator of MSN Administration and Management track at the School of Nursing, and co-director of Continuing Medical Education Office, Faculty of Medicine, AUB.

As President of the Order of Nurses in Lebanon (June 2015- 2018), I submitted several nursing regulation proposals, won the International Council of Nurses (ICN) innovation award (2017), and organized a regional symposium addressing the impact of refugee healthcare on the nursing workforce.

I served on the Scientific Steering Committee for the ICN Code of Ethics.

G. Invited Presentations

International

1. Invited as a main speaker in a session titled **"Solving the global nursing workforce crisis"** in the International Council of Nurses (**ICN**) Congress that will be held in November 2-4, 2021 in Abu Dhabi.

2. Invited by Columbia Global Center Istanbul to join an online forum and share our experiences with the REACH project in October 2, 2021.

3. Invited speaker for the 3Next (Nursing Now Next Generation), part of Nursing Now's "Nightingale Challenge" and a global nursing leadership online platform supported by Chiba University, Japan, March 2021 via Zoom.

4. Invited by the Bobst-AUB Collaborative Initiative to contribute in the Panel entitled: "What is next for Lebanon?" that covered the recent events and several implications of the Beirut Blast. The panel was addressed to the Princeton University and AUB Communities, held on 12 October, 2020 via Zoom.

5. Invited as a panelist to the "4th Middle East HIV Nurses Meeting, Patient Focus: The Full 360" on September 27, 2019 Dubai, UAE.

6. Invited as a speaker to a symposium titled "**Nursing Profession and the UN Global compacts for Migration and on Refugees**". The symposium was organized by International Centre on Nurse Migration, CGFNS International that took place at the ICN 2019 congress in Singapore June 29, 2019.

7. Invited to an "Invitational, multi-stakeholder, international colloquium" titled, "NURSING. POWER. ADVOCACY. Helping Nurses Deliver: Conversations on nurses, nursing and power" co-hosted by the International Council of Nurses (ICN) and the Canadian Nurses Association (CNA) in Vancouver, Canada, June 1-2, 2019.

8. Invited to the 'First Saudi Forum: Eitizaz' [Pride] to speak on "My Journey as a Nurse Leader" among 5 regional leaders in nursing and honored by the KSA minister of health, Riyadh, KSA March 17, 2019.

9. Invited to speak on "Nurses leading healthcare Transformation: from Practice to Policy" at the International Nursing Conference organized by King Fahd Specialist Hospital, Dammam, under the title of "Nursing Voice: Partners in Healthcare Transformation", November 22-24, 2018.

10. Invited by the Jordanian Nursing Council to present my experience in policy making at a national level at the "Nursing Now" Roundtable on "Putting Nurses at the Heart of Policy Making: A Paradigm Shift in Nursing Leadership for the 21st Century", Amman, April 18, 2018.

11. Invited as a plenary keynote speaker by the "European Federation of Educators in Nursing Science" (FINE) to address the conferees in their 2018 conference titled "Nursing Education and Practice from Vision to Action in a Changing World". My presentation title was "Role of the Order of Nurses in Creating an Integrated System of Nursing Education, Practice and Research", Malta, February 2018.

12. Invited by the International Council of Nurses to present in a main plenary session the Innovation Award winning project done by the Order of Nurses in Lebanon "Nurses joining efforts in serving communities in different districts", ICN

Congress titled "Nurses at the Forefront of Transforming Care", Barcelona, June 1 2017.

13. Invited by the International Council of Nurses to participate in the ICN Policy Forum addressing "Displaced Populations – Health, Social, and Economic Implications" to present on Lebanese nurses perspectives on refugees' healthcare, Barcelona, May 25, 2017.

14. Invited to participate in the "Global Nursing and Midwifery Clinical research Summit" organized by Columbia University School of Nursing to develop clinical nursing and midwifery research priorities in the Eastern Mediterranean countries, Amman, Jordan, July 19, 2016.

---

15. *Invited to speak on "Building and Promoting Excellence in Nursing Practice" at the 2nd International Nursing Conference Abu Dhabi – UAE, April 17-18, 2013.*

16. *Invited to speak about: Cardiac Nursing Experience in Lebanon; Recent Trends in the Care of Patients in ACS; & Family Caregivers Role in the Care of Cardiac Patients at the 4th International Cardiovascular Nursing Conference, Dammam, Saudi Arabia, Dec. 7- 9, 2010.*

17. *Invited by the World health Organization in Geneva to participate in the "Consultation to Discuss Country Implementation of the Rapid Assessment Tool for Sexual and Reproductive Health and HIV linkages", Geneva Switzerland, Dec. 1-3, 2010.*

18. *Invited to speak on "Globalization and Globalism: Effects on Nursing Education, Practice, Research and Workforce" at the "1st Abu Dhabi International Nursing Conference", May 19/20, 2009.*

19. *Keynote Speaker on adolescent health in Al-Ain, U.A.E. during the International Nurses' Day, May 1997.*

20. *Invited to present on "Survey of Health Care Facilities for Adolescents in selected Organizations in Lebanon" in Al- Ain U.A.E. during the International Nurses' Day, May 1997.*

National

1. Invited by MSF Lebanon Branch Office, as a main speaker in a webinar titled "**Health Sector in Lebanon: Caught Between the Pandemic, the Banks and the Blast",** May 19, 2021.

2. Invited to speak in a panel discussion about "Closing the Gap between What Market Needs and What Education Provides" at the 8th edition of Health Insight 2018 titled "Value in Healthcare", organized by the Arab Pharmaceutical Industry Business Development Forum, Beirut, April 20, 2018.

3. Invited to speak on "**Ethical Issues** in Emergency Care" at the Byblos Health, "First Emergency Medicine Conference of ND Maritime Hospital", Lebanon, April 20, 2018.

4. Invited to speak on "LGBT Health as a Right" at the LebMASH conference on "advancing Excellence in LGBT Health in Lebanon", March 17, 2018.

5. Invited to the "6th annual Beirut Breast Cancer Conference" Debate during the opening ceremony of the conference addressing challenges in breast cancer prevention, early detection and treatment from legal and service provision standpoints, and panel addressing support of cancer patients organized by AUBMC, Beirut, February 8-9, 2018.

6. Invited to speak on "Nursing Job Market Situation in Lebanon, Challenges in Hiring Palestinians, Practical solutions and Possible Collaborations, organized by UNRWA and supported by the European Union, Beirut, December 13, 2017.

7. Invited to speak in a panel discussion on "Multidisciplinary Approach to Diabetes Care' during the 13th Diabetes Day, organized by the Lebanese Society of endocrinology, Diabetes and Lipids, Beirut Lebanon, November 11, 2017.

8. Invited by the Ain WaZein Medical Village Center for Research to speak in a panel on the "Aged in Lebanon", during the scientific meeting on "the Aged in Lebanon: Advanced Vision for Better Care", Ain Wazein Lebanon, October 14, 2017

9. Invited to speak on a panel addressing "Medico-Legal Aspects of Infection Control" at the 2nd Annual Congress of Prevention and Control of Infections, Tripoli Lebanon, May 20, 2017.

10. Invited to speak in a panel discussion addressing "Diabetes in Lebanon, Where are we standing", organized by the Lebanese Society of Endocrinology, Diabetes, and Lipids in collaboration with the Ministry of Public health, Beirut, May 5, 2017.

11. Invited to a panel discussion on 'employment opportunities for Palestinian refugees in Lebanon, organized by the Issam fares Institute, AUB, May 4, 2017.

12. Invited to speak on a panel addressing the judicial session on "Co-Responsibilities between the Surgeon and the Team Worker" during the "20th Spring Lebanese Congress of Surgery" organized by the Lebanese Society for General Surgery, April 28, 2017.

13. Invited to speak on "Nursing Practice Regulation as a Foundation for Nursing Specialization" during the "5th annual Beirut Breast Cancer Conference" organized by AUBMC, February 10, 2017.

14. Invited to speak in a panel addressing "Emergency Nursing in Lebanon" during the conference on "Clinical Updates in Emergency Medicine", December 1-2, 2016.

15. Invited to speak in a press conference addressing role of nurses in diabetes care during the Diabetes Day organized by the Lebanese Society of Endocrinology, Diabetes, and Lipids, November 14, 2016.

16. Invited to speak in a panel addressing quality and safety in diabetes care during the "4th Annual Congress on Quality and Safety in HealthCare: Luxury or Necessity" organized by the Lebanese Society for Quality and Safety in Healthcare, September 23, 2016.

---

17. *Invited to speak/sit on a panel addressing "Lifelong Learning as a Bridge between Higher Education and Industry", specifically the session on "Healthcare Industry Focus: Current HC Workforce Needs in Lebanon; organized by the Lebanese American University, Notre Dame University, Ministry of Higher Education, supported by Tempus and EU MILL, Beirut, October 7, 2015.*

18. *Invited to speak on Leading and Managing others: Inspiring and Motivating People at the "Women's Health across the Lifespan" symposium at Gefinor Rotana Hotel Beirut organized by AUB Medical Center, March 6-7, 2015.*

19. *Invited to speak on nurse migration at the MEDHEALTH conference at Le Royal Dbayeh, Lebanon, in Nov. 28, 2013.*

20. *Invited to give a workshop on teaching effectiveness for nurse educators at the Order of Nurses in Lebanon, September 26-28, 2013.*

21. *Invited by the Antonine University Nursing Program to speak about the "Role of the Nurse in Patient Education" at their conference titled* ***Éducation pour la santé: Rôles et responsabilités des professionnels de santé, Lebanon,*** *May 30, 2013.*

22. *Invited by the Order of Nurses in Lebanon to present on "Organizational Communication, Media, and Power" followed by a workshop as part of the "Campaign for Advocating Nurses' Rights", April 29, 2013.*

23. *Invited to speak on "Nurses' Role as Educators" presented at the International Nurses Day Conference titled "Nursing: values and ethics in serving your health", organized by the Order of Nurses in Lebanon, May 12, 2010.*

24. *Invited to speak on Selecting the Right Learning Strategy for the Right Population, Grand round organized by the Nursing Services Department AUBMC, Apr.1, 2010.*

25. *Invited to speak on "Nurses Fighting AIDS Stigma" at a conference organized by the Order of Nurses in Lebanon, WHO, and National AIDS Prevention Program On the Role of the Nurse in Fighting Stigma against People with AIDS, December, 2003.*

26. *Invited to speak on the "Role of the Nurse in Health Promotion" at the International Nurses Day celebrations organized by the "Mother and Child Association", Lebanon, May 1998.*

27. *Invited to speak on "Infection Prevention in Health Care Settings" at the Armenian Relief Cross Socio-Medical Center, Beirut, June, 1995.*

Scholarly/Scientific presentations with no published transactions

1. Presenting in a regional meeting that will be held in Istanbul in October 7-8, 2021 preliminary findings of the first phase of the study "REfugees Act and Communicate for Health (REACH): Using Technology to Increase Health Literacy and Health Care Access for Refugees in Turkey and Lebanon"

2. *Sexual and Reproductive Health and HIV Linkages in Lebanon, National dissemination day, January 14, 2010*

3. *School Book Content of Reproductive and Sexual Health at the Regional Technical Meeting of the UNFPA & Educational Center for Research and Development, April 2006*

4. *Comparative Study of Nursing Education in Lebanon, at The second Nursing Research Conference" AUB, Nov. 1995*

5. *Lebanese High Schoolers' Knowledge, Practices and Attitudes toward AIDS Prevention at the regional workshop on "Changing Times: AIDS and Drug Addiction" organized by the Middle East Council of Churches, Lebanon, June 1993*

V. Grants

A. Grants Awarded

1. Nuhad Dumit & Samar Noureddine Co-PIs (AUB) and Myrna Doumit Co-investigator (Lebanese American University)**.** URB. Lebanese Nurses' Health Study. July 2021-July 2022. Grant budget $4200.

   This study examines the health status of nurses working in Lebanon specifically prevalence of NCD risk factors and their association with work conditions, in addition to identifying nurses' attitudes and practices of health risk reduction; and explores their personal and professional experiences with COVID-19.

2. Yanis Ben Amor (International) PI**),** Ozge Karadag Caman (International) Co-PI**)**, Columbia University; **Nuhad Y. Dumit*, (Lebanon PI);** and Selma Karabey, Istanbul Faculty of Medicine, Istanbul University. Center for Sustainable Development, Earth Institute, Columbia University. REfugees Act and Communicate for Health (REACH): Using Technology to Increase Health Literacy and Health Care Access for Refugees in Turkey and Lebanon. December 2020-december 2021. $18,500 for Lebanon part of the study.

3. **Nuhad Y. Dumit (PI),** Gladys Honein-AbouHaidar, & Suzanne Dhaini (AUB); Ibtissam Al Zaru & Muntaha Gharaibeh (Jordan University of Science and technology); Nancy R. Reynolds & Patricia M. Davidson (Johns Hopkins University). AUB Global Health Institute. Perspectives of Registered Nurses On **Refugee Healthcare** In Lebanon and Jordan: A multi-site cross-sectional study (PROfILE). October 2019-October 2020. $20,230.

4. Mohamad Alameddine (PI), **Nuhad Y. Dumit** (**Co-PI**) (AUB). Order of Nurses in Lebanon. Understanding the Workforce Dynamic of Emigrant Lebanese Nurses: What made them leave? And what would bring them back? One year 2018. In-kind support.

5. **Nuhad Y. Dumit*** (PI), Souha Fares (Co-PI). URB. Assessing the Basic and Continuing Education Learning Needs of Nurse Managers in Lebanon. July 1st, 2016 to June 30th, 2017. $8800.

---

6. ***Nuhad Y. Dumit**** *(PI), Souha Fares (Co-PI). Order of Nurses in Lebanon. Assessing the Basic and Continuing Education Learning Needs of Nurses in Lebanon. January 2015- 2016. $5800.*

- Nuhad Y. Dumit (PI), Gladys Honein-AbouHaidar (co-PI) (AUB) Randa Hamadeh MOPH (Co-I), Michel Matar –Karantina Government Hospital (Co-I), Khalil Ashkar Lebanese University (Co-I), Huda Huijer FHS Balamand (Co-I). European commission Delegation of the European Union to Lebanon. A Scalable Primary Healthcare Experience (SHE). Submitted April 2021 for 3 years duration. 2,800,000 euros.

- Nuhad Y. Dumit (PI) & Gladys Honein-AbouHaidar (Co-PI) (AUB). Canada Fund for Local Initiatives-Lebanon. Frontline Agents for Community Health Care (FACe): Empowering trained nurses and young women community agents in Karantina, Submitted April 2021 for one year duration. $39,476.

- Nuhad Y. Dumit (PI) & Gladys Honein-AbouHaidar (Co-PI) (AUB). HOPES-LEB (Higher and Further Education Opportunities and Perspectives for Syrians and vulnerable youth in Lebanon. Technique Supérieur (TS) to Bachelor of Science in Nursing (BSN) Bridging Program. Submitted December 2020 for 3 years duration. $72,333.

VI. Teaching

A. Courses taught

a. PhD

PhD, Fall 2021-2022, NURS 609, Research Seminar, 3 students

PhD, Fall 2020-2021, NURS 606, Qualitative Research, 6 students.

PhD, Spring 2019, NURS 606, Qualitative Research, 3 students; Newly introduced.

b. Graduate

Fall 2021-2022, NURS 527, Systems Approach to the Development and Evaluation of Health Care Services, 13 students.

Fall 2020-2021, NURS 527, Systems Approach to the Development and Evaluation of Health Care Services, 16 students.

Fall 2019-2020, NURS 527, Systems Approach to the Development and Evaluation of Health Care Services, 10 students.

Fall 2019-2020, NURS 525, Leadership Theories and Behaviors for Nurse Managers, 5 students.

Fall 2018-2019, NURS 527, Systems Approach to the Development and Evaluation of Health Care Services, 10 students.
Spring 2018-2019, NURS 520, Managing Quality with Teams. 9 students.

Fall 2017-2018, NURS 527, Systems Approach to the Development and Evaluation of Health Care Services, 13 students.

Fall 2016-2017, NURS 527, Systems Approach to the Development and Evaluation of Health Care Services, 8 students

Spring 2016-2017, NURS 520, Managing Quality with Teams. 6 students.

Spring 2015-2016, NURS 520, Managing Quality with Teams. 7 students.

c. Undergraduate/Graduate

Spring 2017-2018, IPEC 300, Interprofessional Education and Collaboration, 85 students.

Fall 2017-2018, IPEC 300, Interprofessional Education and Collaboration, 105 students.

Spring 2016-2017, IPEC 300, Interprofessional Education and Collaboration, 100 students.

Fall 2016-2017, IPEC 300, Interprofessional Education and Collaboration, 100 students of Medicine, Nursing and MPH.

d. Undergraduate

Spring 2020-2021, NURS 411, Intensive Practicum in Area of Interest, 26 students

Spring 2019-2020, NURS 411, Intensive Practicum in Area of Interest, 20 students.

Spring 2018-2019, NURS 411, Intensive Practicum in Area of Interest, 37 students.

Spring 2017-2018, NURS 410, Leadership and management in Nursing Theory & Practicum, 36 students.

Courses previously taught before 2016

NURS 508, Advanced Practice in Nursing Administration, ***Graduate***

NURS 520, Managing Quality with Teams ***Graduate***

NURS 527, Systems Approach to the Development and Evaluation of Health care Services ***Graduate***

NURS 507, Role Development in Nursing Administration ***Graduate***

NURS 525, Transformational Leadership for Nursing Practice ***Graduate***

NURS 509, Role Development in Nursing Education ***Graduate***

NURS 410, Leadership and management in Nursing Theory & Practicum ***Undergraduate***

NURS 411, Intensive Practicum in Area of Interest ***Undergraduate***

NURS 400, Critical Care Nursing Theory and Practicum ***Undergraduate***

NURS 205, Foundations of the Nursing Profession ***Undergraduate***

NURS 201-202, Fundamentals of Nursing Practice Theory & Practicum, ***Undergraduate***

Summer Nursing Institute Courses

Using Microteaching to Improve your Classroom Instruction, (NURS 511Y), 2010

Nursing-Sensitive Outcomes Measurement (NURS 511R, 1Cr), 2009

B. Student Supervision and Advising

B1. PhD Students

2021-2022, academic Advisor and mentor of 1 PhD student.
2020-2021, academic Advisor and mentor of 2 PhD students
2021, mentoring Christina Baker, a 3rd year PhD student at the College of Nursing University of Colorado

B3. Undergraduate Students Capstone Projects (selected)

I guide senior nursing students working on their clinical capstone project in NURS 411 course to identify a clinical/patientcare/management issue, analyze the problem situation, search the literature for evidence-based solutions, select one based on established criteria, and plan the implementation and evaluation of the proposed solution. Since I supervised over 50 projects, I am presenting titles of some of those projects:

- Reducing the Hemolysis Rates of Blood Specimens Withdrawn on the Units
- Creating a Pediatrics' Acuity Tool
- CLABSI Prevention and Control in the Coronary Care Unit
- Compliance and Effectiveness of the VAP Bundle in Intensive Care Unit
- Enhanced Compliance with the Safety Guidelines of Enteral Medication Administration
- Maintaining Patient-Centered Care during COVID-19
- Upholding a Positive Work environment during COVID-19
- Evidence-Based Practice and COVID-19
- Quality of Care and Safety in COVID-19
- Policy on Cross Training as a Strategy for Balanced Unit Staffing
- Alleviating Nurses Burnout in a Chronic Diseases Unit

B4. Service as Member on Thesis or Dissertation

Dissertation

Rana Abdel Malak, PhD Dissertation, "Nursing leadership and followers' relations and its impact on determinant of RN job satisfaction", 2016, currently Executive Healthcare Consultant.

Member of Master's Thesis

- Member of thesis committee, Dalya Nehme, "The Impact of CME/CNE Programs on Clinical Practice and Clinical Attitudes of Physicians and Nurses at AUBMC", Department of Education, Faculty of Arts and Sciences AUB, in progress.

- Member of thesis Committee, Dana El Hajj, "Smoking among students at the American University of Beirut: prevalence and relation to other lifestyle risks"; defended successfully, MS Population Study program, Faculty of Health Sciences, 2002; ***assistant professor at the university of North Carolina***.

B5. Student Advising Activities Summary

Though I am involved in teaching undergraduate students in their last semester of the senior year, yet as a convener of the division, I am the secondary advisor for all BSN students (160-205 students). Nonetheless, I supervise almost half of the senior class (ranging between 18-26) each year in their clinical capstone projects.

In the MSN program, other than academically supervising 5-7 students per year, I supervise those working on their graduation projects or theses whether they are in the nursing administration and management track or the clinical tracks. I served as thesis chair to 5 students; project first reader to 29 students; and second project reader to 25 students.

I am supervising 2 second-year PhD students specifically preparing them for their qualifying exam in December 2021.

C. Educational Innovations and Academic Contributions

Currently, co-designing the "**Development of an Online Training Module for Nurses Working in Primary Health Care Centers in Lebanon**" funded by WHO, in collaboration with the Order of Nurses in Lebanon, AUB Family Medicine Department, and the Ministry of Public Health.

April-May 2021: Coordinated and co-designed a Bachelor of Nursing program for the American University of Armenia

2020-2021, Co-designed to the "**Online Academic Graduate Diploma in Nursing Education"** approved by the AUB Senate in May 2021.

2020-2021, Co-designed to the "**Online Academic Graduate Diploma in Nursing Administration"** approved by the AUB Senate in May 2021.
April 2020, developed the "Critical Care Capacity Building Program" for critical care nurses in Irbil upon the request of the Syrian American Medical Society. The program is pending funding.

2018, Coordinated and participated in the Nursing Program Review for the Mohammed Al Mana' College of Health Sciences (KSA).

April 2017…, developed the National Capacity Bridling Program for bedside Nurses based on the national survey that I led assessing continuing education needs of nurses. Phase 1 of the program, Train the Trainer, that took 2 years was completed [2017-2019]. Phase 2, trainers train bedside nurses in all Lebanese healthcare organizations will commence once the country situation allows.

April 2017-2019: Served as Technical Coordinator for the Mohammed Al Mana' College of Health Sciences (KSA) academic and administrative consultation agreement with AUB Regional External Program.

2016-2019, chaired a task force that designed the **Technique Supérieur to BSN Bridging Program;** this new program is pending approval by the Academic and Development Committee at AUB.

2016-2018, Designed, led and coordinated a 3-year project of Continuing Nursing Education of more than 50 offerings to UAE nurses under the Health Authority Abu Dhabi through REP.

VII. Service

A. University/ Faculty/Department Service

Service to the University

2017… Elected Member of **AUB senate**, effective September 2017
Senate steering Committee member
Chair of the Senate Steering Committee, 2019-2020; 2020-2021

2020 …, member of the **VITAL** Advisory Group 6 addressing the health of our communities; VITAL 2030 is the new vison for AUB

2021…, Reviewer of grant proposals for the Center for Teaching and learning (CTL) at AUB.

2020…, member of the Board of the General Education Program

2011- Now, Abstract reviewer for the CTL and IT Academic Core Processes & Systems (IT ACPS), annual conferences on "Effective Teaching and Learning in Higher Education,", AUB.

2018-2019, Ad hoc Senate Committee on Department Chairs at AUB, member

2018-2019, Core Mandatory, Elective, Capstone Courses Task Force, AUB Core Curriculum, member

2018 … Committee on the Lives and Careers of Women at AUB, member

2017-2018, member of the Working Group 1 of the AUB Accreditation

2016-2019, Regional External Program technical coordinator of MACHS project

2017, Standing Faculty Grievance Committee Co-Chair

2016-2020 Regional External Program Steering Committee member, AUB

2015 – 2017, member of the Task Force on the Lives and Careers of Women Faculty at AUB

2014 – 2017, member of the Board of Graduate Studies at AUB

2012 -2018, member of the Task force on Interprofessional Education, (School of Nursing, Faculty of Medicine, Faculty of Health Sciences) AUB

December 18, 2012, *participated in giving a workshop on assessment of program learning outcomes organized by the Center for Teaching and learning (CTL), AUB*

August 6, 2012, *gave a session on Diagnostic/Formative/Summative Assessment in a workshop organized by CTL for AUB faculty*

May 24, 2012, *gave workshop on peer observation to AUB faculty organized by CTL*

2009, *Member of the Search Committee for director of the CTL, AUB*

2008-2012*, Member of the Senate Committee on General Education Requirement, AUB*

2008-2012, *Member of the AUB Center for teaching and Learning Advisory Committee*

2007-2008*, Member of Working Group 8–Institutional Assessment and Student learning Assessment- for the University accreditation*

2007- 2008, *member of the University Learning Outcomes Coordinating Committee, AUB*

2001-2003*, Member of one of the task teams –Institutional Assessment- for accreditation of the University by the Middle States Commission on Higher Education*

1999-2002*, Member of the AUB Task Force on Undergraduate Teaching Excellence;*

- *Member of a Sub-Committee of the Task Force on organizing Workshops for AUB Faculty on teaching excellence;*
- *Secretary of the Sub-Committee for preparing and conducting surveys related to Perceptions of AUB graduating students about teaching practices at AUB;*
- *Member of the Sub-Committee on teaching portfolios*

2009, *Offered the unit on "Designing Course Syllabi" for the Mellon Summer Seminar, AUB*

March 2009, *Provided 2 train the trainer workshop on "Developing Course Learning Outcomes" to faculty members from the FAS and FAFS, AUB*

Jan. 5 & April 11, 2008*, Gave 2 sessions on "how to prepare a teaching portfolio" for AUB*
Faculty together with Drs. Nesreen Ghaddar & Saouma BouJaoude

Feb. 25, 2005*, Gave a sessions on "how to prepare a teaching portfolio" for AUB Faculty together with Drs. Malek Tabbal & Saouma BouJaoude*

Nov. 8, Dec. 13, 2003, & Jan. 10, 2004, *Gave 3 sessions on "how to prepare a teaching portfolio" for AUB Faculty together with Drs. Nisreen Ghaddar & Ayman Kaysi*

2002-2003, *Gave 3 sessions on "how to prepare a teaching portfolio" for AUB Faculty together with Dr. Nisreen Ghaddar in November 30, 2002, December 13, 2002, & January 10, 2003*

Apr. 2002*, Co-coordinated and presented a seminar on Teaching Portfolios for AUB Faculty in a series of Faculty Seminars on University Teaching*

Service to the Faculty/School

2021…, HSON Graduate Studies Committee, chairperson
2020-2022, member of the CCNE accreditation self-study task team and leader of Standard II
2020-2021, member of the task team for developing the online academic graduate diploma in nursing education and the online academic graduate diploma in nursing administration
2019…, HSON Advisory Committee, member
2015…, HSON Administrative Committee, member
2015…, ex-officio on the Academic and Curriculum Committee & Academic Evaluation Committee
2015…, Convener of the Undergraduate Division
2010 – 2021, HSON Graduate Studies Committee, member

2011-2013*, HSON Graduate Studies Committee, chairperson*
2011*, HSON Strategic Planning Committee, member*
2005 – 2008, *Led Development of the ADN and BSN nursing curriculum for Mohamad Al Mana' College of Health Sciences Division of Nursing, AUB-REP project*
2008-2011*, HSON Research Committee, member*
2006-2008*, SON Advisory Committee, member*
2005-2007*, SON Task force on Accreditation, member*
2005*, SON Strategic Planning Committee, member*
2004-2010*, SON Search Committee, member*
2004-2009*, SON Catalogue Committee, Chair*
2003 – 2005*, SON Centennial celebration & conference, member of*
Organizing Committee
Scientific Committee
Home Coming Committee

2003-2008*, Academic and Curriculum Committee (Chairperson)*
2001-2003*, Curriculum Committee, Chairperson*
1997-2003*, Research Committee, member*
1995-2001*, Continuing Education Committee, member*
1993-2001*, Curriculum Committee, member*
1998-1999*, Academic Committee, member*
1998-1999*, Organizing Committee for the "First International Nursing Conference in Lebanon", member*
1997-1999*, Advisory Committee, member*
1995-1999*, Student Affair Committee Chairperson,*
1990-1999*, Nursing Student Society, Advisor*
1993-1996*, Task Force Graduate Subcommittee, member*

***1987-1990**, Library Committee – member*
***1987-1990**, Recruitment Committee, member*

B. AUB Medical Center

Continuing Medical Education Office Co-Director

2011-2014 & 2019 on, I served as the co-director of the CME Office at the Faculty of Medicine, AUB on a 50% FTE basis. In my capacity as a co-director, I lead the office into moving from three continuing medical education activities into more than 70 activities for medicine, nursing, pharmacy, pathology, clinical nutrition, physiotherapy, radiology, and quality administrators. The CE offerings included conferences, seminars, workshops, congresses, short courses, training, and observership. Moreover, I helped in developing the self-study report in preparation for accreditation application to the American Council for Continuing Medical Education (ACCME) that we achieved. Similarly, I lead the learning need assessment for pharmacist in collaboration with the Order of Pharmacists in Lebanon; also in preparation for the Accreditation Council for Pharmacy Education accreditation application.
I resumed office in 2019 after 5 years break due to academic and professional responsibilities.

2010 - 2020, Member of the "Evidence-based Healthcare Management Unit (EHMU)" Executive Board, AUBMC

***July 2012,** Delegated to visit Cleveland Clinics for a 4-day meeting on CME/CNE update on continuing education strategies, methods, media, and evaluation*

***2010,** Member of the FM task force for collaboration with KFSHRC*

***2010,** Member of the Search Committee for Director of Nursing, Nursing Services department, AUB Medical Center*

***2008-2011**, Member of the Education Council, Nursing Services, AUBMC*

***2006-2008**, Quality committee, Nursing Services, AUBMC, member*

***1986-1990**, Nursing Procedure Committee, AUBMC, member*

***1986-1990**, Nursing Routine Committee, AUBMC*

C. Professional Services

C1. Professional National

President of the Order of Nurses in Lebanon, June 2015- June 2018, as president of the Order of Nurses, the only legal and professional regulatory body in Lebanon, I spearheaded several national projects naming a few:

1. "Nurses joining efforts in serving Communities in different Districts" for which the Order received the International Council of Nurses (ICN) Innovation Award May 2017. In this national project, masses of nurses and nursing students from different geographic areas joined efforts to do health

screening and health awareness in different underserved areas over a period of 4 months with full media coverage highlighting the contribution of the nursing profession in a country where nursing image is still unfavorable.
2. Transforming the national nursing qualifying [colloquium] exam for university nursing graduates from a subjective oral exam of 1-3 questions to computerized case-based multiple-choice questions.
3. The national capacity-building program for nurses, which is designed based on the national study that assessed basic and continuing education learning needs of nurses. This is a 2-year long program where experts and clinical nurse specialists train selected nurses from across the country to be national trainers for practicing nurses; once proven competent, the trainers will train fellow nurses in their geographic area over 1-2 years.
4. Nursing practice regulation where leaders in nursing from academia and practice joined efforts to write the standards and scope of practice and associated competencies for nurses in all healthcare settings consistent with Lebanese practice act and Lebanese laws.
5. Media coverage including TV, Radio, social media, online and newspapers to demonstrate the value of nursing and the contribution of the profession to healthcare.
6. Organization of joint meeting among the Orders of the healthcare professions in the country, (nurses, physicians, pharmacists, physiotherapists, midwives, dieticians, and syndicate of hospitals) to address challenges encountered in legislation and regulation and come up with recommendations for solutions.
7. New nursing laws/regulations submitted:
    a. to the parliament, law concerned with mandatory continuing nursing education to keep nurses abreast of the updates on nursing and health care that are evidence-based; legislated, decree number 136.
    b. to the council of ministers, two regulatory laws: one related to standards and scope of practice of nurses through the Ministry of Public Health; another regulation concerned with accreditation of nursing programs through the Ministry of Education
8. Brought to Lebanon the Leadership for Change program by the International Council of Nurses; a capacity building program for nursing services directors from all hospitals in Lebanon.
9. Organizing the 2nd International Nursing Conference of the Order of Nurses in Lebanon in collaboration [for the first time] with the International Council of Nurses, May 2018.
10. Organizing the first regional symposium on **Health of Refugees and Displaced People with** speakers from the international communities and agencies such as the International Committee of the Red Cross, UNHCR, MSF, ICN, International Organization of Migration, WHO, and the National Nurses' Associations from countries of the region, May 2018.
11. Organizing the first regional nursing workforce forum in collaboration with the International Council of Nurses, May 2018.
12. Supporting 5 research studies for AUB nursing faculty members.

2003-Now, Order of Nurses in Lebanon, member

2016-2018. member of the Beirut Arab University Faculty of Health Sciences Advisory Board

2016-2017, invited to several national conferences to give opening ceremony speeches:

- The 11th Regional Meeting of the Lebanese Society of Hematology and Blood Transfusion, October 12-14, 2017
- The 2nd Annual Congress of Prevention and Control of Infections, Tripoli Lebanon, May 20, 2017
- Conference on "Nurses: a Voice to Lead" organized by Sagesse University in collaboration with Agence Universitaire Francophone and the Order of Nurses in Lebanon, May 15, 2017
- The first scientific conference, Orange Nassau Governmental Hospital, Tripoli, Lebanon, May 2017

May 1993*, trained nurses and senior nursing students in a project on 'Creating Nursing Policies and Procedures' at Haroun hospital*

Nursing Education

June 16, 2015 *gave a workshop on "Student Clinical Evaluation" at the Faculty of Health Sciences, University of Balamand*

2014*, Organized Teaching excellence workshops*
September 5, 2014, Imam Sadr nursing program
November 17-21, 2014, HSON West Bank faculty members

Sept. 26-28, 2013*, conducted teaching effectiveness workshop for nurse educators at the Order of Nurses in Lebanon*

December 5, 2012, *participated in training nurse educators from Bahman Hospital in teaching critical care nursing*

July 25, 2008*, organized the School of Nursing Summer retreat on Clinical Evaluation: Monitoring Student's Progress*

Aug. 16/17, 2007*, Organized the School of Nursing Summer retreat on Evaluating Student learning*

January 19, 2006*, conducted a workshop on "Teaching Portfolio for Nurse Educators" to nurse educators from all over Lebanon at the AUB Medical Center*

Aug. 13/14, 2004*, organized the School of Nursing Summer retreat on Conceptual progression and course evaluation*

March 1995*, Participated in planning, offering, and facilitating a workshop on Clinical Performance Evaluation for the Faculty and Senior Students of the American University of Beirut - School of Nursing*

Nursing Practice

Dec. 1992-1993*, participated in Planning, Offering, and Facilitating 3 workshops for Nurses on AIDS Prevention organized by the National AIDS Prevention Program.*

***Nov.-Dec.1992**, offered a Continuing Education course on Advanced Nursing Care for RN's at Haroun Hospital*

***August 1992**, offered a Continuing Education course on Nursing Skills update for Registered Nurses at Haroun Hospital, Lebanon*

***Feb. 1992**, offered a block course on Critical Care Nursing for RN to BSN Students in Bahrain*

***Sept. 1990**, offered a two week block course on Nursing Patients with Cardiovascular Problems in Al Ain, UAE*

***Sept. 1990**, offered a two week block course on Care of Patients with Cardiovascular Problems in Sharjah - UAE*

***Feb. 1988**, conducted a one week workshop on Care of Patients with Respiratory Problems for Professional Nurses in Bahrain*

***Jan. 1988**, Conducted a one week workshop on Care of Patients with Musculoskeletal Problems for Professional Nurses in UAE*

Medical and Allied Health

***Mar. 12/13, 2008**, provided seminar/workshop on "Teaching Excellence" to Iraqi group of nurses and paramedics*

***April 13/14, 2004**, Gave 3 sessions on communication, team work, and adult education to a group of Qatari Community Physicians*

***Oct. 12-17, 2003**, in collaboration with the Family Medicine Department, AUB, organized (& trained) a second "Training and Study Tour in Curriculum Development" for a group of Jordanian Family Physicians*

***Sep.16-28, 2003**, in collaboration with the Family Medicine Dept. AUB, I organized (& trained) a "Training and Study Tour in Curriculum Development" for a group of Jordanian Family Physicians*

Higher Education

***Mar.28/29, 2010**, gave a 2-days workshop on "Writing Exam Questions" to 30 faculty members from Qatar University followed by a one-day follow-up session end of April 2010*

***Nov. 29 - Dec. 2, 2008**, Organized and implemented a 4-day workshop on "Program, Course, and clinical Evaluation" for faculty at Mohammad Al Mana'a College of Health Sciences, Khobar, KSA*

***Sept. 15-17, 2008**, organized and implemented a 3-day workshop on "Teaching Effectiveness" for faculty at Mohammad Al Mana'a College of Health Sciences, Khobar, KSA*

D. Public and Community Services

2020 …, I am leading the Community Health Initiative (CHI) of Khaddit Beirut (KB) (Shake-up Beirut). KB is established in response to the Beirut Port blast led by an interdisciplinary team of healthcare providers, public health experts, environmentalists and chemists, education experts, small business experts, political scientists, and information technology experts. The CHI is an interprofessional team of nurses, doctors and other volunteers of healthcare professionals targeting the Karantina community.

> The team identified the need to manage chronic diseases in the affected areas including homebound elderlies; and established a preventive and chronic disease management unit at the epicenter of the blast. In addition, we are aiming at training local agents on community health care for which we are soliciting funding, thus empowering and providing jobs to local agents who will be most suited to care for their community.

Additionally, the team responded to the influx of COVID-19 patients to the emergency rooms in hospitals by adopting a decentralized approach and establishing COVID-19 response task teams in coordination with municipalities in rural areas formed of nurses and doctors from the same communities. We developed guidebooks that we used in conducting training workshops to the municipalities' COVID task teams, thus empowering the marginalized medical doctors, nurses and social workers in their own villages.

2020, Coordinated the 4-month AUB-Annahar COVID-19 studio, a live show program aired 2 times per week, each time hosting an expert in a specific topic to create public awareness about COVID. The program was a part of a plan created by the AUBMC Medical Committee in response to the pandemic. Examples of topics covered are Socio-economic impact of COVID-19; Preparing hospitals for handling COVID-19; Communities against Corona-collaborative: Effort with municipalities; non-COVID patients are not left behind; Household recommended disinfectants for COVID-19; Empowering and enabling healthcare providers to face the Corona pandemic; Mental health and COVID-19; and COVID-19 policies at national and institutional levels. The Epidemiologic overview was addressed in every episode.

2009-2011, *Member of the "Think Positive' organization that addresses issues related to People Living with HIV [PLHIV]*

1990-1999, *as advisor to the Nursing Student Society, I lead several student activities including health screening and awareness to various groups of populations*

March 1998, *Offered a whole-day activity/sessions on AIDS Prevention for the Middle and High Schoolers at Adma International School - Lebanon*

Dec. 1, 1992*, organized a whole-day awareness campaign on AIDS Prevention for AUB students*

Mar. - June 1985*, Participated in training elementary school teachers on Health Education in addition to field application in elementary schools of Tareek Al Jedideh*

- Beirut. The program was sponsored by the Health Education Unit of the Ministry of Education

CURRICULUM VITAE

EDUCATIONAL BACKGROUND

June-December 2013
Coursework in Epidemiology and Biostatistics at the Chan School of public Health, Harvard University, USA

April 2001
PhD in Nursing at the University of Michigan, Ann Arbor, USA. Dissertation titled: Self-Cognitions as Motivational Predictors of Healthy Eating.

June 1994
Masters in Nursing, cardiopulmonary specialty, at the University of California, Los Angeles (UCLA), USA.

1991-1992
One year graduate study in physiology, Faculty of Medicine, AUB, Beirut, Lebanon.

October 1983
Bachelor of Science in Nursing at the American University of Beirut (AUB), Beirut, Lebanon, "with distinction".

WORK EXPERIENCE

September 1, 2019
Honorary Professor, University of Dundee, UK

September 1, 2019-present
Associate Dean for Academic Affairs

September 1, 2018-present
Convener, Graduate Division, Hariri School of Nursing
Tenured Professor, Hariri School of Nursing

September 1, 2014-August 31, 2018
Professor, Hariri School of Nursing, AUB

September 1, 2013 – August 31, 2016
Adjunct Professor, Faculty of Health, University of Technology at Sydney, Australia

February 2012 – August 31, 2018

Assistant Director for Academic Affairs, Hariri School of Nursing, AUB

October 2007 – September 2011

MSN Program Coordinator, School of Nursing, AUB

October 2007 – August 31, 2014

Associate Professor, School of Nursing, AUB

July 2006 – Present

Adjunct faculty, Johns Hopkins University, School of Nursing, Maryland, USA.

October 2003 – September. 2007

BSN program coordinator, School of Nursing, AUB.

January 2001 – September 2007

Assistant Professor, School of Nursing, American University of Beirut (AUB).

January 1997 – December 2000

Research assistant at the University of Michigan, School of Nursing

July 1994 – August 1996

Assistant professor on annual contract, American University of Beirut, School of Nursing.

Courses taught: Critical Care Nursing, Medical Surgical Nursing, Fundamentals of Nursing Practice, Leadership and Management in Nursing (all theory and clinical undergraduate courses).

September 1993 – June 1994

Clinical nurse specialist internships at the UCLA medical center

1. Coronary Care Unit, UCLA; 10 weeks.
2. Medical Intensive Care Unit, UCLA; 10 weeks.
3. Nursing Research and Education Center, UCLA; 10 weeks.

February 1993 – March 1994

Research Assistant in the family CPR project, UCLA School of Nursing

September 1993 – November 1993

Teaching assistant at the School of Nursing, UCLA. Taught Fundamentals of Nursing to junior BS nursing students.

July 1988 – September 1992

Instructor, American University of Beirut (AUB), School of Nursing

Courses taught: Fundamentals of Nursing Practice, Medical Surgical Nursing, and Leadership and Management in Nursing (undergraduate courses: Theory and Practicum).

October 1987 – June 1988

practice of Papanicolaou smear among Lebanese Armenian women following an educational program. Presented at the first international nursing conference in Lebanon, AUB, Beirut, Lebanon.

3. Poster presentations

- **December 2021**
- Bayrakdar, A., **Noureddine, S.** A culturally Sensitive Framework for Emerging Adults with Type 1 Diabetes. Presented as an eposter presentation at the International Diabetes Federation Virtual Congress 2021
- **June 29, 2019**
  Noureddine, S. (presenter), Avedissian, T., Irani, J., Khatib, N. Nurses and Cardiopulmonary Resuscitation in the Community. Poster presentation at the ICN Congress 2019, Singapore; 29 June.
- **April 15, 2016**
  Noureddine, S. (Presenter), Avedissian, T., El Sayed, M. (2016). *Assessment of Cardiopulmonary Resuscitation Practices in Emergency Departments in Lebanon.* Poster presentation at EuroHeartCare Annual Congress of the Council on Cardiovascular nursing and Allied Professionals, Athens, Greece.
- **April 5, 2014**
  Noureddine, S. (Presenter), Dakik, H., Massouh, A. *Smoking behavior after hospitalization for a coronary event.* Moderated poster presentation at the EuroHeartCare Annual Congress of the Council on Cardiovascular Nursing and Allied Professions, Stavanger, Norway
- **October 16, 2013**
  Noureddine, S. **(Presenter).** *Testing the Arabic Illness Perception Questionnaire for Heart Disease in a Lebanese Sample*. Presented at the *10th International Congress on Coronary Artery Disease*, Florence, Italy.
- **October 10, 2012**
  Saab, S., **Noureddine, S.**, Yazbik Dumit, N. *Early Hospital Readmission Rates Following Coronary Artery Bypass Graft Surgery and Related Factors.* Presented at the 2012 ANCC Magnet conference, Los Angeles, California, USA.
- **April 2, 2011.**
  Noureddine, S. (Presenter) , Dumit, N. *Decision Process to Seek Heath Care in Myocardial Infarction Patients in Lebanon.* Poster presented at the 11th spring annual meeting of the Cardiovascular Council of Nursing and Allied Professionals of the European Society of Cardiology in Brussels, Belgium.
- **May 23, 2009**
  Noureddine, S. (Presenter), Froelicher, ES. *What are the beliefs of Lebanese adults about cardiac illness?* Poster presented at the Research Day organized by the Nurses' Chapter of the Alumni Association, American University of Beirut.
- **May 5, 2006**
  Noureddine, S. (Presenter) *Gender differences in the responses to symptoms of acute coronary syndromes in a Lebanese sample*. The 6th annual spring meeting of the Working Group on Cardiovascular Nursing of the European Society of Cardiology: New Frontiers in Cardiac Care. Bergen, Norway.

- **November 2 – 6, 2005**
  Major S., Khogali M., **Noureddine S**., Arayssi T., Nabulsi M., Yunis K., Al-Amin H., Sibai A., Khalil I., Nassar H., Farha A. *The evolution of evidence-based health care (EBHC) at the American University of Beirut Medical Center (AUBMC* . The 3rd international conference of evidence based health care teachers and developers; 'Building bridges between research and teaching', Italy.
- **November 2 – 6, 2005**
  Nassar H., Farha A., Major S., Khogali M., **Noureddine S**., Arayssi T., Nabulsi M., Yunis K., Al-Amin H., Sibai A., Khalil I. *Role of medical librarians in promoting evidence based health care (EBHC) at the American University of Beirut (AUB)*. The 3rd international conference of evidence based health care teachers and developers; 'Building bridges between research and teaching', Italy.
- **April 11, 1999**
  Noureddine, S. **(Presenter)** & Metzger, B. L. *The effect of dietary manipulation on body weight, metabolic efficiency and body composition in Zucker rats*. Poster presented at the Annual Conference of the Midwest Nursing Research Society, Indianapolis.
- **June 2, 1994**
  Faber, L., & **Noureddine, S**. **(Presenter)** *Quality of life of renal transplant recipients.* Presented at the School of Nursing, UCLA.
- **November 24, 1992**
  Noureddine, S. (Presenter)*Coping with chronic illness: The American Indians and diabetes mellitus*. Poster presented at the School of Nursing, UCLA.

4. Research Grants

a) Research grants funded and completed

- Cardiopulmonary Resuscitation in the Community: A survey of nurses. This national survey explored the knowledge, attitude and practices related to out-of-hospital resuscitation in a national sample of 692 nurses. The survey was completed in 2018. Role: PI. I wrote the proposal, coordinated the mailed survey and analyzed the data, Partial funding by the Order of Nurses in Lebanon was granted for $5,000.00

- D-43 Fogarty research training grant in non-communicable diseases. I am a member of the multidisciplinary team and serve as mentor. Grant for 4 years by NIH for the amount of $863,000. A certificate program and a Masters program in clinical research were launched through this grant in 2012. Role: I participated in writing the grant proposal and currently serve as a faculty mentor offering seminars and supervising students' projects.

- Postdoctoral fellowship award by the Cardiovascular Nursing Councils of the European Society of Cardiology and the American Heart Association, May 12, 2008 for research at the University of California San Francisco. Grant amount $14,000. The grant requirement was to do research activities with a mentor. I developed a proposal for a study that I conducted in Lebanon in 2009 and wrote manuscripts.

- Delay in seeking health care among persons experiencing acute coronary syndromes. Project was supported by 2 grants from the American University of Beirut: Medical Practice Plan grant # 116010034007. Amount is $8,500.00 and University Research Board grant # 110610088602. Amount is $5,000.00 on February 2004. My role was primary investigator (PI), overseeing the whole study from proposal preparation, data collection and analysis, to manuscript writing and revisions.

d) Grants under Review

- Community knowledge and levels of air pollution. Submitted to the Lebanese National Council of Scientific Research. Role: Co-PI. Status: Pending funding decision

e) Grants submitted not funded

- 2020: Lebanese Nurses' Health Study**.** Grant submitted to Sigma Theta Tau International. Role: PI. Other investigators: Nuhad Dumit, Myrna Doumit, and Hiba Chakhtoura

- 2018: Out of Hospital Cardiac Arrest Outcomes in Lebanon. PI. Mazen El Sayed. Role co-PI. Submitted to Laerdal Foundation. Not funded

- Collaborative Stimulus Research grant proposal submitted October 2017 titled: Health Promotion using Social Media In Lebanon (HeLP SMILe) Samar Noureddine (lead PI); Lara Nasreddine, Marco Bardus and Hussain Isma'eel. Not funded

- Collaborative Stimulus Research grant proposal submitted October 2016 titled: Multifactor Intervention to Reduce Cardiovascular Risk in people with Metabolic Syndrome. Samar Noureddine (lead PI); Lara Nasreddine, Marco Bardus and Hussain Isma'eel. Not funded.

- Council for Scientific Research-Lebanon proposal submitted September 2012 titled: Smoking behavior after hospitalization for a coronary event. Samar Noureddine (PI); Habib Dakik; Angela Massouh. Not funded

- Medical Practice Plan proposal submitted September 2011 and January 2012 titled: Smoking behavior after hospitalization for a coronary event. Samar Noureddine (PI); Habib Dakik; Angela Massouh. Not funded

- International Cooperation grant FPA7 FP7-REGPOT-2009-2. INTERNATIONAL COLLABORATIVE INITIATIVE TO COMBAT CHILDHOOD OBESITY (ICICCO). PROPOSAL SUBMITTED FEBRUARY 2009. INVESTIGATORS: HAFEZ EL ZEIN (PI); SAMAR NOUREDDINE (CO-PI); Wolfgang Ahrens; Iris Pigeot; Luis Moreno; Gerardo Rodriguez ; German Vicente-Rodriguez Rodriguez; Rekia Belahsen; Nezha Mouane; Mohamad EL Ayachi;Jose Calbet; Joaquin Sanchis Moysi. Not funded.

- Joint grant by Sigma Theta Tau International and the American Nurses Foundation proposal submitted May 2009 titled: Decision making Processes and their Correlates in Patients Experiencing Acute Myocardial Infarction. Samar Noureddine (PI); Nuhad Dumit. Not funded

- Council for Scientific Research-Lebanon proposal submitted September 2008 titled: Decision making Processes and their Correlates in Patients Experiencing Acute Myocardial Infarction. Samar Noureddine (PI); Nuhad Dumit. Not funded

5. Research in Progress

- Emerging Adulthood in Individuals with Type 1 Diabetes in Lebanon: A Mixed Method Study. Submitted to the University Research Board. Role: PI. Status: Funded by the University Research Board at AUB. Award # 104113; project # 26345 ; Amount $ 10,352

- The Lebanese Nurses' Health Study. PI: Dr. Nuhad Dumit. Assigned custodian Dr. Nour Alayan. Submitted to the University Research Board. Role: Co-PI. Status: Funded by the University Research Board. Award number 104113. Project # 26344 Amount: **$ 5,600**

- Appraisal, Burnout, and Coping in Dyads Living with Chronic Illness: The ABCs of Informal Caregiving. Grant received from the Doha International Family Institute and the Qatar National Research Fund DIFI-QNRF-OSRA funded in 2020. Role: Co-PI. Status: Funded $45,000 and IRB approved.

- A survey of the knowledge and attitudes of physicians concerning air pollution. Role: Primary investigator (PI). Status: Data analysis. Funding: Vascular Medicine Program.

- Symptom Measurement in Patients with Arrhythmias. Role: Team member. Manuscript in preparation.

TEACHING

1. Courses taught

- ***Graduate (taught since the academic year 2003-2004):***
  - NURS 602: Quantitative Research Designs, every Fall starting 2018.
  - NURS 506: Advanced Practice in Adult Gerontology III, Summer and Fall semesters since 2018
  - IPEC300: Interprofessional Education and Collaboration, Spring 2017.
  - NURS505B: Advanced Practice in Adult Gerontology II, every Spring starting 2017.
  - NURS 505A: Advanced Practice in Adult Gerontology I, every Fall starting 2016.
  - NURS 511E: How to Ask the Right Questions in Research: Conducting Surveys.

Summer 2010.
- NURS 506: Advanced Practice in Adult Care II (Clinical residency for graduate students). Summer and Fall semesters till 2017.
- NURS 503: Advanced Health Assessment (with theory and clinical components). Every fall semester then every spring starting 2017; also taught summer of 2004.
- NURS 504: Advanced Pathophysiology (theory course). Every fall semester.
- NURS 502: Advanced Nursing Research (theory course). Every spring semester 2004 till 2011.
- NURS 505: Advanced Practice in Adult Care I (theory and clinical components). Every spring semester till 2016.
- NURS 528: Certification practicum (a clinical course for students planning to get specialty certification from the US). Summer and fall semesters 2009 till 2013.

➢ ***Undergraduate courses (taught until academic year 2003-2004):***
- NURS 311: Nursing Care of Adults-Theory and Practicum, course for RN-BSN students; summer 2002.
- NURS 406: Nursing Research (theory course). Every fall semester.
- NURS 409: Leadership and Management in Nursing-Theory. Every spring semester.
- NURS 410: Leadership and Management in Nursing –Practicum. Every spring semester.
- NURS 400: Critical Care Nursing-Theory. Every Fall semester till 2003-2004.
- NURS 401: Critical Care Nursing-Practicum. Every Fall semester 2003-2004.
- NURS 201: Introduction to Nursing Practice-Theory. Every summer till 2003.
- NURS 202: Introduction to Nursing Practice-Practicum. Every summer till 2003.
- NURS 407: Community Health Nursing -Theory (guest lecturer). Fall semester 2002.
- NURS 303: Nursing Care of Adults II-Practicum. Spring semester till 2002.

2. Doctoral Dissertation Supervised

- Advisor of the PhD dissertation of Tamar Avedissian: The influence of parental perceptions of child vulnerability and overprotectiveness on growth and development of children with congenital heart disease
- Advisor of the PhD dissertation of Melissa Makhoul: The role of pain catastrophizing and pain resilience in patients with chronic musculoskeletal pain
- Advisor of the PhD dissertation of Amani Bayrakdar: Type 1 Diabetes in Emerging Adults in Lebanon: A Mixed Methods Study
- Dissertation Committee chair of Rima Saad: Primary Caregivers' Knowledge, Attitudes and Beliefs toward Palliative Care for Children with Cancer
- Co-Director of the PhD thesis of Hassan Maatouk; Lebanese University: The Effect of Public Access Defibrillation Programs on Survival of Out-of-Hospital Cardiac Arrest Victims
- Doctoral thesis committee member for Aline Akiki, University of Dundee, United Kingdom: self-management in COPD patient

- Consultant on the dissertation of Mariam Zahweh at the Lebanese University on a study titled 'Validation of the Arabic version of the Minnesota of Living with Heart Failure Questionnaire'. Defended successfully December 2, 2019.
- Dissertation Committee Member, University of Technology at Sydney, for Hiba Deek. Dissertation title: Family focused Approach to improve Heart Failure care In Lebanon Quality (FAMILY) Intervention. Successfully completed January 28, 2016.

3. Master's Theses Supervised

1. Member, thesis Committee: Investigating Predictors and Health Outcomes of Polypharmacy among Older Adults with Type 2 Diabetes Mellitus at a Primary Care Center in Lebanon by Ahmed-Rufai Yahaya.

2. Member, thesis Committee: The Feasibility of Implementing a Tailored Delirium Prevention Bundle for Intensive Care Unit (ICU) from Registered Nurses perspective by Hratch Moskofian

3. Chair, thesis Committee: Outcomes of pregnant women with COVID-19 by Nour Kassem

4. Chair, thesis committee, HSON, Attitudes and beliefs related to early mobility of patients in the ICU: A survey of nurses and physicians by Noura Jannoun. Defended August 24, 2021.

5. Chair, thesis committee, HSON, Thirst, salt intake and associated factors in patients with heart failure by Kamar Younes.

6. Chair, thesis committee: Comparing Patient Outcomes of Transcatheter Aortic Valve Implantation versus Surgical Aortic Valve Replacement by Dounia Iskandarani. Defended successfully January 22, 2021

7. Chair, thesis Committee, HSON, Knowledge and Self-Management of Patients with Chronic Kidney Disease for Yvonne Jleilaty; successfully defended January 27, 2020.

8. Member, thesis Committee, HSON, A Tailored Delirium Prevention Bundle for Intensive Care Unit (ICU)

9. Member, thesis committee, Hariri School of Nursing for Ammar Zahreddine. Thesis title: Health-Related Quality of Life in Adult Patients Following Hematopoietic Stem Cell Transplant. Defended successfully June 22, 2020.

10. External examiner on 2 Masters thesis committees at Sultan Qaboos university that were successfully defended on April 22, 2019

    a. Predictors of Patient Safety Culture and Frequency of Event Reporting among Critical Care Nurses in Selected Hospitals in Oman by Qasim Sultan Ali AL-Mamari

    b. Diabetes Self-Management among Adult Omanis with Type 1 Diabetes Mellitus By Rajaa Al-Hadhrami

11. Member of the thesis Committee of Nay Ezzeddine on Validation of the Heart Failure Index 9-Item European Heart Failure Scale Arabic Version (EHFScB Scale). Successfully defended April 25, 2019

12. Member, thesis committee, Universite St Joseph Faculty of Nursing. Student Eliane El Haj; Thesis title: Facteurs predictifs de la depression chest le maladies coronariens; successfully defended March 22, 2018.

13. Member, thesis Committee, Hariri School of Nursing for Grace Hakim. Thesis title: The effect of sex on the outcomes of traumatic brain injury; successfully defended February 5, 2018.

14. Chair, thesis committee, Hariri School of Nursing for Mohamad Saab. Thesis title: Surviving testicular cancer: the Lebanese experience. Successfully defended May 13, 2013.Member, thesis committee for Madeleine El Hajj, Hariri School of Nursing. Thesis title: 'Patients' Experiences

and Satisfaction with Postoperative Pain Management at AUBMC'. Thesis successfully defended June 8, 2012.

15. Member, thesis Committee, Faculty of Health Sciences for Abeer Dakik; thesis title: Differentials in Myocardial Infarction Management and Related Outcomes at a University Hospital in Lebanon. Thesis defended successfully June 10, 2010.

16. Member, thesis Committee, School of Nursing for Rima Saad; thesis title: Evaluation of the quality of pediatric palliative care at the Children Cancer Center in Lebanon. Thesis successfully defended February 25, 2009.

17. Chair, thesis committee, school of nursing for Sara Abboud; thesis title: Quality of life in AIDS patients in Lebanon. Thesis successfully defended October 30, 2007.
18. Chair, thesis committee, school of nursing for Suha Ballout; thesis title: the Arabic Brief Pain Inventory: psychometric testing and cultural validation. Thesis successfully defended October 24, 2007.
19. Chair, thesis committee, school of nursing for Amani Bayrakdar; thesis title: Quality of life in type 1 diabetic patients receiving insulin pump therapy. Thesis defended successfully on March 28, 2007.
20. Chair, thesis committee, school of nursing for Nina El Khatib; thesis title: Self care in a sample of Lebanese heart failure patients. Successfully defended October 29, 2007.
21. Chair, thesis committee, school of nursing, for Dareen Al Hajj Sleiman; thesis title: Comparison of code management at a tertiary center in Beirut to the American Heart Association Guidelines. Thesis successfully defended January 23, 2008.
22. Member, thesis committee, school of nursing, for Reda Gharzeddine; thesis title: Prevalence of Cardiovascular risk factors and their relation to PTSD symptoms among civilian population exposed to Israeli occupation in South Lebanon. Thesis successfully defended February 23, 2007.
23. Member, Thesis Committee for Mohammad Al Shami, Masters in Educational Psychology, thesis title: Professional self-esteem of university degree nurses in Lebanon. Thesis successfully defended June 10, 2005.

24. **Graduate Projects supervised**

- Fall 2021: First reader on
    - A Lung Transplant Clinical Pathway Proposal for the American University of Beirut Medical Center (AUBMC) Transplant Program by Sarine Rita Malkdjian. Defended successfully September 6, 2021
- Fall 2019: First reader on
    - Delay in seeking care for stroke by Ahmad Termos. Defended successfully June 17, 2020.
- Fall 2018: Second reader on
    - Exploring health literacy in patients with non-communicable disease in South Lebanon by Hanadi Saad; successfully defended January 25, 2019
- Spring 2018: First reader on:

  - Educational Program for Hospital Nurses on Diabetes Mellitus for Hind Abdel Massih, successfully defended on May 2, 2018.

- Spring 2017: First reader on
  - Prevalence of depression and Anxiety in ESRD patients undergoing hemodialysis at AUBMC by Victoria Semaan. Successfully defended April 28, 2017.
- Summer 2016: First reader on
  - Protocol for prevention of falls among older adults in community settings by Siham Sleiman, successfully defended June 1, 2016
  - 'Survey of Paramedic Personnel on Attitudes and Practices Related to Resuscitation of Out of Hospital Cardiac Arrest Victims in Lebanon', by Mohamad Hussein Haidar successfully defended September 6, 2016.
- Spring 2016: First reader on
  - 'Improving Nutritional Status in Head and Neck patients: A clinical guideline', by Joyce Abi Kharma, successfully defended May 25, 2016.
  - 'An Evidence Based Protocol for Skin Management For Breast Cancer Patients Receiving Radiation Therapy' by Aida Zaiter, successfully defended April 11, 2016
- Spring 2016: Second reader on
  - 'Subarachnoid Hemorrhage: Development Of An Evidence Based Clinical Pathway' by Abdel Wahab Al Firkh, successfully defended April 11, 2016.
- Fall 2015: First reader on
  - 'Knowledge of Diabetes Mellitus, a Survey of Registered Nurses' by Bachir Itani, successfully defended December 16, 2015.
  - 'Educational Program for Family Caregivers of Stroke Survivors' by Ingrid Corbani, defended successfully December 16, 2015.
- Spring 2015: First reader on
  - 'Health Education Program for Prevention of Coronary Artery Disease in primary health care centers in Saudi Arabia by Zainab Al Far; defended successfully April 28, 2015.
  - 'Educational Program for Liver Transplant Patients' by Diana Wehbeh; defended successfully April 30, 2015.
  - Fall 2014: First reader on
  - 'Optimizing the Management of Patients Admitted with Acute Heart Failure' by Samer El Chami. Defended successfully February 4, 2015.
  - 'The Prognostic Value of New Left Bundle Branch Block in Patients with Acute Myocardial Infarction: A Systematic Review and Meta-analysis' by Belal Al Rajoub. Defended successfully January 16, 2015.
  - 'Cardiac Rehabilitation at AUBMC: Clinical Protocols and the Role of the Advanced Practice Nurse' by Mohamad Issa. Successfully defended December 15, 2014.

- Fall 2014: Second reader on
    - Richmond Agitation and Sedation Scale (RASS): an Educational Package for Critical Care Nurses by Rayan Al Dabbah. Successfully defended December 15, 2014.
- Summer 2014: First reader on
    - Peripartum Cardiomyopathy: A Proposed Clinical Pathway by Manal Hamzeh on September 17, 2014.
    - Development of an Early Mobility Protocol in Critically Ill Patients by Amali Saab. Successfully defended September 17, 2014.
- Summer 2014: Second reader on
    - Clinical Guidelines for a Headache clinic by Solange Chweifaty. Defended successfully on September 17, 2014.
- Spring 2014: First reader on:
    - Assessment and management of oral mucositis: A hospital protocol by Ghina Al Arab. Project successfully defended May 7, 2014.
    - A multidisciplinary outreach program for older adults in Lebanon: Proposal and recommendations by Serpouhi Toriguian. Project successfully defended May 7, 2014.
- Spring 2014: Second reader on
    - Establishing an ischemic stroke management program at AUBMC emergency department: A proposal by Ahraf Emara. Project successfully defended May 7, 2014.
    - Survey of Registered Nurses 'and nurses in management positions' perceptions of the safety culture at AUBMC by Aimee Khaled. Defended successfully on April 23, 2014.
- Fall 2013: Second reader on
    - Testing the validity and reliability of the revised outpatient satisfaction questionnaire at AUBMC by Mohamad Azzam. Project successfully defended January 10, 2014.
- Summer 2013: First reader on:
    - Educational campaign about heart disease for women by Nour Abi Zahr Successfully defended September 30, 2013.
    - Staff educational program in oncology nursing by Dana Kassem successfully defended September 30, 2013.
    - Diabetes Conversation Maps: An Evaluation Study by Elise Ghostine successfully defended September 30, 2013.
- Spring 2012-2013: Second reader on:
    - Clinical Nurses' Perceptions of Shared governance at the National Center for Cancer Care and Research, Qatar by Layal Diba; successfully defended May 17, 2013.

  - Stress Management Program for Health Care Providers in Healthcare Settings by Myrna Saadeh; successfully defended May 17, 2013.
- Spring 2012-2013: First reader on:
  - Patients' knowledge, attitudes and beliefs regarding heart disease by Hassan Maatouk; successfully defended May 17, 2013.
  - Educational program for renal transplant recipients by Rachele Bejjani; successfully defended May 17, 2013.
  - Clinical pathway for atrial fibrillation patients by Madice Merheb; successfully defended May 14, 2013.
- Fall 2012-13: First Reader on:
  - Readmission rates of Chronic Respiratory Patients by Ali Shaddad. Project successfully defended January 25, 2013.
- Summer 2012: Second reader on:
  - Quality care monitoring and improvement: a comparison of generic versus specific patient satisfaction tools by Alik Sarian; successfully defended October 29, 2012.
- Spring 2011-2012: First Reader on:
  - Readmission rates in Heart Failure Patients: A study in Lebanon by Hiba Deek. Successfully defended June 8, 2012
  - Developing an Emergency Nursing Triage Educational Program by Naseem Ali. Project successfully defended May 24, 2012
  - Discharge planning program at the Respiratory Care Unit by Sabat Jamous. Project successfully defended June 8, 2012
- Spring 2011-2012: Second Reader on:
  - Knowledge, attitude and practice of nurses related to pain by Maya Abdul Rahman. Project successfully defended June 6, 2012
  - Developing a post basic critical care certificate by Ema Janahi. Project successfully defended May 24, 2012.
- Fall 2011-2012. Second reader on:
  - Evaluation of Traumatic Brain Injury Management in the Emergency Department at AUBMC in Lebanon by Maha Habre. Project successfully defended February 15, 2012.
  - Testing Validity and Reliability of a Patient Satisfaction Questionnaire by Maha Al-Hassan. Project successfully defended November 4, 2011.
- Summer 2011. First reader on:
  - Educational Package on Hemodynamic Monitoring for critical care nurses, by Nisrine Kumbarji. Project successfully defended on October 5, 2011.
- Summer 2011: Second reader on:
- Spring 2010-2011. First reader on:

  - Early Hospital Readmission Rates Following Coronary Artery Bypass Graft Surgery by Soulandia Saab. Project successfully defended June 1, 2011.
  - Protocol for the Management of Asthma in the Emergency Department by Noyemi Kasbarian. Project successfully defended June 1, 2011.
- Spring 2010-2011. Second reader on:
  - Comparative Evaluation of Non-Mercury Thermometers and Nursing Staff Preferences, by Ali Naffah. Project successfully defended June 1, 2011.
  - Integrated Dialysis Care in End Stage Renal Disease: Peritoneal Dialysis as Initial Modality, by Fatemah Al Omer. Project successfully defended June 8, 2011.
- Fall 2010-2011. First reader on:
  - Educational package for Chronic Pulmonary Disease Patients, by Aline Akiki. Project successfully defended February 28, 2011.
- Fall 2010-2011. Second reader on:
  - Nurse-led cardiac clinic for AUB employees: proposal and cost analysis by Rachel Hamdan, successfully defended February 28, 2011
- Summer 2010. Second reader on the following projects:
  - Assessing the need for the creation of a fast track unit at AUBMC Emergency Department, by Lamia Eid. Successfully defended August 16, 2010.
  - A systematic approach to discharge planning: Development of a new assessment tool, by Taline Gulgulian. Successfully defended October 22, 2010.
  - Implementing ventilator bundles to reduce ventilator associated pneumonia in intensive care unit, by Iman Abiad. Defended successfully October 22, 2010.
- Spring semester 2009-2010, first reader on the following projects:
  - Differences in Clinical Presentation and Responses to Acute Coronary Syndrome between Diabetic and Non Diabetic Lebanese Patients, by Bana Zein; defended successfully June 9, 2010.
  - Clinical management guidelines for a stroke unit at AUBMC, by Hisham Bawadi; successfully defended June 9, 2010.
  - Critical Pathway for Acute Respiratory Distress Syndrome: Development and Implementation Proposal by Lara Afesh; defended successfully June 7, 2010.
- Spring semester 2009-2010, second reader on the following projects:
  - Need Assessment For The Role Of Psychiatric APN in Adult Critical Care Areas at AUBMC as Perceived by Nurses and Physicians by Hanadi Masalkhi; Project defended successfully June 7, 2010.
  - Nurses' perspectives of their work environments and patients' outcomes, by Rachelle Nassar, successfully defended April 1, 2010.
- Spring semester 2008-2009, first reader on the following projects:
  - Diabetes Management: Educational Material for Nurses, by Samar Nassif. Project successfully defended May 28, 2009

  - Nursing care of patients on mechanical ventilation: A self-learning module, by Imtithal Kiserwan. Project successfully defended May 28, 2009
  - Outcomes of patients presenting to the emergency department with chest pain, by Farah Salha. Project successfully defended May 28, 2009
- Spring semester 2008-2009, second reader on the following projects:
  - Development of educational material for oncology nurses, by Zeina Kassem. Project successfully defended May 28, 2009
  - Guidelines and recommendations for the development of a palliative care program in Lebanon by Janane Hanna. Project successfully defended May 28, 2009
- Fall 2008-2009, first reader on 2 projects:
  - Development of an educational module for women with breast cancer; project by Rebecca El Asmar successfully defended February 25, 2009.
  - Development of an educational module for nurses on management of patients on intracranial pressure monitoring; by Bader Al Wadaany. Defended October 30, 2008.
- Spring 2007-2008, first reader on the following project
  - Heart failure clinic in Lebanon: proposal and recommendations by Angela Massouh, defended successfully May 22, 2008.
- Spring 2007-2008, second reader on the following project:
  - Creation of a heart failure clinic in Lebanon by Wahid Kaissi, defended successfully May 29, 2008.
- Fall semester 2007-2008, first reader on the following project;
  - Ventilator weaning protocol. Student: Rafika Zaatari. Project successfully defended February 2, 2007.
- Spring semester 2006-2007, first reader on the following students' projects:
  - Elderly fall assessment and prevention protocol proposal in a hospital setting. Student Grace Khatcherian. Project successfully defended June 5, 2007.
  - Diabetes mellitus: Control, complications and related predictors. Student: Fatimah Al-Sayah. Project successfully defended April 27, 2007.
  - Chronic Wounds Center: review and recommendations. Student: Thana Mikdashi. Project successfully defended April 27, 2007.

5. Undergraduate projects supervised

- In the spring semesters of 2002, 2003 and 2004, I supervised clinical group projects of undergraduate students as part of the leadership and management in nursing course.

6. Other teaching activities

1. Advising 17-20 students per semester for their curriculum plans.

2. Give a guest lecture on *Advanced Practice Competencies Globally and in Lebanon* as part of the graduate course (NURS 501) every fall semester since 2010.
3. Gave a research seminar as part of the Masters in the SHARP Master of Sciences in Health Research, Faculty of Medicine, AUB on *Seeking Emergency Care for Acute Coronary Syndrome: The case of Lebanon*, November 20, 2014.
4. Invited and gave guest lectures on *theoretical frameworks in nursing research* and *mixed methods research* to MSN students Fall 2014.
5. Invited to give guest lectures in the undergraduate and graduate research courses on *quantitative designs and sampling designs*, 2011-2012 and 2012-2013.
6. Gave a workshop on writing papers for graduate students October 2008.
7. Gave part of a graduate workshop on writing research proposals in the summer of 2005.
8. Gave a number of continuing education sessions and seminars for nurses (listed under professional practice activities).

SERVICE

1. Professional practice

- **April 23, 2019**
  Presented on 'Designing and Conducting Mixed Methods Research' for faculty members at Sultan Qaboos University College of Nursing, Muscat, Oman.
- **June 30, 2018**
  Moderated a session titled 'Surgical Patient Management and Care' at the 21st congress of the Lebanese Society of General Surgery, Order of Physicians, Beirut, Lebanon.
- **June 18, 2018**
  Reviewed abstracts for the ICN Regional Conference on Nurses: A Voice to Lead – Ensuring access to healthcare through leadership, innovation and collaborative practice, that was held in Abu Dhabi, UAE, 25-27 September 2018.
- **May 10, 2018**
  Moderated a session titled 'Nursing Care in NCDs' at the 2nd international conference of the Order of Nurses in Lebanon in Habtoor Hotel, Lebanon
- **May 11, 2018**
  Moderated a session titled 'Nursing care in NCDs' at the 2nd international conference of the Order of Nurses in Lebanon in Habtoor Hotel. Lebanon
- **March 28, 2018**
  Presented on the cultural adaptation of research instruments to the faculty members of the Hariri School of Nursing.
- **July 27, 2017**
  Moderated a session titled 'Better Communication leads to Better Education' at the Congress titled 'Back to Lebanon: The International Medical Forum', organized by the St. Pantaleon Group at the Regency Hotel, Adma, Lebanon.
- **March 16, 2017**
  Workshop on Writing for Publication: Why and How. Presented to faculty members at

Tanta University, Egypt.

- **March 9, 2017**
  Presentation on 'Programs of Research at HSON' for the Nursing Advancement Program in Clinical Research at the American University of Beirut Medical Center.
- **November 19, 2016**
  Invited to moderate a session titled 'Amélioration de la qualité des soins' at the second international nursing conference at the Faculty of Nursing Science of St. Joseph University, Beirut, Lebanon.
- **July 18, 2016**
  Invited to moderate a session on 'Regional Barriers and Specific Actions Needed to Address Research Priorities' at the Global Nursing and Midwifery Clinical Research Development Initiative Summit Meeting by Columbia University Global Center in Amman, Jordan
- **April 7, 2016**
  Invited to moderate a session on 'Integrating Scientific Knowledge into Clinical Practice' at the International Nursing Conference at Zarqa University, Jordan.
- **March 27-30, 2016**
  Gave a 3-day course on 'Renal Nursing' for the Training and Development Center of the Ministry of Health, at Sharjah, UAE
- **October 10, 2015**
  Invited to present on 'Interdisciplinary approaches to Rehabilitation' at the Al Rahme Hospital conference on rehabilitation, Tripoli, Lebanon.
- **April 19, 20, 2015**
  Offered a 2 day workshop on Evidence Based Practice at Al Rassoul Al A'zam Hospital to practicing nurses.
- **November 21, 2014**
  Gave a session on 'Writing for Publication' for faculty members from Palestine as part of a teaching excellence workshop for nurse educators at the Hariri School of Nursing, Beirut,
- **November 15, 2014**
  Participated in a multidisciplinary panel on diabetes mellitus: do we control it with a good diet and healthy life style? Organized by the Lebanese Society of Endocrinology, Diabetes and Lipids at the Metropolitan Hilton-Hilton Hotel, Beirut, Lebanon.
- **April 24, 2014**
  Moderated a Nursing Workshop: Evidence and Quality in Oncology Nursing Care as part of the Middle East Medical Assembly 2014 Updates: Focus on Hematological Malignancies, AUB, Beirut.
- **September 8, 2012**
  Invited to present on Accreditation of Academic Programs at the 2nd international conference of the Order of Physiotherapists in Lebanon titled 'Quality in Physiotherapy' in the congress center in Dbayeh, Beirut.
- **May 12, 2012**
  Invited to moderate a session on *Nutrition, Exercise and Nursing in Heart Failure* at the Middle East Heart Failure Congress, Le Bristol Hotel, Beirut.
- **May 13, 2011**
  Moderated a session on *Evidence Based Practice* at the conference titled 'Globalization

and nursing challenges and perspectives held by the Order of Nurses in Lebanon in Habtoor Hotel, Beirut May 12-14, 2011.

- **February 9, 2011.**
  Shock in the trauma patient. A session given for Iraqi nurses as part of a course on trauma care.
- **February 7, 2011**
  Assessment of the trauma patient. A session given for Iraqi nurses in a course on trauma care.
- **January 14, 2011**
  The Dos and Don'ts when submitting a proposal to the IRB. Presentation to faculty and students, Hariri School of Nursing, American University of Beirut
- **March 5, April 1, May 7, 2010**
  Understanding Statistics. Workshop presented to 25 nurse managers, advanced practice nurses and clinical educators from the Nursing Services Department, AUBMC.
- **September 2-4, 2009.**
  Professional training workshop in gerontological nursing. Workshop presented to 20 registered nurses in Larnaca, Cyprus.
- **January 14, 2009**
  Patient Education. Workshop presented to Iraqi health professionals in the Department of Family Medicine, American University of Beirut Medical Center.
- **March 17, 2008**
  The knots and bolts of a journal club in nursing. Grand round given at the Nursing Services Department, AUB Medical Center.

  Acted as president of the first nursing conference in Southern Mount Lebanon titled 'Nursing Care in the Emergency Room'.
- **March-May, 2007**
- Developed and pilot tested a survey for the National Nursing Development Program, Ministry of Public Health, on the profile, working conditions, continuing education needs and job satisfaction of nurses at government hospitals; did training for data collectors.
- **June 2006**
  Served on the Colloquium Examining Committee, Ministry of Higher Education.
- **May 12, 2006**
  Moderated a panel on *'safe staffing saves lives'* at the International Nurses Day meeting of the Order of Nurses in Lebanon, UNESCO Palace, Beirut, Lebanon.
- **May 26, 2005**
  Gave a session on reviewing *The Literature, Theoretical And Conceptual Frameworks*, as part of the workshop on research proposal writing offered by AUB school of Nursing to graduate students and researchers.
- **February 25, 2004**
  Critiquing research articles. Session given to registered nurses at AUBMC as part of the critical care journal club at the nursing services department, Beirut, Lebanon.
- **February 26, 2004**
  Shock: Types, management and nursing care. Continuing education session for graduate nurses at AUBMC as part of a critical care course, Beirut, Lebanon.

- **March 7, 2003**
  Critiquing research articles. Session given to registered nurses at AUBMC as part of a journal club launched by the nursing services department, Beirut, Lebanon.
- **December 17, 2002**
  Shock: Types, management and nursing care. Continuing education session for graduate nurses at AUBMC as part of a critical care course, Beirut, Lebanon.
- **November 28, 2002**
  A healthier body and mind. A grand round presentation to staff nurses at AUBMC, Lebanon.
- **August 30, 2002**
  Kais, N., **Noureddine, S**. & Haidar, L. *The Job Satisfaction Survey – 2001*. Grand Round presentation for nursing staff at AUBMC, Beirut, Lebanon.
- **August 16, 2002**
  The nursing perspective on evidence based nursing. Presentation for the faculty of the School of Nursing, AUB as part of a workshop on evidence based practice; Mzar Intercontinental Hotel, Faraya, Lebanon.
- **April 5, 2002**
  Meta-analysis: Quantifying research reviews. Continuing education presentation given for nursing graduates, AUBMC.
- **November 28, 2001**
  Health Behavior Modification. Presentation at the 'Nursing Grand Rounds' at AUB-Medical Center, Lebanon.
- **May 28, 2001**
  Writing for publication. Presentation to nursing faculty at the school of nursing, American University of Beirut, Lebanon.
- **April 9, 2001**
  Self- thoughts that motivate healthy eating in middle aged adults. Presentation to nursing faculty and staff at the American University of Beirut, Lebanon.
- **March 30, 2000**
  Ketefian, S. & **Noureddine, S.** *Meta-analysis: Statistical basis and the DSTAT software*. Presentation to doctoral students at the University of Michigan, School of Nursing, USA.
- **July 18, 1996**
  Research utilization in the hospital setting. Presentation to the nursing staff at the AUBMC on the occasion of the initiation of a hospital wide journal club.
- **May 30, 1996**
  Historical overview of research utilization in nursing. Presentation to nursing staff on the occasion of the International Nurses' Day, the AUB Alumni Auditorium, Lebanon.
- **August 12, 1995**
  Genetics and Nursing. A continuing education presentation for the faculty of the School of Nursing, AUB, Lebanon.
- **September 19, 1995**
  Medications: ways to reduce errors. A continuing education lecture to the nursing staff at Ain Wazain Hospital, Lebanon.
- **November 19, 1994**
  The Neuman Systems Model. A presentation to the faculty of the School of Nursing, AUB, Lebanon.

- **March 15, 1994**
  Disseminated intravascular coagulation. An in-service session to the nursing staff at the Coronary Care Unit, UCLA Medical Center, USA.
- **January 27, 1994**
  Rejection after heart transplantation. An in-service session to the nursing staff at the Coronary Care Unit, UCLA Medical Center, USA.
- **May 19, 1992**
  Physical assessment of the critically ill. An in-service session to staff nurse at AUBMC.

2. Service to the University

A. At the Hariri School of Nursing, AUB

1. Chair, Task Force on HSON Faculty Workload, 2020-present

9. June 18, 19, 2007
Served as member of the examining committee of applicants to the position of Nursing Director for the Rafic Hariri University Hospital by the Council of Civil Service.
10. July 1, 2005.
Moderated a session on acute nursing at the Centennial Nursing Conference '100 years of nursing education at AUB: Pioneering Achievements and Global Vision' at the School of Nursing, American University of Beirut, Beirut, Lebanon.
11. May 13, 2005.
Moderated a session on 'the use of medications in the elderly' at the XXXIX Middle East Medical Assembly, American University of Beirut, Beirut, Lebanon
12. May 22, 2004
Moderated the session on 'labor and delivery' in the Third World Congress of Perinatal Medicine in Developing Countries, Bristol Hotel, Beirut, Lebanon.
13. December 3, 2003
Moderated a seminar on 'The role of the nurse in fighting AIDS stigma', Saint Joseph University Auditorium, Beirut, Lebanon.
14. May 17, 2002
Noureddine, S. *Documentation in nursing: Legal and ethical responsibilities*.
Invited Presentation for nurses on the occasion of the international nurses' day, Makassed National College of Nursing, Beirut, Lebanon.
15. May 12, 2002

Noureddine, S. *The nurse and family health*. Presentation for nurses on the occasion of the International Nurses' day, UNESCO Palace, Beirut, Lebanon.

16. May 13, 2001
Moderated the session on 'collaboration between nursing services and nursing education', a symposium of the nurses' chapter of AUB alumni association, Lebanon.

17. June 1999 – March 2000
Served on the local planning Committee for the Midwest Nursing Research Society conference held in Dearborn, Michigan, March 31, 2000 to April 3, 2000, USA.

18. June 27, 1999
Assisted in the registration for the International Network for Doctoral Education in Nursing conference in London, UK.

4. Service to the Region

1. External referee for promotion files of 2 faculty members from Al Al Bayt University, Jordan, applying for promotion from associate to full professor, 2019 and 2020
2. External referee for a faculty member's application for promotion from associate to full professor for Philadelphia University, Amman, Jordan, 2018.
3. Member, scientific Committee, International Nursing Conference, Zarqa University, April 6-7, 2016.
4. Gave a course on Nephrology Nursing to registered nurses at the Ministry of Health Training and Development Center in Dubai, March 28-30, 2016.
5. Jabal Amel Women's Association feasibility project for planning a technical program in nursing in Kfarhatta, South Lebanon, May 2009 till now.
6. Workshop on Gerontologic nursing, Cyprus, September 2009.
7. UNFPA project on assessment of the linkages between sexual and reproductive health and HIV services, September 2009 till January 2010.
8. Assisted in the development of the Abu Dhabi proposal for a BSN program, May 2006.
9. Assistance in the establishment of AD and BS nursing curricula for the Al Mana' college of Health Sciences, and a site visit March 17 – 21, 2006 to help in the planning of the launching of the nursing program.
10. Assistance in the development of a proposal for an accelerated nursing program for the Education for Employment Cairo project, December 2005.
11. Assistance in the preparation of an MOU, Dubai Health Care City project, November 2004.
12. Gave a continuing education course on Emergency Nursing, with theoretical and clinical components to registered nurses in Bahrain, September 19-October 3, 1991.
13. Conducted a seminar on Emergency Nursing to registered nurses in Bahrain, July 12-19, 1990.
14. Gave two continuing education courses on 'Nursing Care of Clients with Gastrointestinal and Hepato-biliary disorders' to registered nurses in Abu Dhabi and Sharjah, the United Arab Emirates, November 28-December 26, 1988.

5. Service to the Profession

1. Abstract reviewer, ICN conference, 2019-present

2. Abstract reviewer, EuroHeart Care conference of the Association of Cardiovascular and Allied Professionals of the European Society of Cardiology, 2017-present
3. Reviewer, European Journal of Cancer Care, effective Spring 2018.
4. External referee for a faculty member's application for promotion from assistant to associate professor for Zarqa University, Jordan, Summer 2019.
5. Served as external examiner on the theses of 2 Masters students in adult care: Rajaa Al-Hadhrami and Qasim Sultan Ali AL-Mamari for the college of nursing at Sultan Qaboos University, Oman, who defended successfully April 21, 2019
6. External referee for an application for promotion from assistant to associate professor for the Faculty of nursing, Philadelphia University, Jordan, spring 2018
7. Reviewer of research proposal for the Faculty Advancement Program at AUBMC, spring 2017
8. External referee for an application for promotion from assistant to associate professor for the Faculty of Nursing, A'l Al Bayt University, Jordan, Fall 2017
9. Reviewer, BMC Health Services Research effective November 2016
10. Abstract reviewer, Pan Arab Critical Care conference, October 15 and 16, 2016
11. Abstract reviewer, University of St. Joseph International conference, November 11 and 12, 2016
12. Reviewer of excellence awards applicants to the Scientific Society of Arab Nursing Faculties, summer 2013.
13. Member, international editorial board, European Journal of Cardiovascular Nursing, effective February 2013.
14. Reviewer, Heart & Lung: The Journal of Acute and Critical Care, effective September 2012.
15. Reviewer, Pan African Medical Journal, effective March 2012.
16. Abstract reviewer, Spring annual meeting of the Cardiovascular council of Nurses and Allied Professionals, effective 2012.
17. Reviewer, Journal of Clinical Nursing, since August 2011.
18. Reviewer of research proposals for funding for Qaboos University School of Nursing.
19. Member, interest group in heart failure of the Lebanese Society of Cardiology, since April 2011.
20. Member, International Editorial Board of the Metas de Enfermiera' Nursing Journal, effective September 2009
21. Member on the editorial board for the Lebanese Journal of Nursing, since November 2010.
22. Member on the editorial board for the Journal of Transcultural Nursing, since November 2008.
23. Reviewer for the Journal of Cardiovascular Nursing, effective December 2010.
24. Reviewer for the International Journal of Nursing studies, effective August 2009
25. Reviewer for the Journal of Nursing Scholarship, effective April 2009
26. Reviewer for the European Journal of Cardiovascular Nursing, effective February 2009
27. Reviewer for the American Journal of Critical Care, effective November 2008.
28. Elected Council member, Order of Nurses in Lebanon, February 2003 till April 2007.
29. Chair, Scientific Committee, Order of Nurses in Lebanon, April 2004 till April 2007.
30. Member, Scientific committee, Third World Congress of Perinatal Medicine in Developing Countries, May 20-22, 2004, Beirut, Lebanon.
31. Member, Scientific Committee of the Federation of Nurses' Association in Lebanon, January 2001 till December 2002.

6. Memberships in International Organizations

- Member, Global Cardiovascular Nursing Leadership Forum since 2014.
- Member, Science Committee of the Cardiovascular Council for Nursing and Allied Professionals (CCNAP) of the European Society of Cardiology, November 2010-September 2016
- Member, American Heart Association, member #153102746, effective September 2007.
- Member, Working Group on Cardiovascular Nursing of the European Society of Cardiology (WG24) later changed to CCNAP, ESC member # 195197, since April 2005.
- Member, Midwest Nursing Research Society, April 1997 till present.
- Member, the American Association of Critical Care Nurses, February 1993 till present.
- Member, Sigma Theta Tau International, Honor Society, 1994 till now. Member number 021393.
- Graduate students' representative, Alumni Committee, University of Michigan, School of Nursing, 1999-2000.
- Doctoral students' representative, Curriculum Committee, School of Nursing, the University of Michigan, 1998-1999.
- Member, Advisory Committee for International Affairs, the University of Michigan, School of Nursing, 1997-1998.
- Treasurer, Doctoral Student Organization, University of Michigan, School of Nursing, 1997-1998.

AWARDS AND HONORS

- Distinguished Faculty Award by the Scientific Committee of Arab Nursing Faculties, December 2021.
- Inducted as international fellow in the American Academy of Nursing, October 17, 2015
- Elected President of the Nurses' Chapter, Worldwide Alumni Association of the American University of Beirut, January 2015; served for one term till 2018.
- Nominated for the American University of Beirut Award for Excellence in Teaching, December 2013 and 2014; Beirut, Lebanon.
- Biographical record included in the 30th Pearl Anniversary Edition of The Marquis Who's Who in the World, 2013, in recognition of outstanding achievements in own field of endeavor.
- Recognition for special contribution to nursing by the Order of Nurses in Lebanon, December 11, 2012 at the UNESCO palace, Beirut, on the occasion of the 10-year anniversary of the establishment of the Order.
- Inducted as international Fellow at the American Heart Association: November 15, 2011.
- Recognition for contribution to the Order of Nurses in Lebanon, May 15, 2009 in the Conference palace, Dbayeh, Beirut, Lebanon.
- Distinguished Nurse of the Year in Nursing Education; award granted by the Order of Nurses in Lebanon, May 12, 2008.
- Postdoctoral fellowship award by the Cardiovascular Nursing Councils of the European Society of Cardiology and the American Heart Association, May 12, 2008.

- Who's Who Among Students in American Universities and Colleges, the University of Michigan, 1999 - 2000.
- Barbour scholarship for Asian Women, Rackham School of Graduate studies, the University of Michigan, 1999-2000.
- Who's Who Among Students in American Universities & Colleges, The University of Michigan, School of Nursing, 1996 - 1997.
- Faculty Award, UCLA School of Nursing, June 19, 1994.
- Inducted into Sigma Theta Tau, Gamma Tau Chapter, April 16, 1994.
- Graduated with Distinction, October 1983, with Bachelor in the Science of Nursing.
- Placed on the Dean's Honor List at AUB school of nursing on:
  February 1981, June 1981, February 1982, February 1983, and June 1983.

PRACTICE LICENSURE

- License to practice nursing in Lebanon; license number 3985-87; active.
- License to practice nursing in U.S.A.; California RN license number 489077; inactive.
- License to practice nursing in U.S.A.; Michigan, license 4704210012; active.

PROFESSIONAL PRACTICE CERTIFICATES

- ACLS experienced provider, American Heart Association, December 2013.
- Training certificate in smoking cessation, American Lung Society, 2002.
- ACLS provider, American Heart Association, September 2006 till present. # 70-2920
- BLS provider, American Heart Association, June 2006 till present. # 70-2915.
- Critical Care Registered Nurse certificate (CCRN), the American Association of Critical Care Nurses, August, 1993 till 2004; license # 110086.
- CPR instructor, the American Heart Association, April 1993 till 1995.

Silva Dakessian Sailian

Personal Information

- **Home Address and Contact Info**: Dekwaneh, City Rama, Raai El- Saleh Street, Guibinian
  Building #112, 2nd floor. Beirut - Lebanon. Contact number: 01-488496, 03-864070
- **Email**: sd61@aub.edu.lb

- **Date of Birth:** 1/4/1974.
- **Present Family Status:** Married
- Dependents:

Family Name	First Name	Relationship	DOB	Nationality
Sailian	Lana	daughter	12/3/2007	Lebanese
Sailian	Laura	daughter	12/3/2007	Lebanese
Sailian	Carmen	daughter	22/6/2015	Lebanese

Education

Bachelor of Sciences in Nursing with distinction
American University of Beirut 1995
Master's in Public Health with distinction
American University of Beirut 2000
PhD candidate in Palliative Care
Lancaster University enrolled in 2017- expected date of graduation 2021-22

Languages

Excellent reading, writing and speaking skills in English, Arabic, Armenian

Academic Positions/ Clinical roles

Clinical Instructor *AUB-Hariri School of Nursing* Sept. 2014-present
Nursing Instructor *University of Balamand, Faculty of Health Sciences* 2008- Aug.2014
Consulting-Clinical-Nursing- *St.George-Hospital-University-Medical-Center(SGUMC)*- 2010
Registered Nurse (CCU) *AUBMC* 1995-1999
Professional Medical representative *Khayat-Kanaan Medical* 2000-2002
Professional Medical representative *Merck-Sharp & Dohme* 2002-2004
Pharmacy Administrator *Primary Health Care Center: Jinishian Memorial Program* 2004-2008
Clinical Preceptor *AUBMC* 2001-2002 & 2005-2006

Teaching Experience at University of Balamand & at American University of Beirut:

i). Undergraduate Courses

- NURS201 Introduction/ Fundamentals to Nursing Practice (Theory & Practicum)
- NURS300 Nursing Care of Adults & Older Adults I (Theory and Practicum)
- NURS302 Nursing Care of Adults & Older Adults II (Theory and Practicum)
- NURS400 Nursing Care of Adults in Critical Condition (Theory and Practicum)

- NURS307 Service Training/ Internship for Nurses (Practicum)
- NURS410 Leadership in Nursing Management (Theory and Practicum)
- Clinical Skills for medical students (Simulation Laboratory)

ii). **Continuing Education Courses delivered or courses completed**

- "Oncology Nursing" for Staff nurses at SGHUMC (5 day course) given twice per year for 3 years consecutively.
- "Acute Coronary Syndrome and Nursing Care" two lectures for SGHUMC staff nurses given yearly for 2 years.
- 3 sessions in the Nephrology course at UAE- Training and Development Center-Dubai (March 2016) on:
    - Conservative Management in End Stage Renal Disease (ESRD)
    - Palliative Care in ESRD
    - Prevention and Management of Acute Kidney Injury

- Participated in delivering "Essentials of Primary Care Nursing - Cardiovascular Nursing and Triage to UNRWA nurses.
- Attended 3rd Regional MENA: IDF Diabetes Workshop - May 2012
- Attended "Masters course in Palliative Care" AUB - May 2013
- Attended "Effective Learning and Teaching" at AUB (Feb 6-7/2015)
- Attended "Pressure Ulcer Workshop: with the AUBMC CPDC Department (March 16-2015)
- Attended "Heart Failure Workshop" at AUB by Mrs. Angela Massouh (April 2015)
- Completed "Recent Advances in Simulation" 5 day online course By Judith Lampton (June 2016)
- Completed Faculty Advancement Program course with the Clinical Research Institute at AUB (April 2017-July 5, 2017).
- Audited the SHARP program in summer of 2017 at AUB planned and executed by AUB.
- Completed Palliative care online course with The End-of-Life Nursing Education Consortium - ELNEC to be completed in Summer 2017.
- Completed an online Palliative Care Program in summer of 2018 prepared by Lancaster University. https://www.futurelearn.com/courses/palliative

Scientific/Professional Society Memberships/Professional Services

- Served as a member in the committee of "National Nursing Colloquium Examination" in 2013-2014.
- Current Member of the Order of Nurses in Lebanon
- Corresponding secretary and member of the AUB Alumni Nurses Chapter 2015-2019.
- Member of the Social Committee at AUB- HSON 2015-current
- Member of the Academic Curriculum Committee at AUB-HSON 2015-2017
- Member of Sigma Theta Tau International- Honor Society of Nursing- Chi Iota Chapter AUB
- Member of the MSN education task force 2018-2019.
- Served as on ground coordinator of graduating students in the HSON undergraduate graduation ceremony 2018.
- Participated in the 2nd International Nursing Conference held in Lebanon- Habtour Hotel, May 9-11, 2018
- Participated in Global Leadership Mentoring Program with Sigma Theta Thaw- The Circle started from March 2018- 2020.
- Participated in a Nursing campaign for Armenian Orthodox schools in BH. On January 2019, 21st form 10am -2pm, with collaboration of the Order of Nurses in Lebanon.
- Participated in a Workshop on Teaching Portfolio at AUB, June 18, 2019
- Participated in a Workshop on life design with GradEX on September 11, 2019 from 10 till 2:00pm
- Prepared a video on How to restart life at the workplace in times of COVID, that was broadcasted through AUB COVID studio in May 2020

Certifications

- Certified in the Advanced Cardiac Life Support- training course offered by LEAEM, the Emergency Medicine Courses at SGHUMC. (2011)
- Certified in Basics of Mechanical Ventilation delivered by LEAEM/ SGHUMC (2012).
- Certified in Advanced Trauma Course for Nurses- AUB (April 2016)
- Certificate of attendance at the Geriatric course at ELNEC – Relias Learning in 2017
- CITI Collaborative Institution for Training Initiative: Certification renewed on 17-11-2019.
- Certificate of Attendance on *Conducting Systematic Review* by Clinical Research Institute (CRI)- AUB, September 2018
- Certificate of Completion of Palliative care course "Palliative Care: Making it Work" by Lancaster University in July 2018.
- Certificate of Attendance at the 16th World Congress of the European Association for Palliative Care 23 – 25 May 2019, Berlin, Germany
- Certificate of Attendance on *Qualitative Research* by Clinical Research Institute (CRI)- AUB, April 2020

Honors and Awards:

- **Penrose award-** American University of Beirut , School of Nursing-1995 *Graduation Ceremony*
- **Dean's Honor List -** American University of Beirut. 1992-1995; 2000
- **Distinguished Research Award** from the Scientific Society of Arab Nursing Faculties Nov 16, 2018

CURRICULUM VITAE

Souha Fares
Assistant Professor
Rafic Hariri School of Nursing
American University of Beirut

Skilled in clinical research with a record of publications and presentations in international conferences, and an extensive experience in teaching statistics and offering statistical training for health care professionals. I am the lead researcher on studies on blood pressure variability/complexity (beat-to-beat) and the lead statistician on research related to cardiovascular disease, Covid-19, pharmacology, bariatric surgery, cancer, mental health, quality of life, vitamin D, nursing workforce and others. Well versed in clinical study designs (observational, RCTs, quasi-experimental, survey and other) and recently involved in pre-clinical research. Extensive experience in grant writing and submission, research design, sampling methods, sample size calculation, randomization, data collection process, statistical analyses and writing, discussing and disseminating the research results. Well experienced in organizing and delivering workshops on a wide range of statistical topics and use of statistical software. Successful team leader and collaborative team player, acting as key resource in statistics to colleagues and graduate students.

Education

I. Educational Background

- Case Western Reserve University, Cleveland, Ohio, USA.
  PhD in Statistics, May 2011.
  Dissertation titled: Cox-Ross-Rubinstein Option Pricing Model with Dependent Jump Sizes.
  GPA: 4.0/4.0

- Lebanese University with the collaboration of Universities of Rennes and Reims, France and L'Ecole Polytechnique Federale de Lausanne, Switzerland.
  Masters in Modeling and Simulation, September 2004.

- Lebanese University, Beirut, Lebanon.
  BS/Teaching diploma in Mathematics, September 2002.

II. Employment History

- September 2014-present: Assistant professor of biostatistics at the American University of Beirut.
- September 2013-August 2014: Lecturer of biostatistics at the American University of Beirut.
- September 2011-August 2013: Visiting assistant professor of biostatistics at the American University of Beirut.

III. Awards/Honors

- Graduate Dean's Instructional Excellence Award, Case Western Reserve University, 2011.
- Teaching Assistantship, Department of Statistics, Case Western Reserve University, 2007 – 2011.

IV. Research and/or Creative Work Outputs

A. Refereed Journal Publications

Blood pressure variability

C. Reports

The Initiative of Cardiovascular Service in the PHC Network of Lebanon. Published on the website of the Lebanese Ministry of Public Health. (2015). Team Leader: Walid Ammar, MD, PhD. Principal Investigator: Rouham Yamout, MD, MPH. Contributors (By alphabetical order): Salim Adib, MD, PhD; . Mohammad-Samir Arnaout, MD; Moubadda Assi, MPH; **Souha Fares, PhD;** Alia Freidi, ParmD, MPH; Ghassan Hamadeh, MD; Randa Hamadeh, MPH; Fatima El-Masry, MPH; Joe Noun, MPH; Ali Roumani, BE; Mohammad Sandid, MD; Abla Mehio Sibai, PhD.

D. Oral Presentations

- **Souha Fares** and Nuhad Dumit. Continuing nursing education of registered nurses and nurse managers: Perceptions, priorities and barriers. International Council of Nurses in Singapore, June 27 – July 1st, 2019.
- **Souha Fares** (Invited as keynote speaker). Abnormal blood pressure complexity and fluctuation: an indicator of vascular disease. Applied Statistics Day. Beirut Arab University, Lebanon, April 24, 2018.

- **Souha Fares,** Nuhad Dumit and Suzanne Dhaini. Development and psychometric assessment of a continuing education learning needs survey of nurses in Lebanon. Fine Europe Conference in Malta February 21st – February 23rd, 2018.

V. Grants

A. Grants Awarded

- Beat-to-beat Blood Pressure Variability Parameters in Young Healthy Adults: Using Linear and Non-linear Variability Parameters to Inform Early Clinical Diagnosis of Cardiovascular Disease. Principal Investigator. Funded by the University Research Board at the American University of Beirut (2021).

- ACEIs and ARBs during COVID-19 Pandemic: Friends or Foes? Co-Investigator. Funded by the National Council for Scientific Research (2020).

- Gender Differences in the Interplay between Type 1 Cardiorenal Syndrome and Metabolic Impairment: Underlying Mechanisms. Co-Investigator. Funded by the Medical Practice Plan at the American University of Beirut (2019).

- Patient and Caregiver Dyad Engagement in Heart Failure Self-Care. Co-Investigator Funded by the University Research Board (2019).

- Abnormal Blood Pressure Complexity and Fluctuation: An Indicator of Vascular Disease Independent of Mean Blood Pressure. Principal Investigator. Funded by the Medical Practice Plan at the American University of Beirut (2018).

- Assessing the Basic and Continuing Education Learning Needs of Nurses in Lebanon. Co-Principal Investigator. Supported by the Order of Nurses in Lebanon (2016).

- The organization of nursing work in Lebanese hospitals: What do nurses do and how do models of care affect fatigue. Co-Investigator. Funded by the University Research Board at the American University of Beirut (2016).

- Exploring continuing education learning needs of nurse managers in Lebanon. Co-Principal Investigator. Funded by the University Research Board at the American University of Beirut and supported by the Order of Nurses in Lebanon (2016).

B. Grants Submitted and Currently under Review

- Impact of inhibitors of Angiotensin II axis and NAD metabolic booster on inflammatory profile of peripheral blood mononuclear cells from COVID-19 patients with heart failure. Submitted to the French National Research Agency (ANR) and the National Council for Scientific Research.

C. Grants Submitted and not Awarded

- Blood Pressure Variability as a Potential Predictor of Severe Cardiovascular and Respiratory Involvement in COVID-19 Patients. Principal Investigator. Submitted to the National Council for Scientific Research. (2020).
- Beat-to-Beat Blood Pressure Variability and Podocyturia in Young Adults: The Framework for a Computational Model for Detection of Early Vascular Aging. Principal Investigator. Submitted to the Johnson&Johnson WiSTEM2D Scholars Award Program. (2020).
- Lebanese families' functioning during COVID-19 pandemic. Co-Investigator. Submitted to the Qatar Foundation. (2020).
- Empowering Families to Cope: A Community-Based, Multi-Family Intervention to Promote Wellbeing. Co-Investigator. Submitted to International Medical Corp. (2019).

VI. Teaching

A. Courses Taught

TEACHING

a. Graduate Courses

Faculty of Medicine, American University of Beirut

Scholars in Health and Research (SHARP): I am part of the Basic Biostatistics component of the sharp summer program. It is an introduction to basic statistical techniques applied to health sciences and related fields. The objectives are twofold: descriptive statistics, which encompass techniques for organizing and summarizing data, and inferential statistics from estimation, to confidence interval, and testing of hypothesis. Summer 2015-Present.

Medical Statistics: An introductory course for Medicine I students to the study of statistics applied to medicine. Topics include introduction to design in medical research, methods for describing and summarizing data, introduction to probability, screening tests, statistical inference for means and proportions both parametric and non-parametric and simple linear and logistic regression. Spring 2011-2012, coordinator.

Hariri School of Nursing, American University of Beirut

Applied Multivariate Statistics and Longitudinal Methods: Data are often complicated by high dimensionality and inter-observation correlations. This course aims at providing a solid grounding in the analysis of multivariate data, repeated measure data and correlated data. Specifically, students will learn to (1) distinguish between univariate and multivariate outcomes, (2) group comparison for multivariate outcomes using One- Way and Two -Way MANOVA, (3) multivariate analysis using General Linear Model, (4) analysis of longitudinal data and (5) analysis of correlated clustered data. Spring 2021-Present, coordinator.

Bivariate Analysis and Linear Regression: This class introduces PhD students to the statistical techniques commonly used in nursing and health sciences. It covers descriptive statistics, inferential statistics (both parametric and non-parametric) followed by regression methods (linear and logistic) and diagnostics with a focus on linear regression. The statistical software used SPSS. Spring 2018-Present, coordinator.

*Biostatistics for Nursing Research***:** This class introduces Masters students to the basic concepts and applications of statistics for Nursing research and how to carry these applications using SPSS. Topics include types of data, data management, descriptive statistics, and inferential statistics with a main focus on t tests, ANOVA, chi-squared tests, Fisher's exact test and the assumptions underlying those tests. Simple and multiple linear regression will also be covered. Spring 2015-Present, coordinator.

Advanced Nursing Research: This course is offered to masters nursing students. It focuses on complex research designs and analysis of multiple variables. Emphasis will be placed on research designs, sample selection technique and data collection methods. Reliability and validity of research instruments will also be covered. Students will critically evaluate research articles Utilization of research findings to promote evidence-based practice will be emphasized. Spring 2014-2018, Coordinator/Co-coordinator.

Biostatistics for Health care Professionals Made Easy Using SPSS: A condensed course offered to health care professionals on the basic concepts and applications of statistics in the health care field, and how to carry these applications using SPSS. Topics include types of data, data management, descriptive statistics, and inferential statistics with a main focus on t tests, ANOVA, chi-squared tests, Fisher's exact test and the assumptions underlying those tests. January 2014, coordinator.

Exploratory and confirmatory Factor Analysis: A session offered to PhD nursing students on the construct validity of research instruments using exploratory and confirmatory factor analyses. Spring 2019-Present.

Power and Sample Size Calculation: a session offered to Nursing PhD students on the power and sample size calculation. Examples included sample size calculations for one and two means and one and two proportions. Spring 2019-Present.

Faculty of Health Sciences, American University of Beirut

Analysis of Continuous Data: This class is designed for Public Health masters' students who intend to use Regression Analysis to address their research questions. It covers basic exploratory data analysis for univariate (outcome) continuous observations with single or multiple covariates, followed by regression methods and diagnostics with a main focus on multiple regression. Applications of the statistical techniques are carried out using the statistical package STATA. Spring 2011-2013, coordinator.

Practical Non-Parametric Data Analysis: Non-Parametric tests are often used in place of their parametric counterparts when certain assumptions about the underlying population are questionable. This course introduces Public Health masters' students to the students to the theory and applications of nonparametric statistics. Methods will include estimation and testing of hypotheses for the one sample location problem, two sample location problem, multi-sample location problem, correlation, regression and tests for proportions. Summer 2011-2013, coordinator.

b. Undergraduate Courses

Hariri School of Nursing, American University of Beirut

Introduction to Nursing Research: This course is writing intensive and includes a basic introduction to quantitative and qualitative research methods and research proposal writing as they are used in nursing research and practice. Fall 2013-2017, coordinator/co-coordinator.

Biostatistics for Nurses: This course is designed to introduce the BSN students to the concepts and applications of statistics in the nursing field. The course starts with a general overview of probability, types of data and ways to summarize and present them. The course then introduces the concept of hypothesis testing with a main focus on t tests, ANOVA, chi-squared tests, Fisher's exact test and the assumptions underlying those tests. Summer 2013-2015 and Spring 2015-Present, coordinator.

Faculty of Health Sciences, American University of Beirut

Introduction to the Principles of Epidemiology and Biostatistics: This is an introductory course offered to undergraduates covering the basic principles of Epidemiology and Biostatistics. This course introduces students to the types and sources of epidemiological data, common measures of morbidity and mortality, the design and analysis of various epidemiological study designs, and the main biases and issues that threaten data validity. The course also covers exploratory data analysis, and introduces students to statistical techniques commonly used in the analysis of epidemiological data. Fall 2013, co-coordinator.

Case Western Reserve University, The United States of America

Basic Statistics for Scientists and Engineers: For advanced undergraduate students in engineering, physical sciences, life sciences. Comprehensive introduction to probability models and statistical methods of analyzing data with the object of formulating statistical models and choosing appropriate methods for inference from experimental and observational data and for testing the model's validity. Balanced approach with equal emphasis on probability, fundamental concepts of statistics, point and interval estimation, hypothesis testing, analysis of variance, design of experiments, and regression modeling. Spring 2008-2009, Fall 2008-2009, Spring 2009-2010, Fall 2009-2010, coordinator.

*Basic Statistics for Social and Life Sciences***:** Designed for undergraduates in the social sciences and life sciences who need to use statistical techniques in their fields. Descriptive statistics, probability models, sampling distributions. Point and confidence interval estimation, hypothesis testing. Elementary regression and analysis of variance. Summer 2009-2010, coordinator.

B. Student Supervision and Advising

B1. PhD's Theses Supervised

2021: Member of dissertation committee, Hariri School of Nursing, for Ms. Rima Saad, titled: Primary Caregivers' Knowledge, Attitudes and Beliefs toward Palliative Care for Children with Cancer. Current.

2021: Member of dissertation committee, Hariri School of Nursing, for Ms. Rachele Bejjnai, titled: Parkinson's Disease Patient and Caregiver Quality of Life: A Dyadic Analysis. Current.

B2. Master's Students

B2.1 – Theses Supervised

2021: Member of thesis committee, Hariri School of Nursing, for Mr. Hratch Moskofian, titled: The Feasibility of Implementing a Tailored Delirium Prevention Bundle for the Intensive Care Unit (ICU) from the Registered Nurses' perspective. Current.

2021: Member of thesis committee, Hariri School of Nursing, for Ms. Fatima Dirani, titled: The Role of Resilience in Mediating the Relationship between Dispositional Mindfulness and Depression in Nursing and Medical Students. Current.

2021: Member of thesis committee, Hariri School of Nursing, for Mr Mahdy Braytee, titled: Perspectives of Critical Care Registered Nurses on Refugee Healthcare in Lebanon: Work-environment Factors in Relation to Emotional Exhaustion and Quality of Patient Care. Current.

2020: Member of thesis committee, Hariri School of Nursing, for Ms. Joelle Massouh, titled: Association of Resilience with Depression, Anxiety, and Quality of Life in Multiple Sclerosis Patients. Successfully defended in July 2020.

2020: Member of thesis committee, Hariri School of Nursing, for Ms. Roula Chehade, titled: Brownout in a sample of Lebanese registered nurses. Successfully defended in February 2020.

2020: Member of thesis committee, Hariri School of Nursing, for Mr. Mohammad Taha, titled: Symptom Clusters' Severity and Effects on Quality of Life of Hospitalized Oncology Older Adults in Lebanon. Successfully defended in February 2020.

2020: Member of thesis committee, Hariri School of Nursing, for Ms. Yvonne Jleilaty, titled: Knowledge and self-management of patients with chronic kidney disease. Successfully defended in February 2020.

2019: Member of thesis committee, Hariri School of Nursing, for Ms. Melissa Makhoul, titled: The relationship between pain catastrophizing and pain-related outcomes in patients with Rheumatoid Arthritis: A secondary analysis of research data. Successfully defended in May 2019.

2019: Member of thesis committee, Hariri School of Nursing, for Ms. Zepur Aharonian, titled: Prevalence and Relationship of Work-Related Musculoskeletal Disorders, Work-Related Fatigue, and Work organization among Lebanese Nurses. Successfully defended in May 2019.

Member of thesis committee, Faculty of Medicine, for Ms. Nour Bakkar

2019: (Pharmacology) titled: Cardiac Autonomic Neuropathy and Cardiovascular Dysfunction in Type 2 Diabetes: Modulation by Anti-Diabetic Drugs. Successfully defended in January 2019.

2018: Member of thesis committee, Faculty of Health Sciences, for Ms. Mary Abdel Ahad, titled Factors associated with people's willingness to pay for better solid waste management services in Lebanese rural areas: the case of Jdeidet Ghazir. Successfully defended in December 2018.

2016: Member of thesis committee, Faculty of Health Sciences, for Ms. Patil Mardigian, titled: Factors associated with farmers' willingness to engage in safer pesticide use in coastal farms in Lebanon. Successfully defended in November 2016.

2013: Chair of thesis committee, Faculty of Health Sciences, for Mr. Karim Firikh titled: The impact of psychological maltreatment and social support on self-perceived health in a large nationally representative sample of elderly men and women above 60 years old in Lebanon. Successfully defended in December 2013.

2013: Member of thesis committee, Faculty of Health Sciences, for Ms. Blanche Ghandour. Titled: Organizational factors affecting worker-related injuries in private hospitals in Lebanon. Successfully defended in September 2013.

2013: Member of thesis committee, Faculty of Health Sciences, for Mr. Mohamad Iskandarani, titled: Association of smoking with hospitalization in a large nationally representative sample of the Lebanese adult population. Successfully defended in January 2013.

2012: Co-advisor of thesis committee, Faculty of Health Sciences for Mr. Fathi Hezam, titled: Determinants of malaria seeking behavior in the endemic areas in Yemen. Successfully defended in June 2012.

B2.2 Projects Supervised

2017: Second reader of MSN project, Hariri School of Nursing for Ms. Fatima Chreif, titled: Barriers of continuing Education for Nurses in Lebanon. Successfully defended in Spring 2017.

2016: Second reader of MSN project, Hariri School of Nursing for Ms. Hasmig Tchaparian, titled Fatigue and Burnout in a sample of Lebanese Bedside Nurses. Successfully defended in Spring 2016.

2015: Second reader of MSN project, Hariri School of Nursing for Ms. Nora Kakati, titled: Collaborative Perception: Physician-Nurse Communication and Stress in an Acute Hospital. Successfully defended in Spring 2015.

2014: Second reader of MSN project, Hariri School of Nursing for Ms. Fatme Dirani, titled: Factors Associated with Low Influenza Vaccination Rate among AUBMC Registered Nurses. Successfully defended in Spring 2014.

2013: Supervisor of MPH culminating experience for Mr. Rami Ofeich, titled: Influence of mental disorders on smoking behavior in the Lebanese population. Successfully defended in Spring 2013.

2013: Supervisor of MPH research project for Mr. Rami Ofeich, titled: Use of Antibiotics without Medical Prescription in 5 to 10-Year-Old Children. Successfully defended in Spring 2013.

2013: Supervisor of MPH research project for Ms. Noura El Salibi and Ms. Pamela Mrad, titled: Lay public's perception and understanding of dementia in Lebanon. Successfully defended in Spring 2013.

2013: Supervisor of Medicine I SPM project for a group of 9 students, titled: The Impact of the Influx of Displaced Syrians into Densely Populated Areas in Sidon, Lebanon, on the Quality of Provided Healthcare to the Lebanese Population Living in Their Proximity. Successfully defended in Spring 2012-2013.

2013: Supervisor of MPH research project by Ms. Maria Saade, titled: Dominance of Specific Facial Components in Predicting Class II Treatment Outcome. Successfully defended in Fall 2012.

B3. Other Teaching Activities

- Advising students for their curriculum plans.
- In addition to serving as a member of students' projects/theses committees, I provide statistical advice and guidance, specifically in design and analysis to all graduate students working on quantitative studies.

C. Educational Innovations and Academic Contributions

- Developed and taught as a coordinator and sole instructor the following courses:
    - NURS627: Applied Multivariate Statistics and Longitudinal Methods
    - NURS605: Bivariate Analysis and Linear Regression
    - NURS530: Statistical Reasoning and Application for Nursing Research

VII. Service

A. University/Faculty/Department Service

- Member, HSON Graduate Studies Committee, September 2019 – present.
- HSON representative on the AI, Computational and Data Sciences committee (Facilitator of the sub-group working on the Bio-statistics-epidemiology/bio-medical/bio-informatics component), 2020
- Chair, HSON Research Committee, September 2015-2019.
- Member, HSON Research Committee, September 2013-2015.
- Member, HSON Graduate Assessment Committee, 2018-present.
- Member, taskforce working on the PhD in Nursing Science, 2016-2017
- Member, taskforce working on the joint PhD program between FM-HSON- FHS, 2016.
- HSON representative at the Faculty of Medicine Research Committee, September 2017- 2019.
- Member of the special review panel for proposals submitted in response to the Farouk Jabre Biomedical Research Grants, 2017-2019.
- HSON representative on the Library Committee, 2018-2021.
- HSON representative on the Institutional Assessment Committee, 2018-2020.
- HSON representative on the OIP Advisory Board, 2016-present.
- HSON representative on the Quantitative taskforce of the Core curriculum taskforces, 2018-2021.
- Jury for the 6th Annual AUB Biomedical Research Day, 2016.
- Member, committee to select the recipient of the Penrose Award, 2012-2013.
- Member, Teaching Public Health in the Faculty of Medicine, 2012-2013.
- Jury member, culminating experience poster presentation sessions, FHS, 2012.
- Member of the search committee for a Faculty Position in Biostatistics at the Department of Nutrition and Food Sciences, 2015.

- Statistician, AUB Composite Score Sub-Committee to revisit the method for admission of sophomores and freshmen to AUB, 2013.

B. Professional Service

- Consultant to develop undergraduate research syllabus for the BS in Nursing program at the American University in Armenia (2021).
- Consultant to revise undergraduate research and biostatistics syllabi for the Mohammad Al Mana' College for Health Sciences (MACHS) in Saudi Arabia (2017).
- Trainer, two-day workshop for health care professionals organized by the Modern University for Science and Technology. Title: *Data Management and Statistical Analysis using SPSS.* (2018).
- Invited to give a session for the Clinical and Professional Development Center at the American University of Beirut Medical center (CPDC). Title: Data Analysis Methods for Nursing Research. (2017).
- Statistical Consultant on a national study organized by Smart Kids with Individual Learning Differences (SKILD). Title: *Prevalence and types of special education needs in public elementary schools in Lebanon*. (2014).
- Trainer, two-day workshop for oncologists organized by Pierre Fabre medicament. Title*: Introduction to statistics for cancer research using SPSS.* (2013).
- Invited to give grand rounds in the Research Education Sessions organized by the Clinical Research Institute at the American University of Beirut/AUBMC, Title: Descriptive data analysis and Inferential data analysis (2012-2015).
- Editorial Board
    - 2019- The Journal of Cardiovascular Pharmacology.
    - 2018 - Biostatistics and Epidemiology International Journal.

C. Public and Community Service

- Consultant on the Capacity building for nursing services directors in Lebanon done by the International Council of Nurses leadership for change academy, with the Order of Nurses in Lebanon.

- Statistical consultant for the Order of Nurses in Lebanon Title: *Nurses' and Nurse managers' salaries in relation to work-related and socio-demographic characteristics*. Data from two national studies.

VOLUNTEER EXPERIENCE

Course Workshop Coordinator, Clinical Instruction
National Organizations and Non-Governmental organizations

Example:

Helping Babies Survive (HBS) is an initiative of the American Academy of Pediatrics (AAP)**,** developed in collaboration with WHO, and supported by the US Agency for International Development (USAID), Save the Children, Latter-day Saint Charities, Laerdal Global Health, Johnson & Johnson, and a number of other global health partners. HBS is a suite of evidence-based, hands-on training programs developed by the AAP to reduce neonatal mortality in resource-limited environments.

HBS consists of the following programs:

Helping Babies Breathe (HBB)

HBB teaches the initial steps of neonatal resuscitation to be accomplished within The Golden Minute to save lives and give a much better start to many babies who struggle to breathe at birth.

Essential Care for Every Baby (ECEB)

ECEB teaches health care providers essential newborn care practices to keep all babies healthy from the time of birth to discharge from the facility.

Essential Care for Small Babies (ECSB)

ECSB builds on the skills taught in ECEB, guiding providers on the specialized care small and preterm babies need.

Tasks/Achievements

Content Expert, Master Trainer

AMERICAN UNIVERSITY OF BEIRUT
HARIRI SCHOOL OF NURSING

Faculty Retreat October 11, 12, 2019
Summary Report

The retreat took place at Ain Kassis in Dhour Choueir. See attached schedule.

Friday October 11, 2019

Dean Farhood started the retreat by addressing the faculty regarding the purpose and plan for the 2 days. This was followed by a group activity whereby the faculty were divided into 3 groups that discussed concerns related to 3 main areas and provided recommendations for improvement:

Collegiality and Team Work, moderated by Mrs. Mary Arevian & Dr. Houry Puzantian

1. Group 1 Moderated by Samar Noureddine: Partisanship: The group addressed segregation that is felt among faculty members, such as clinical versus research faculty, faculty trained in Europe/Canada versus those trained in the US; Graduate teaching faculty versus undergraduate teaching faculty; senior versus junior faculty; and staff versus faculty. Some expressed a generation gap and others a sense of discrimination, all of which is creating tension, a negative atmosphere and suboptimal collaboration. Others raised concern over faculty members not differentiating professional disagreements from personal relationships, and the sense of hierarchical ranking and marginalization of junior and some senior faculty members that is coming in the way of collegiality. Recommendations to address this issue were:
    a. Improve communication between faculty members by showing respect, active listening and accepting differences
    b. Providing opportunities for growth to early career faculty members
    c. Involving early career faculty in change and accepting their new ideas
    d. Engaging faculty members at all levels in research to promote collaboration
    e. Stop using titles such as Dr. when addressing each other in meetings except in front of students
    f. Improve the mentorship and allow faculty members to choose their mentor. Make sure new faculty members are better oriented to their role as faculty member at all levels.
    g. Revisit the current division structure in the school (undergraduate and graduate) and replace with specialty divisions, such as health system and clinical/translational
2. Group 2 Moderated by Hala Darwish and Ghada Assaf: Communication and trust: This group discussed issues related to communication during meetings and

email communication and how trust among faculty members is affecting and being affected by those. The main points raised were:

Email Communication: The following suggestions were made:

- Respect needs to be reflected
- Formal tone is recommended
- Clear and concise style and it is preferable to make it simple and short
- Avoiding abuse and keeping it for work purposes especially when replying to all.
- Whenever we have an announcement, it is preferred to reply to the person, in person or by email.
- When reading an email, we read and comprehend based on how we feel at the moment, based on assumption, based on perception. To avoid conflict, not responding or reacting immediately, allow some time to pass the respond or clarify with the sender in person. In certain situations, we may escalate to a higher rank.
- When email requests are made by the administration (the Dean or conveners) faculty are expected to reply as per the deadline posted, which ought to be 2 weeks, unless it is an emergency.

Communication during Meetings: The following points were made:

- Respect again ought to be displayed
- Active listening ought to be the norm
- Avoid nonverbal communication or clues that may offend others
- Meetings are not a battlefield. It is a place to address work related agenda.
- The chairperson of the meeting has a responsibility in keeping a focused conversation and abiding by the timeframe.
- Sticking to the point of discussion, respecting others and giving constructive feedback
- When facing a negative comment, it helps to take a deep breath and control our responses.
- Discussing topics one to one prior or after the meetings facilitates the discussions.

Communication in Hallways: Dos and Don't:

- Only non-work-related conversations can take place in the hallways or the elevator or the faculty lounge. All other work-related conversations are to held inside closed doors.

Trust: Trust can be promoted by:

- Respect
- Actions and behaviors that promote trust
- The pattern of our behavior is what promotes trust or mistrust
- Transparency
- Sorting certain issues on one to one basis

3. Group 3 moderated by Marina Adra and May Khoury: Teaching assignments and workload: The group discussed how the decisions about teaching assignments are made, how one chooses what to teach, one's expertise versus what he/she perceives to be able to do. The following recommendations were made:
    a. There needs to be room for growth and a trajectory for moving from course to course
    b. Provide consistency in teaching assignment in order to allow more time for research
    c. Avoiding undergraduate faculty stagnation from giving the same exact courses and provision of opportunities to teach in the graduate program
    d. Rotation between courses within a track ought to be based on expertise
    e. Clarification of when can a faculty member teach in the graduate program.
    f. Plan the teaching assignment ahead of time in agreement with the faculty member and share it early in due time
    g. Undergraduate clinical coordinators ought to be involved in the clinical units.
    h. Preceptors are often used to help in clinical teaching. Ensure adequate preparation and monitoring of preceptors.

Clinical Instruction, Clinical Evaluation of Students, & Safe Practice

Clinical Instruction (moderated by Lina Kantar)

1. Hire master prepared clinical preceptors and initiate joint appointments with AUB-MC.
2. Further develop the role of the clinical coordinator in terms of mentoring preceptors and weak students.
3. Establish teaching assistants/fellowship with PhD students.
4. Make use of simulation hours to teach clinical skills and track student development of these skills.
5. Not to hire master students as clinical preceptors.

Clinical Evaluation (moderated by Lina Younan)

1. Ensure consistency of student exposure to a clinical unit, mainly when developing the course's clinical rotation; the exposure has to take place over a number of weeks, to ensure valid evaluation.
2. Maintain the already existing learning contracts with needy students.
3. Revisit clinical appraisal tool to include attitudes, behaviors, and ethical features of students, as this may have an impact on faculty decision for student graduation readiness.
4. Have a pool of prepared preceptors to garner effectiveness of evaluation.
5. Ensure more involvement of clinical coordinators in the evaluation process of students.
6. Develop a preceptor education program to secure better preparation of preceptors.

Safe Practice (moderated by Nour Alayan)

1. Have competent preceptors who can be role models for students.
2. Foster systematic thinking during case discussions with students in clinical settings.
3. Consistently deliver instructions to students on safety.
4. Train students on therapeutic communication with patients
5. Offer stress management sessions to reduce student anxiety in the clinical settings.
6. Report incidents of bad practice (shortcuts) of nurses to the dean.

Advising, Follow Up, and Documentation

This session was moderated by Drs. Dumit and Massouh. Issues concerning advising, documentation of student's progress and follow up were discussed. Then faculty members proposed related solutions. The following are issues followed by proposed solutions:

What are the issues faculty face in **advising**?

- Graduate and undergraduate students do not come for advising.
- Faculty are not available when students come to advising [potential causes are when advising overlaps with clinical days].
- Students do not listen to instructions given by advisors.
- Students seek advice from peers and registrar.
- Students complain that nursing curricula are not flexible.
- Advising can pose the risk of **too much control** and might **shift the focus of responsibility to the advisor rather than student.**

What are possible solutions for issues in **advising**?

- Stress importance of advising during orientation.
- Stress the fact that advising is not solely for academic issue but rather for student enculturation at AUB.
- Faculty should be present during student orientation (Fall and Spring) and should make sue to be present during academic advising.
- Academic advisors are asked to document in student files when students do not come for advising.
- Academic advisors are asked to document in student files when serious academic challenges are discussed with students.
- Academic advisors are asked to balance between exerting too much control over advises.
- One future suggestion: creation of a system for advising where students cannot register nursing courses before advising.

What are the issues faculty face in **documentation and following up on weak students**?

- Faculty members requested that academic files be electronic.

- All student evaluations, letters of probation be put in the academic files immediately after academic evaluation.
- Academic advisors and the student officer are responsible to ensure no document is missing from student academic files.
- Academic advisors are asked to document student encounters in the academic files by time and themes to ensure proper documentation. A standardized system will be shared with academic advisors soon.

What are possible solutions for issues in **documentation and following up on weak students**?

- Involve graduate and undergraduate convener as applicable.
- Standardize the process of documentation and follow up on weak students.

Promotion concerns

Dr. Noureddine gave an overview of the promotion criteria for both the tenure track and the clinical track. The faculty members raised a number of concerns and clarifications made regarding the differences between the 2 tracks, whereby faculty members are evaluated on research, teaching and service in both tracks, the weight and expectations of research are much heavier and higher in the tenure track, whereas teaching and service are weighed more heavily in the clinical track. Research in the clinical track may include quality improvement projects, development and implementation of clinical protocols and evidence based management projects. The following recommendations ensued:

a. Provide faculty members with the choice of which track to join upon securing their PhD and applying to the professorial rank, following a very clear articulation of the expectations for promotion within each track
b. Provide graduate assistants who are trained to help early career faculty with teaching and research
c. Manage the time and teaching assignments for faculty who are candidates for promotion, so they can use their time efficiently and effectively to meet the promotion criteria.
d. Promote the formation of research groups that include tenure track and clinical faculty to increase research productivity as clinicians may bring research ideas and researchers would then plan studies to address them.
e. Increase funding opportunities for faculty development, such as covering travel for attending conferences and research meetings.
f. Faculty members must consult their division convener regularly regarding their plans and discuss their progress towards promotion not just at the yearly appraisal meeting.

Strengthening the culture of ethics at HSON for faculty & students

This session was moderated by Drs. Gladys Honein & Suzanne Dhaini, the following ethical challenges were discussed and proposed solutions were recommended:

Ethical Challenges at HSON

- Vandalism
- Cheating in exams
- Social inappropriate behaviors on the premises

Proposed Etiology

- Students reflect the current society
- Faculty members have become lenient over time

Proposed Solutions:

- Design workshops on ethics
- Faculty members need to be firm, strict, & consistent
- Student involved in cheating should be on 1 yr suspension
- There is a need to have an agreement among all faculty members on measures taken against cheating and plagiarism
- Faculty members should include grades on ethical behavior
- Class representatives should attend workshops plagiarism
- Start a campaign on ethics-allocate half a day (or so) on ethic-related activities (ex: paper rally)
- Empower and protect students to be whistle-blower
- Emphasize ethical concerns in our courses
- Assignment of guided-reflective writing: ethical, professional, legal, quality of care
- Learn from opportunities- ex: Role modeling (preceptor/instructor interacting professionally with patients)
- Find a mechanism to communicate ethical issues between HSON and service (AUBMC) in order to improve quality of care
- Report to the Dean of HSON ethical issues witnessed in the hospital
- A majority agreement on NO use of cell phones by students during classes. Very few faculty members objected under the umbrella of freedom.
- Interprofessional collaboration and contribution: faculty researchers should communicate contribution and authorship during early phases of the study
- Contribution and role of Thesis members should be openly discussed early
- Acknowledge name of colleagues who prepared syllabus &/or ppt slides.
- Register protocols with OGC to protect ownership of data and ideas

Saturday October 12, 2019

Research Collaboration: where are we heading

Moderators: Drs. Hala Darwish & Souha Fares

Dr. Darwish gave an overview of the flow of thinking. The activity was divided into 3 parts:

1. Assessment of the current research status of the HSON

2. Thinking for the coming 3 years, “Dream State”, what needs to be done to shift the current status to prepare the grounds for Implementation
3. Immediate action to initiate the shift

Under the Current Assessment, the following was mentioned:

- Lack of research collaborations: internal and external
- The bio-behavioral group is larger than the rest of the groups hence leading to imbalance
- The IRB process is challenging
- The chair of research and center of nursing research are still vacant and not launched
- More intramural funding opportunities than extramural
- Need for more statistical support
- Lack of visibility
- Little RCTs
- Little specialized courses in research
- No faculty development activities in research
- Workload imbalance
- Lack of infrastructure
- Little senior and research expertise
- Scarcity of funds
- Minimal internal consultations
- No research identity
- Fragmented research
- No research culture with little engagement from the students
- Seed grant is tiny

Thinking for the coming 3 years, “Dream State”, what needs to be done to shift the status to prepare the grounds for implementation?

- Launching the Nursing Research center
- Webinars with external expertise
- Research Roundtables and seminars
- More teamwork and collaboration
- Statistical Support
- Involving Students in research activities
- Securing more funds
- Balancing workload to facilitate the promotion
- Creating a regional research identity
- Influence the practice: translational research, generate the evidence for practice
- More research specialized courses
- Faculty development funds
- Space
- More RCTs
- Visibility: website and social media

Immediate action:

1. RC will plan webinars and research roundtables
2. RC will organize a research day and conference
3. RC will revisit the website and social media dissemination of research findings
4. Research seminars geared toward faculty development
5. Collect research ideas and needs from the faculty to be addressed by the RC
6. Involve the students in research: URVP, consider an honors program,
7. Identify funds for collaborative research teams
8. The administration will work on workload balance for possible dedicated time for research
9. The administration will revisit the idea of the research center

Mental Health issues by Dr. Laila Farhood: An overview of common mental health problems among students and how to detect them

Faculty Wellness

Moderators: Drs. Dina Madi & Houry Puzantian

- Create a wellness committee (led by Dr. Nour Alayan)
- Integrate activities with the wellness center at AUB (yoga, Botanics group, university for seniors)
- Social outings more regularly
- Nursing relations/greetings
- Better communication needed in-person vs. emails
- Flowers in offices
- A small gym at HSON, e.g., treadmill
- Healthy snacks in the vending machine
- Utilize the rooftop if possible
- Aroma in elevator
- Music
- Add color to the school walls
- Remove the painting from the lounge
- Promoting exercise for faculty and students

Stress Management by Dr. Laila Farhood: A session about measures to reduce stress among students and faculty.

The retreat was wrapped by a presentation by Samar Noureddine, Nuhad Dumit and Hala Darwish of a summary of the recommendations made.
